MEDICAL PRACTICE IN ILLINOIS.

THE ILLINOIS MEDICAL PRACTICE ACT.

AN ACT to Regulate the Practice of Medicine in the State of Illinois. Approved June 16, 1887. In force July 1, 1887.

5. QUALIFICATIONS FOR PRACTICE—DIPLOMA—EXAMINATION—CERTIFICATE OF STATE BOARD OF HEALTH.] SECTION 1. *Be it enacted by the People of the State of Illinois, represented in the General Assembly:* That no person shall practice medicine in any of its departments in this State unless such person possesses the qualifications required by this act.

If a graduate in medicine, he must present his diploma to the State Board of Health for verification as to its genuineness. If the diploma is found genuine, and from a legally-chartered medical institution in good standing, and if the person named therein be the person claiming and presenting the same, the State Board of Health shall issue a certificate to that effect signed by all the members thereof, and such certificate shall be conclusive as to the right of the lawful holder of the same to practice medicine in this State.

If not a graduate, the person practicing medicine in this State shall present himself before said Board and submit himself to such examination as the Board may require, and if the examination be satisfactory to the Board, the said Board shall issue its certificate in accordance with the facts, and the lawful holder of such certificate shall be entitled to all the rights and privileges herein mentioned.

6. STATE BOARD OF HEALTH—ORGANIZATION, ETC.—CERTIFICATES.] § 2. The State Board of Health shall organize within three months after the passage of this act; it shall procure a seal, and shall receive, through its Secretary, applications for certificates and examinations; the President and Secretary shall have the authority to administer oaths, and the Board to take testimony in all matters relating to its duties; it shall issue certificates to all who furnish satisfactory proof of having received diplomas or licenses from legally-chartered medical institutions in good standing as may be determined by the Board; it shall prepare three forms of certificates, one for persons in possession of such diplomas or licenses, the second for candidates examined and favorably passed on by the Board, and a third for persons to whom certificates may be issued as hereinafter provided in section 12 of this act; it shall furnish to the county clerks of the several counties a list of all persons receiving certificates. In selecting places to hold its meetings, it shall, as far as it is reasonable, accommodate applicants residing in different sections of the State, and due notice shall be published of all its meetings for examination.

Certificates shall be signed by all the members of the Board, and the Secretary of the Board shall receive from the applicant a fee of five (5) dollars for each certificate issued to such graduate or licentiate. Graduates or licentiates in midwifery to pay the sum of two (2) dollars for each certificate. All such fees for certificates shall be paid by the Secretary into the treasury of the Board.

7. VERIFICATION OF DIPLOMA—AFFIDAVIT.] § 3. The verification of the diploma shall consist in the affidavit of the holder and applicant that he is the lawful possessor of the same, and that he is the person therein named. Such affidavit may be taken before any person authorized to administer oaths.

and the same shall be attested under the hand and seal of such officer, if he have a seal; and any person swearing falsely shall be deemed guilty of perjury, and punished accordingly.

Graduates may present their diplomas and affidavits, as provided in this act, by letter or by proxy, and the State Board of Health shall issue its certificate the same as though the owner was present.

8. EXAMINATIONS BY BOARD.] § 4. All examinations of persons not graduates or licentiates, shall be made directly by the Board, and the certificates given by the Board shall authorize the possessor to practice medicine and surgery in the State of Illinois.

9. CERTIFICATE TO BE RECORDED.] § 5. Every person holding a certificate from the State Board of Health shall have it recorded in the office of the clerk of the county in which he resides within three months from its date, and the date of recording shall be endorsed thereon. Until such certificate is recorded as herein provided, the holder thereof shall not exercise any of the rights or privileges conferred therein to practice medicine.

Any person removing to another county to practice, shall record the certificate in like manner in the county to which he removes, and the holder of the certificate shall pay to the county clerk the usual fee for making the record.

10. BOOK TO BE KEPT.] § 6. The county clerk shall keep, in a book provided for the purpose, a complete list of the certificates recorded by him, with the date of the issue of the certificate. If the certificate be based on a diploma or license, he shall record the name of the medical institution conferring it, and the date when conferred. The register of the county clerk shall be open to public inspection during business hours.

11. FEES FOR EXAMINATIONS.] § 7. The fees for the examination of non-graduates shall be as follows: Twenty (20) dollars for an examination in medicine and surgery; ten (10) dollars for an examination in midwifery only; and said fees shall be paid into the treasury of the Board. If an applicant fails to pass said examination, his or her fee shall be returned. Upon successfully passing the examination, the certificate of the Board shall be issued to the applicant without further charge.

12. CHARACTER OF EXAMINATION.] § 8. Examinations may be made in whole or in part in writing, and shall be of an elementary and practical character, but sufficiently strict to test the qualifications of the candidate as a practitioner.

13. REFUSAL OR REVOCATION OF CERTIFICATE.] § 9. The State Board of Health may refuse to issue the certificates provided for in Section 2, to individuals guilty of unprofessional or dishonorable conduct, and it may revoke such certificates for like causes. In all cases of refusal or revocation the applicant may appeal to the Governor, who may affirm or overrule the decision of the Board, and this decision shall be final.

14. DEFINITION OF PRACTICING PHYSICIAN.] § 10. Any person shall be regarded as practicing medicine, within the meaning of this act, who shall treat, operate on, or prescribe for any physical ailment of another. But nothing in this act shall be construed to prohibit service in cases of emergency, or the domestic administration of family remedies. And this act shall not apply to commissioned surgeons of the United States Army, Navy or Marine Hospital service in the discharge of their official duties.

15. ITINERANT VENDOR OF DRUGS, ETC.—LICENSE.] § 11. Any itinerant vendor of any drug, nostrum, ointment or appliance of any kind intended for the treatment of disease or injury, who shall, by writing or printing, or any other method, profess to cure or treat disease or deformity by any drug, nostrum, manipulation or other expedient, shall pay a license of one hundred (100) dollars per month into the treasury of the Board, to be collected by the State Board of Health, in the name of the People of the State of Illinois, for the use of the said Board of Health. And it shall be lawful for the State Board of Health to issue such license on application made to the State Board of Health, such license to be signed by the President of the Board, and attested by the Secretary of the Board, with the seal of the Board.

Any such itinerant vendor who shall vend or sell any such drug, nostrum, ointment or appliance without having a license so to do, shall, if found guilty, be fined in any sum not less than one hundred dollars, and not exceeding two hundred dollars for each offense, to be recovered in an action of debt before any court of competent jurisdiction. But such Board may for sufficient cause refuse such license.

16. PENALTY FOR PRACTICING WITHOUT CERTIFICATE—USING ANOTHER'S DIPLOMA.] § 12. Any person practicing medicine or surgery in the State without the certificate issued by this Board, in compliance with the provisions of this act, shall for each and every instance of such practice forfeit and pay to the people of the State of Illinois, for the use of the said State Board of Health, the sum of one hundred (100) dollars for the first offense, and two hundred (200) dollars for each subsequent offense, the same to be recovered in an action of debt before any court of competent jurisdiction, and any person filing or attempting to file as his own the diploma or certificate of another, or a forged affidavit of identification, shall be guilty of a felony, and upon conviction, shall be subject to such fine and imprisonment as are made and provided by the statutes of the State for the crime of forgery.

Provided, that all persons who have been practicing medicine continuously for ten years within the State prior to the taking effect of the act to which this is an amendment, and who have not under said original act, obtained a certificate from the said Board of Health to practice medicine in this State, shall upon proper application to said Board of Health receive such certificate, unless it shall be ascertained and determined by said Board of Health that the person so applying for a certificate is of immoral character, or guilty of unprofessional or dishonorable conduct, in which case said Board of Health may reject such application.

And, provided, that such application for a certificate shall be made within six months after the taking effect of this act, and all persons holding a certificate on account of ten years' practice shall be subject to all the requirements and discipline of this act, and the act to which this is an amendment, in regard to their future conduct in the practice of medicine the same as all other persons holding certificates, and all persons not having applied for or received such certificate within six months after the taking effect of this act, and all persons whose applications have for the causes herein named been rejected or certificates revoked, shall, if they shall practice medicine, be deemed guilty of practicing in violation of law and shall suffer the penalties herein provided.

17. JUDGMENT UPON CONVICTION—APPEAL.] § 13. Upon conviction of either of the offenses mentioned in this act, the court shall, as a part of the judgment, order that the defendant be committed to the common jail of the county until the fine and costs are paid, and upon failure to pay the same immediately, the defendant shall be committed under said order.

Provided, that either party may appeal in the same time and manner as appeals may be taken in other cases, except that where an appeal is prayed in behalf of the People, no appeal bond shall be required to be filed, whether the appeal be from a justice of the peace, or from the county or circuit court, or from the appellate court. But it shall be sufficient in behalf of the People of the State of Illinois, for the use of the State Board of Health, to pray an appeal, and thereupon appeal may be had without bond or security.

17a. REPEAL.] All acts and parts of acts inconsistent or in conflict with this act are hereby repealed.

WHAT CONSTITUTES PRACTICING MEDICINE UNDER THE STATUTE.

The tenth section of the act to regulate the practice of medicine in the State of Illinois states that "any person shall be regarded as practicing medicine, within the meaning of this act, who shall treat, operate on, or prescribe for any physical ailment of another."

"Independently of the statutory definition, the term imports and embraces the pursuit and vocation of one who holds himself out to the public as possessing the requisite skill to treat disease, and accordingly prescribes for or treats patients as a physician." (Opinion of Attorney General Edsall, July 23, 1880.)

"Par. 14 of Ch. 91, Sec. 10 of the Medical Practice Act, declares that 'any person shall be regarded as practicing medicine within the meaning of this act who shall treat, operate on or prescribe for any physical ailment of another.'

"It is argued on behalf of appellant that this provision must receive reasonable interpretation and that to 'treat' implies the use of medicine or drugs of some sort. This is not so necessarily. Many of the minor operations are affected without the use of instruments, by mere pressure, extension and flexing." (Opinion of Hon. J. Wall of the Appellate Court of Illinois, June 16, 1897.)

GRATUITOUS PRACTICE.

If a person "practices medicine," as defined by the statute, without complying with the law, it is wholly immaterial whether he charges for his services or not. He is guilty of a violation of the law, and liable to prosecution. This, however, does not apply to gratuitous services rendered in a case of emergency by a non-qualified person.

The Administration of the Illinois Medical Practice Act.

Under the act to regulate the practice of medicine in the State of Illinois, all practitioners are divided into three classes: First, graduates of "legally chartered medical institutions in good standing, as may be determined by the Board." (See section 2, Medical Practice Act.) *Second, graduates of medical institutions not in good standing with the Board. Third, non-graduates who are required by the law to undergo an examination by the Board. (See section 1, Medical Practice Act.)

To be held in good standing in Illinois, medical colleges, since the session of 1882-3, have been required to comply with the Schedules of Minimum Requirements, adopted at different periods by the State Board of Health, in order to enable the Board the better to discharge the duty devolved upon it by the Act above referred to.

In 1880 the following Schedule prepared by a committee of the Board was formally adopted as the standard entitling to recognition, as the basis of legal qualifications for practice in Illinois, any diploma *issued after the session of 1882-83*:

MINIMUM REQUIREMENTS FOR A MEDICAL COLLEGE TO BE HELD IN "GOOD STANDING."

I. CONDITIONS OF ADMISSION TO LECTURE COURSES.

1. Credible certificates of good moral standing.
2. Diplomas of graduation from a good literary and scientific college or high school. Or, lacking this,
3. A thorough examination in the branches of a good English education, including mathematics, English composition, and elementary physics or natural philosophy.

II. BRANCHES OF MEDICAL SCIENCE TO BE INCLUDED IN THE COURSE OF INSTRUCTION.

1. Anatomy. 2. Physiology. 3. Chemistry. 4. Materia Medica and Therapeutics. 5. Theory and Practice of Medicine. 6. Pathology. 7. Surgery. 8. Obstetrics and Gynecology. 9. Hygiene. 10. Medical Jurisprudence (Forensic Medicine).

* There is no provision in the law covering this class of physicians, which, of necessity, must exist when the Board determines that certain medical institutions are not in "good standing." It consequently devolves upon the Board to decide what action shall be taken in the case of such graduates.

III. LENGTH OF REGULAR OR GRADUATING COURSES.

1. The time occupied in the regular courses or sessions from which students are graduated shall not be less than five months, or twenty weeks each.
2. Two full courses of lectures, not within one and the same year of time, shall be required for graduation with the degree of Doctor of Medicine.

IV. ATTENDANCE AND EXAMINATIONS OR QUIZZES.

1. Regular attendance during the entire lecture courses shall be required, allowance being made only for absences occasioned by the student's sickness, such absences not to exceed twenty per centum of the course.
2. Regular examinations or quizzes to be made by each lecturer or professor daily, or at least twice each week.
3. Final examinations on all branches to be conducted, when practicable, by competent examiners other than the professors in each branch.

V. DISSECTIONS, CLINICS AND HOSPITAL ATTENDANCE.

1. Each student shall have dissected during two courses.
2. Attendance during at least two terms of clinical and hospital instruction shall be required.

VI. TIME OF PROFESSIONAL STUDIES.

This shall not be less than three full years before graduation, including the time spent with a preceptor, attendance upon lectures, or at clinics and hospital.

VII. INSTRUCTION.

The college must show that it has a sufficient and competent corps of instructors and the necessary facilities for teaching, dissections, clinics, etc.

Hereafter, diplomas of colleges whose educational requirements and methods fall below the above schedule will not be recognized as entitling their possessors to certificates from the Illinois State Board of Health. This does not, however, affect the value of diplomas issued prior to the session of 1883-84.

The Board at this time accorded recognition to fifty-seven medical colleges in the United States and declined to recognize degrees issued by twenty-four institutions, among which were the American Eclectic Medical College, Cincinnati, the Bellevue Medical College, of Boston, and the Eclectic Medical College, of Philadelphia. Of the fifty-seven colleges referred to, fifty-six are now in active existence and recognized by this Board. One only of the twenty-four non-recognized institutions is now in operation, and its "diplomas" are still rejected.

In addition to the foregoing there were a number of institutions concerning the "good standing" of which the Board had no opportunity of deciding.

The above schedule remained in force until the close of the sessions of 1890-91, when the following, which was adopted and promulgated by the Board in 1887, took effect:

SCHEDULE OF MINIMUM REQUIREMENTS.

I. *Conditions of Admission to Lecture Courses.*—1. Credible certificate of good moral standing. 2. Diploma of graduation from a good literary and scientific college or high school, or a first grade teacher's certificate. Or, lack-

ing this, a thorough examination in the branches of a good English education, including mathematics, English composition and elementary physics or natural philosophy.

II. *Branches of Medical Science to be Included in the Course of Instruction.*—1. Anatomy. 2. Physiology. 3. Chemistry. 4. Materia medica and therapeutics. 5. Theory and practice of medicine. 6. Pathology. 7. Surgery. 8. Obstetrics and gynecology. 9. Hygiene. 10. Medical jurisprudence.

III. *Length of Regular or Graduating Courses.*—1. The time occupied in the regular courses or sessions from which students are graduated shall not be less than five months, or twenty weeks, each. 2. Three full courses of lectures, not within one and the same year of time, shall be required for graduation with the degree of Doctor of Medicine.

IV. *Attendance and Examinations or Quizzes.*—1. Regular attendance during the entire lecture courses shall be required, allowance being made only for absences occasioned by the student's sickness, such absence not to exceed twenty per centum of the course. 2. Regular examinations or quizzes to be made by each lecturer or professor at least twice each week. 3. Final examinations on all branches to be conducted, when practicable, by competent examiners other than the professors in each branch.

V. *Dissections, Clinics and Hospital Attendance.*—1. Each student shall have dissected during two courses. 2. Attendance during at least two terms of clinical and hospital instruction shall be required.

VI. *Time of Professional Studies.*—This shall not be less than three full years before graduation, including the time spent with a preceptor, and attendance upon lectures or at clinics and hospitals.

VII. *Instruction.*—The college must show that it has a sufficient and competent corps of instructors and the necessary facilities for teaching, dissections, clinics, etc.

In connection with this schedule, the following resolution was adopted on April 26, 1893:

RECOGNITION OF DEGREE OF PH. G., D. D. S., OR V. S.

Resolved, That on account of the great disparity which exists in the requirements for graduation in the colleges of dentistry, pharmacy and veterinary science in the United States and Canada, the Illinois State Board of Health declines to recognize the degree of Ph. G., D. D. S. or V. S. as the equivalent of any part of the minimum requirements fixed by the Board as characterizing a medical college in good standing within the meaning and intent of the Illinois Medical Practice Act.

This Schedule was amended in part in April, 1896, as follows:

CONDITIONS OF ADMISSION TO LECTURE COURSES.

1st. Credible certificates of good moral character signed by two physicians of good standing in the state from which the applicant comes.

2d. A diploma or certificate of graduation from a high school; evidence of having passed the matriculation examination to a recognized literary or scientific college, or a certificate of successful examination by the faculty of any reputable university or college or by the State Superintendent of Public Instruction in the following branches: English grammar, arithmetic, elementary physics, United States history, geography, Latin (equivalent to one year in a high school). One year is allowable in which to cure defects in knowledge of Latin, but the student must be provided with a certificate of proficiency in this branch of learning from the designated authorities before he can be accepted as a second course student.

Resolved, That graduates of dental surgery, pharmacy and veterinary medicine may be entitled to credit for one year's study* in said recognized colleges, on complying with their entrance requirements and passing examinations in all the branches embraced in the previous years of study.

† *Resolved*, That as a further condition of the recognition of any medical college as in good standing, the college shall furnish the Secretary of the State Board of Health, or State Board of Medical Examiners, on or before January first of each year, a complete list of all its matriculants, together with the basis upon which each applicant matriculated, giving the name of the institution from which the degree or certificate of graduation was obtained, or the name of the State official conducting the examination, or the university or college conducting examinations, or the college previously attended, together with the date when the degree or certificate was issued. This list to be sworn to by the executive officer of the college and attested by the Secretary, under the seal of the college.

Resolved, That students who have heretofore attended full courses of instruction in non-recognized medical colleges may be admitted to advanced standing in recognized medical colleges, on complying with the entrance requirements of said recognized medical colleges, and passing other examinations in all the branches in the previous years of study.

Resolved, That no medical college shall be recognized as in good standing for the purpose of the Illinois Medical Practice Act, that does not require of all matriculants after January 1, 1897, as a condition of graduation, four (4) full courses of lectures in four (4) separate years.

Under the conditions of this Schedule of Minimum Requirements, adopted in July, 1887, and amended in April, 1896, students can be graduated in 1898 and 1899 after an attendance on three courses of lectures in three separate years.

The subjoined schedule adopted on January 4, 1893, and slightly amended later, is now in force, and goes actively into effect with the session of 1898-99.

SCHEDULE OF MINIMUM REQUIREMENTS.

ADOPTED BY THE ILLINOIS STATE BOARD OF HEALTH JANUARY 4, 1898.

CONDITIONS OF ADMISSION TO LECTURE COURSES.

1st. Creditable certificates of good moral character signed by two physicians of good standing in the state in which the applicant last resided.

2d. (1) a diploma or certificate of graduation from a high school; or (2) evidence of having passed the matriculation examination to a recognized literary or scientific college; or (3) a certificate of having successfully passed the medical student's examination conducted by the examiner of the faculty of a recognized literary or scientific college or university or by the State Superintendent of Public Instruction, or by a principal of a high school in the following named branches, in each of which the applicant should possess, at least, the knowledge required at the completion of one year of study in such school, viz.: English grammar, arithmetic, elementary physics, United States history, geography and Latin. One year is allowed in which to make up defects in knowledge of Latin, but the student must be provided with a certificate of proficiency in this branch of learning from the *designated authorities* before he can be accepted as a second course student, or be given a certificate of attendance on the first year's course.

* On a course extending over four years.

† This resolution, though omitted on page XVIII. *infra*, is still in force.

ADVANCED STANDING.

Graduates of reputable and regularly established colleges of dentistry, colleges of pharmacy and colleges of veterinary medicine, which require as a condition of graduation attendance on a course extending through two or more full years, may be allowed one year's advanced standing on a four year medical course only on condition that they comply with the entrance requirements of the medical college, and pass all the examinations and perform all the laboratory work embraced in the course of the Freshman year.

Graduates of medical colleges recognized by this Board may be admitted to any class without examination. Students from said colleges who possess certificates of attendance and of successful examinations, can enter without examination the class immediately following that previously attended. Students who have attended one or more full courses in colleges not fully recognized by this Board can be granted advanced standing in accordance with such attendance, on complying with the entrance requirements and passing all examinations and performing all laboratory work of the classes below that which they enter. Graduates of or students from colleges to which no recognition is given by the Illinois State Board of Health can be granted *no advanced standing whatever*.

Graduates of colleges of arts or science which require a regular attendance of three or more years as an essential to graduation, may be admitted to the second year of the medical course without examination, provided,

First—That they furnish, beside their diploma or certificate of graduation, formal and satisfactory evidence of having creditably done at least one full year's work in the following named branches, for which they may receive credit in the medical school without examination: (1) Chemistry, (2) Biology or Comparative Anatomy, (3) Histology, (4) Embryology, (5) Experimental Physics, (6) Physiological Botany, (7) Laboratory Physiology or Experimental Psychology, (8) Zoology.

And second that they make up their other deficiencies in the first year's work by attendance and examination, the same as other students.

II. Branches of medical science to be included in the Course of Instruction:

(1) Anatomy, (2) Physiology (3) Chemistry, (4) Materia Medica and Therapeutics, (5) Theory and Practice of Medicine, (6) Pathology and Bacteriology, (7) Surgery, (8) Obstetrics, (9) Gynecology, (10) Hygiene, (11) Medical Jurisprudence.

* III. LENGTH AND NUMBER OF REGULAR OR GRADUATING COURSES.

The time occupied in each regular course or session shall not be less than six months, or twenty-six weeks.

The College must have a curriculum extending over three (after January 1st, 1900, four) calendar years.

The interval between the required courses of lectures shall be at least three months of time, and no two courses which commence or end in the same calendar year shall be recognized.

IV. Attendance and Examinations or Quizzes.

1. Regular attendance during the entire lecture courses shall be required, allowance being made only for absences occasioned by the student's sickness, such absence not to exceed 20 per centum of the course; 2. regular examinations or quizzes to be made by each lecturer or professor at least once each week; 3. final examinations on all branches to be conducted.

V. Dissections, Clinics and Hospital Attendance.

* As amended April 7, 1898.

1. Each student must have dissected the entire cadaver, such dissection must have been carried on during two or more courses of lectures; 2, he shall have at least two—after January 1, 1900, three—terms of clinical and hospital instruction.

VI. Time of Professional Studies:

The time of professional study shall not be less than three—after January 1, 1900, four—full calendar years before graduation, and attendance upon lectures and at clinics and hospital.

* VII. INSTRUCTION. The college must have a sufficient and competent corps of instructors, and facilities for teaching, dissections, ambulatory and hospital clinics which obtain in the majority of colleges in the United States. The teachers and instructors in the branches of medical science which are required to be included in the course of instruction (chemistry and medical jurisprudence excepted) shall invariably be physicians, authorized to practice in the State in which the college is located.

RECOGNITION OF MEDICAL COLLEGES.

Rule 1. Only regularly conducted and legally chartered medical colleges which conform to the conditions of admission to lecture courses, the course and period of study, the number, character and length of lecture terms, the duration of attendance on hospital and clinical instruction, as set forth in the Schedule of Minimum Requirements adopted by the Illinois State Board of Health, and the other requirements of a medical education which obtain as the practice of a majority of the established medical colleges of the United States shall be considered medical institutions in good standing according to the purpose of the Act to Regulate the Practice of Medicine in the State of Illinois, approved June 16, 1887.

Rule 2. No medical college can be held to be in good standing entitling its diploma to full recognition until it has established its claim to such standing by an active existence of not less than four years, and then only on compliance with the terms of Rule 1. Provided, that colleges which after a personal investigation made by a Committee of the Board, are shown to comply with the Schedule of Minimum Requirements, and to possess a sufficient and competent corps of instructors, all legally qualified physicians, and the necessary facilities for teaching, may, at the discretion of the Board, be granted full recognition during the second year of existence.

Rule 3. Graduates of medical colleges who do not fully comply with the Schedule of Minimum Requirements of the Illinois State Board of Health, and graduates of institutions of less than four years' existence which are not considered as in good standing, will be required to pass an examination before receiving a State Certificate to practice medicine and surgery, in the following branches: practice of medicine, surgery, obstetrics, and gynecology, or at the discretion of the Board, in the branches of the usual medical college course, to-wit: anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, bacteriology, surgery, obstetrics, gynecology, hygiene and medical jurisprudence.

* Graduates of colleges not in "good standing" with this Board, who are required to pass a supplemental examination before receiving a State Certificate to practice medicine and surgery, will pay a fee of \$10.00, which will be returned if applicant fails. No further charge will be made for a Certificate if issued.

No medical college shall be recognized in good standing for the purposes of the Illinois Medical Practice Act, that does not require after January 1, 1900, of all students excepting graduates of colleges of arts or science, or of colleges of dentistry, pharmacy or veterinary medicine, to whom advanced standing is given in accordance with the requirements of this Board, as a condition of graduation, an attendance of four full courses of lectures in four separate years.

* As amended April 7, 1898.

Diplomas issued by colleges in good standing, in 1898 and 1899, to students after an attendance on three full courses of lectures in three separate years, will be recognized.

FOREIGN DIPLOMAS.

* The Illinois State Board of Health will hereafter recognize no foreign diplomas as a basis upon which to issue a Certificate to practice medicine and surgery in the State. All applicants will be required to pass an examination.

INFORMATION FOR APPLICANTS FOR STATE CERTIFICATES TO PRACTICE MEDICINE AND SURGERY, OR MIDWIFERY.

REQUIREMENTS FOR GRADUATES.

Applications for Certificates, etc.

A graduate in medicine desiring to practice in the State should apply to the Secretary of the Board at Springfield for blank forms and for information concerning the recognition of his diploma. He should state the name of the college from which he graduated, mentioning the year, and should also state the number of lecture courses attended, giving the dates of commencement and ending of each.

On receipt of this information, the Secretary will advise the applicant whether his diploma can receive unconditional recognition, or if it will be necessary to pass an examination.

If the college be in "good standing" with the Illinois State Board of Health, it will only be necessary for the candidate to make formal application on the prescribed blanks, to furnish two letters of recommendation from licentiates, or from physicians in other states, endorsed by licentiates of the Board; also to forward his diploma to the Secretary for verification, and to pay a fee of \$5.00.

When the above requirements have been complied with, temporary permission to practice will immediately be granted, and with the diploma, will be sent to the applicant. A State Certificate will be issued as soon as the signatures of the members of the Board can be obtained.

A graduate of a medical college, not in "good standing" with the Board, will be required to pass such examination as the Board may elect. If the institution be regularly conducted, and in good repute in the State in which located, as a rule, the candidate will be required to pass an examination in four branches only, viz.: theory and practice of medicine, surgery, obstetrics and gynecology. Should the college not be a reputable institution, no recognition whatever can be given to the diploma presented, the applicant being considered a non-graduate.

* As amended April 7, 1898.

Prior to taking an examination, an applicant from a conditionally recognized college should also make formal application on the required forms, furnish two letters of recommendation, forward his diploma to the Secretary for verification, and pay a fee of \$10.00, which will be returned if he fail to pass. There will be no extra charge for a certificate, if issued.

Diplomas Presented for Verification.

Diplomas must be presented for verification. They should be forwarded, prepaid, by express or registered mail. If by mail, letter postage must be affixed to package. *No diploma should be forwarded to the Secretary until he request that such be done.*

Foreign Diplomas.

No foreign diploma is recognized in full as a basis upon which to issue a State Certificate to practice medicine and surgery. Graduates of reputable institutions known to the Board, are required to pass a supplemental examination in the four branches named above. They are required also to have their diplomas authenticated by a Consul from the country in which the diploma was issued. Holders of diplomas from non-reputable institutions, or of those which do not receive the visé of the foreign Consul concerned, are considered as non-graduates in medicine.

Fees.

The fee of \$5.00 for a State Certificate, that of \$10.00 for the supplemental examination, and for a certificate, or that for translating, should be forwarded to the Secretary *only when requested*. Remittances should be made by express or post-office money order, or by draft. No personal checks should be sent.

Time of Examinations.

Graduates of conditionally recognized medical institutions can undergo examination at the quarterly examinations of the Board in Chicago at the Great Northern Hotel on the second Wednesday of January, April, July and October, commencing at 9 a. m., or at any time during office hours in the office of the Board at Springfield. All examinations are written. There are ten questions to each subject, An average of 80 per cent is required. The supplemental examination can be completed in one day. An applicant who fails to pass can not be re-examined within six months. The fee is the same in all cases, viz., \$10.00, returnable if the applicant fail.

Examination in a Foreign Language.

An applicant who desires to be examined in another but the English language, should notify the Secretary of the Board of the fact at least two weeks before the examination. The cost of the translation of the questions and of the answers, when written, must be defrayed by the applicant; usually for an examination in four branches the fee is \$5.00, payable at least two weeks prior to the examination. *No examinations in a foreign language will be held by the Board after January 1, 1901.*

Certificates to be Recorded.

A person holding a certificate from the State Board of Health must have it recorded in the office of the clerk of the county in which he resides within three months after it is issued. Until the certificate is recorded the holder can not lawfully exercise any of the rights and privileges conferred. He must also record his certificate in any county to which he removes to practice.

Non-Resident Physicians.

Physicians residing in other states, whose practice extends into Illinois, must obtain State Certificates from the Board before engaging in practice in this State. All certificates must be recorded.

REQUIREMENTS FOR NON-GRADUATES.

Under the provisions of the Medical Practice Act the examinations of persons not graduates is made directly by the Board. The examinations, entirely in writing, are of an elementary and practical character, but sufficiently strict to test the qualifications of the candidate, as a practitioner.

It being unpracticable for the Board to require of the candidate an examination relative to his preliminary education and fitness to pursue the study of medicine, or to demand practical demonstrations in the dissection of the cadaver, in operative surgery, or in practical obstetrics, in order that his qualifications might be more fully tested, the following resolution was adopted by the Board:

REQUIREMENTS CONCERNING NON-GRADUATE APPLICANTS FOR LICENSE TO PRACTICE MEDICINE IN ILLINOIS, ADOPTED OCTOBER 5, 1897.

Resolved, That after May 1, 1898, all non-graduate applicants for license to practice medicine and surgery, who are examined in accordance with the

* To the Certificate of Preliminary and Medical Education and to each Letter of Recommendation must be affixed a ten cent Internal Revenue Stamp.

provisions of the Medical Practice Act, in addition to the requirements already exacted, must present as evidence of a satisfactory preliminary education, either,

1st. A diploma or *certificate of graduation from a high school.

2d. A *certificate of having passed the matriculation examination to a recognized literary or scientific college.

3d. A *certificate of successful examination by the faculty of any reputable university or college of arts or science by the State Superintendent of Public Instruction of Illinois, or by the principal of a high school in Illinois, in the following branches: English grammar, arithmetic, elementary physics, United States history, geography and Latin (equivalent to one year in a high school).

Each candidate will also be required to present a *certificate from a medical college in good standing with this Board, attesting that the applicant has,

1st. Pursued the study of practical anatomy in said college for at least one term, and has made dissections of the entire cadaver.

2d. Taken at least one full course in operative surgery and practical obstetrics.

3d. Personally attended six or more cases of labor.

APPLICATIONS FOR CERTIFICATES.

The candidate will make application on the following blank form, in his own handwriting:

APPLICATION FOR EXAMINATION BY THE ILLINOIS STATE BOARD OF HEALTH.

Under the Act to Regulate the Practice of Medicine in the State of Illinois.

1. Name in full
2. Place of Birth and Age
3. Residence and Post Office
4. Time spent in Professional Studies
5. Physician or Preceptor under whom the Studies were pursued, with P. O. Address
6. Courses of Medical Lectures attended, with dates
7. Name of School
8. Time spent in Hospital
9. Time of Practice

He will also furnish two letters of recommendation in accordance with the subjoined blank, such as are required of graduates in medicine.

[Letter of Recommendation.] †

P. O. Address:..... Ill.

Date:....., 189..

THIS CERTIFIES, That I am personally acquainted with

.....
that I know h.... to be of good moral and professional character and entirely worthy of confidence. I hereby recommend h.... to the STATE BOARD OF HEALTH to be licensed to practice Medicine and Surgery in the State of Illinois.

..... M. D.

Graduate of..... in the year.....

* If dated after July 1, 1898, each certificate must be stamped.

† To each letter must be affixed a ten cent Internal Revenue stamp.

Character of Examination.

The examination is in writing, in the following named branches: anatomy, physiology, chemistry, materia medica, pathology and bacteriology, surgery, theory and practice, obstetrics, gynecology, hygiene, and medical jurisprudence.

Each subject comprises ten questions. The candidate must attain a general average of 80 per cent. A candidate who fails to pass will be required to take the entire examination when he is re-examined.

Candidates of the Homeopathic, Eclectic or physio-medical schools of medicine are examined in materia medica and the practice of medicine in accordance with the tenets of their respective schools.

Time for Examination.

On receipt of an application the candidate will be informed when the examination can be taken. The regular examinations are held at the Great Northern Hotel in Chicago, on the second Wednesday of January, April, July and October of each year, commencing at 9 a. m., and continuing for three and one-half days. A candidate who fails can not take another examination within one year.

Fees.

The fee for an examination, viz., \$20.00, or for translating where the examination is taken in a foreign language, viz., \$11.00, should always accompany the application and letters of recommendation. The fee for translating should be sent in a separate order or draft. Fees should be transmitted by money order (postoffice or express) or bank draft. No personal checks should be sent.

The examination fee is returned if the candidate fails to pass.

Examination in a Foreign Language.

The same requirements obtain as in the case of a graduate in medicine, the fee for the translating of the papers being \$11.00. *The Board will hold no examinations in a foreign language after January 1, 1901.*

Certificates to be Recorded.

All certificates, whether issued to graduates or to non-graduates, must be recorded alike.

SCHEDULE OF QUESTIONS ASKED AT THE EXAMINATIONS OF NON-GRADUATES IN MEDICINE.

Anatomy—By R. F. Bennett, M. D.

1. Describe the occipital bone.
2. Name the cranial nerves.
3. Describe the coeliac axis.
4. Give the ligaments of the knee joints.

5. What is the mediastinum?
6. What muscles does the quadriceps extensor include?
7. Bound the fourth ventricle of the cerebellum.
8. What bones enter into the formation of the orbit?
9. When and into what does the thoracic duct empty?
10. What structure passes the inguinal canal of the female?

Chemistry—By P. H. Wessel, M. D.

1. What is the basis of chemistry?
2. Give definition of Valency.
3. What do the following symbols represent: HNO_2 HNO_3
4. What is dextrine?
5. How many compounds of hydrogen with oxygen are there? Name them?
6. Give the symbols for sulphurous acid, sulphuric acid, phosphorous acid and phosphoric acid.
7. What is the formula and under what name are the monobasic acids known?
8. What compound is formed by nitrogen and hydrogen? Give formula of compound.
9. What combination does fluorine form with oxygen?
10. What is glycerine, and what will be the result if glycerine is treated with nitric acid?

**Gynecology*—By Florence W. Hunt, M. D.

1. Give the prominent symptoms of extra-uterine pregnancy.
2. Give the minute anatomy of the ovaries.
3. Give the treatment of endometritis.
4. What are the prominent symptoms in malignant disease of the uterus?
5. What are the causes of sterility?
6. What is the treatment of acute pelvic peritonitis?
7. Describe briefly the operation of curettement of the uterine cavity.
8. How would you treat cystitis?
9. Give the minute anatomy of the uterus.
10. What are the signs of retroflexion of the uterus?

Hygiene—By C. B. Johnson, M. D.

1. Give the normal amount of humidity in atmospheric air.
2. Name some diseases that an excessively dry atmosphere might produce.
3. Some that an excessively moist atmosphere might cause.
4. What do you understand by the Caisson disease?
5. To what is it due, and what are its symptoms?
6. Hot air, hot water, steam, open fire places and stoves are the usual means of heating dwellings. In your judgment, which of these is the most desirable, and why?
7. Briefly name some of the advantages of each of the five methods of heating.
8. Cheapness and simplicity being factors, how is a dwelling best ventilated?
9. How is a public building best ventilated, thoroughness being the end sought?

* Used also in the examination of graduates.

10. Describe a simple method for ventilating a country school house of one room.

Materia Medica and Therapeutics—By M. Meyerovitz, M. D.

1. What is materia medica, pharmacology and pharmacognosy?
2. Name the principal constituents of ginger, and where does it grow?
3. Compare acidum tannicum with acidum gallicum.
4. Describe the physiological and therapeutical action of phosphorus, and name its antidotes and antagonists.
5. What would you do in a case of opium poisoning?
6. Describe the therapeutical action of digitalis, and name its preparations.
7. Write a prescription for a case of angina pectoris, and outline the general treatment.
8. Describe the therapeutical action of jaborandi, and name its alkaloids.
9. What are the properties, uses and dose of auri et sodii chloridum?
10. Give the composition of Dover's powders, salol and paregoric.

Medical Jurisprudence—By C. B. Johnson, M. D.

1. The death penalty has been passed upon a woman, and to escape, the victim avers that she is pregnant. This is one instance in which pregnancy becomes a medico-legal question. Give other instances.
2. A woman is found dead, and it is alleged that she was murdered to conceal pregnancy. Among other things, it is desired to ascertain how long pregnancy had existed. In the event conception occurred one month before the death of the mother, what would be the appearance of the embryo?
3. What the appearance and size at two months?
4. What the appearance, size and weight at three months?
5. What at four months?
6. What the appearance, size and weight of the foetus at five months?
7. What at six months?
8. What at seven months?
9. What at eight months?
10. What at nine months?

* *Obstetrics*—By P. H. Wessel, M. D.

1. What are the causes of abortion? How would you diagnose inevitable abortion?
2. Give causes, symptoms and treatment of accidental hemorrhage.
3. Describe the mechanism of labor in the fourth position, vertex presentation.
4. How would you treat a case of eclampsia at the commencement of labor? How would you treat such a case after labor is completed?
5. Describe a case of tubal pregnancy left to nature.
6. What would be the result of incarceration of the uterus if left to nature?
7. What are the indications for the use of the forceps? Describe the preparation for and the application of the forceps.
8. Is turning ever resorted to in case of a too small or deformed pelvis?
9. What is a spontaneous version? What is a spontaneous evolution?
10. What would you do in a case of breech presentation, the breech becoming arrested in the cavity of the pelvis?

* Used also in the examination of graduates.

Pathology and Bacteriology—By Florence W. Hunt, M. D.

1. Name the tumors which develop from the middle embryonal layer.
2. Describe the histology of carcinomatous tumors.
3. What are the pathological tissue changes in anterior polio-myelitis?
4. What are the blood changes in leukemia?
5. What are the pathological tissue changes in interstitial nephritis?
6. Name six of the pathogenic cocci.
7. State briefly what you know of the bacillus typhi abdominalis. To what organs is it most frequently distributed?
8. Define the terms parasite, saprophyte.
9. State briefly what you can of the bacillus tuberculosis.
10. Give the main characteristic of the bacillus tetani.

* *Practice of Medicine*—By M. Meyerovitz, M. D.

1. Give the causes, symptoms and treatment of typhoid fever.
2. Describe the morbid anatomy of insolation, and outline its general treatment.
3. Name the various forms of bronchiectasis and give physical signs.
4. Differential diagnosis between chronic parenchymatous and chronic interstitial nephritis.
5. Trichinosis, its causes, symptoms and treatment.
6. Describe the bacillus tuberculosis of Koch, and Ehrlich's method of staining.
7. Pseudo hypertrophic muscular paralysis, its diagnosis, complications and treatment.
8. Give the differential diagnosis between aortic obstruction and mitral regurgitation.
9. Write what you know of lithaemia.
10. How would you diagnose and treat a case of cholera morbus?

Physiology—By Z. D. French, M. D.

1. What is the crusta phlogistica and how formed?
2. Describe the colored and colorless blood corpuscles.
 - a as to proportion.
 - b as to size and composition.
 - c as to function.
3. Give the mechanism of respiration.
4. Describe the respiratory changes in the blood and tissues.
5. Describe the nervous apparatus of respiration.
6. What is the function and composition of saliva?
7. Give summary of the digestive changes in the large intestine.
8. Describe the two kinds of supporting material for the medullated nerve fibers of the white matter of the spinal cord.
9. Name the different columns and tracts of the spinal cord, and which are of ascending and descending degeneration.
10. Give in full, the distribution of the gray matter in both brain and cord.

* Used also in the examination of graduates.

* *Surgery*—By P. H. Wessel, M. D.

1. What general rules are necessary to be observed in the use of anæsthetics?
2. What ligaments are ruptured in a dislocation of the radius forward on to the anterior surface of the humerus?
3. In how many directions may the humerus be dislocated at the shoulder? Name them.
4. What do you understand by Pott's fracture! Give position of displacement and treatment.
5. How would you treat fracture of the patella? What is the prognosis!
6. What delay is necessary in amputation, if mortification has already taken place?
7. How would you perform lateral lithotomy?
8. How would you diagnose and replace a dislocation of the head of the femur upon the dorsum illii?
9. How is an amputation at the shoulder joint performed, and what arteries have to be ligated?
10. Why are arteries of the brain not subject to aneurism?

Homeopathic Practice of Medicine—By P. H. Wessel, M. D.

1. What is typhoid fever? Give symptoms and treatment.
2. Give differential diagnosis of varicella, varioloid and variola.
3. Give treatment of varioloid.
4. What is pneumonia? Give symptoms and treatment.
5. What is meant by emphysema! What are the symptoms and how is it treated?
6. What is hypertrophy of the heart? What are the causes? Give symptoms and treatment.
7. Give differential diagnosis of endocarditis and pericarditis. Give treatment of both.
8. How many kinds of paralysis are there? Name them.
9. What do you understand by Bright's disease of the kidney? Name some of the secondary affections and give treatment.
10. What is apoplexy? Name causes, symptoms and treatment.

Homeopathic Materia Medica—By P. H. Wessel, M. D.

1. *Bryonia alba*: What part of the plant is used in preparing the Homeopathic tincture? What are its medical uses?
2. *Ignatia amara*: Where does this plant grow? What part is used in preparing the Homeopathic tincture? What are its physical actions!
3. *Arsenicum album*: What is its characteristic medical action?
4. *Cantharides*: How is the Homeopathic tincture prepared? What are its medical uses?
5. *Chelidonium majus*: What part of the plant is used in making the Homeopathic tincture? What are its medical uses?
6. *Nux vomica*: Where does the plant grow? What are its medical uses?
7. *Euphrasia Officinalis*: What part of the plant is used in preparing the Homeopathic tincture? What are its medical uses?
8. *Colocynthis*: Where does this plant grow? What are its medical uses?
9. *Rhus Toxicodendron*: What are its medical uses?
10. *Veratrum album*: Where does this plant grow? What part is used in preparing the Homeopathic tincture? What are its medical uses?

* Used also in the examination of graduates.

Eclectic Practice of Medicine—By R. F. Bennett, M. D.

1. Differential diagnosis between cerebral hemorrhage and uraemia.
2. What are the symptoms of tabes dorsalis?
3. What are the physical signs of mitral incompetency?
4. Diagnosis of leukaemia.
5. Describe the stages of lobar pneumonia.
6. What is your treatment of cholera infantum?
7. What is the treatment for tetanus?
8. Diagnose measles.
9. Outline the causes and treatment of typhoid fever.
10. Diagnosis of chronic parenchymatous nephritis.

NON-GRADUATE EXAMINATIONS.

July 1, 1877, to June 30, 1898.

Year.	Applicants examined.	Licensed.	Rejected.	Per cent rejected.
1877-78.....	477	150	327	68.6
1879.....	73	22	51	69.6

1898.....	46	35	11	23.9

At the April, 1898, examination thirty-four candidates were present. Of this number thirty obtained the necessary percentage and were awarded certificates. Twenty-nine of the successful applicants were students in medical colleges in Chicago. The course of study pursued is shown in the subjoined table:

Name of Institution Attended.	Number of Courses Taken.		
	2	3	4
N. W. U. Medical School (Chicago Medical College).....		2
Rush Medical College, Chicago.....		10	1
College of Physicians and Surgeons, Chicago.....	2	7	1
Women's Medical College, Chicago.....		1
Harvey Medical College, Chicago.....	1	2
Chicago Homeopathic College, Chicago.....			
State University of Iowa.....	1
Hering Medical College, Chicago.....			1
King's College, London.....			

The remaining successful applicant presented evidence of having studied for over six years in a physician's office.

Of the four candidates who failed to pass, three also were students of Chicago medical institutions. The fourth claimed to have studied for seventeen years under a preceptor.

REQUIREMENTS FOR MIDWIVES.

SCHEDULE OF MINIMUM REQUIREMENTS FOR SCHOOLS OF MIDWIFERY.

No school of midwifery shall be regarded as in good standing by the Illinois State Board of Health until it has presented evidence of full compliance with the following Schedule:

Requirements for Admission.

All applicants for matriculation in schools of midwifery must present certificates of good moral character, and evidence of their ability to read and write, in at least one language, English preferred.

Requirements for Graduation.

(1) No student shall be graduated from any school of midwifery who has not completed two full courses of lectures of five (5) months each, said courses to consist of daily instruction of three (3) hours, at least, in the following branches: First, anatomy; second, physiology; third, natural labor; fourth, abnormal labor, including instruction in abnormal positions and other conditions, with special reference to the importance or proper time of calling assistance; fifth, management of the mother before, and the mother and child after delivery; sixth, instruction in hygiene, asepsis and antisepsis.

(2) No school of midwifery shall graduate any students who have not attended at least ten cases of midwifery, under direct supervision of registered physicians, and have had practical drill in the use of antiseptics, and everything necessary for the study of hygiene and the lying-in room.

Facilities for Teaching.

(1) The building to be used for schools of midwifery must be spacious, with rooms of sufficient size, and properly ventilated.

(2) The lecture room must contain the necessary equipments, such as charts, manikins, and other material.

(3) Schools of midwifery must be, at all times, open for the inspection of the Board.

(4) Sworn statements by the President and Secretary of every school of midwifery must accompany reports required by the Board.

(5) The State Board of Health reserves the right to modify or change the above regulation, at any or all times.

(6) The members of the teaching faculties of schools of midwifery must be legally qualified physicians.

(7) After January 1, 1901, no school in which the instruction is given in a foreign language will be recognized by the Illinois State Board of Health.*

Applications for Certificates.

A graduate of a recognized school of midwifery, or a licentiate whose license is accorded recognition, should make application to the Board on the

*At the present time the Board recognizes the diplomas of one college only, the Play-fair School of Midwifery, Chicago.

prescribed blank form, and furnish two letters of recommendation from registered physicians in Illinois. The candidate should also send to the Secretary of the Board, at Springfield, the diploma and a fee of \$2. On compliance with these requirements a certificate will be issued.

The following is the form of the affidavit required of all midwives:

NOTE—If the applicant is not a graduate or licentiate in midwifery strike out all words and phrases in the subjoined relating to diploma or license.

STATE OF ILLINOIS, }
County. } ss.
 being duly sworn, deposes and says that she is a resident of.....
in the County of.....State
 of Illinois, and that she has studied and practiced the ART OF MIDWIFERY for
 the period of.....years,months in.....
; that she is the lawful

*LETTER OF RECOMMENDATION.

P. O. Address:, Ill.

Date:, 189..

THIS CERTIFIES, That I am personally acquainted with
 M.....
 that I know her to be of good moral and professional character and entirely
 worthy of confidence. I hereby recommend her to the State Board of Health
 to be licensed to practice Midwifery in the State of Illinois.

Graduate of M. D.
in the year.....

The blank forms can be obtained of the Secretary of the Board.

All non-graduates in midwifery, and all applicants whose diplomas or licenses are not recognized by the Illinois State Board of Health are required to make application on the blank form shown above, furnish two letters of recommendation from licensed physicians in Illinois, pay a fee of \$10.00, and pass an examination.

† The applicant can be of either sex.

* A ten cent Internal Revenue stamp must be affixed to each Letter of Recommendation.

Character of Examination.

The examination, entirely in writing, covers the following subjects:

1. Anatomy of the pelvis and of the generative organs of woman. 2. Physiology of menstruation and conception. 3. The signs of pregnancy. 4. Mechanism of labor. 5. Management of normal labor. 6. Management of abnormal labor. 7. Puerperal hygiene and antisepsis. 8. Special care of mother and infant.

There are ten questions to each subject. The candidate must obtain an average of 80 per cent. In case of failure the entire examination must be taken again.

Examinations can be taken by either sex.

Time of Examinations.

Examinations are held at the Great Northern Hotel, Chicago, on the second Wednesday of January, April, July and October of each year, commencing at 9 a. m., or at any time during office hours in the office of the Board at Springfield. Three days' time is allowed at the regular quarterly examination, but candidates can complete their papers in a much shorter period. A candidate who fails to pass the examination can not be re-examined within one year.

Fees.

The fee for an examination is \$10.00. This should accompany the application for a certificate. The fee for translating, when an examination is taken in a foreign language, is \$8.00. This amount should invariably be sent to the Secretary in a separate order or draft at least two weeks before the date of the examination. Money should be sent by express or post office money order, or by bank draft.

The fee for an examination is returned in case the applicant fails to pass.

Examinations in a Foreign Language.

An applicant who desires to take an examination in a foreign language should notify the Secretary at least two weeks prior to the date of examination. The fee (\$8.00) must be paid by the applicant, and should be forwarded with the notification. *After January 1, 1901, examinations will be held in the English language only.*

Certificates to be Recorded.

A midwife holding a certificate from the State Board of Health should have the same recorded promptly in the office of the clerk of the county in which she lives. Should she move to another county to reside, she must have her certificate recorded in that county also.

SCHEDULE OF QUESTIONS EXAMINATION OF MID-WIVES.

Abnormal Labor—By R. F. Bennett, M. D.

1. When is version indicated?
2. Diagnose placenta previa.
3. What does a chill two days after labor indicate?
4. What are the indication for the use of forceps?
5. Causes and symptoms of rupture of the uterus?
6. When does milk-leg occur, and what is the treatment?
7. Treatment of caked breasts.
8. When is induction of premature labor permissible?
9. Treatment of post-partum hemorrhages.
10. What does suppression of urine preceding labor indicate?

Anatomy—By Florence W. Hunt, M. D.

1. What is the ileo-pectineal line?
2. Describe the os innominatum.
3. What three bones form the pelvis?
4. Describe the ovaries.
5. Describe the urethra.
6. What is the symphysis pubis?
7. Give the diameters of the superior strait of the pelvis.
8. Bound the inferior strait.
9. What is the most important structure in the perineal floor of the pelvis?
10. Describe the rectum.

Care of Mother and Child—By P. H. Wessel, M. D.

1. What should first be ascertained when arriving at the bedside of a woman in labor?
2. What are the causes of child bed fever? What would you do to prevent it?
3. In what proportion would you use corrosive sublimate as an anti-septic wash?
4. What are the causes of laceration of the perinaeum? What would you do to prevent it?
5. Should laceration of the perinaeum always be sewed up immediately?
6. What do you understand by puerperal state?
7. How would you care for the bowels and bladder of the woman during the puerperal state? What would you do in regard to the vagina?
8. What immediate attention should be given to the mother after the child is born?
9. What attention should be given to the child immediately after its birth?
10. How would you remove the sebaceous matter from the body of the child after it is born?

Hygiene and Antisepsis—By Z. D. French, M. D.

1. Describe the model diet for a woman in the last two months of her pregnancy.
2. What effect on parturition does unusual exercise have?
3. What attention should be given to the breasts and nipples, and when?
4. How would you prevent child bed fever?
5. Is puerperal fever contagious, and if so how may it be carried from one to another?
6. Describe the effect to the patient of a shred of membrane or bit of placenta left in the uterus.
7. How do you prepare the person of your patient for confinement?
8. How do you prepare the couch, or the bed and the room?
9. By what means do you prevent mastitis!
10. Describe your favorite vaginal douche and your methods of using it.

Mechanism of Labor—By Z. D. French, M. D.

1. Define "mechanism of labor."
2. Give the means of diagnosis of a breech presentation.
3. What causes the pains of labor?
4. Which is preferable for anaesthesia in labor, chloroform or ether?
Why?
5. Under what conditions, with a shoulder presentation, should the membranes be ruptured?
6. What may cause face presentation?
7. In normal labor, which shoulder is born first, the upper or lower one?
Why?
8. What causes prolapse of the cord?
9. What are the dangers of version?
10. Differentiate between knee and elbow presentation.

Normal Labor—By C. B. Johnson, M. D.

1. You are engaged to attend a woman some weeks before confinement; mention some suggestions you would make to patient.
2. Sent for later on, how would you know whether labor had actually begun?
3. How many stages in normal labor?
4. Describe the last stage.
5. In obstetrics, what do you understand by the term "presentation?"
6. What by the term "position?"
7. Name the principal presentations.
8. Name the principal positions in the order of their frequency.
9. What in your judgment is the most essential thing to be observed by patient and attendants during the parturient period?
10. Name three complications, and one of which would convert normal labor into abnormal.

Physiology—By M. Meyerovitz, M. D.

1. Describe the foetal circulation.
2. Give symptoms of menstruation and source of flow.
3. Give the chief causes of suppressed menstruation.
4. What changes take place in the circulation after birth?
5. What is the function of the fallopian tubes?

6. Name the causes of after pains and what would you do?
7. What is the quantity and quality of the menstrual discharge?
8. What is the function of the placenta?
9. Write what you know of lactation.
10. Where does conception occur?

Pregnancy—By P. H. Wessel, M. D.

1. What do you understand by premature labor? What would you do in a case of threatened premature labor?
2. What is accidental hemorrhage? What would you do in such a case?
3. How many positions of the vertex are there? Name them.
4. How would you diagnose a third from a first position?
5. What changes occur in the cervix during gestation?
6. Why are pelvic presentations dangerous to the child?
7. What signs of pregnancy are determined by auscultation?
8. How would you diagnose a pelvic presentation?
9. Name varieties of pelvic presentations.
10. Describe the management of the third stage of labor.

REQUIREMENTS FOR PRACTICE IN THE UNITED STATES.

SUMMARY OF THE LAWS AND REGULATIONS GOV- ERNING THE PRACTICE OF MEDICINE IN THE STATES AND TERRITORIES OF THE UNION.

ALABAMA.

Board of Medical Examiners and Committee of Public Health for the State.

Sanders, W. H., Senior Censor.....	Mobile	Term expires April, 1902
Seelye, S. D.....	Montgomery..... 1902
Baldwin, B. J..... 1901
Franklin, C. H.....	Union Springs..... 1901
Ketchum, G. A.....	Mobile 1900
Wyatt, Heflin.....	Birmingham..... 1900
Sholl, E. H..... 1899
Gaston, E. H.....	Montgomery..... 1899
Furniss, J. P.....	Selma..... 1898
Searey, J. T.....	Tuscaloosa 1898

The Board of Censors of the Medical Association of the State of Alabama, and the boards of censors of the several county medical societies which are in affiliation with the said Medical Association of the State of Alabama, are the authorized Boards of Medical Examiners.

No persons except those proposing to practice some irregular system, are permitted to practice medicine in any of its branches or departments in this state, without having obtained a certificate of qualification from some authorized board of medical examiners.

No person is permitted to practice any irregular system of medicine in any of its branches or departments in this state, without having obtained a diploma or certificate of qualification in anatomy, physiology, chemistry, and the mechanism of labor, from some authorized board of medical examiners.

The examinations are in writing, and in the following branches, namely, chemistry, anatomy, physiology, natural history and diagnosis of diseases, physical diagnosis, surgery, mechanism of labor, obstetrical operations, hygiene and medical jurisprudence. The answers are valued separately, and for the applicant to pass the final average must not fall below 75 per cent.

Any unsuccessful applicant before a county board may obtain a second examination before the same or any other county board after a lapse of twelve months, or he may appeal at once to the state board which will give him a new examination.

Eclectics and Homeopaths must pass the same examination as physicians of the regular school.

Non-graduates are examined by the State Board of Examiners only; graduates by the state or county boards.

After the annual session of 1893-4 the diplomas of medical colleges that require only two courses of lectures for graduation will not be recognized by the authorized boards of medical examiners in Alabama.

Examinations before the State Board of Examiners are held at Montgomery, but each county board holds examinations at times and places as may be necessary. The time consumed in the examination is from six to ten days. The examination, while written, is always followed by an oral quiz. The rejections in past years have averaged twenty per centum.

The fee for the examination is \$10.

Midwives are not licensed.

Applicants for an examination should write to the senior censor of the state board for blanks or for additional information. If an examination by one of the county boards be desired the name of the members thereof can be obtained from a member of the State Board.

ALASKA.

There is no law regulating the practice of medicine in this territory.

ARIZONA.

Territorial Board of Medical Examiners.

D. M. Purman, M. D., President.....	Phoenix	Term expires 1902.....
C. D. Belden, M. D., Secretary	1901.....

No one can practice medicine, surgery or obstetrics in Arizona unless he has obtained a diploma regularly issued by a medical college properly and lawfully organized under the laws of the state or territory in which the college is located and has passed a satisfactory examination before the above board.

After presentation of a diploma the candidate is examined in the following subjects: anatomy, physiology, chemistry, obstetrics, surgery, practice of medicine, materia medica, gynecology and neurology. An average of 75 per cent on at least seven of these subjects is required for a "satisfactory examination" and the issuing of a license.

The board meets quarterly and at such other times as may be deemed advisable and examines all persons eligible to practice medicine as above, but the examination of each applicant is conducted by the members of whichever school of medicine the applicant chooses, and upon their approval a certificate is issued by the board.

The fee for an examination and for a certificate is \$5.00.

The law does not apply to women who practice obstetrics.

ARKANSAS.

Practically no law exists. Diplomas are registered with the county clerks, who are the sole judges of the validity of the degrees: county boards examine non-graduates, but as diplomas are easily obtained the boards are seldom called upon.

The certificate of the Board of Examiners gives license to practice in that county or "into any into which his practice may extend, so long as his residence remains in the county wherein his certificate is issued."

CALIFORNIA.

State Board of Examiners.

Representing the Medical Society of the State of California.

J. Henry Barbat, M. D., President.....	503 Sutter st.....	San Francisco.....
C. C. Wadsworth, M. D., Secretary.....	1104 VanNess av.....

Representing the California State Homeopathic Society.

C. L. Tisdale, M. D., President.....	Alameda.....
A. C. Peterson, M. D., Secretary.....	53 Spring Valley bldg.....	San Francisco.....

Representing the Eclectic Medical Society of the State of California.

D. Maclean, M. D., President.....	710 VanNess av.....	San Francisco.....
Geo. G. Gere, M. D., Secretary.....	825 Market st.....

Every person in this state desiring to practice medicine or surgery must present his diploma to one of the board of examiners above named, together with an affidavit relative to medical studies pursued. If the board finds all the facts required to be stated in the affidavit to be true, and that the applicant is a graduate of a medical college in good standing, the board will issue its certificate to that effect, and such certificate will be conclusive as to the right of the person named to practice medicine and surgery in any part of the state.

The board of examiners examines diplomas as to their genuineness, and if the diploma is found genuine as represented, the secretary of the board of examiners receives a fee of five dollars from each applicant or licentiate; but if it be found to be fraudulent, or not lawfully owned by the possessor, the board will be entitled to charge and collect twenty dollars of the applicant presenting the diploma. The applicant must accompany his diploma with an affidavit stating that he is the lawful possessor and the person therein named.

The boards meet monthly at the offices of their respective secretaries. Applications can be made at any time.

The fee for a certificate is \$5.00, as stated.

In January, 1888, the Board of Examiners of the State Medical Society adopted a resolution to refuse to issue certificates after April 1, 1891, on diplomas granted subsequent to the latter date by colleges not requiring three full years of study and three full regular courses of lectures as conditions of graduation. June 3, 1892, the board adopted the following:

Resolved, That the words "medical institutions in good standing" in section three (3) of that certain act passed by the Legislature of the State, approved April 3, 1876, and entitled "An act to regulate the practice of medicine in the State of California," is hereby defined to include only those institutions which require at least three regular courses or sessions, of six months each, extending over a period of three years for graduation.

The board representing the California State Homeopathic Society recognizes diplomas issued by a Homeopathic college whose course is governed by rules prescribed by the American Institute of Homeopathy.

The board representing the Eclectic Medical Society of the State of California require three terms of study in separate years for those graduating after January 1, 1896, and four years for those who graduate after January 1, 1899. If the applicant is a graduate of an Eclectic medical college, it must be one recognized as in good standing by the National Eclectic Medical Association. The standing of other colleges is determined by the report of the Illinois State Board of Health.

Midwives are not licensed.

For blanks or for additional information applicants should write to the secretary of the board representing their particular school of medicine.

COLORADO.

State Board of Medical Examiners.

Luke McLean, M. D.....	President.....	Pueblo.....
T. A. Hughes, M. D.....	Secretary.....	Denver.....

A graduate in medicine desiring to practice in this state, must present his diploma to the State Board of Medical Examiners for verification, or furnish other evidence conclusive of his being a graduate of a legally chartered medical school in good standing, recognized by Illinois State Board of Health. The State Board of Medical Examiners will issue its certificate to that effect, and such diploma, or evidence and certificate, shall be conclusive to the rights of the lawful holder of the same to practice medicine.

In lieu of a diploma, the physician may present five affidavits from responsible persons, setting forth that he has practiced medicine for ten years continuously, as a business—these affidavits to be sworn to before a clerk of a district or county court in the county in which they are made. The clerk shall state that he knows the affiants to

be persons of integrity. Such applicants must appear in person before the board at a regular meeting. Fee, \$5.00. The ten years' practice alluded to must not have been in this State since 1893.

If not a graduate of a legally chartered medical school in good standing, the person practicing or wishing to practice medicine in this State, must present himself before the Board of Medical Examiners, and submit himself to an examination as defined below, and if the examination is satisfactory to the examiners, the Board of Medical Examiners will issue its certificate in accordance with the facts, and the lawful holders of such certificate shall be entitled to all the rights and privileges herein mentioned.

All examinations of persons not graduates are made directly by the State Board of Medical Examiners. Examinations are in whole, or in part, in writing, and the subjects of examinations are as follows: anatomy, physiology, chemistry, pathology, surgery, obstetrics and practice of medicine, exclusive of materia medica and therapeutics.

The board meets in Denver on the first Tuesday of January, April, July and October, and at such other times and places as may be found necessary.

The fee for a certificate issued upon a diploma or upon the affidavit above referred to, is \$5.00 For an examination, \$10.00.

The statutes of 1893 admits without authorizing the practice of midwifery. The Act Regulating the Practice of Medicine forbids any practice except by licensed physicians. Midwives, however, flourish, and are allowed to register in city health offices.

CONNECTICUT

State Board of Health.

W. H. Brewer, Ph. D., President	New Haven	Term expires 1902.....
C. A. Lindsley, M. D., Secretary.....	<i>Ex-officio.</i> Permanent ..

Committee Representing the Connecticut Medical Society.

H. S. Fuller, M. D., President	Hartford	Term Expires 1902.....
Max Mailhouse, M. D. Secretary.....	New Haven	1898.....

Committee Representing the Connecticut Homeopathic Medical Association.

E. B. Hooker, M. D., President.....	Hartford	Term expires 1899.....
E. H. Linnell, M. D., Secretary	Norwich	1901.....

Committee Representing the Eclectic Medical Association.

Leonard Bailey, M. D., President.....	Middletown	Term expires 1901.....
J. D. S. Smith, M. D., Secretary.....	Bridgeport ..	1903.....

Up to July 15, 1897 the possession of a diploma from a medical college considered reputable, was the only requirement demanded by the societies above named. At the present time no one can obtain a certificate of registration from the State Board of Health unless he has passed an examination before one of the examining committees of the societies named. No evidence of study seems now demanded and the applicant need not possess a diploma. Each committee determines its own standard. The committees require a general average of 75 and devote two days to the examination. The examination includes questions in anatomy, physiology, medical chemistry, obstetrics, hygiene, surgery, pathology, diagnosis and therapeutics—including practice and materia medica.

Examinations are held at places selected by the board within thirty days after applications are received.

The fee for an examination is \$10.00. The State Board of Health charges \$2 for a certificate. Midwives are examined and licensed.

“Those who sell proprietary remedies, chiroprodists, clairvoyants, masseurs, sun curers, mind curers, magnetic healers, christian scientists and all persons who do not use or prescribe * * * drugs, poisons, medicine, chemicals or nostrums are exempted from this law.”

Applications for blank forms and for examinations should be made to the secretary of the State Board of Health.

DELAWARE

Medical Council.

Hon. Charles B. Lore, Chief Justice.....	President.....	Wilmington
I. S. Vallandigham, M. D	Secretary.....	Middletown

Board of Medical Examiners Representing the President and Fellows of the Medical Society of Delaware.

I. S. Vallandigham, M. D., President	Middletown
James H. Wilson, M. D., Secretary.....	Dover.....	Term expires 1899.....

Board of Medical Examiners Representing the Homeopathic Medical Society of Delaware State and Peninsula.

Edward S. Anderson, M. D.....	President.....	Dover.....
Charles M. Allmond, M. D.....	Secretary.....	Wilmington

The right to practice in this state is conferred only by a certificate of the medical council. All applicants must present diplomas from legally incorporated medical colleges. Graduates after April, 1895, must have attended three courses of lectures in different years. Applicants furthermore, must pass a written examination * before the Board of Medical Examiners representing the President and Fellows of the Medical Society of Delaware, or that representing the Homoeopathic Society of Delaware State and Peninsula.

Examinations are held twice yearly, in June and December, at places such as may be selected. Applications must be made ten days prior to the date of the examination, and diplomas *must* be presented on the first day of the examination.

The examination fee is \$10.00 and the same amount is collected by the clerk of the peace who issued the license.

No attempt is made to regulate the practice of midwives.

Applications for blanks, or for additional information, should be made to the secretary of the Medical Council.

DISTRICT OF COLUMBIA.

Board of Medical Supervisors.

J. B. G. Custis, M. D., President.....	110 East Capitol St.....	Washington, D. C.....
William C. Woodward, M. D., Secretary..	Health Department.....

Board of Medical Examiners.

G. Wythe Cook, M. D., President.....	3 Thomas Circle.....	Washington, D. C.....
George C. Ober, M. D., Secretary.....	210 B St., S. E.....

Board of Homeopathic Medical Examiners.

J. B. G. Custis, M. D., President.....	110 East Capitol St.....	Washington, D. C.....
Z. B. Babbitt, M. D., Secretary.....	810 11th St., N. W.....

Board of Eclectic Medical Examiners.

Thomas Robinson, M. D., President.....	617 13th St., N. W.....	Washington, D. C.....
William Geddes, M. D., Secretary.....	1719 G St., N. W.....

All persons desiring to practice medicine and surgery in the District of Columbia should apply to the Board of Medical Supervisors for a license. Applicants must submit to examination upon the following named branches: anatomy, physiology, chemistry, pathology, materia medica and therapeutics, hygiene, histology, practice of

* It has been impossible to obtain a list of the subjects.

medicine, surgery, obstetrics and gynecology, diseases of the eye and ear, medical jurisprudence, and such other branches as the Board deems advisable. Each applicant will be certified for examination as speedily as possible to the board of medical examiners, whose members are adherent to the system of medicine which the applicant desires to practice; but the board will not certify for examination any applicant until satisfactory proof is furnished that he is of good moral character and over twenty-one years of age, nor until he has presented a diploma conferring upon him the degree of doctor of medicine, issued by some medical college authorized by the law to confer such degree, provided, that the diploma, if issued prior to July first, eighteen hundred and ninety-eight, be accompanied with satisfactory evidence that the applicant has studied medicine and surgery for not less than three years prior to the date of issue, and if issued subsequent to June thirtieth, eighteen hundred and ninety-eight, be accompanied by satisfactory evidence that the applicant has studied medicine and surgery for not less than four years prior to the issue of the diploma. All examinations are both theoretical and practical and of sufficient severity to test a candidate's fitness to practice medicine and surgery.

All applications for a license to practice must be made to the secretary of the Board of Medical Supervisors upon a form prescribed, and should be in the hands of the secretary not less than two weeks before the day set for examination, and any application may be rejected for refusal to furnish any of the information called for, or for other irregularity.

Each board holds a meeting in Washington on the 'second Tuesday in January, April, July and October of each year, and continue so long as may be necessary. Other meetings will be held when required.

The fee for an examination is \$10, payable when making application.

Licenses are issued to physicians who may change their residences to the District of Columbia from any state or territory where medical laws and medical examining boards exist, the presentation of a certificate or license from a medical examining board, if found to be true and genuine, being sufficient evidence of the right to registration and certification under the provisions of the law of the state, providing that the medical laws and examining boards of such states and territories grant equal rights and recognition to the licentiates of this board.

Midwives are examined and licensed.

For the necessary blanks, forms, or for further information, applications should be made to the secretary of the Board of Medical Supervisors.

FLORIDA.

Directory of Officers in Charge.

*FIRST DISTRICT.

H. L. Simpson, M. D., President.....	Pensacola
C. B. McKinnon, M. D., Secretary

In this state there is a board of examiners in and for each judicial circuit of the state, and one Board of Homeopathic Examiners for the state at large.

All applicants for a certificate of qualification to practice medicine are examined, upon the production of their medical diplomas from a recognized college, in the following subjects: anatomy, physiology, surgery, gynecology, therapeutics, obstetrics and chemistry, but no preference is given to any school of medicine. The Board of Homeopathic Medical Examiners examines thoroughly, every applicant for a certificate of qualification to practice medicine in any of its branches or departments, upon the production of his diploma from a college recognized by the American Institute of Homeopathy, upon the following named subjects: anatomy, physiology, surgery, gynecology, materia medica, therapeutics, obstetrics and chemistry.

Each board meets regularly, semi-annually, at some central point in its circuit, to conduct examinations and grant certificates. The boards give at least one month's public notice of their meeting by publication in at least one newspaper published in the circuit in which the meeting is to be held, and if there is no such newspaper published in the circuit, it is posted in three conspicuous places in the circuit. The Board of Homeopathic Medical Examiners meets in the city of Jacksonville to conduct examinations and grant certificates, and they give at least one month's public notice of the time and place of their meeting by publication in at least one newspaper published in the state.

Any two members of a board may grant a certificate of qualification to an applicant; and any member of a board has authority to grant a temporary certificate to an applicant, upon examination, until the next regular meeting.

The examination fee is \$10.00.

The above does not apply to midwives, for whom there is no special legislation.

GEORGIA.

Board Representing the Regular School of Medicine.

J. B. S. Holmes, M. D.....	President	Griffin
E. R. Anthony, M. D.....	Secretary	Griffin

* No reply received from the remaining districts or from the Homeopathic Board.

Board Representing the Homeopathic School of Medicine.

M. A. Cleckley, M. D., President	Augusta.....
R. E. Hinman, M. D., Secretary.....	Atlanta.....	Term expires 1900.....

Board Representing the Eclectic School of Medicine.

W. V. Robertson, M. D.; President	Atlanta
M. T. Salter, M. D., Secretary	Atlanta	Term expires 1899.....

All applicants for a license to practice medicine in this State must pass an examination before one of the boards mentioned.

Each board at any of its meetings will examine only persons making application to it, who are graduates of an incorporated medical college, school or university, that requires not less than three full courses of study of six months each, who desire to commence the practice of medicine or surgery in the state, and who shall not be exempt from the examination; but any person from any other state who has graduated prior to April 1, 1895, at a lawfully chartered medical college requiring two full courses of study, is eligible for examination and license: *Provided*, that the applicant for such examination holds a lawfully conferred diploma from an incorporated medical college which conforms to the system of practice represented by the board to which the application is made, unless the applicant desires to practice a different system from that recognized in his diploma; then he shall appear before the board which represents the system that he proposes to practice. In no event shall an applicant who stands rejected by one of said boards be examined or licensed by either of the said boards. If the applicant desires to practice a system not represented by any of the boards, he may elect for himself that before which he will appear for examination.

Each board holds two regular meetings in each year, one at such time on or just before graduation day of each medical college in this State. The board of examiners, after consultation with the faculty, fixes a time for each meeting to suit a majority of the students graduating; the other on the second Tuesday in October. The meetings of each board are held in such city as each board determines for itself. Special meetings may be held upon the call of the president and two members of each board; but there can not be less than two regular meetings a year.

A fee of \$10.00 must be paid to the board by each applicant before an examination is had. In case an applicant fails to pass a satisfactory examination before any board, he will not be permitted to stand any further examination before any of the boards within the next three months. The fee prescribed shall not be paid for any subsequent examination. When, in the opinion of the president of any board, an applicant has been prevented by good cause from appearing before the board, the president and two members of the

board designated by him, will constitute a committee to examine the applicant, and, if they see fit, grant him a certificate, which shall have the same force and effect as though granted by a full board, until the next regular meeting of the board, when, if the applicant fails to appear for examination, the certificate becomes void.

Midwives are exempted from the provisions of the law.

HAWAII.

It is probable that in this territory a Board of Health will be appointed, which, in addition to the other duties devolving on it, will issue certificates to graduates of reputable medical colleges, entitling them to practice. Under the laws of the Republic of Hawaii, graduates of "good colleges in the United States" were issued certificates after passing an examination before the Board of Health.

IDAHO.

State Board of Medical Examiners.

George Collister, M. D.....	President.....	Boise.....
C. L. Sweet, M. D.....	Secretary.....

The law regulating the practice of medicine and surgery passed by the fourth Legislature and approved March 12, 1897, created a Board of Medical Examiners consisting of three regular, two eclectic and one homeopathic physicians.

Under this Act all persons desiring to commence the practice of medicine or surgery in this State must make a written application to the State Medical Examining Board. If the board be not in session at the time the applicant should transmit to the secretary with the application his diploma, together with an affidavit showing that it is genuine and that he is the rightful possessor and the identical person named in the diploma, and that the same was obtained by pursuing a regular course of study or examination in the institution named, and setting forth that he is a citizen of the United States or has declared his intention to becoming such. The president and secretary of the board can issue to the applicant a temporary license, which remains in force until the next meeting of the board, when the applicant must appear in person and present the affidavit and other credentials required and be examined in the following branches: Anatomy, physiology, pathology, chemistry, histology, materia medica, therapeutics, preventive medicine, surgery, theory and practice of medicine, obstetrics, disease of women and children, disease of the nervous system, disease of the eye and ear, hygiene, toxicology and medical jurisprudence. Candidates of the homeopathic and eclectic

schools are examined and rated by the homeopathic and eclectic members of the board, as the case might be, in the special tenets of their respective schools.

The fee for an examination is placed at \$15.00; for a temporary license, \$5.00.

Prior to the passage of this act it was simply necessary to file for record with the county recorder of the county in which one was about to practice a diploma from a *bona fide* medical school.

An interesting decision relative to this Act was rendered by the Supreme Court of Idaho on December 5, 1897.

There are no laws regulating midwifery.

* ILLINOIS

State Board of Health.

L. Adelsberger, M. D	President.....	Waterloo.....
J. A. Egan, M. D	Secretary.....	Springfield.....

Proposed Medical Examiner's Bill.

A BILL for an act to establish a State Board of Medical Examiners, prescribing its powers and duties, to provide for the licensing of practitioners of medicine and midwifery, and to regulate the practice of medicine and midwifery in the State of Illinois, and imposing penalties and to repeal all acts or parts of acts in conflict therewith.

SECTION 1. *Be it enacted by the People of the State of Illinois represented in the General Assembly:* That a board of examiners to be know as the "State Board of Medical Examiners" shall be appointed as follows: Within sixty days after this act shall take effect, the Governor shall appoint seven (7) physicians of recognized professional ability and standing, who have received the degree of Doctor of Medicine from some recognized college in good standing with the State Board of Health, as members of said Board, no one school of practice to have a majority, who shall hold their office until their successors are appointed and qualified. The members of said Board so first appointed, shall determine by lot, their respective terms of office, so that the term of one member shall expire on December 31, 1899, and the term of one member on December 31st in each year thereafter And at the expiration of the term of office of each of the members of the Board, the Governor shall appoint his or their successor or successors, whose term of office shall be for the period of seven (7) years; and all vacancies occurring in the membership of the Board, by resignation or otherwise, shall be filled by the Governor, and all appointments on said Board shall be made from

* For the requirements now in force see pages XIII-XXIV *ante*.

physicians having the qualifications prescribed herein for members of the first Board: *Provided, however*, that all appointments shall be made with the advice and consent of the Senate, but appointments made when the Senate is not in session may be confirmed at the next ensuing session thereof.

§ 2. The said Board shall, within thirty days after its appointment, meet and organize by electing a president, vice-president and treasurer from among its members, and a secretary who shall be a legally qualified physician, not a member of the Board. Such officers shall hold office until the next annual meeting of the Board, or until their successors are elected and qualified. The Board shall prescribe the duties of its officers, and shall require the treasurer to give a satisfactory bond. The Board shall adopt and have a common seal, and the president or presiding member and the secretary shall be empowered to administer oaths in taking testimony, or in any matter pertaining to the duties of the Board. A majority of the Board shall constitute a quorum for the transaction of any business. It shall adopt such rules, regulations and by-laws not inconsistent with the laws of this State and of the United States, as it may deem necessary or proper, to enable it to properly perform its duties and transact its business.

§ 3. The annual meeting of the Board for the election of officers shall be held in the State Capitol on the second Tuesday of January, in each year. The Board shall also hold regular meetings on the second Tuesdays in April, July and October in each year, at such places as it may determine, and may hold other meetings at such times and places as it may deem necessary, or its duties may require. It shall keep an official record of all its proceedings and a complete file of all applications for licenses, together with the correspondence pertaining thereto, and of all examination papers, and shall make a report of its transactions, annually, to the Governor, which shall include a statement of all moneys received and disbursed by it, and an official list of all physicians and midwives authorized to practice in this State.

§ 4. No person shall hereafter begin the practice of medicine or any of the branches thereof, in this State, without first applying for and obtaining a license from said Board so to do. Applications shall be in writing, and in the form prescribed by the Board, and shall be accompanied by the examination fees hereinafter specified, and with proof that the applicant is of good moral character and has received a diploma conferring upon the applicant the degree of Doctor of Medicine from some legally incorporated medical institution in good standing, as may be determined by the Board, at the time of issuing said diploma. When the application and diploma aforesaid have been inspected by the Board, and found to comply with the foregoing provisions, the Board shall notify the applicant to appear before it for examination, at the time and place mentioned in such notice. Such examination shall be in the English language, and embrace those general subjects and topics, a knowledge of which is commonly and generally required of candidates for the degree of Doctor of Medicine by reputable medical colleges in the United States. No

person shall hereafter begin the practice of midwifery in this State without first applying for and obtaining a license from said Board so to do. Applications shall be in writing, and in the form prescribed by the Board, and shall be accompanied by examination fee hereinafter specified and with proof that applicant is of good moral character, and has received a diploma from a school of midwifery, complying with the requirements of the Board. When the application and proofs aforesaid have been inspected by the Board, and found to comply with the foregoing provisions, the Board shall notify the applicant to appear before it for examination, at the time and place mentioned in such notice. Such examination shall be in the English language, and of such character as to determine the qualifications of the applicant to practice midwifery. All examinations provided for in this act, shall be conducted under rules and regulations prescribed by the Board, which shall provide for a fair and wholly impartial method of examination. If the applicant successfully passes his or her examination, the Board shall issue to such applicant a license authorizing him or her to practice medicine or midwifery, as the case may be, in this State. Such license shall be in such form as may be determined by the Board, and in accordance with the provisions of this act: *Provided, however*, any willful violation, on the part of an applicant, of any of the rules and regulations of the Board governing examination, shall be sufficient cause for the Board to refuse to issue a license to such applicant.

§ 5. The examination fee for those desiring to begin the practice of medicine under the foregoing section shall be \$20.00 and for those desiring to begin the practice of midwifery the examination fee shall be \$15.00, and in all cases the examination fee must accompany the application.

§ 6. That all persons who, at the date of taking effect of this act, are qualified to practice medicine or midwifery, under the laws of this State, in force at the time of the passage of this act, and who desire to continue in practice, shall, within six months after the appointment and organization of the Board of Examiners, provided for in this act, apply to such Board for a license, which shall be issued by the Board on payment of a fee not to exceed fifty cents: *Provided*, the Board may refuse to issue such license to any such applicant for cause as hereinafter provided. All licenses issued under the provisions of this and the foregoing sections shall expire on a date to be named therein, not more than one year from the date of issue, so that all licenses outstanding at one time shall, as nearly as may be, expire on the same date.

§ 7. That all licenses issued under the provisions of this act, at the date of their expiration, be renewed for a period of one year, upon payment to the Board of a renewal fee not to exceed fifty cents, which renewal shall be evidenced by a new license: *Provided, however*, the Board may refuse such license for cause as hereinafter provided.

The failure of a licentiate to obtain a renewal of license at the date of its expiration shall render such practitioner liable to the penalties

provided for by this act for practicing without a license, but will not prevent application for a renewal license at some subsequent date, not later than one year from the date of expiration of his former license, within which time, subject to all the conditions for renewals heretofore provided for, the Board may issue a renewal license, which shall expire at the same date as if issued at the date of expiration of his former license. *Provided, however,* retirement from practice or removal from the State shall not deprive the licentiate of a right to renewal within five years after such retirement or removal. All original licenses issued by the Board shall be signed by all the members of the Board. All renewals shall be signed by the President and Secretary of the Board and attested by the seal of the Board.

(NOTE.) There seems to be some misapprehension as to the object of the renewal fee, which makes an explanation necessary. The principal object of this provision is to overcome a legal difficulty in the matter of revoking and withholding licenses.

A licensing body which is given discretionary power may refuse to exercise the authority conferred, in which event the only way to compel the exercise of that authority is by *mandamus* proceeding. The records of the courts show that it is only in cases where such discretionary power is manifestly abused that a *mandamus* will lie. On the other hand, where a license is granted, that license becomes a vested right during the time for which it is granted, the exercise of which right even the licensing body can not take away except by due process of law. This has been proven by the experience of our State Board of Health to be burdensome, expensive and impracticable; hence the necessity not only for a law which operates as a *check* upon disreputables obtaining a license, but also to provide some practical means for *taking away* that license for good cause when it has been granted. This feature of the law restores to the licensing body, once a year, that discretionary power which seems to be the only practicable way to reach this class, who make the enactment of such laws necessary. In other words, we place them on the offensive instead of, as now, on the defensive, which, we are informed upon the very best legal authority, will make practicable the suppression of the most obnoxious features of quackery and will enable the Board to exclude from the privileges of practice the disreputables already in the State. In addition, the license fee is the contribution of each reputable physician in the State to the treasury of the Board of Examiners to enable it to make a successful fight against the quacks and should not be considered as in any sense a tax, but rather as an insurance premium against fraud. Furthermore, the fees charged for the licensing of new practitioners are not sufficient to support the Board, and in order to secure the adoption of a law of this kind it will be necessary to show the Legislature that it will not carry with it any appropriation from the State treasury. The failure to make a provision of this kind is the principal element of weakness of the New York law, which otherwise works well. The committee on medical legislation in the New York State Society, in their report last year, had this to say:

"Your committee take this occasion to refer to the defect in the medical practice law which makes no adequate provision for the revocation of licenses of physicians for cause. This defect we believe should be corrected, as unfortunately some regularly licensed physicians subsequently become notoriously irregular and offensive as to their methods in practice, but are still under the protection of their legally obtained license. Unjust advantage may be taken in this manner by unscrupulous physicians, and it has come to the knowledge of this committee that in other states which are infested by this class that a strong movement is on foot to provide for revocation in such cases."

In adopting the license feature we are following the precedent established by the pharmacy law. When this law was first proposed it was violently opposed by a large majority of the pharmacists, but it has worked so well that

its repeal would be as strenuously opposed. We believe it will prove even more satisfactory to the medical profession. In fact, we regard this provision as the strength of the bill.

§ 8. The Board may refuse to issue any license provided for by this act, whether an original or renewal license, if it shall appear that the person applying therefor has been guilty of persistent inebriety, or the practice of criminal abortion, has been convicted of a crime involving moral turpitude, or has, by false or fraudulent representations, obtained practice in his or her profession, or by the false or fraudulent practice of his or her profession has obtained money or any other thing of value: *Provided, however,* no person shall be finally refused a license until after the applicant for the same has been given at least thirty days' notice of the grounds for such refusal, and opportunity given the accused for a hearing before the Board to show cause why the Board shall not finally refuse his or her license, at which hearing the accused shall be entitled to be represented by counsel.

§ 9. That any person shall be regarded as practicing medicine within the meaning of this act who shall operate for or upon, prescribe for, or otherwise treat, or profess to heal or cure any physical ailment, or any physical injury to or deformity of another: *Provided,* nothing in this act shall be construed to apply to the practice of dentistry or pharmacy, to the administration of domestic or family remedies in cases of emergency, to commissioned surgeons of the United States army or navy, or marine hospital service, in the discharge of their official duties.

§ 10. That any itinerant vender of any drug, nostrum, ointment or appliance of any kind intended for the treatment of disease or injury who shall vend or sell any such drug, nostrum or appliance, or who shall, by writing or printing, or any other method, profess to the public to cure or treat disease or deformity by any drug, nostrum or appliance, shall pay a license of one hundred (100) dollars per month into the treasury of the Board, to be collected by the Board in the name of the People of the State of Illinois, for the use of said Board. And it shall be lawful for the State Board of Medical Examiners to issue such license on application made to said Board, said license to be signed by the President of the Board and attested by the Secretary with the seal of the Board; but said Board may, for sufficient cause, refuse said license. Any such itinerant vender who shall vend or sell any such drug, nostrum, ointment or appliance, or who shall, by writing or printing, or any other method, profess to cure or treat diseases or deformity by any drug, nostrum or appliance, without a license so to do, shall be deemed guilty of a misdemeanor and upon conviction thereof shall be punished for the first offense by a fine of not less than one hundred dollars, or by imprisonment in the county jail for a period of not less than thirty nor more than ninety days, or by both fine and imprisonment, and for each subsequent offense the penalty shall be double that of the preceding one.

§ 11. That the office expenses of the Board, and all expenses arising from the proper enforcement of the provisions of this act, shall be paid from the fees above provided for, and from such fines as may accrue to the Board for the violation of the provisions of this act.

§ 12. That the salary of the Secretary of the Board shall be fixed by the members of the Board, and shall not exceed the sum of \$3,000 per annum. The members of the Board shall receive no compensation, but their traveling expenses and other expenses incurred while employed on the business of the Board shall be paid.

§ 13. That any person hereafter practicing or attempting to practice medicine or midwifery in this State without having a license so to do, as herein provided for, or contrary to the provisions of this act, shall be deemed guilty of a misdemeanor and upon conviction thereof shall be punished for the first offense by a fine of not less than one hundred dollars and not exceeding two hundred dollars, or by imprisonment in the county jail for a period of not less than thirty days nor more than ninety days, or by both fine and imprisonment, and for each subsequent offense the penalty shall be double that of the preceding one: *Provided*, that the provisions of this section shall not apply, for a period of six months after the appointment and organization of the first Board, to those persons who are qualified to practice medicine and surgery or midwifery under the laws of this State in force at the time of the passage of this act.

§ 14. That all suits for the recovery of the several penalties prescribed in this act shall be prosecuted in the name of "The People of the State of Illinois," in any court having jurisdiction, and it shall be the duty of the State's Attorney of the county where such offense is committed to prosecute all persons violating the provisions of this act, upon proper complaint being made. All penalties shall be paid into the treasury of the State Board of Medical Examiners.

§ 15. All acts and parts of acts inconsistent or in conflict with the provisions of this act are hereby repealed.

NOTE. This bill has been endorsed and recommended by the State Board of Health and by committees representing the Illinois State Medical Society, the Illinois Homeopathic Medical Association, and the Illinois State Eclectic Medical Society.

INDIANA.

State Board of Medical Examiners.

W. T. Gott, M. D.	President.....	Crawfordsville
W. F. Curryer, M. D.	Secretary.....	Indianapolis

Any person desiring to begin the practice of medicine, surgery or obstetrics in this state must procure from the State Board of Medical Registration and Examination a certificate that he is entitled to a license to practice medicine, surgery and obstetrics in the state, and in order to obtain such the applicant must submit to the State Board of Medical Registration and Examination his diploma, with

an affidavit showing the time and under what circumstances it was received. The application should be accompanied by the affidavits of two freeholders, residents in the same county in which the applicant resides, stating that he is the person named in the diploma and application for certificate. In the event of an applicant for a certificate from the board presents a diploma from a medical college which is not recognized as maintaining a sufficiently high grade or standard of medical education as defined and fixed in the records of the Board, the applicant will have the privilege of being examined as to his qualifications to practice medicine, surgery and obstetrics in such manner as the board provides, and if he passes an examination satisfactory to the board, he shall receive a certificate the same as if he had presented a satisfactory diploma and other evidence of qualifications for the practice of medicine. But if he should fail to pass such examination he will not be permitted to submit to another examination until twelve months from the time of the first.

The applicant must be a bona fide resident of the county and state.

Examinations are held on the second Tuesday of January, April, July and October of each year. Applications must be on file at least five days before the examination.

The fee for a certificate upon presentation of a diploma is \$6.00; for an examination, \$25.00, \$15.00 of which is returned to the applicant in the event of his failing to pass. The fee must be paid when application is made.

RESOLUTIONS PASSED BEARING UPON THE STANDING OF MEDICAL COLLEGES.

OFFICE OF
STATE BOARD OF MEDICAL REGISTRATION AND EXAMINATION. }
INDIANAPOLIS, IND., July 14, 1897. }

Resolved, That all medical colleges requiring a minimum of three years' study of medicine and two courses of lectures for graduation prior to 1886, and possessing proper facilities for teaching and a faculty embracing the chairs of anatomy, physiology, chemistry, materia medica, therapeutics, medicine, surgery and obstetrics, shall be recognized as in good standing, and diplomas issued by the same and properly verified shall entitle the holders thereof to register as graduates in medicine under the laws of Indiana, providing that no certificate shall be issued to any applicant upon proof that his or her diploma has been obtained fraudulently or in violation of the published rules of the college issuing the same.

Resolved, That for the 11 years ending April 14, 1897, all medical colleges exacting the foregoing requirements and possessing facilities and a faculty, as specified in the foregoing resolution, shall, by virtue of such facts, be recognized as in good standing to and including the year 1892, but that no medical college shall be recognized as in good standing which has not, since 1892, possessed the foregoing facilities and faculty, and which has not, in addition, exacted an entrance qualification and attendance upon three regular courses of lectures as a condition of graduation.

Resolved, That on and after July 1, 1899, no medical college will be recognized as in good standing which does not require the entrance qualifications prescribed by the Association of American Medical Colleges as a prerequisite for matriculation, which does not possess an adequate equipment for teaching medicine, which has not clinical and hospital facilities, and which does not have an active and competent faculty embracing the departments of anat-

omy, physiology, chemistry, materia medica, therapeutics, medicine, surgery, obstetrics, histology, pathology, bacteriology, ophthalmology, otology, gynecology, laryngology, dermatology, hygiene and state medicine, and which does not enjoin attendance upon eighty per cent of four regular courses of instruction, of not less than 26 weeks each, in four different years, and which does not exact an average grade of 75 per cent on an examination as a condition of graduation.

Midwives are examined and licensed, if found proficient.

INDIAN TERRITORY.

Board of Medical Examiners.

L. C. Tenneut, M. D.....	President.....	McAllister.....
J. C. McClendon, M. D.....	Secretary.....	Coalgate.....

In the Cherokee Nation there is a board of examiners to examine all applicants.

The fee for examination is \$25.00.

There seems to be no penalty for illegal practice.

The above applies to the Choctaw Nation also, except that ten dollars must be paid each year for "a permit," and that all persons violating the law will be held as "intruders" liable to be removed by the United States Government.

In both nations the laws are practically null and void.

From the Creek, Peoria, Wyandotte and other nations no information could be obtained.

IOWA.

State Board of Medical Examiners.

J. E. Scroggs, M. D.....	President.....	Keokuk.....
J. F. Kennedy, M. D.....	Secretary.....	Des Moines.....

The following facts are stated for the information of those desiring to practice medicine, surgery or obstetrics in any of their branches in the State of Iowa:

1. The *only* right to engage in such practice is a certificate from the Board of State Medical Examiners. An application on file, though in due form, by one desiring examination, or by one having graduated from a college in good standing, confers no legal right to practice. A permit from the Pharmacy Commission to sell proprietary medicines, confers no right to assume any of the duties of a physician.

2. The Board issues two kinds of certificates and a license:

A. Upon a diploma from a medical college recognized by the Board as "in good standing" for the session preceding the issuance of such diploma.

B. Upon a successful examination before the Board, and itinerant physician's license.

The Board in no case issues temporary certificates or licenses, nor certificates to practice midwifery or any specialty.

* * * * *

7. The meetings of the Board are held quarterly, on the first Thursday of February, May, August and November. The examinations are held on the Tuesday and Wednesday two weeks prior to each Board meeting.

8. The fee for certificate on diploma is \$5.00. The fee for examination is \$20.00, which entitles the applicant to a re-examination, without additional fee, in case of failure.

9. The examinations are practical in character, and embrace anatomy, chemistry, materia medica and therapeutics, obstetrics, pathology, physiology, practice and surgery. Ten questions are asked upon each branch, the answers to which must be written. The Board requires a general average of 80 per cent on a scale of 100. The examinations cover two days as follows: Tuesday, anatomy, chemistry, materia medica and therapeutics and obstetrics; Wednesday, pathology, physiology, practice and surgery. In case of a failure and re-examination no credit is given for percentages gained in a former examination, but the re-examination must, as in the former one, be upon all branches.

10. Certificates upon diploma or examination, issued by other state boards do not entitle the holder to like certificates in this state, the certificates of this state only being issued upon the conditions named.

11. Itinerant physicians, whether residing in the state or not, must, in addition to either certificate name in "2," procure from the Board a special itinerant's license, for which he shall pay annually to the state treasurer, in advance, the sum of two hundred and fifty dollars. The license may be applied for at the same time or session of the Board that the certificate is issued.

* * * * *

13. From and after January 1, 1899, all persons beginning the practice of medicine in the State of Iowa, must submit to an examination as set forth in this chapter, and in addition thereto shall present diplomas from medical colleges recognized as in good standing by the State Board of Medical Examiners; and all persons receiving their diplomas subsequent to January 1, 1899, shall present evidence of having attended four full courses of study of not less than twenty-six weeks each, no two of which shall have been given in any one year.

Under Section 13, after the date above given, no one can be admitted to practice except upon a successful examination; *no one can be admitted to such examination* except upon a diploma from a college in good standing, and no college issuing diplomas after January 1, 1899, can be regarded as in good standing except upon conditions specified in the section above quoted.

Graduates from colleges in good standing with this Board who, during their college course, have devoted regular time to the study of the following branches: biology, botany, chemistry, physics, histology, physiology and human anatomy, may be admitted to the second year of the medical course. Students entering under these conditions shall take instruction in *materia medica* and pharmacy during the first year of their medical course, and pass the examination in these branches at the end of their first session.

KANSAS.

State Board of Health.

H. Z. Gill, M. D.....	Secretary.....	Pittsburg.....

Gen. Stat. 1897, Vol. 2, 109.

SEC. 392. That it shall be unlawful for any person within the limits of the State of Kansas, who has not attended two full courses of instruction and graduated in some respectable school of medicine, either of the United States or some foreign country, or who can not produce a certificate of qualification from some state or county medical society, and is not a person of good moral character, to practice medicine in any of its departments for reward or compensation, for any sick person within the State of Kansas: *Provided*, that in all cases, when any person has been continuously engaged in the practice of medicine for a period of ten years or more, he shall be considered to have complied with the provisions of this act, and that where persons have been in continuous practice of medicine for five years or more, shall be allowed two years in which to comply with such provisions.

SEC. 393. Any person living in the State of Kansas, or any person coming into said State, who shall practice or attempt to practice medicine in any of its departments, or perform or attempt to perform any surgical operation upon any person within the limits of said State in violation of Section 1 of this act, shall, upon conviction thereof, be fined in not less than \$50 nor more than \$100 for such offense; and upon conviction for a second violation of this act shall, in addition to the above fine, be imprisoned in the county jail of the county in which said offense shall have been committed, for the term of thirty days, and in no case wherein this act shall have been violated shall any person so violating receive compensation for service rendered: *Provided*, that nothing herein contained shall in any way be construed to apply to any person practicing dentistry.

[The implied contract with a surgeon is, that he possesses reasonable skill in his profession, and will use reasonable care and diligence. *Branner v. Stormont*, 9 Kan. 51.]

[Under Chapter 68 of the Laws of 1870, it is unlawful for a person to furnish medicine as a practicing physician unless authorized to practice medicine in accordance with the provisions of the statute. *Underwood v. Scott*, 43 Kan. 714.]

RESOLUTIONS OF THE BOARD.

Resolved, That all persons practicing medicine in the State of Kansas by virtue of diplomas from the following so-called medical colleges, are doing so illegally, and are subject to prosecution under the statutes of Kansas, and are hereby required to cease practice until legally qualified to do so according to law: Wisconsin Eclectic Medical College; Illinois Health University, Chicago; also the Independent Medical College. County health officers are hereby duly notified of this action, and will govern themselves accordingly. Persons registering under diplomas from the above so-called institutions will not have their names published in the annual report in the list of registered physicians.

“The Divine Healer on Top.—The Kansas State Board of Health recently applied to the Attorney General for a decision concerning the enforcing of the Medical Practice Law in that State. The legal luminary cogitated for a while and then delivered the opinion that the magnetic healers and the hypnotists, and all other quacks except Divine healers, can be prosecuted; but adds that the Divine healers claim their power to come from Jehovah, and that, as he understands it, the right and privileges of Jehovah can in no way be regulated or restricted by the statutes of Kansas.”—Medical Record.

KENTUCKY.

State Board of Health.

J. M. Mathews, M. D.	President.....	Louisville
J. N. McCormack, M. D.	Secretary.....	Bowling Green.....

No person can practice medicine within the limits of this state who has not exhibited and registered in the county clerk's office of the county in which he resides, his authority, together with his age, address, place of birth and the school or system of medicine to which he proposes to belong, and the person so registering must subscribe and verify by oath, before such clerk, an affidavit containing such facts, which, if wilfully false, shall subject the affiant to conviction and punishment for perjury.

The authority to practice medicine is a certificate from the State Board of Health, which, upon application, issues a certificate to any reputable physician who is practicing, or who desires to begin the practice of medicine in this state who possesses any of the following qualifications: First, a diploma from a reputable medical college legally chartered under the laws of this state. Second, a diploma from a reputable and legally chartered medical college of some other state or county endorsed as such by the State Board of Health. Third, satisfactory evidence from the person claiming the same that such person was reputably and honorably engaged in the practice of medicine in this state prior to February twenty-third, one thousand eight hundred and sixty-four. Applicants may present their credentials by mail or proxy, and the board issues its certificates to applicants as are entitled as though he was present. All certificates are signed by the president and secretary. and attested by the seal of the board, and not more than \$2.00 is charged for any certificate.

Nothing in this law can be so construed as to authorize any itinerant doctor to register or to practice medicine in any county in the state.

"To open an office for such purpose, or to announce to the public in any other way a readiness to practice medicine in any county is to engage in the practice of medicine within the meaning of the law."

No foreign diplomas are recognized.

Midwives are not licensed.

LOUISIANA.

State Board of Medical Examiners.

Louisiana State Medical Society.

E. S. Kennedy, M. D., President.....	New Orleans.....	Term expires 1904.....
H. S. Cocram, M. D., Secretary	Sept. 1, 1898

Hahnemann State Society.

E. A. Murphy, M. D., President.....	New Orleans.....	Term expires 1899.....
C. R. Mayer, M. D., Secretary.....	Aug. 24, 1898

All persons before entering upon the practice of medicine in any of its branches, dentists excepted, in this state must present to the Board of Medical Examiners a diploma from a medical college in good standing, as is determined by the board, and pass a satisfactory examination before the board upon the following branches: anatomy, physiology, chemistry, principles of medicine, obstetrics, physical diagnosis, surgery, materia medica and hygiene. The person shall also satisfy the board that he or she is twenty-one years of age, of good moral character, and possesses at least a fair primary education.

The board, composed of physicians and surgeons recommended by the Louisiana State Medical Society, examines all applicants who propose to practice any other than the homeopathic system of medicine, and the board composed of physicians recommended by the Hahnemann State Medical Society examines all applicants who propose to practice the homeopathic system of medicine. The certificate of either board is conclusive proof of the efficiency of the applicant.

The regular meetings of the board are held at least twice in each year in the city of New Orleans, but the president can call special meetings elsewhere in the state whenever the boards deem necessary or expedient.

The fee for a certificate is \$1.00. For an examination, \$10.00. If the applicant fails to pass a satisfactory examination, and no certificate is issued to him, \$5.00 of the fee is retained. The

fee for a certificate of temporary permit is \$5.00, fee to be accredited to the applicant when he applies to the boards for a permanent permit.

To prevent delay and inconvenience one member of a Board of Medical Examiners may grant a permit, after a satisfactory examination, to any applicant. Such temporary permit shall not continue in force longer than until the next regular meeting of the board, but such can in no case be granted within six months after the applicant has been refused a permit by the boards.

Certain midwives are examined and licensed, others are exempted from the provisions of this act.

MAINE.

State Board of Registration.

John Lord, M. D., Chairman.....	Biddelford	Term expires July 1, 1899 1901
A. K. P. Meserve, M. D., Secretary.....	Portland.....	

All persons desiring to commence the practice of medicine in this state must be examined by the State Board of Registration of Medicine.

Each applicant must give satisfactory proof of being twenty-one years of age and of having good moral character and possessing a reasonable amount of average knowledge in the branches of science he desires to practice in. Examinations are in whole or in part in writing and of an elementary and practical character, embracing the general subjects of anatomy, physiology, pathology, materia medica, therapeutics, surgery, the principles and practice of medicine, obstetrics, or such branches as the board may deem necessary for the applicant to possess.

Examinations are held in March, July and November.

The fee for examination is \$10.00, which entitles the applicant to a re-examination within two years. A fee of \$2.00 is charged for a certificate.

Nothing in the Act "applies to clairvoyants or to persons practicing hypnotism, magnetic healing, mind cure, massage, christian science so-called, or any other methods of healing, if no poisonous or dangerous drugs are employed, nor surgical operations performed: *Provided*, Such persons do not violate any of the provisions of the Act in relation to the use of M. D. or the title of Doctor or Physician."

Midwives are not licensed.

MARYLAND.

*State Board of Medical Examiners**Representing the Medical and Chirurgical Faculty of Maryland.*

Representing the Maryland State Homeopathic Society.

T. E. Sears, M. D.....	President.....	658 West Franklin St., Baltimore
H. J. Evans, M. D.....	Secretary.....	N. E. Cor. Cary & Fayette Sts., Baltimore

Physicians and surgeons of good moral and professional standing, graduates of a medical college or university of good standing, or having a certificate or license from a board of medical examiners of any state, where the requirements for practice are equal to those required in this state, may make application to the president or either board of medical examiners of the state. The application shall be made under oath and shall state when and how long the applicant has been engaged in the practice of medicine and surgery and from what medical college, university or other institution of learning he graduated. The Board of Medical Examiners has the authority and discretion to require applicants to undergo an examination as set forth below, or may require the applicant to submit to a special examination, the terms and methods of which shall be prescribed by the board.

The subjects are: anatomy, physiology, surgery, obstetrics, hygiene, gynecology, pathology, medical jurisprudence.

Examinations are held by the Medical and Chirurgical Faculty in Baltimore in May and November. The State Homeopathic Society meets on the second Wednesday and Thursday of February, May, August and November in Baltimore.

The fee for examination is \$10.00.

Under the law approved in 1898 midwives are registered. They must also report all cases of puerperal fever and refrain from attendance on other women during continuance of cases. "The Prevention of Blindness Act," which requires midwives to report cases of ophthalmia, is rigidly enforced.

Application for blank forms or for further information should be made to the secretary of the board before which the candidate desires to appear.

MASSACHUSETTS.

State Board of Registration in Medicine.

Chas. E. Miles, M. D., Chairman.....	Roxbury.....	Term expires 1903.....
Edwin B. Harvey, M. D., Secretary.....	Boston.....	1901.....

All applicants for a license are obliged to pass an examination,* which is conducted in writing and occupies one day.

The Board meets at Boston on the second Tuesday of March, July and November in each year.

The fee for an examination is \$10.00; for a certificate, \$1.00.

Midwives are not licensed.

MICHIGAN.

“Every graduate of any legally authorized medical college in this State, or in any one of the United States, or in any other country, shall be deemed qualified to practice medicine and surgery in all its departments, after having registered as provided.” (Extract from Act.)

A registration of a diploma with the county clerk is obligatory.

Fee, 50 cents.

No restrictions are placed upon the practice of midwifery—and none upon the practice of medicine.

MINNESOTA.

State Board of Medical Examiners.

O. C. Strickler, M. D.....	President.....	New Ulm.....
J. B. Brimhall, M. D.....	Secretary.....	St. Paul.....

All persons who hereafter commence the practice of medicine and surgery in this State must apply to the Board of Medical Examiners for a license, and the applicant, at the time and place designated by the board, or the regular meeting of the board, must submit to an examination in the following branches: anatomy, physiology, chemistry, histology, materia medica, therapeutics, preventive medicine, practice of medicine, surgery, obstetrics, diseases of women and children, diseases of the nervous system, diseases of the eye and ear, medical jurisprudence, and such other branches as the board deems advisable, and present evidence of having attended three (after 1887)

* The subjects are not known. It has, in fact, been impossible to ascertain anything concerning the requirements in Massachusetts from the State Board of Registration.

full courses of lectures at a medical college recognized by the State Board of Medical Examiners, of at least twenty-six weeks each, no two courses being within the same year.

After January 1, 1899, it will be necessary for all persons commencing the practice of medicine and surgery to submit to an examination in above mentioned branches and present evidence of having attended four full courses at a medical college recognized by the State Board of Medical Examiners, of at least twenty-six weeks each, no two courses being in the same year. All examination papers on subjects requiring treatment peculiar to any school of medicine are examined, and their sufficiency passed upon by the members of the Board belonging to such school, if there are such, and their recommendation as to the proficiency of such candidates in those particular subjects is deemed final by the board. The examination is both scientific and practical, but of sufficient severity to test the candidate's fitness to practice medicine and surgery. When desired, an examination will be conducted in the presence of the dean of any medical school, or the president of any medical society of this State. The applicant need not possess a diploma.

The Board meets in St. Paul on the first Tuesday of January, April, June and October. The examinations are in writing, lasting two and one-half days.

Applicants must receive a minimum marking of 75 per cent in: 1, practice of medicine; 2, practice of surgery; 3, materia medica; 4, obstetrics; 5, diseases of women and children, and a minimum marking of 65 per cent in each of the following: 1, anatomy; 2, chemistry; 3, physiology; 4, pathology and histology; 5, diseases of the eye and ear; 6, medical jurisprudence and preventive medicine.

The fee for the examination is \$10.00.

Midwives are licensed upon presentation of diplomas, or after an examination, as the board may require. Licenses are for the period of one year only.

MISSISSIPPI.

State Board of Health.

W. G. Kiger, M. D.	President	Brunswick
J. F. Hunter, M. D.	Secretary	Jackson

Every person who desires to obtain a license to practice medicine and surgery must apply in writing to the State Board of Health and be examined by this board touching his learning in the following branches of medicine: anatomy, chemistry, obstetrics, materia medica, physiology, pathology, surgery and hygiene. If the applicant be found by the board, upon examination, to possess sufficient learning in the branches named, and be of good moral character, the board will at once issue to him a license to practice medicine.

The Board meets at the Capitol on the first Tuesday of April and October in each year, for the purpose of examining applicants for licenses to practice medicine, and continues in session until all applicants are examined and the examinations are approved or disapproved. All examinations as to the applicant's learning are upon written questions and answers, and no distinction is made between applicants because of the different systems of schools of practice that may be chosen.

The Secretary of the State Board of Health may issue, under his signature, a temporary license to any one to practice medicine, which will be valid until the next succeeding meeting of the board for examining applicants. Only one temporary license will ever be issued to the same person.

All applicants must pay a fee of \$10.25 in advance.

Midwives are permitted to practice without being licensed.

MISSOURI.

State Board of Health.

E. L. Standlee, M. D.	President.....	St. Louis.....
Paul Paquin, M. D.	Secretary.....

A graduate in medicine desiring to practice in the state must present his diploma to the State Board of Health for verification. If it is found to be genuine the State Board of Health will issue its certificate to that effect. If not a graduate the person practicing medicine in this state must present himself before the board and submit himself to such examination as may be required, and if the examination is satisfactory to the examiners the board will issue a certificate.

Examinations are held quarterly at the regular meeting of the board: The January meeting is held in Jefferson City.

The fee for a certificate is \$1.00.

"Any one can practice midwifery without fear of molestation."

NOTE—It has been claimed during the past year that a decision of the Supreme Court of the state has rendered the law inoperative. In connection with this statement the following letter from Dr. Paul Paquin, the secretary of the board, under date of June 24th, 1898, will be found of interest:

"Answering your note of June 22d I beg to say that under the state law of Missouri the board is compelled to grant a license to any physician complying with said law, provided he holds a certificate from a recognized medical college in good standing, of whatever school or system. Or if an applicant has no such diploma he must pass an examination before the board, and the last regulation of the board has put the fee for same at \$20.00.

"The Supreme Court's decision on the regulations which the board adopted some years ago had the effect of completely knocking them out, so far as the right of the board to regulate the teaching of medical colleges is concerned. The board had attempted to enforce upon medical schools certain educational qualifications that students had to comply with before studying medicine, but

the court held that we had erred in this ruling and that every man from a medical college in good standing must be granted a license, provided he was not guilty of unprofessional or dishonorable conduct.

"The question now is, what constitutes a college in good standing? It was for the purpose of determining this feature that the board made several rulings, but the court held that our rulings could not determine the school's standing, but that same must be judged by the character of the individual and by the institution's general reputation. Consequently, when an applicant appears before the board all we have to consider now is the general standing of the school from its reputation with other boards, etc. The effect of this Supreme Court decision has been that the State of Missouri has been flooded with a number of physicians who had been refused certificates before, and who had graduated from inferior colleges teaching medicine but two sessions, etc. Therefore it has had a very bad moral effect, and is largely responsible for the passage of the law recognizing osteopathy, which law, being for a certain class of people, might be called class legislation, and possibly is unconstitutional."

The decision, which will be found elsewhere in this report, hardly seems as wide in its scope as thought by Dr. Paquin. The board still has the right to determine what is and what is not good standing, but it can not make rules which will apply to graduates who were in possession of their diplomas prior to the adoption of the rules. The Illinois State Board of Health has long recognized this latter fact.

MONTANA.

State Board of Medical Examiners.

W. G. Riddell, M. D.....	President.....	Helena.....
Henry Chapple, M. D.....	Secretary.....	Billings.....

All persons wishing to practice medicine or surgery in this state must apply to the State Board of Medical Examiners for a certificate and present their diplomas to the board for verification. If the diploma is found genuine and is issued by a medical school legally organized and in good standing, whose teachers are graduates of a legally organized school, at a time and place designated by the board, or at a regular meeting of said board, the applicant must submit to an examination in the following branches: anatomy, physiology, chemistry, histology, materia medica, therapeutics, preventive medicine, practice of medicine, surgery, obstetrics, diseases of women and children, diseases of the nervous system, diseases of the eye and ear, medical jurisprudence, and such other branches as the Board deems advisable, and present evidence of having attended four courses of lectures of at least six months each; but such evidence of attending such four courses of lectures will not be required of applicants graduating prior to July 1, 1898. The examination is both scientific and practical, but of sufficient thoroughness and severity to test the candidate's fitness to practice medicine and surgery. If desired, it will be conducted in the presence of the dean of any medical school or the president of any medical society of the state.

During the intervening period of the sessions of the board temporary certificates are issued by the president or secretary of the board.

The examinations are held at Helena the first Tuesday in April and October and at such other time and places as the board elects.

Candidates for examination must pay in advance to the secretary of the Board of Medical Examiners a fee of \$15 to defray the entire expense of the candidates for examination before the board. Any one failing to pass the required examination will be entitled to a second examination within six months without fee.

No exception is made. All persons desiring to practice in the state must pass an examination.

There are no laws concerning midwifery.

NEBRASKA.

State Board of Health.

B. F. Bailey, M. D.....	President.....	Lincoln.....
B. F. Crummer, M. D.....	Secretary.....	Omaha.....

No person can practice medicine, surgery or obstetrics in this state without first having obtained a certificate; and no person will receive a certificate unless a graduate of a legally chartered medical school or college in good standing, the qualifications to be determined by the State Board of Health.

The term medical school or college is defined as follows: A medical school or college requiring a preliminary examination for admission to its courses of study, and which requires as a requisite for the granting of the degree of M. D. attendance on at least three courses of lectures of six months each, no two of said courses to be held within one year, and having a full faculty of professors in all the different branches of medical education, viz.: anatomy, physiology, chemistry, toxicology, pathology, hygiene, materia medica, therapeutics, obstetrics, gynecology, principles and practice of medicine and surgery and clinical instructions in the last two named. The three-year clause does not apply to degrees granted prior to July, 1891. Holders of diplomas issued after July 1, 1898, must have attended four courses of lectures in four separate years.

The board meets at Lincoln the first Thursday of each month.

The fee for the certificate is \$5.00.

There are no regulations relative to midwives.

NEVADA.

AN ACT to Prevent the Practice of Medicine and Surgery by Unqualified Persons in the State of Nevada.

SECTION 1. No person shall practice medicine or surgery in this state who has not received a medical education and a diploma from some regularly chartered medical school, said school to have a bona fide existence at the time when said diploma was granted.

§ 2. Every physician or surgeon when about to take up his residence in this state, or who now resides here, shall file for record with the county recorder of the county in which he is about to practice his profession, or where he now practices it, a copy of his diploma, at the same time exhibiting the original or a certificate from the dean of the medical school of which he is a graduate, certifying to his graduation.

§ 3. Every physician or surgeon when filing a copy of his diploma or certificate of graduation, as required by section two of this act, shall be identified as the person named in the papers about to be filed, either by the affidavit of two persons of the county or by his affidavit taken before a notary public or commissioner of deeds for this State, which affidavit shall be filed in the office of the county recorder.

§ 4. Any person practicing medicine or surgery in this state, without complying with sections one, two and three of this act, shall be punished by a fine of not less than fifty dollars (\$50) nor more than five hundred dollars (\$500), or by imprisonment in the county jail for a period of not less thirty (30) days nor more than six months (6) months, or by both fine and imprisonment for each and every offense, and any person filing or attempting to file as his own the diploma or certificate of graduation of another, or a forged affidavit of identification, shall be guilty of a felony, and upon conviction shall be subject to such fine and imprisonment as is made and provided by the statutes of this state for said offense.

§ 5. It shall be the duty of the police, sheriff or constable to arrest all persons practicing medicine or surgery in this state who have not complied with the provisions of this act, and the officer making the arrest shall be entitled to one-half of the fine collected.

§ 6. No portion of this act shall apply to any person who, in an emergency, may prescribe or give advice in medicine or surgery in a township where no physician resides or where no physician resides within convenient distance, nor to those who have practiced medicine or surgery in this state for a period of ten years next preceding the passage of this act, nor to persons prescribing in their own family.

Approved January 28, 1875.

Midwives are not restricted.

There is practically no law. Any diploma can be registered.

NEW HAMPSHIRE.

Regent.

Hon. Fred Gowing..... Concord

State Board of Medical Examiners.

Representing the New Hampshire Medical Society.

Geo. Cook, M. D.....	President.....	Concord
J. T. Greely, M. D.....	Secretary.....	Nashua

Representing the New Hampshire Homeopathic Medical Society.

G. W. Flagg, M. D.....	President.....	Keene
R. H. Hazelton, M. D.....	Secretary.....	Lebanon

Representing the New Hampshire Eclectic Medical Society.

W. H. True, M. D.....	President.....	Laconia.....
F. L. Gerald, M. D.....	Secretary.....	Belmont

No person can hold himself out to the public as a physician and surgeon, or advertise as such, or use the title of M. D. or Dr. (or any title which shows or tends to show that the person using the same is a practitioner of any of the branches of medicine) in this state unless he is authorized or licensed and registered as required.

The Superintendent of Public Instruction, *ex-officio*, is the Regent of the State Board of Medical Examiners. He will admit to examination any candidate who pays a fee of ten dollars and submits satisfactory evidence, verified by oath, if required, (1) that he is more than twenty-one years of age, (2) is of good moral character, (3) has graduated from a registered college or satisfactorily completed a first course in a registered academy or high school, or had a preliminary education considered and accepted by the regents as fully equivalent, (4) has studied medicine not less than four * full school years of at least nine months each, including four satisfactory courses of at least six months each, in four different calendar years, in a medical college registered as maintaining at the time a satisfactory standard (the regent will accept as the equivalent or any part of the third and fourth requirements, evidence of five or more years' reputable practice, provided that such substitution be specified in the license), (5) or has either received the degree of bachelor or doctor of medicine from some registered medical school, or a diploma or license conferring full right to practice medicine in some foreign country.

Students who matriculate in a New Hampshire medical school before January 1, 1898, on the prescribed study of medicine are exempt from this preliminary requirement.

The candidates must pass examinations in anatomy, physiology, hygiene, chemistry, surgery, obstetrics, pathology and diagnosis and therapeutics, including practice and materia medica. In therapeutics, practice and materia medica all the questions submitted to any

* The increase in the required course of medical study from three to four years does not take effect until January 1, 1898, and does not apply to students who matriculate before that date, who receive the degree M. D. before January 1, 1902.

candidate are chosen from those prepared by the Board selected by that candidate and are in harmony with the tenets of that school, as determined by its State Board of Medical Examiners.

Examinations for license are given at Concord at least twice annually. They are exclusively in writing and in English.

The fee for an examination is \$10.00. If a candidate fails on first examination he may, after not less than six months' further study, have a second examination without fee. If the failure is from illness or other cause satisfactory to the boards they may waive the required six months' study.

All requirements for admission to examinations should be completed and in the hands of the regent at least one week before examinations.

Applicants examined and licensed by other state examining boards, registered by the regent as maintaining standards not lower than those provided above, and applicants who matriculate in a New Hampshire medical school before January 1, 1898, and who receive the degree of M. D. January 1, 1903, may, without further examination, on payment of five dollars to the regent, and on submitting such evidence as may be required, receive an endorsement of their licenses or diplomas conferring all rights and privileges of the regent license issued after examination.

"No reciprocity with states" is announced, however.

Midwives are not licensed.

NEW JERSEY.

State Board of Medical Examiners.

G. P. Wilbur, M. D.....	President.....	Asbury Park.....
E. L. B. Godfrey.....	Secretary.....	Camden.....

REQUIREMENTS FOR LICENSE TO PRACTICE MEDICINE AND SURGERY IN THE STATE OF NEW JERSEY, 1898-99.

1. Evidence that applicant is more than 21 years of age.
2. Certificates of moral character from not less than two physicians in good standing, one of whom must be a resident of New Jersey.
3. Candidates must be graduates from an accredited literary or scientific college, or having completed satisfactorily not less than a three years' course in an accredited high school or academy, or have received a preparatory education covering the following branches, viz.: orthography, arithmetic, English grammar and composition, geography, history of the United States, algebra and physics, or what this board may consider their equivalent.

4. Candidates must have "received a diploma conferring the degree of doctor of medicine from some legally incorporated medical college, (which in the opinion of said board was in good standing at time of issuing said diploma) in the United States, or a diploma or license conferring *the full right* to practice all the branches of medicine and surgery in some foreign country, and have also studied medicine *four years*, including *three courses* of lectures in different years in some legally incorporated American or foreign medical college or colleges *prior* to the granting of said diploma or foreign license; provided, however, that two courses of medical lectures, both of which shall be either begun or completed within the same calendar year, shall not be considered to satisfy the above requirements."

First Exemption.—Evidence of one year's service "as a member of the resident medical staff of any legally incorporated, charitable or municipal hospital or asylum," or of five or more years of reputable practice of medicine and surgery, may be accepted as equivalent to one year's study of medicine and surgery.

5. All examinations shall be written in the English language, and questions shall be, except in materia medica and therapeutics, such as can be answered in common by all schools of practice. If the applicant intends to practice homeopathy or eclecticism, the members of said board of those schools respectively shall examine said applicant in the materia medica and therapeutics of the school in which such applicant intends to practice; the examinations shall be in the following subjects, namely: (Sec. 1) materia medica and therapeutics; (Sec. 2) obstetrics and gynecology; (Sec. 3) practice of medicine, including diseases of the skin, nose and throat; (Sec. 4) surgery, including surgical anatomy and diseases of the eye, ear and genito-urinary organs; (Sec. 5) anatomy; (Sec. 6) physiology; (Sec. 7) chemistry; (Sec. 8) histology, pathology and bacteriology; (Sec. 9) hygiene and medical jurisprudence.

Second Exemption.—"Applicants examined and licensed by, or who are or have been members of state examining and licensing boards of other states, upon the payment of \$50.00 to the treasurer of said board, and on filing with the secretary of said board a copy of his or her license or certificate, certified by the affidavit of the president and secretary of such board, showing also that the standard of requirements of said board at the time said license or certificate was issued was substantially the same as that required by said board and of his or her affidavit as to the personality thereof may be granted a license by said board without further examination thereby." This exemption applies only to licentiates of the state boards of medical examiners of New York and Pennsylvania.

6. Applicants for examination must present to the secretary of this board at least *10 days* before the commencement of the examination at which he or she is to be examined, a written application on a form provided by this board, together with a certified check or money order for \$25.00, the regular examination fee. This form will be furnished by the secretary upon request. When returned to the secretary for filing for the examination, it must bear the seal of the medical institution from which the applicant was graduated, and be accompanied by certificates of academic education, embracing at least the branches set forth in paragraph 3. If unable to furnish

such certificates, an applicant may take a special examination before the State Superintendent of Public Instruction of New Jersey, whose certificate is accepted by this board. The fee will be returned to applicants failing to pass the examination.

7. The regular examinations of the board are held in the State House at Trenton, on the third Tuesday of June and September. Applications for the proper blank form for the June examination should be made early in May, and for the September examination in the latter part of July. Neither academic nor medical diplomas should be sent to the secretary, unless requested.

* * * * *

9. A temporary license may be granted to a legally qualified physician of another state to take charge of the practice of a legally qualified physician of this state, temporarily, during the latter's absence from this state, upon written request on the blank form of this board and the payment of the regular fee. This applies to a period of not less than two weeks nor more than four months. A temporary license will not be granted under any other conditions.

Midwives are examined and licensed.

NEW MEXICO.

Territorial Board of Health.

W. R. Tipton, M. D.	President.....	Las Vegas.....
J. M. Cunningham, M. D.	Secretary.....

No person can practice medicine in any of its departments in this territory unless he possesses the qualifications required by the act regulating the practice of medicine. If a graduate in medicine he must present his diploma, by mail or in person, to the Territorial Board of Health for verification, and if the diploma is found genuine and from a legally chartered medical institution in good standing the Board of Health will issue a certificate. If not a graduate, the person practicing medicine in the territory must present himself before the board and submit himself to such examination as may be required. All examinations of persons not graduates or licentiates are made directly by the board and are in whole or in part in writing and of an elementary and a practical character, sufficiently strict to test the qualifications of the candidate as a practitioner.

Examination will be required of all applicants to practice medicine in New Mexico who shall graduate after July 1, 1897, from any medical college which does not require of matriculants as a minimum evidence of sufficient general education a high school certificate or its equivalent and for graduation proof of four years' study of medicine and four terms of lectures occurring in four separate years.

The previous standard of three years' study and three terms of lectures in three separate years, with the preliminary requirements of matriculants of a high school certificate or its equivalent, will be maintained for all applicants who graduate between July 1, 1890, and July 1, 1897.

If an examination is required it will be held at a convenient time and place.

The fee for issuance of a certificate upon a diploma is \$5.00; for an examination, \$20.00.

No restrictions are placed upon the practice of midwives.

L. H. Smith, M. D., President.....	Buffalo.....	Term expires 1898..... 1899.....
Arthur R. Tiel, M. D., Secretary.....	Matteawan	

All applicants for a license to practice in this state *must* pass an examination before a regents' examiner.

The regents will admit to examination any candidate who pays a fee of \$25.00 and submits satisfactory evidence, verified by oath if necessary, that he—

1. Is at least 21 years of age.
2. Is of good moral character.
3. Has the general education required preliminary to receiving the degree of bachelor or doctor of medicine in this state.
4. Has studied medicine not less than four full school years of at least nine months each, including four satisfactory courses of at least

six months each in four different calendar years in a medical college registered as maintaining at the time a satisfactory standard. New York medical schools and New York medical students shall not be discriminated against by the registration of any medical school out of the state whose minimum graduation standard is less than that fixed by statute for New York medical schools. The regents may, in their discretion, accept as the equivalent for any part of the third and fourth requirements evidence of five or more years' reputable practice, provided that such substitution be specified in the license. (The increase in the required course of medical study from three to four years does not take effect till January 1, 1898, and does not apply to students who matriculated before that date and received the degree of M. D. before January 1, 1902.)

5. Has either received the degree of bachelor or doctor of medicine from some registered medical school, or a diploma or license conferring full rights to practice medicine in some foreign country. The degree of bachelor or doctor of medicine shall not be conferred in this State before the candidate has filed with the institution conferring it, the certificate of the regents that before beginning the first annual medical course counted toward the degree unless matriculated conditionally as hereinafter specified (three years before the date of the degree), he had either graduated from a registered college or satisfactorily completed a full course in a registered academy or high school; or had a preliminary education considered and accepted by the regents as fully equivalent; or held a regents' medical student certificate, granted before this act took effect; or had passed regents' examinations as hereinafter provided. A medical school may matriculate conditionally a student deficient in not more than one year's academic work or 12 counts of the preliminary education requirement, provided the name and deficiency of each student so matriculated be filed at the regents' office within three months after matriculation, and that the deficiency be made up before the student begins the second annual medical course counted toward the degree. Students who had matriculated in a New York medical school before June 5, 1890, and students who had matriculated in a New York medical school before May 13, as having entered before June 5, 1890, on the prescribed three years' study of medicine, shall be exempt from this preliminary educational requirement.

A medical student certificate may be earned without notice to the regents of the conditional matriculation, either before the student begins the second annual medical course counted toward the degree or two years before the date of the degree for matriculation in any medical school in the four cases following:

1. For matriculants prior to May 9, 1893, for any 20 counts, allowing 10 for the preliminaries, not including reading and writing.
2. For matriculants prior to May 13, 1895, for arithmetic, elementary English, geography, spelling, United States history, English composition and physics, or any 50 counts, allowing 14 for the preliminaries.
3. For matriculants prior to January 1, 1896, for any 12 academic counts.
4. For matriculants prior to January 1, 1897, for any 24 academic counts.

But all matriculants after January 1, 1897, must secure 48 academic counts or their full equivalent before beginning the first annual medical course counted towards the degree, unless admitted conditionally as hereinbefore specified, when the deficiency must be made up before the student begins the second annual medical report counted towards the degree.

The candidate must pass examination in anatomy, physiology, hygiene, chemistry, surgery, obstetrics, pathology and diagnosis, therapeutics, practice and materia medica. The questions are the same for all candidates, except in therapeutics, practice and materia medica, and all submitted to any candidate shall be chosen from those prepared by the board selected by that candidate, and be in harmony with the tenets of that school as determined by its State Board of Medical Examiners.

Applicants examined and licensed by other state examining boards registered by the regents as maintaining standards not lower than those provided by this article, and applicants who matriculated in a New York State Medical School before June 5, 1890, and who received the degree M. D. from a registered medical school before August 1, 1895, may, without further examination, on payment of \$10.00 to the regents, and on submitting such evidence as they may require, receive from them an endorsement of their licenses or diplomas, conferring all rights and privileges of a regents' license issued after examination.

Examinations are held in New York, Albany, Syracuse or Buffalo five times yearly, in January, April, May, June and September.

The fee, as stated, is \$25.00, which entitles the applicant to a re-examination within six months.

Several counties of the state have laws governing the practice of midwifery within their municipalities. There is not any general law covering the subject.

Applications should be made to the Board of Regents at Albany for blank forms, etc.

NOTE.—The cause in the law permitting the endorsement of licenses from other state examining boards, is still inoperative, as no other state board seems to meet in all respects the New York requirements. Pennsylvania, New Jersey, New Hampshire and Missouri have more nearly approximated this standard than any other State, but in no other state are the preliminary requirements on quite the same plane as those exacted by the New York statute.

Extract from letter from the Director of the Examination Department:

“You will see that for matriculants after January 1, 1898, we can not register any medical school which, under any circumstances, permits graduates in dentistry, pharmacy, veterinary medicine, or any literary, technical or professional school to receive a degree on less than four full years' study of medicine, including four courses of lectures in different years, in a medical school registered by us as maintaining at the time a satisfactory standard. Last year, as you will see by reference to my report, we hoped to secure an amendment by which we could accept as the equivalent of the first year of medical study, evidence of graduation from a registered college after four years of general preliminary education in addition to the high school course

fixed by law as the minimum, provided that such college course included not less than the minimum required in languages, physics, chemistry and biology. A bill amending the medical law in this respect passed both houses of the 1897 Legislature, but unfortunately was not signed by the governor. We hope that this bill will become a law this year.

* * * * *

"We can, therefore, in the case of matriculants before January 1, 1898, who receive the M. D. degree *before* January 1, 1902, register medical schools with four year courses that admit graduates in dentistry, pharmacy and veterinary medicine the second year, provided that in no case is the degree given on less than the minimum requirement of *three* full years' study of medicine in a registered medical school; or register medical schools with three year courses that do *not* permit graduates in dentistry, pharmacy, etc., to receive a degree in less time."

Julian M. Baker, M. D.....	President.....	Tarboro.....
H. B. Weaver, M. D.....	Secretary.....	Asheville.....

All applicants for a certificate to practice must pass an examination in the following branches: anatomy, physiology, surgery, pathology, medical hygiene, chemistry, pharmacy, materia medica, therapeutics, obstetrics and the practice of medicine. The applicant need not possess a diploma.

Examinations are held twice yearly, and occupy four days each time.

The fee for the examination is \$10.00.

A re-examination can be had without additional cost.

Temporary licenses are issued.

There is no law regulating the practice of midwives.

NORTH DAKOTA.

State Board of Medical Examiners.

J. N. Wear, M. D., President.....	Fargo.....	
H. M. Wheeler, M. D., Secretary.....	Grand Forks.....	Term expires 1899.....

All applicants for a certificate must pass an examination before commencing the practice of medicine, surgery and obstetrics in this state, in the following branches: anatomy, physiology, chemistry, histology, materia medica, therapeutics, diseases of women and children, diseases of the nervous system, diseases of the eye and ear, medical jurisprudence and such other branches as the board deems advisable, and present evidence of having attended three courses of

lectures of at least six months each. The examinations are practical and scientific and sufficient to test the candidate's fitness to practice medicine, surgery and obstetrics. An average of 75 per cent must be obtained.

The applicant need not possess a diploma.

Examinations are held at Grand Forks on the first Tuesday of January, April, July and October of each year.

The fee for examination is \$20.00, which entitles the candidate to a re-examination.

The law regulating the practice of midwifery is not enforced.

OHIO.

State Board of Medical Registration and Examination.

N. R. Coleman, M. D.....	President.....	Columbus
Frank Winders, M. D.....	Secretary.....

A graduate in medicine desiring to practice medicine, surgery or midwifery in this state ^{as a} should, either personally or by letter or proxy, present his letter to the board for verification. Accompanying it the applicant should file his affidavit, duly attested, stating that he is the person named in the diploma and is the lawful possessor of the same, and giving his age and time spent in the study of medicine. If the board finds the diploma to be genuine, and from a legally chartered medical institution in good standing, as determined by the board, the board will issue its certificate to that effect at a regular session. No temporary certificates are issued.

The Board meets on the first Tuesday of January, April, July and October at such place as it may elect.

The fee for a certificate is \$5.00.

"REQUIREMENTS DEMANDED OF MEDICAL COLLEGES."

"*Resolved*, That all medical colleges of the United States requiring a minimum of three years' study of medicine and two courses of lectures for graduation prior to 1886, and possessing proper facilities for teaching, and a faculty embracing the chairs of anatomy, physiology, chemistry, materia medica, therapeutics, medicine, surgery and obstetrics, shall be recognized as in good standing and diplomas issued by the same and properly verified shall entitle the holders thereof to register as graduates in medicine under the laws of Ohio, providing that no certificate shall be issued to any applicant upon proof that his diploma has been obtained fraudulently or in violation of the published rules of the college issuing the same."

"*Resolved*, That for the ten years ending February 27, 1896, all medical colleges exacting the foregoing requirements and possessing facilities and a faculty, as specified in foregoing resolutions, shall, by virtue of such fact, be recognized as in good standing to and including the year 1892, but that no medical college shall be recognized as in good standing which has not, since 1892, possessed the foregoing facilities and faculty."

"*Resolved*, That on and after July 1, 1899, no medical college will be recognized as in good standing which does not require the entrance qualification prescribed by the Association of American Medical Colleges as a pre-requisite

for matriculation, which does not possess an adequate equipment for teaching medicine, which has not clinical and hospital facilities based upon a minimum municipal population of 50,000, and which does not have an active faculty embracing the departments of anatomy, physiology, chemistry, materia medica and therapeutics, medicine, surgery, obstetrics, histology, pathology, bacteriology, ophthalmology, otology, gynecology, laryngology, hygiene and state medicine, and which does not enjoin attendance upon 80 per cent of four regular courses of instruction of not less than 26 weeks each, in four different years, and which does not exact an average grade of 75 per cent on an examination as a condition of graduation, providing that the rule relative to population, as a basis for clinical and hospital facilities, shall not apply to institutions under state control, and which, by virtue of such control, receive gratuitously, patients from all parts of the state in which such colleges are located."

Midwives are examined and licensed. The examinations in midwifery are practical in character. Ten questions are asked upon each branch, the answers to which must be written. The board requires a general average of 75 per cent on a scale of 100. The fee for examination is \$10.00, which entitles the applicant to a re-examination, without additional fee, in case of failure.

Proper blanks for applying for either certificate will be issued upon application to the secretary and enclosing a stamp for postage.

OKLAHOMA.

Board of Medical Examiners.

L. Haynes Buxton, M. D.....	Supt. of Public Health ..	Guthrie.....
-----------------------------	---------------------------	--------------

No person can practice medicine in this territory unless he is a graduate of a medical college, or unless upon examination by a board composed of the superintendent of public health and two other physicians selected by the Territorial Board of Health he is found proficient in the practice of medicine and surgery and found upon proof to be actually engaged in the practice of medicine for a term of not less than five years. No person can practice unless he is of good moral character and is not an habitual drunkard. Any person possessing the qualifications mentioned shall, upon presentation of his diploma or proof by affidavit, if the same is lost or destroyed, and upon the affidavit of two reputable citizens from the county where he resides that he possesses the qualifications of a physician, to the superintendent of public health, together with a fee of \$2.00, receive a license certifying him to be a practicing physician and having the qualifications for such as prescribed.

The board meets at such times and places as may be convenient.

The fee for a certificate is \$2.00. For an examination before the board, \$20.00.

The medical college referred to above must be "a reputable institution."

These laws apply to the Osage Nation and other attached territory of Oklahoma, but not to the Indians themselves under charge of the U. S. Indian agents and still sustaining their tribal relations.

Midwives are not licensed.

OREGON.

State Board of Medical Examiners.

W. H. Saylor, M. D.....	President.....	Portland.....
Byron E. Miller, M. D.....	Secretary.....

Every person desiring to practice medicine and surgery in this state should make a written application to the board for a license, which must be supported and accompanied by an affidavit setting forth the actual time spent by the applicant in the study of medicine and surgery and when, whether such study was in an institution of learning, and if so, the name and location, and if not in such an institution, where and under whose tutorship such study was prosecuted, the time he has been engaged in actual practice, if at all, of medicine and surgery, or either of them, and where he was located during the time of such practice, his age at the time of making the application. The applicant at the time and place designated by the board, or at the regular meeting of the board, must also submit to an examination in the following branches: anatomy, physiology, chemistry, materia medica, therapeutics, practice of medicine, surgery, obstetrics, diseases of women, medical jurisprudence and such other branches as the board shall deem advisable. The examination is both scientific and practical and of sufficient severity to test the candidate's fitness to practice medicine and surgery, and is written or printed, or partly written or partly printed.

Regular examinations are held at Portland on the first Tuesday of January and July of each year.

The fee for the examination is \$10.00.

No temporary licenses are issued.

The words "unprofessional" or "dishonorable conduct" as used in this act are hereby declared to mean:

First—The procuring or aiding or abetting in procuring a criminal abortion.

Second—The employing of what are popularly known as "cappers" or "steerers."

Third—The obtaining of any fee on the assurance that a manifestly incurable disease can be permanently cured.

Fourth—The wilfully betraying of a professional secret.

Fifth—All advertising of medical business in which untruthful and improbable statements are made.

Sixth—All advertising of any medicines, or of any means whereby the monthly periods of women can be regulated or menses re-established if suppressed.

Seventh—Conviction of any offense involving moral turpitude.

Eighth—Habitual intemperance.

Midwives are not licensed.

PENNSYLVANIA.

The Medical Council.

Hon. Nathan C. Schaeffer, President.....	Harrisburg.....
Hon. Henry C. McCormick	Williamsport.....
Hon. Walter Lyon.....	Pittsburg.....

Eclectic Medical Society Board.

Henry Yeagley, M. D., President	Lancaster	Term expires 1900.....
W. H. Blake, Secretary	Philadelphia	1898.....

All applicants are examined by one of the above boards.

An applicant should deliver to the secretary of the medical council a written application for a license, together with satisfactory proof that he is more than twenty-one years of age, is of good moral character, has obtained a competent common school education, and has received a diploma conferring the degree of medicine from some legally incorporated medical college of the United States, or a diploma or license conferring the full right to practice all the branches of medicine and surgery in some foreign country. Applicants who received their degrees in medicine since the first day of July, 1894, must have pursued the study of medicine for at least three years, including three regular courses of lectures in different years, in some legally incorporated medical college, prior to the granting of the diploma or license, and after the first day of July, 1895, such applicants must have pursued the study of medicine for at least four years, including three regular courses of lectures in different years, in some legally incorporated medical college, prior to the granting of the diploma or license.

Applicants who graduate after 1899 will, in addition, be required to give evidence of a preliminary education equivalent to a high school course. Proof of this may be submitted in the application for examination.

"Applicants examined and licensed by state boards of medical examiners or state boards of health of other states, on payment of a fee of \$15.00 to the medical council, and on filing in the office of the medical council a copy of the license, certified by the affidavit of the president or secretary of such board, showing also that the standard of requirements adopted by said state board of medical examiners or state board of health is substantially the same as is provided by * * * this act, shall, without examination, receive a license."

Examinations are held twice yearly. The examination is written and occupies four days.

The fee for the examination is \$25.00, which must be paid to the secretary of the medical council when making application. A re-examination may be had within two years without an additional fee.

No temporary licenses are issued.

"Any person who shall attempt to practice medicine or surgery, either for a valuable consideration or without any charge or remuneration therefor, by opening a transient office within this commonwealth, or who shall, by hand-bill or other form of written or printed advertisement, assign such transient office or other place to persons seeking medicine or surgical advice or prescription, or who shall itinerate from place to place or from house to house, and shall propose to cure any person sick or afflicted by the use of any medicine, means or agency whatsoever, either for valuable consideration or without any charge or remuneration therefor, shall, before being allowed to practice in this manner, appear before the clerk of the court of quarter session of the county wherein such person desires to practice, and shall furnish satisfactory evidence to such clerk that the provisions of this act have been complied with, and shall, in addition, take out a license for each day and pay into the county treasury for the use of such county the sum of ten dollars therefor, whereupon it shall be the duty of such clerk to issue to such applicant a proper certificate or license on payment of the fee of five dollars for his services."—Extract from act.

There is no law regulating the practice of midwives. The practice is apparently not interfered with.

For application blanks or for further information, apply to the secretary of the medical council.

PORTO RICO.

Under Spanish rule the requirements were practically similar to those in force in Spain and Cuba. Considerable latitude, however, was accorded in the case of foreign physicians. It is probable that under the Territorial government graduates of legally chartered and reputable colleges will be allowed to practice.

RHODE ISLAND.

State Board of Health.

A. G. Sprague, M. D., President	River Point	Term expires 1903.....
Gardner T. Swarts, M. D., Secretary.....	Providence.....	Elected annually

The authority to practice medicine in this state is a certificate from the State Board of Health, which is issued to any reputable physician who is practicing, or who desires to begin the practice of medicine or surgery in this state, who possesses any of the following qualifications:

First. A diploma from a reputable and legally chartered medical college, endorsed as such by the State Board of Health.

Second. Satisfactory evidence from the person claiming the same that such person was reputably and honorably engaged in the practice of medicine or surgery in this State prior to January 1, 1892. Any person not qualified as provided, before practicing medicine and surgery in this state must present himself before the State Board of Health and submit to such examination as the board may require. They shall examine any person presenting himself and if the examination is satisfactory shall issue its certificate.

Examinations are held whenever necessary.

The fee for a certificate is \$2.00. For each examination \$10.00.

"EFFICIENCY OF THE EXAMINATION REQUIRED BY THE BOARD FOR THE ISSUANCE OF A CERTIFICATE TO PRACTICE MEDICINE IN THIS STATE."

"Under the condition whereby a certificate to practice medicine in this state may be granted, provision is made for an examination in the various branches of medicine and surgery, when a diploma from a medical school in good standing, rated as such by the State Board of Health, is not possessed by the applicant.

To be in good standing it was deemed necessary that the school issuing the diploma should have required a three year course, after the year 1891, and a four year course after 1895. *Colleges which grant advanced standing to other than medical students are considered as schools having a course of three years only.* From applicants of schools being one year short of the required time, a supplemental examination in the branches of surgery, theory and practice, obstetrics and gynecology was only required. Of applicants from other schools not having good standing legally or otherwise, and graduates of schools which are located in cities where the population of under fifty thousand, a full examination in all the eleven branches was required.

Extract from letter received from the secretary of the board:

"Our board recognizes as in good standing *only* such schools as are requiring of their matriculants a four year course. This went into effect with graduates of 1896.

"Schools which will admit to advanced standing to the second year of that course (even with examination which is essential in any event) any graduate of a dental, veterinary, pharmaceutical school, or, as is the case with some schools, a scientific school, are rated as three year schools, and a supplementary examination is required of all those presenting diplomas from such a school. It is immaterial whether the individual under consideration has spent one year or six at the school. It is the standing of the school. It is the standard of the school which we desire to *raise*, that of the individual will follow. We refuse to recognize the entire class.

"We do, however, make exceptions as to preliminary schools as follows: If a school, scientific or dental, gives the same course as the medical course in its first year, we consider that as year of medicine. Since we are unable to determine what schools are recognized as giving this satisfactory course, we can not depend upon the schools to make the selection.

"If a student enters the Harvard Dental School he has a parallel course with the medical department, omitting the dissection. If, at the end of the year, he wishes to continue in the medical and give up the dental, we consider that he has one year of medicine. If a scientific or classical college as Harvard, Brown, or other school which gives during its four years a course in the branches which are given and required by the medical school, we consider that as an equivalent. A medical school admitting to such advanced standing would be accepted, but the school must be well known to the board, and hence quite near to our borders for us to feel that we may not be imposed upon."

SOUTH CAROLINA.

State Board of Medical Examiners.

L. C. Stephens, M. D.....	President.....	Blockville
S. C. Baker, M. D.....	Secretary.....	Sumter.....

All applicants for a state certificate to practice are examined, providing they hold diplomas from any medical colleges or schools, in the following branches:

Anatomy, general and regional. physiology and histology, chemistry, toxicology, practical urinalysis, materia medica and therapeutics, surgery and surgical pathology, practice and diseases of children, obstetrics and gynecology.

An average of at least 75 per cent on the whole list of subjects must be obtained by each applicant, and he must not make less than 60 per cent on any one branch.

Examinations are held in May on the 3d Tuesday at Columbia and elsewhere as may be necessary.

The fee for examination is \$5.00, which is refunded if applicant fails to pass.

Temporary licenses are granted after an oral examination.

There is no law regulating the practice of midwifery in the State.

SOUTH DAKOTA.

State Board of Health.

R. D. Jennings, M. D....	President and Executive Officer.....	Hot Springs.....
F. H. Files, M. D.....	Secretary	Sioux Falls.....

The board of health of this state is constituted a board of public examiners, *ex-officio*, for the purpose of examining and licensing physicians to practice medicine in this state, and any person who is a graduate of a lawful medical college, who has attended three full courses of medical lectures of six months each, no two full courses within the same year, and who is of good moral character and is not an habitual drunkard, shall, upon proof of such facts to the Superintendent of

the State Board of Health, as the board may require, and on the payment of the stated fee, receive from the Superintendent of the State Board of Health a license certifying him to be a practicing physician and qualified for such as prescribed. The requirements of the three courses of lectures do not apply to those who had graduated prior to February 13, 1893.

The fee for the license is \$5.00.

There are no laws relative to midwives.

TENNESSEE.

State Board of Medical Examiners.

Heber Jones, M. D., President.....	Memphis	Term expires 1901..... 1902.....
T. J. Happel, M. D., Secretary	Trenton	

Any person wishing to enter upon the practice of medicine in this state must present himself before the State Board of Medical Examiners for examination upon the following branches: anatomy, physiology, chemistry, pathology, surgery, obstetrics and materia medica and practice. Examinations are both written and oral upon the branches specified. The written examination is conducted in the presence of the board, such time being allowed for each branch as may be agreed upon by the board. The same questions for the written examinations, in the different branches, are given to each applicant for examination, except as provided as to the different schools of medicine. The examinee is required to answer 75 per cent in value of all these questions before any license shall be granted. In the questions on materia medica and therapeutics the value of the answers given is determined by the member, or members, of the board representing the school of medicine the applicant claims to practice. All examination papers must, when finished, have a certificate appended, stating that the writer has "neither given nor received any assistance whatsoever during the examination," and must be signed by the applicant, giving his post office, age, when, how long, and under what preceptor (if any), and when, how long, and in what college he had studied medicine or attended lectures or graduated; when, where, how long, and at what places (if any) he has practiced medicine, and the school of practice chosen.

In examining the written answers of the applicant the evidences of an English education, as shown in the papers, will be considered in determining the fitness of an applicant for license to practice medicine in this state.

Examinations are held whenever necessary. The session continues for three days.

The fee for a certificate is \$5.00; for an examination, \$10.00, \$5.00 of which is returned if applicant fails to pass.

Two members of the board may grant a temporary license to any applicant who is permanently located in the state. This license will not continue in force longer than until the next regular meeting of the board. The fee for a temporary license is \$1.00, to be accredited to the applicant when he applies to the board for a permanent license.

“Examinations for temporary license are always conducted in writing, and the member of the board who examined the applicant for temporary license, after grading his papers, forwards them to the member of the board living in the same section of the state with him, who examines the papers carefully and rates them, and at once returns to the first examiner. If the average of the two ratings shall reach or exceed 75 per cent the first member who made the examination makes out and signs a temporary license and forwards the same to the second member, who then signs and forwards to the examinee.”

Midwives are not licensed.

TEXAS.

AN ACT to regulate the practice of medicine in the State of Texas. Revised statutes, 1879.

Article 3626. Said board of medical examiners (appointed in each judicial district by the district judges) shall be composed of not less than three practicing physicians of known ability and who are graduates of some medical college recognized by the American Medical Association, and who are residents of the district for which they were appointed.

Article 3629. Said board shall meet regularly, semi-annually, at some central point in their respective districts, to conduct examinations and grant certificates, as hereinafter provided; and they shall give at least one month's notice of the time and place of (each) meeting, by publication in at least one newspaper published in the district in which such meeting is to be held.

Article 3632. It shall be the duty of said board to examine thoroughly all applicants for certificates of qualification to practice medicine in any of its branches or departments, whether such applicants are furnished with medical diplomas or not, upon the following subjects, to-wit: Anatomy, physiology, pathological anatomy and pathology, surgery, obstetrics and chemistry; but no preference shall be given to any school of medicine.

Article 3633. When the board shall be satisfied as to the qualifications of an applicant they shall grant to him a certificate to that effect, which certificate shall entitle the person to whom granted to practice medicine in any county when the same has been recorded as required by article 3635.

Article 3634. Any two of the members of such board of medical examiners may grant a certificate of qualification to an applicant, and any member of such board shall have authority to grant a temporary certificate to an applicant, upon examination, until the next regular meeting of the board, at which time the temporary certificate shall cease to be of force.

Article 3635. The certificate provided for in the two preceding articles shall, before the person to whom it was granted is entitled to practice by virtue thereof, be recorded in the office of the clerk of the district court of the county in which such practitioner may reside or sojourn.

Article 3638. No person shall be permitted to practice medicine in any of its practice or departments without first having obtained and recorded a certificate of qualification from some authorized board of medical examiners as hereinbefore provided, and any person offending shall be punished as provided in the penal code.

The following are the articles of the penal code referred to in 3638:

Article 396. If any person shall practice for pay, or as a regular practitioner, medicine in this state, in any of its branches or departments or offer or attempt to practice without first having obtained a certificate of professional qualification from some authorized board of medical examiners, or without gaining a diploma from some accredited medical college and chartered by legislation of the state, or its authority, in which the same is situated, he shall be punished by a fine of not less than fifty nor more than five hundred dollars.

398. If any person shall hereafter engage in the practice of medicine, in any of its branches or departments, for pay or as a regular practitioner, without having first filed for record with the clerk of the district court of the county in which such person may reside or sojourn, a certificate from some authorized board of medical examiners, or a diploma from some accredited medical college, he shall be punished as prescribed in article 396.

Approved March 26, 1979.

Examinations are presumably held twice yearly.

The fee for the examination is \$5.00.

Article 3637. The provisions of this title shall not apply to the following persons: To females who follow the practice of midwives strictly as such.

(NOTE.) The law is inoperative. Any one possessing a document termed a diploma can practice. It is claimed, furthermore, that individuals whose diplomas have been "destroyed by fire" or those whose degrees are "in the east" can secure temporary licenses, which, like Tennyson's brook, go on forever.

Dr. R. M. Swearingen, state health officer, writes under date September, 1893:

"The law is well nigh a dead letter, inasmuch as any holder of a diploma is given the right to practice, is exempt from examination, and is only required to register his diploma in the office of the clerk of the county court, and if there is a board in the district a license will be granted upon complying with that requirement. Every effort to amend the law or substitute a better has, for some reason, failed."

UTAH.

State Board of Medical Examiners.

J. M. Dart, M. D., President.....	Salt Lake City.....	Term expires 1899.....
Briant Stringham, M. D., Secretary.....

The board issues certificates to all who furnish satisfactory proof of having received degrees or diplomas from chartered medical colleges in good standing and pass a satisfactory examination before the board.*

Examinations are held in Salt Lake City on the first Monday in January, April, July and October.

The fee for examination is \$15.00.

* Subjects now under consideration.

All persons not graduates of medical colleges, who have practiced medicine for five years continually in this territory prior to March 8, 1894, shall, upon producing to the board of medical examiners a proper application, accompanied by a petition signed by twenty-five legal voters living in the city or precinct where such applicant practices, on payment of a fee of five dollars, receive a (certificate) license to practice medicine in the city, county or precinct where the signers of the applicant's petition reside. No non-graduate so licensed shall, however, in any way advertise as doctor, physician or surgeon, but shall, if he advertises at all, do so as a licensed non-graduate practitioner of medicine." Extract from Act.

Midwives are examined and licensed.

VERMONT.

Board of Censors

Of the Vermont Medical Society.

H. C. Tinkham, M. D.....	President.....	Burlington.....
H. H. Lee, M. D.....	Secretary.....	Wells River.....

Of the State Homeopathic Society.

No replies received to enquiries.

Of the State Eclectic Society.

J. H. Potter, M. D.....	President.....	Bennington
P. L. Templeton, M. D.....	Secretary.....	Montpelier

MEDICAL LAWS OF VERMONT.

Practice of Medicine and Surgery, Chapter 172, Revised Laws 1880.

Section 3908. Medical societies organized under a charter from the general assembly shall, at each annual session, elect a board of censors consisting of three members, which board may examine and license practitioners of medicine, surgery and midwifery.

3909. A practitioner of medicine, surgery and midwifery who offers his services to the public as practitioner of either medicine, surgery or midwifery, or who assumed the title of doctor, shall obtain a certificate from one of such medical societies, either from a county, district or state society.

3910. A person not a resident of this state, who has not received a diploma from a chartered medical college, shall obtain a certificate from a board of censors in this state before he shall be permitted to practice the medical art in this state.

3911. Each board of censors shall issue certificates, without fee, to physicians and surgeons who furnish evidence by diploma from a medical college or university, or by certificate of examination from an authorized board, which satisfies said censors that the person presenting such credentials has been, after due examination, deemed qualified to practice the branches mentioned in such diploma or certificate.

* * * * *

The standard of the colleges from which the diploma is presented is determined by the board. The censors of the Vermont State Medical Society recognize colleges in good standing with the Illinois State Board of Health.

Midwives are not examined or licensed, although, all who desire, practice unmolested.

Applications for blanks or for further information, should be made to the secretary of the board before which the candidate wishes to appear.

VIRGINIA.

State Board of Medical Examiners.

R. W. Martin, M. D., President.....	Lynchburg.....	
R. S. Martin, M. D., Secretary	Stuart	Term expires 1902.....

The following persons only are permitted to practice medicine and surgery in this state:

First. All persons who have practiced medicine and surgery in the state continuously for the period of at least five years prior to February 22, 1894, but only those persons who were assessed with a license tax as a physician or surgeon by some commissioner of the revenue of this state during each of the five years mentioned, are included within the provisions of this clause.

Second. All persons who may hereafter receive certificates from the Board of Medical Examiners of the state.

In order to receive a certificate an applicant must pass an examination satisfactory as to efficiency, before the board which is in session, in the following branches: hygiene, medical jurisprudence, chemistry, anatomy, physiology, histology, pathology, bacteriology, materia medica and therapeutics, obstetrics, gynecology, practice of medicine and surgery. An average of 75 per cent is required on the entire examination and there can not be less than 45 per cent on any branch. No applicant shall be rejected upon his examination on account to his adherence to any particular school of medicine or system of practice, nor on account of his views as to the method of treatment and care of disease.

When, in the opinion of the president of the board, any applicant has been prevented by good cause from appearing before the board, the president will appoint a committee of three members to examine such applicant, and if they see fit, grant him a certificate, which will have the same form and effect as though granted by the full board, until the applicant shall have an opportunity to appear before the board. When if the applicant fail to appear for examination the president of the board has the authority to revoke the certificate, or in any case the president has authority at his discretion to grant a special permit to any applicant to practice medicine until he has an opportunity to appear before the board in session for examination, the permit being revokable at the discretion of the president.

Examinations are held during the third week in January and the second week in July in Richmond and at such other times and places as may be required.

The fee for an examination is \$10.00. There is no additional charges for a re-examination.

Midwives are not licensed.

WASHINGTON.

State Board of Medical Examiners.

H. C. Willison, M. D.	President.....	Port Townsend
J. H. Hoxsey, M. D.....	Secretary.....	Spangle

Every person desiring to commence the practice of medicine and surgery in this state is required to make a written application to the board for a license. The application should be accompanied by an affidavit of the applicant showing the actual time spent by him in the study of medicine and surgery, and when; whether the study was in an institution of learning, and if so, the name and location, and if not in such institution, where and under whose tutorship such study was prosecuted; the time the applicant was engaged in the actual practice, if at all, of medicine and surgery, where located during the time of such practice, and the age at the time of making the application. The applicant, at the time and place designated by the board or at the regular meeting of the board, must also submit to an examination in the following branches: anatomy, physiology, chemistry, histology, materia medica, therapeutics, preventive medicine, practice of medicine, surgery, obstetrics, diseases of women and children, diseases of the nervous system, diseases of the eye and ear, medical jurisprudence, and such other branches as the board shall deem advisable. The examination, both scientific and practical and of sufficient severity to test the candidate's fitness to practice medicine and surgery, is either written or printed, or partly written and partly printed.

The board meets on the first Tuesday of January and July of each year, alternately in western and eastern Washington, at such places as it may designate.

The fee for the examination is \$10.00.

No temporary licenses are issued.

Midwives are not licensed.

WEST VIRGINIA.

State Board of Health.

C. B. Blubaugh, M. D.....	President.....	Parkersburg
A. R. Barbee, M. D.....	Secretary.....	Mount Pleasant.....

The following persons only are permitted to practice medicine in this state:

First—Those legally entitled to practice medicine in the state on the 22d of February, 1895.

Second—Those who pass an examination before the State Board of Health and receive certificates from the board.

Each applicant must show that he has had a good preliminary education.

The State Board of Health, at such times as it deems proper, holds examinations for the licensing of practitioners of medicine. No less than three examinations are held during the year, at such points in the state as are convenient to those presenting themselves for examination.

At the examinations, written and oral questions will be submitted to the applicants, covering all the essential branches of the sciences of medicine and surgery. The examination is to be a thorough and decisive test of the knowledge and ability of the applicant.

The board of health gives timely notice of the time and place of holding each examination by publishing the notice in at least three newspapers of general circulation in the state.

No applicant for license will be rejected because of his or her adherence to any particular school or theory of medicine.

The fee for an examination is \$10.00. One re-examination can be had without additional cost, one year from the date of the first examination. All future examinations cost \$10.00. each.

Midwives are not licensed.

WISCONSIN.

State Board of Medical Examiners.

Samuel Bell, M. D.....	President.....	Beloit.....
H. M. Ludwig, M. D.....	Secretary.....	Richland Center.....

All persons hereafter commencing the practice of medicine and surgery in this state must apply to the board for license at the time and place designated by the board, or at the regular meeting, and submit to an examination in the various branches of medicine and surgery, or present to the board his diploma from a medical college that requires after January 1, 1897, at least three courses, of no less than six months each, before graduation, and after the year 1901 at least four courses of not less than six months each before graduation, no two of the courses to be taken within one twelve-month. The examination in materia medica, therapeutics and practice of medicine will be conducted by the members of the board representing the school of medicine which the applicant claims to follow. After ex-

amination, or upon presentation of a satisfactory diploma as before provided, the board will, if it find the applicant qualified, grant a license to practice medicine and surgery in the state.

The board holds four regular meetings each year on the second Tuesday in January, April, July and October. One in Madison, one in Oshkosh and two in Milwaukee, and such other meetings at such other times and places as the board may from time to time determine.

The fee for the examination is fixed by the board, but can not exceed the sum of \$10.00. When no examination is required, and in case a satisfactory diploma is presented the fee will not exceed \$5.00.

The requirements do not apply to women practicing midwifery.

WYOMING.

"No person shall practice medicine, surgery or obstetrics in this *Territory who has not received a medical education and a diploma from some regularly chartered medical school, said school to have a bona fide existence at the time the said diploma was granted."

"Every physician, surgeon or obstetrician in this Territory, shall file for record, with the Register of Deeds of the County in which he or she is about to practice his or her profession, or where he or she now practices it, a copy of his or her diploma, at the same time exhibiting the original, or a certificate from the Dean of the Medical School of which he or she is a graduate, certifying to his or her graduation."

"Every physician, surgeon or obstetrician, when filing a copy of his or her diploma, or certificate of graduation, as required by the preceding section, shall be identified as the person named in the paper about to be filed by the affidavit of two citizens of the county, or by his or her affidavit, taken before a notary public or commissioner of deeds for this Territory, which affidavit shall be filed in the office of the Register of Deeds."

"Any person practicing medicine, surgery or obstetrics in this Territory, without complying with the preceding sections of this chapter, shall be guilty of a misdemeanor, and upon conviction, shall be punished by a fine of not less than fifty dollars, nor more than five hundred dollars, or by imprisonment in the county jail for a period of not less than thirty days, nor more than six months, or by both such fine and imprisonment for each and every offence. And any person filing or attempting to file as his or her own, diploma or certificate of graduation of another, or a forged affidavit of identification, shall be guilty of a felony, and upon conviction, shall be subject to such fine and imprisonment in the penitentiary as may be fixed by the court for said offence."

* Although Wyoming was a Territory when the Act of which the above is a part was passed there has apparently been no change in the law. The above requirements are now in force, although of no force. Any one can practice medicine in this State provided he has a "diploma."

COURT DECISIONS ARRANGED ALPHABETICALLY BY STATES.

CALIFORNIA.

DECISION OF THE SUPREME COURT OF CALIFORNIA ON THE POWER OF THE BOARD OF DENTAL EXAMINERS TO DETERMINE WHETHER A COLLEGE OF DENTISTRY IS REPUTABLE.—*John D. Van Fleet, Petitioner and Respondent, vs. the Board of Dental Examiners of the State of California, et al., Defendants and Appellants.*

This is a proceeding in mandate commenced in the Superior Court against the Board of Dental Examiners of the State, and the individuals composing said Board, to compel the issuance to petitioner of a certificate entitling him to practice dentistry, under the act of the legislature entitled "An act to insure the better education of practitioners of dental surgery, and to regulate the practice of dentistry in the State of California" approved March 12, 1885. Stats. of 1885, p. 110.

Mr. Justice Van Fleet delivered the following opinion, which was concurred in by Hon. Justice Harrison:

The court below gave judgment granting a peremptory writ, and defendants appeal therefrom and from an order denying them a new trial.

Defendants demurred to the complaint or petition upon the ground, among others, that it did not state facts entitling petitioner to the relief sought. The demurrer was overruled, and this ruling presents the only question which need be considered, since we are of the opinion that the demurrer should have been sustained.

The petition omitting the formal parts and much immaterial and redundant matter, is in substance: That petitioner is the holder of a diploma of graduation regularly issued to him on April 2, 1894, by the American College of Dental Surgery of Chicago, Illinois, after a course of study therein and an examination for graduation as prescribed by the regulations thereof; that, desiring to practice his profession in this state, petitioner, on the 10th day of May, 1894, in pursuance of said act, presented to defendant his said diploma and demanded that they endorse the same and issue to him a certificate to that effect; that when said diploma was issued, and at the time of application to defendants, said American College of Dental Surgery "was a reputable college, and there existed and was at the command of the defendants sufficient evidence of such fact"; that with his application petitioner furnished "evidence satisfactory to the defendants that he was the person named in the diploma," and that the same had been issued to him as stated in said diploma. That defendants "without any lawful right or excuse therefor, refused to endorse plaintiff's said diploma, or to issue to him the certificate provided for in said act."

The act referred to which underlies the proceeding makes it unlawful for any person who is not at the time of the passage of the act engaged in the practice of dentistry, to engage therein, unless he shall have obtained a certificate as thereafter provided: it authorizes the appointment of a board of examiners, to consist of seven practicing dentists, "whose duty it shall be to carry out the purposes and enforce the provisions of this act."

After providing for the constitution and organization of the board, and for the registration of all those practicing dentistry in the state at the date of its passage, it provides:

"Section 5. Any and all persons who shall so desire may appear before said board at any of its regular meetings and be examined with reference to their knowledge and skill in dentistry, and, if the examination of any person or persons shall prove satisfactory to said board, the board of examiners shall issue to such persons as they shall find to possess the requisite qualifications a certificate to that effect in accordance with the provisions of this act: said board shall also endorse as satisfactory diplomas from any reputable dental college, when satisfied of the character of such institution, upon the holder furnishing evidence satisfactory to the board of his or her right to the same, and shall issue certificates to that effect within ten days thereafter. All certificates issued by said board shall be signed by its officers, and such certificates shall be *prima facie* evidence of this right holder to practice dentistry in the State of California." The further provisions of the act are not involved.

The contention of the attorney-general, for appellants, is that the functions of the defendant board under the statute are judicial or quasi judicial, in that they involve the exercise of discretionary power—the determination of facts from evidence; that the determination of such facts is exclusively and finally vested in said board, and that therefore, while mandate will lie to require it to act, should it refuse it will not require it to proceed to a particular conclusion; nor where it appears, as the complaint alleges, that it has acted and reached one result, can it be coerced by this writ to act differently. The correctness of these principles, if such be the proper interpretation of the powers vested in the board, is conceded by respondent, but respondent contends that the act will not bear such construction. His contention in effect is that the power vested in the board is largely ministerial, or clerical merely; that, while the board has certain discretionary powers to pass upon the facts upon which its action is to be based, its determination of those facts is not final; that, if the evidence presented to it is such that in the judgment of the court the board should have found in favor of the existence of the facts authorizing it to endorse the certificate, it can be required to so find and make such endorsement.

We are unable to coincide with respondent's construction of the act. The whole theory upon which it proceeds, and the manifest purpose intended to be accomplished thereby, are against such construction. It is very evident, as indicated not only by the title but in the body of the act, that the inducing consideration moving the legislature to its adoption was the protection of the public against the ill suffered at the hands of incompetent quacks, empirics and other unqualified practioners in this most important and essential branch of modern surgery and medical science. Until within a comparatively recent period the practice of dentistry consisted of treatment largely, if not exclusively of a mere mechanical nature, such as drawing, filling and cleaning the teeth; and practioneers of the art were neither required nor expected to know anything of the pathological features or surgical necessities of those diseases which rendered their artisanship a necessity to man's relief and comfort. Indeed the local dentist was frequently the village barber or leech, the watch-maker, even the blacksmith—any artisan possessed of a convenient, if not suitable instrument and the necessary strength to pull a tooth. In more recent years however, the necessity for a higher and special education in the art and science of treating teeth has become widely and generally recognized, and has given rise to a distinct honorable and numerous profession; departments for teaching dental science and surgery have been added to the regularly established schools of medicine and surgery, while numerous special colleges of dentistry have sprung up. Many of the latter, unfortunately, as with similar institutions in other branches of learning are more of a pretense than a fact; mere pseudo establishments with an outward semblance of educational facilities and forms, but in reality but dishonest shams, gotten up to make money by dispensing for coin and without requirements of learning, pretended certificates and diplomas of graduation, which give the holder an apparent standing and character in his profession to which he is not of right entitled.

The evil resulting from this abuse has become so pronounced as to have received very general recognition, and there are now to be found in most of the states statutes intended for its correction.

The statute under consideration is one of these. As expressed in its title its purpose is "to insure the better education of practitioners of dental surgery, and to regulate the practice of dentistry." It provides for a board composed of expert practitioners with power to examine and license those who have not graduated elsewhere, and to investigate and pass upon the reputability of schools and colleges and colleges issuing certificates or diplomas, and the right of the holder of such diplomas to their possession. The powers thus conferred are broad and comprehensive, and in some respects at least must their nature be final. The judgment of the board, for instance, as to the qualification of an applicant for license by examination, which is largely, if not wholly discretionary, must of necessity be conclusive. *Keller vs. Hewitt*, 109 Cal., 146. No one would question this. Is the power to pass upon the reputability of a college, or the right of a holder of a diploma, intended to be less discretionary or final? There is nothing in the language of the act in conferring this power to indicate it. The requirement is to "endorse as satisfactory diplomas from any *reputable* dental college, *when satisfied of the character of such institution* upon the holder furnishing *evidence satisfactory to the board* of his or her right to the same." This implies quite as necessarily the exercise of judgment and discretion as in the examination of an applicant as to his fitness. It does not direct the board to act upon the presentation of certain specified evidence prescribed by the statute, but it requires the finding of the facts upon which their action is to be based from evidence which is to be "satisfactory to the board." If the statute required that the applicant make a prescribed showing in a particular manner, and that thereupon the board should endorse his certificate, it might with some reason be said that the act was more ministerial than judicial, and that upon the prescribed showing being made the board could not refuse to act. Such a case would be within the doctrines of *Wood vs. Strother*, 76 Cal., 545, and *Stockton Ry. Co. vs. Stockton*, 51 Cal., 328, relied on by respondent, where the action of the tribunal depended upon a certain event, and that event being shown to have in fact occurred, the adverse determination of the tribunal whose duty it was to act was held not so far discretionary as to conclude the question; the true test was held in *Wood vs. Strother*, being whether the determination of the tribunal "is intended by law to be final." But here the question whether those facts which are to move the action of the board have been shown, does not depend upon some specified piece of evidence fixed by the statute, but upon such facts *as will satisfy the board*. The whole question, in other words, as to the facts is committed to its discretionary judgment, and that its determination in such a case is conclusive, and is not subject to the mandatory control of the courts, there can be no doubt.

In *People ex rel., etc., vs. Board of Dental Examiners*, 110 Ill., 180, where the statute made it the duty of the board to issue a license to a "regular graduate of any reputable dental college" having a full course of lectures and instructions in dental surgery, mandamus was sought to compel the issuance of a certificate to one who alleged that he held a diploma from a "reputable dental college," and that there was annually delivered at said college "a full course of lectures."

In sustaining a demurrer to the petition it was said: "Whether a college be reputable or not is not a legal question, but a question of fact. So also are the requirements in regard to the annual delivery of full course of lectures and instruction. The questions of fact are by the act submitted to the decision of the board, not in so many words, but by the plainest and most necessary implication. Their action is to be predicated upon the existence of requisite facts, and no other tribunal is authorized to investigate them, and of necessity therefore they must do so. The act of ascertaining and determining what are the facts is in its nature judicial. It involves investigation, judgment and discretion." And it was held that mandamus would not lie to control the discretion thus vested, and that no ground of relief was stated.

Under a statute of Missouri providing for the issuance by the State Board of Health of a certificate to practice medicine to "all who shall furnish satisfactory proof of having received diplomas or licenses from legally chartered medical institutions in good standing," if the diploma be found to be genuine, and the person named therein be the one presenting it, etc., it was held that the board was vested with discretionary powers involving matters of judgment which could not be controlled by mandate; and that a petition alleging a state of facts which, under the act, should apparently entitle him to a certificate, but which showed that the application had been acted on by the board and denied, did not state a case for relief, *State ex rel.*, etc., vs. Gregory, et al., 83 Mo., 123. To the same effect are *Williams vs. Dental Examiners*, 93 Tenn., 619, and *State vs. Medical Examining Board*, 32 Minn., 324; also *Berriman vs. Perkins*, 55 Cal., 483; *Jacobs vs. Board of Supervisors*, 100 Cal., 121; *Fairechild vs. Wall*, 93 Cal., 401.

The facts alleged do not bring the case within the doctrine of *Keller vs. Hewitt*, *supra*, relied on by petitioner. In that case the Board of Education had examined Keller for a teacher's certificate and, as alleged in the petition, *had found* that he was in all respects qualified and in every way fit and competent to receive a certificate, but the board had nevertheless determined not to issue it. We held that upon these facts the writ would lie to compel the issuance of the certificate; that notwithstanding the board's discretionary powers in determining the question of fitness, "where under the law and their rules the question of an applicant's fitness to receive a certificate *has been determined in his favor*, the limit of the board's discretionary functions in the premises has been reached and a plain legal duty results."

In the present case the tribunal has acted and has determined against the petitioner. The allegations that the American College of Dental Surgery "was a reputable college, and there existed and was at the command of defendants sufficient evidence of such fact," and that petitioner furnished "evidence satisfactory to defendants that he was the person named in said diploma," are not the legal equivalent of an allegation that the defendant board have so found. In the language of the Court in *People ex rel. vs. Dental Examiners*, *supra*, on this precise point: "The demurrer here does admit that the Board of Dental Examiners found that the college at which the relator was graduated was reputable, although it does admit that to be the fact. But since the board can not be compelled to decide the question that way, although the evidence might clearly sustain it in doing so, there is no ground for mandamus."

It follows that the petition states no cause of action and the judgment and order must be reversed and the cause remanded, with directions to sustain the demurrer.

It is so ordered.

CONCURRING OPINION OF HON. JUSTICE GAROUTTE.

I entirely agree with Mr. Justice Van Fleet as to the true construction of the legislative act here involved, but am compelled to dissent from the conclusion arrived at to the effect that the petition does not state sufficient facts to entitle the petitioner to the relief sought. At one stage of the proceedings the Board of Dental Examiners has a pure ministerial duty to perform, viz., to endorse the applicant's diploma as satisfactory. And that stage of the proceedings is reached when the board is satisfied that the character of the institution issuing the diploma is that of a reputable dental college, taken in connection with the further condition that the holder of the diploma has also furnished "evidence satisfactory to the board of his or her right to the same." If the holder of the diploma complies with these two demands of the statute, then I say there is nothing remaining for the board of examiners to do but to endorse the diploma as satisfactory—an act in no sense judicial, and to compel the performance of which a mandate will issue.

Eliminating from the allegations of the petition all immaterial matter, it still fairly shows a compliance with the two foregoing demands of the statute.

It is alleged "that at the time of making such presentation and demand he (petitioner) furnished to defendants evidence *satisfactory to the defendants* that he was the person named in said diploma, and that the same had been issued to him as stated in diploma." We also find the further allegation: "Plaintiff, on his information and belief, alleges that at the time the defendants refused to endorse his said diploma and issue said certificate that the defendants, as such Board of Dental Examiners, were satisfied the said college was a reputable college." The latter allegation is strictly in accordance with the terms of the statute and the former by a fair and liberal construction is also sufficient.

Although holding the petition satisfactory in law, still plaintiffs' troubles are by no means over. Allegations of fact are not difficult to make; proof of the facts alleged is the final test of a meritorious case. And here proof of facts to fill the measure furnished by the aforesaid allegations of the petition is wanting. In answer to the petition the board denied that it was satisfied that the college issuing the diploma was a reputable medical college, and also denied that satisfactory evidence was furnished to it that the petitioner was entitled to said diploma. Upon these issues evidence was introduced, and although the findings of the fact thereon were made in favor of petitioner, still in view of construction of the statute, as declared in the main opinion and in such construction I heartily concur, those findings of fact as to one of the allegations at least are without support in evidence; and a reversal of the judgment necessarily results. The law delegated to the Board of Examiners the power to hear and determine certain facts, and its determination as to those facts was beyond review by the Superior Court. The question for the Superior Court to decide was not as to the correctness of the board's decision, but rather, what did the board decide? The vitality of the petitioner's case is found in the two allegations I have quoted from his petition; and, under the evidence introduced at the hearing before the trial court, it is a certainty that the petitioner did not furnish the board evidence satisfactory to it of his right to the diploma presented. It therefore follows that as to one of imperative demands of the statute petitioner failed in his proof, and the relief asked for must be denied.

ILLINOIS.

DECISION RENDERED BY THE SUPREME COURT OF ILLINOIS.
MAY, 1887, TERM.—*George J. Williams v The People of the State of Illinois.*

In this case, the plaintiff in error, George J. Williams, was indicted, tried for and convicted of the offence of violating the provisions of the act in force July 1, 1877—Laws 1877, p. 154; Starr & Curtis, 1602, being an act to regulate the practice of medicine in the State of Illinois—by practicing medicine without having any of the qualifications required by this act. A fine of \$200 was assessed by the court.

Mr. Justice Sheldon delivered the opinion of the court.

It is insisted that the act under which the conviction was had is unconstitutional. We do not understand the act to be challenged in this respect, in the regard of its feature of prescribing qualifications for the practice of medicine. It is the common exercise of legislative power to prescribe regulations for securing the admission of qualified persons to professions and callings demanding special skill; and nowhere is this undoubtedly valid exercise of the police power of the State more wise and salutary, nor more imperiously called for than in the case of the practice of medicine. It concerns the preservation of the health and the lives of the people.

But the constitutional objection which is urged against the act is, that it is special legislation, contrary to Article IV, Section 22, of the State Constitution, to-wit: "The General Assembly shall not pass local or special laws

granting to any corporation, association or individual any special or exclusive privilege, immunity or franchise whatever." The special feature which is plain, is the proviso of the act, which is: "Provided, that the provisions of this act shall not apply to those that have been practicing medicine ten years within this State." This proviso does not confer upon the ten years' practitioners any special privilege, immunity or franchise. It does not confer upon them anything—it leaves them as they are. But it is said the act is one to regulate the practice of medicine and that it subjects to regulations only a class, to-wit, graduates with diplomas and applicants for a certificate of examination, while the ten years' practitioners are not subjected to any regulation at all, by anything in the act.

It becomes proper to look and see what the provisions of the act are. The first clause of the act is as follows: "Every person practicing medicine, in any of its departments, shall possess the qualifications required by this act." All the other provisions of this act, as we view them, only respect such qualifications, with the exception of one section, which requires any itinerant vendor of any drug or nostrum, ointment, etc., to pay a license of \$90 a month.

It was in the province of the Legislature to prescribe what should be the qualifications for the practice of medicine and what the mode in which they should be determined. The act provides, as to a graduate in medicine with a diploma that he may practice upon his diploma, it being verified as pointed out by the act. In regard to others; it is provided they shall undergo an examination before the STATE BOARD or Board of Examiners, and may practice upon the certificate of the BOARD. As respects the proviso, we regard it in the light of but prescribing a qualification—that is, that ten years' practice within the State should constitute a qualification for practicing medicine.

It is virtually conceded, in the argument of counsel for plaintiff in error, that the General Assembly might make the qualification of ten years' practice prior to the act equal to the qualification of a diploma or of a certificate of examination, and that the proviso might have been objectionable had it been limited to the provisions of the act in respect of qualification. But it is argued, that its vice is in saying that "the provisions of this act"—that is, not only its provisions in respect of qualifications, but each and every of its provisions,—should not apply to the ten years' practitioners. And it is said that there is one section which regulates practitioners in respect to conduct, giving the power to exclude them from practice for unprofessional or dishonorable conduct, and that this is a provision from which the ten years practitioners are, by the proviso, exempted. This section referred to is, that the BOARD may refuse certificates to individuals guilty of unprofessional or dishonorable conduct, or may revoke certificates for like causes.

As respects the objection that this provision unjustly discriminates between classes of practitioners, we regard it as but a regulation pertaining to qualifications for admission to practice. It certainly is such as regards applicants for admission. And as respects those who had been admitted to practice, on the BOARD'S certificate, the provision essentially is, that where there has been abuse of the license granted, by having been guilty of unprofessional and dishonorable conduct, the licensing body may revoke the license which they had granted. All is really but in regulation of admission to practice upon the certificate of the BOARD. It has no application to ten years' practitioners, as they are not admitted to practice upon the BOARD'S certificate, but they are, by the act itself, licensed to practice.

The propriety of the provision, as regards the holders of certificates, in making their certificates subject to revocation by the BOARD for unprofessional or dishonorable conduct, we do not regard as involved in this case, or that we are called upon to express any opinion thereon. Plaintiff in error has no grievance in this respect. He has not had any certificate revoked, has never received a certificate, or been licensed to practice; and if, in this particular, the act could be regarded as unconstitutional, we would not hold the entire act for that reason to be void, or to be so in so far as it bears upon the plaintiff in error.

It is assigned for error that there is no evidence in the record tending to show that plaintiff in error had not complied with the requirements of this law and had not practiced medicine ten years previous to 1877, and in refusing to instruct the jury that the burden was on the prosecution to make such proof. The case comes within the general rule upon this subject, which is laid down by Greenleaf on Evidence, as follows: "But where the subject matter of a negative averment lies peculiarly within the knowledge of the other party, the averment is taken as true unless disproved by the other party. Such is the case in civil or criminal prosecutions for a penalty for doing an act which the statutes do not permit to be done by any person, except those who are duly licensed therefor, as, for selling liquors, exercising a trade or profession, and the like."

The judgment [assessing a fine of \$200] will be affirmed.

DECISION RENDERED BY THE SUPREME COURT OF ILLINOIS, JUNE, 1889, TERM.—*The People for use of the State Board of Health v "Blue Mountain Joe."*

Mr. Justice Shope delivered the opinion of the Court:

This was an action of debt, brought in the name of the People of the State of Illinois, for the use of the STATE BOARD OF HEALTH, against "Blue Mountain Joe," before a justice of the peace, in Clark county. An appeal was taken from the judgment of the justice of the peace to the county court of the county, where a trial was had by jury, and resulted in a verdict and judgment for defendant. The plaintiff below prosecuted this appeal from that judgment.

A motion was entered in this Court to dismiss the appeal in this cause upon the following grounds: First, from the record it does not appear that a crime, a franchise, a freehold, or the validity of a statute is involved, or that this Court has jurisdiction; second, the appeal in this cause was improperly and improvidently taken to the Supreme Court; third, this proceeding is in its nature criminal, being punishable by fine, and comes within the spirit of the law forbidding appeals or writs of error by the People, or the twice putting defendant in jeopardy.

This suit is brought under the 11th section of the act of June 16, 1887, in force July 1, 1887, entitled "An act to Regulate the Practice of Medicine in the State of Illinois." The act provides for the recovery of the penalty therein imposed, in an action of debt, before any court of competent jurisdiction. It is a civil proceeding for the recovery of a penalty, and no further attention need be given the third ground on which the motion is predicated.

By the 8th section of the Practice Act, as amended in 1879, appeals from and writs of error to the circuit courts and county courts, in all criminal cases above the grade of misdemeanors, and in cases in which a franchise or freehold, or the vitality of the statute, or the construction of the constitution is involved, and in all cases relating to revenue, or in which the State is interested as a party or otherwise, shall be taken directly to and prosecuted from the Supreme Court. It follows, therefore, if the validity of the statute under which this suit is brought is involved, the appeal was correctly prosecuted to this Court. Some consideration of the record will be necessary to a determination of this question.

The facts are, substantially, that the defendant, with a band of music and some Indians, either real or pretended, was in Marshall, in Clark county, some time in April, 1888, and was engaged in selling medicine, being then located in the Opera Hall. He left there and went to Terre Haute, Ind.; was gone about a month and returned to Marshall. Upon his return he located in a grove near the town, where he put up tents, consisting, as it was shown, of a medicine tent, a business tent, a cooking tent, some seven or eight single tents used as sleeping apartments and also a show tent, fenced with barbed wire, in front of which he erected seats and a stage; that he paraded the

streets twice a day with his band of music and Indians and gave free shows at night, consisting of music, singing, jokes, wire-walking and other performances: that after he got the crowd interested he would advertise his medicines—tell what they were good for and what diseases they would cure. Distribution would then be made of the medicine to his aids and they would carry it through the crowd for sale. They sold it in the audience anywhere and to anybody who would buy.

Plaintiff offered to show that the defendant had men traveling with him to make sales of the medicine, and also to show that the defendant professed, at his meetings, that by the use of his various medicines he could cure rheumatism, kidney disease and other diseases, and also that he sold these medicines for the cure of such diseases—to the proof of each of which matters counsel for defendant objected, and the court sustained the objection. It was shown that the defendant circulated advertisements of the remedies he was selling, one of which, in pamphlet form, was produced and shown to the witnesses, and identified and is preserved in the record. Counsel for the plaintiff offered to read such pamphlet to the jury, having first shown it to be one of the advertisements of his remedies distributed by the defendant. Upon objection by the defendant, the court held the same incompetent. Indeed, the court refused to permit any proof to be made, upon the ground, as stated by the court, as is shown by the record, that the 11th section of the law was unconstitutional and void. The court instructed the jury to return a verdict for the defendant, which was done.

It was clearly competent, if the section of the statute under consideration is valid, to show that the defendant was an itinerant vendor of drugs, nostrums, ointments, or appliances of any kind "intended for the treatment of disease or injury." The question whether he was such itinerant vendor was a question of fact, to be determined by the jury in view of all the facts and circumstances proved. That the facts offered to be proved tended to establish the guilt of the defendant of the acts prohibited by this section of the statute, is unquestioned. It is apparent that the only theory upon which the action of the court can be sustained is, that the legislative enactment under consideration was void. The court so expressly held. It is equally clear, therefore, that the validity of this section of the statute is involved. We said in *Chaplain v. Highway Comr.*, 126 Ill. 264, that "where it can be seen that the constitutional question raised is one which will be fairly regarded as debatable, we think the question of the validity of a statute becomes involved in the case, within the meaning of the statutes regulating jurisdiction of appeals."

From what has been said, it is apparent that to determine this case we must determine the validity of this statute. If the statute is void, the action of the court was right. If it is a valid law, such action was as clearly erroneous. It remains only to determine the question of the validity of the statute.

The section under consideration provides that "any itinerant vendor of any drug, nostrum, ointment or appliance of any kind intended for the treatment of disease or injury, * * * shall pay a license, to be collected by the State Board of Health, in the name of the People of the State of Illinois, for the use of said Board," and makes provision for issuing a license by said board. The act then provides that "any such itinerant vendor who shall vend or sell any such drug, nostrum, ointment, or appliance without having a license so to do, shall, if found guilty, be fined in any sum not less than \$100 and not exceeding \$200 for each offense, to be recovered in an action of debt," etc. It is not suggested that the power here sought to be exercised falls within any limitation upon the power of the Legislature by either the State or Federal constitution. It would seem to fall clearly within the police power of the State. It is, however, insisted that the subject matter of this section is not embraced in the title of the act, and is therefore void, under the provisions of section 13 of article 4 of the State constitution, the first clause of which is as follows: "No act hereafter passed shall embrace more than one subject and that shall be expressed in the title."

It has been uniformly held by this court, that if the subject of the act be expressed in the title in general terms it will be sufficient, under the provi-

sion of the constitution quoted. "The general purpose of this provision of the constitution is accomplished when the title is comprehensive enough to reasonably include as falling within that general subject, and as subordinate branches thereof, the several objects which the statute assumes to effect." If, therefore, the subject matter of the section under consideration is germane to the general subject expressed in the title, or forms a subordinate branch or part of such general subject, it must be held as embraced within the title of the act.

The title of the act is, "An Act to Regulate the Practice of Medicine in the State of Illinois."

To practice is to exercise a calling or profession. It is the application of science or knowledge to the wants of men in the recurring incidents of life, as, in the practice of law or of medicine. (Webster.) The practice of medicine includes the application of the knowledge of medicine, of disease, and of the laws of health. The terms employed in the title of the act are sufficiently broad and comprehensive to include within its scope the entire range of practice of the medical profession. "To regulate" necessarily means to establish certain rules and restrictions by which the practice of medicine is to be governed in this State. To regulate is to adjust by rule, to subject to governing principles, or to restrict within certain rules and limitations.

Within the regulation of the practice of medicine must necessarily fall the right to determine, or to provide means for the determination of, who may lawfully exercise the right to practice medicine and to establish such rules as shall determine what shall and what shall not be regarded as legitimate practice of the profession. The statute was passed to protect the health and promote the welfare of society, and to protect it from imposition and fraud. The purpose was to prohibit and punish fraud, deception, charlatanism and quackery in the practice of the profession of medicine—to prevent empiricism, and to bring the practice of medicine under such control that, so far as practicable, the ignorant and unscientific practitioner should be excluded.

The right to prescribe medicines for the cure of diseases, and to administer them, falls clearly within the practice of medicine; and the regulation of the sale of drugs and nostrums by itinerant vendors as clearly falls within the purpose of the act, as expressed in its title.

Here, the defendant, traveling from place to place with a band of music, and collecting the people together, not only by his speeches, but by advertisements and pamphlets, was prescribing and vending remedies and nostrums for the cure of disease. The symptoms of disease were set forth. Ten different remedies capable of curing substantially all of the ills to which the human family is subject, were extolled and prescribed, while certificates of marvelous cures by these remedies were displayed. Not only do we think that the section of the Medical Practice Act under consideration was not unconstitutional, because the subject matter of it was not included within the title of the act, but the offered evidence clearly tended to show that the defendant had been guilty of violating its provisions. It follows, therefore, that the court erred in sustaining objection to the offered testimony and in directing a verdict for the defendant.

The judgment of the county court is reversed, and the cause remanded to that court for further proceedings.

INTERPRETATION OF THE CLAUSES IN SECTION 12 OF THE ILLINOIS MEDICAL PRACTICE ACT RELATING TO PERSONS WHO HAD PRACTICED TEN YEARS PRIOR TO THE PASSAGE OF THE ACT. BY GEORGE A. WOOD, COUNSELLOR TO THE BOARD. [Approved by the Attorney General, October 23, 1893.]

In 1877 the Legislature passed an act entitled "An Act to Regulate the Practice of Medicine in the State of Illinois." By this act the State Board of Health was empowered to issue certificates to graduates and licentiates of colleges and to candidates examined by the Board. The Board was em-

powered to revoke these certificates for unprofessional or dishonorable conduct. *The proviso of the last section of the act declared that the provisions of the act should not apply to those who had been practicing ten years within the State.*

This act first came before the Supreme Court for judicial interpretation in the case of *Williams v. People*, 121 Ill. 84. The opinion in this case was filed May 12, 1887. The constitutionality of the act was called in question because, it was claimed, it conferred upon the ten years' practitioners special privileges or immunity, and because it subjected to regulation one class of practitioners only. Mr. Justice Sheldon, in delivering the opinion of the Court, said: "*This proviso does not confer on the ten years' practitioners any special privilege, immunity or franchise. The first clause of the act is as follows: 'Every person practicing medicine, in any of its departments, shall possess the qualifications required by this act.' All the other provisions, as we view them, only respect such qualifications, with the exception of one section, which requires any itinerant vendor of any drug or nostrum to pay a license of \$100 a month. It was in the province of the Legislature to prescribe what should be the qualifications for the practice of medicine and what the mode in which they should be determined. * * ** As respects the proviso, we regard it in the light of but prescribing a qualification—that ten years' practice within the State should constitute a qualification for practicing medicine."

The court refused to pass upon the constitutionality of the provision making certificates revocable, because the plaintiff in error had "no grievance in this respect." The court said, however, that "if, in this particular, the act could be regarded as unconstitutional" it "would not hold the entire act for that reason to be void."

On June 16, 1887, the present act was approved. By this act the ten years' practitioners were required to make application to the State Board of Health for a certificate within six months after the taking effect of the act, and were prohibited from practicing without such certificate. At this point we are met with the question as to whether the Legislature has the power to require that a certain class of practitioners shall meet certain additional requirements, not imposed upon them by the first act, under penalty of forfeiture of the right to practice medicine. The question is a "close" one and many strong points can be presented on both sides of it. I can, therefore, merely give you the view that seems to be the one most likely to be taken by the Supreme Court.

The act is an exercise of the police power—a power inherent in sovereignty and necessary to the exercise of good government. It is a power that the Legislature can not bargain away and one Legislature can not control its successor in the exercise thereof. If we say that this act is unconstitutional because it requires of the ten years' practitioners qualifications additional to those demanded by the act of 1877; or, because one Legislature having licensed the ten years' practitioners, a subsequent Legislature can not compel them to comply with additional requirements, we deprive the Legislature of its freedom in the exercise of the police power. It is true, that the right to practice medicine, or to follow any lawful business or profession, can not be arbitrarily taken away from a citizen any more than his real or personal property can be thus taken; but there is no arbitrary deprivation of such right where its exercise is not permitted because of a failure to comply with conditions imposed by the State for the protection of society.

The act of 1887 was virtually a new act; it expressly repealed all prior acts inconsistent or in conflict with it. It was manifestly the intention of the Legislature to remedy the defect pointed out in the case of *The People v. Williams*, by putting all practitioners on the same footing. That is, they created a new set of qualifications for admission.

No one will deny that if there had been no medical practice act passed prior to 1887, the Thirty-fifth General Assembly would have had the right to pass the act that it then did pass. Then, is it not permitting one Legislature to bind another in the exercise of the police power, to say that because the

Thirtieth General Assembly passed a medical practice act, the Thirty-fifth General Assembly could not pass an act inconsistent or in conflict therewith? It would be absurd to say that the Legislature, in exercising the police power, can not repeal a prior act and substitute therefor an act better suited to provide for the general welfare of the people.

Prior to the passage of the act of 1887, it mattered not whether a ten years' practitioner was of good moral character or not; it mattered not how many dishonorable acts he committed; his right to practice medicine could not be questioned. To say that the Legislature could not repeal this law and pass one remedying these defects is to say that the Legislature can confer an irrevocable right to practice medicine. This is inconsistent with the rule as laid down by the Court. "Irrevocable grants of property and franchise may be made if they do not impair the supreme authority to make laws for the right government of the State; but no one Legislature can curtail the power of its successor to make such laws as they may deem proper in the matter of police." (34 N. Y. 65.)

The Supreme Court has said that all the provisions of the act of 1877 "only respect qualifications for admission." The act of 1887 merely adds to the requirements mentioned in the act of 1877. In *Dent v. West Virginia*, 129 U. S. 114, the Court said: "The same reasons which control in imposing conditions, upon compliance with which the physician is allowed to practice in the first instance, may call for further conditions." That, for the good of society, every physician should be of good moral character, can not be questioned. That no physician should be allowed to practice who has been guilty of dishonorable conduct is manifest. These are good reasons for imposing conditions in the first instance, and the fact that they were not imposed by one Legislature can not prevent another from imposing them subsequently.

It may be urged that this act is unconstitutional because it is a grant of a special privilege or immunity to those holding certificates issued by the BOARD; but this position can not be maintained. No more is required of the ten years' practitioner than is required of others. The ten years' practitioner must apply to the BOARD for a certificate; so must all others. The ten years' practitioner must be of good moral character; so must all others. The ten years' practitioner must not be guilty of dishonorable conduct; the same rule applies to all others. Can a law which affects all in like condition, be said to be special? Surely not. In 70 Ill. 398, it was held that laws are general and uniform, not because they operate upon every person in the State, for they do not, but because every person who is brought within the relation and circumstances provided for is affected by the law.

A statute will not be declared void because it can be given a construction not in accordance with the constitution. On the contrary, the presumption is in favor of the constitutionality of the statute; and it will not be construed as unconstitutional where any other reasonable construction can be given. It must be clear beyond a reasonable doubt that the legislature has transcended its constitutional power before the courts will declare an act unconstitutional.

OSTEOPATHY.

DECISION RENDERED IN THE APPELLATE COURT OF ILLINOIS,
THIRD DISTRICT, NOVEMBER TERM, 1896—*Eugene H. Eastman vs.
The People, etc., Appeal from Jersey County Court.*

This is an appeal from a judgment for one hundred dollars as a penalty for practicing medicine without a license, under Par. 10, Ch. 91 R. S. It appears that the appellant was engaged in the practice of "The Profession of Osteopathy," as it is termed in the briefs; that he had an office where he received patients and that he visited patients at their homes; that he advertised his system and his skill therein by publications in the newspapers and that he professed ability to understand and treat human ailments intelligently and successfully.

So far as shown his treatment consisted wholly of rubbing and manipulating the affected parts with his hands and fingers, and by flexing and moving the limbs of the patient in various ways.

It is insisted on his behalf that because he used no medicine or instruments he is not amenable to the statute.

Par. 14 of Ch. 91 declares that "Any person shall be regarded as practicing medicine within the meaning of this act who shall treat, operate on or prescribe for any physical ailment of another."

It is argued on behalf of appellant that this provision must receive reasonable interpretation and that to "treat" implies the use of medicine or drugs of some sort. This is not so necessarily. Many of the minor operations are effected without the use of instruments, by mere pressure, extension and flexing.

This of course implies some knowledge of anatomy and some skill. So many forms of diseases are treated by attention to the diet, habits and mode of life, without resorting to medical remedies.

It is said by counsel that if the statute reaches this case it must include treatment by Turkish baths, massage and the like.

We think not. The evidence shows that appellant held himself out as competent to treat and cure numerous diseases, such as all forms of fevers, cerebro, spinal meningitis, kidney diseases, measles, paralysis and many others, including in fact a large proportion of the ailments common to mankind. He represented himself as a graduate of the new school of "osteopathy" and held himself out as qualified to examine and treat all who might seek his aid.

Herein he differs from those who give Turkish baths, massage and the like.

He professes to be able to diagnose and advise in respect to a long list of diseases and to furnish discriminating and efficient treatment to those who come and try him, and while he may rely wholly upon manipulation, flexing, rubbing, extension, &c., yet he professes to have skill and judgment in these methods, so as properly to adapt the treatment of each case, giving it what is appropriate, in amount, and with repetition at such times and to such extent as may be dictated by his knowledge and experience. By his skill in the use of his peculiar remedies or methods he claims to be competent to relieve and cure various ailments, and therefore he invites patronage. We are referred to the case of *Smith v. Lane*, 24 Hun. 632. The Statute of New York is unlike ours, and the facts of the case are unlike those in the case at bar. We think the ruling there should not control here.

It is suggested rather than argued that as the title of the act in question is "An Act to regulate the practice of medicine in the State of Illinois," and as the Constitution provides that no act shall embrace more than one subject, which must be expressed in the title, any construction which would include a matter not within the practice of *medicine* must be avoided or the act is unconstitutional.

"Medicine is the art of understanding diseases and curing or relieving them when possible."—Bigelow. "It is that branch of physics which relates to the healing of diseases."—Dunglison.

This act is not restricted to any particular methods or remedies. Indeed, these are almost innumerable, considering what are used and what have been discarded.

We are of the opinion the proofs bring appellant within the act and that he is liable to the penalty imposed thereby for practicing medicine without license.

It is urged the Court erred in refusing to dismiss the suit for want of authority of plaintiff's attorney to institute action.

It is shown by a recital of the clerk in the order of record that such a motion was made and overruled and that the defendant excepted.

This entry by the clerk in the orders of the Court for the day is not sufficient to save the exception, and if it were there is nothing to show that the motion was supported by anything requiring the action of the Court. Such a motion should be supported by affidavit or some matter of which the Court should take notice, and must be preserved by a bill of exceptions.

The judgment will be affirmed.

INDIANA.

DECISION RENDERED BY THE SUPREME COURT OF INDIANA,
NOVEMBER, 1886, TERM.—*Albert Eastman v. The State of Indiana.*

The appellant challenges the validity of the act regulating the practice of medicine and surgery, and on this challenge arises the principal question in the case.

The police power of a state is very broad and comprehensive. It has been variously defined by the courts and text writers. "It is," said one of the courts, "that inherent and plenary power in the state which enables it to prohibit all things hurtful to the comfort and welfare of society." "All laws," says another court, "for the protection of lives, limbs, health and quiet of the person, and for the security of all property within the state, fall within this general power of government."

In *Thorpe v. Rutland*, etc., 27 Vt., 149, it was held that, "under the general police power of the state, persons and property are subject to all kinds of restraints and burdens, in order to secure the general comfort, health and prosperity of the state, of the perfect right of the state to do which no question ever was, or, upon acknowledged general principles, ever can be made so far as natural persons are concerned."

In speaking of this power, it was said by this Court in *Hockett v. State*, 105 Ind., 25 S. C., 55 Am. Rep., 201, that "it extends to the protection of lives, limbs, health, comfort and convenience, as well as the property, of all persons within the state. It authorizes the Legislature to prescribe the mode and manner in which every one may so use his own as not to injure another, and to whatever is necessary to promote the public welfare, not inconsistent with its original law." * * *

The practice of medicine and surgery is a vocation that very nearly concerns the comfort, health and life of every person in the land. Physicians and surgeons have committed to their care the most important interests, and it is an almost imperious necessity that only persons possessing skill and knowledge should be permitted to practice medicine and surgery. * * *

The rule requiring physicians to possess learning and skill is a very ancient one. This rule of the common law has been incorporated in many of the state statutes and these statutes have always been upheld. The statute of Minnesota is very similar to ours and it was held to be valid in *State v. State Medical Association*, 32 Minn., 324, the court saying: "In the profession of medicine, as in that of the law, so great is the necessity for special qualification and so injurious the consequences that are likely to result from want of it that the power of the Legislature to prescribe such reasonable conditions as are calculated to exclude from the profession those who are unfitted to discharge its duties can not be doubted." * * *

The power to accept or reject an application for license under the statute is not a judicial one, although it may involve some exercise of discretion. If an exercise of discretion constituted a clerk a judicial officer then he would be such in every case in which he issued a writ, filed a paper or approved a bond, for all these acts involve some exercise of discretionary power. * * * It is the purpose of the statute to prevent persons who do not possess the necessary qualifications to practice medicine or surgery from inflicting injury upon the citizens by undertaking to treat diseases, wounds and injuries. It is the

plain intention of the statute to keep out of the professions of medicine and surgery all who do not possess learning and skill sufficient to enable them to properly discharge the duties incumbent upon members of those honorable professions, and courts have no right to create an exception which will defeat that intention. It is immaterial whether the person who undertakes to treat diseases or wounds does it for hire or not, for unless he is qualified as the statute requires, he must not undertake the treatment of diseases or wounds at all. The courts can not divide professional persons into classes and assert that one class is within the law, and the other not, for the law applies to all who assume the responsible duty of treating the sick, wounded or injured citizens, as well as those who expect compensation for their services as those who do not. The great object of the law is to allow none but skilled and learned persons to attempt to exercise functions and duties which require knowledge and skill, and it is not material whether reward is paid or promised, or the services are rendered without compensation or the promise of it.

The state has an interest in the life and health of all its citizens, and the law under examination was framed, not to bestow favors upon a particular profession, but to discharge one of the highest duties of a state, that of protecting its citizens from injury and harm.

It has been for ages a ruling principle of jurisprudence, "that regard be had for the public welfare is the highest law," and that principle is here of controlling force, for few things, if indeed any, are more important than that the health, limbs and lives of the citizens should not be intrusted to the care of persons who lack the knowledge and skill requisite to enable them to render proper medical and surgical treatment to the citizens afflicted by disease, wounds or injuries.

Judgment affirmed.

IOWA.

DECISION OF THE SUPREME COURT OF THE STATE OF IOWA, MAY, 1893, TERM, AS TO THE JURISDICTION AND LEGALITY OF ACTION OF THE STATE BOARD OF MEDICAL EXAMINERS IN DETERMINING THE "GOOD STANDING" OF A MEDICAL COLLEGE, AND IN REFUSING TO ISSUE A CERTIFICATE TO THE GRADUATE OF A COLLEGE WHICH FAILED TO COMPLY WITH THE SCHEDULE OF MINIMUM REQUIREMENTS OF SAID BOARD.
—*Iowa Eclectic Medical College Case.*

Action to inquire into the legality of certain acts of the Iowa State Board of Medical Examiners with respect to the plaintiff college. Judgment was entered in the district court dismissing the petition, from which judgment the college appeals.

The Supreme Court (Given, J.) finds that—

At a meeting of the defendant board, May 30, 1888, "it was moved that the Iowa Eclectic Medical College, located at Des Moines, be recognized as in good standing." This motion was adopted by a vote of five ayes to two nays, and thereupon and thereafter certificates were issued to graduates of said college.

On March 22, 1890, C. P. Evans, a graduate of said college in the class of 1889-90, exhibited his diploma to the secretary of the defendant board, which was then verified as to its genuineness, and returned to the applicant with a blank for making application for a certificate when he desired to do so. His application was not received until May 21, 1890, and no other application from plaintiff's graduates was before the defendant board during that time.

The defendant board, at its organization, adopted a schedule of minimum requirements as to qualification of students on entering college, branches to be taught, how to be taught, length of course, and attendance, and facilities for teaching, and that "the aggregate graduates of a college shall not exceed

forty-five per cent of its aggregate matriculates, during the period of five years, ending with any session subsequent to the session of 1885-6."

At the regular meeting of the defendant board, May 8, 1890, and when the board was about to adjourn, until the regular meeting in November, written charges were received from Thomas A. Brazill against the plaintiff college, charging that it was conducted and operated in violation of the laws of the state and specifying certain particulars.

The specifications show a disregard of the requirements in every respect except as to the per cent of graduates. On receipt of these charges it was moved and carried that they be placed on file and a copy be furnished to the plaintiff, with notice to appear at the next meeting of the board and answer the charges.

Dr. Clark offered the following resolution:

"*Resolved*, That this board will not issue certificates to graduates of the Iowa Eclectic Medical College, at Des Moines, for session of 1888-90, until the standing of said college shall have been determined."

Following this action, the board adjourned until the November meeting.

At the regular meeting, November 21, 1890, the following proceedings were had:

"Thos. A. Brazill, the complainant, and Dr. John Cooper, dean of plaintiff college, being present, were each sworn and examined. At the conclusion of the evidence the following was adopted by unanimous vote:

"*Resolved*, That in the opinion of this board the charges against the Iowa Eclectic Medical College, preferred by Mr. Brazill, are not fully sustained, no witness for the prosecution other than himself having testified; but on the testimony of the dean of the faculty of the aforesaid college, to-wit, Dr. John Cooper himself, we find sufficient corroborative evidence to satisfy us that the teaching in said college is not up to our minimum requirements, and therefore we feel constrained to withhold certificates from the graduates of said college."

On motion, the secretary was authorized to withhold all applications from colleges not now recognized by this board until the next meeting of the board.

On motion, the application of Evans for a certificate, as above recited, was rejected "on the ground that he fails to furnish satisfactory evidence of having been graduated from a college recognized by this board as in good standing."

Appellant's contentions are that the action of the Board is illegal because not authorized by the statute, and, if so authorized, is illegal because a statute so authorizing is in violation of the constitution. After analyzing the statute the Court holds that—

"It is clear that the defendant Board did have the power, by proper investigation, to determine the identity of applicants, the genuineness of their diplomas, and whether they [the diplomas] were issued by a medical school legally organized and in good standing." * * *

The constitutionality of the statute might well be questioned if it authorized the defendant board to determine without investigation that a particular medical school was not in good standing, and especially so when that school had previously been determined to be in good standing.

We do not say that the board is concluded by having once determined that a school is in good standing from thereafter determining differently, but only that it has not power to do so arbitrarily, and without investigation.

We do not say that such inquiries must be attended with the formality of a trial in court, but the determination must be based upon inquiry and facts, and not upon the mere arbitrary will of the board.

The remaining complaint is against the action taken upon the investigation had November 21, 1890. The complaint is not against the manner of the in-

vestigation, but against the result as shown in the resolutions copied above. The finding was "that the teaching in said college is not up to our minimum requirements."

The board having authority to determine the standing of colleges, it was certainly proper that they should advise them in advance what would be required of them. The requirements prescribed, save the one quoted above, look to the thoroughness of the education to be given, and are in harmony with the purposes of the statute. The standing of a college as contemplated in this statute is rather what the college is, in respect to the thoroughness of its course, than what it is reported to be.

The board was fully authorized to determine, upon proper investigation, that a college was not in good standing, that it did not meet the minimum requirements as to extent and thoroughness of its course. The legality of the requirements as to the per cent that may graduate is not involved in this case, but as it has been discussed we may say that it is certainly questionable.

While the graduation of an unusual per cent may be ground for closer scrutiny, it may well be questioned whether the defendant board may arbitrarily say that but forty-five per cent shall be permitted to graduate.

The standing of the plaintiff college was a matter within the jurisdiction of the defendant board to determine, and on November 21, 1890, after a full and fair examination, it determined that said college was not in good standing, because its teaching was not up to said minimum requirements.

The board having jurisdiction to determine this question of fact, and having determined it upon full investigation and evidence, by unanimous vote, we must hold their action legal, though we might reach a different conclusion on the facts, if it were our province to consider them.

Much is said in argument about the composition of the different schools of medicine, but as the statute does not require that the different schools shall be represented on the board, its composition can not affect the jurisdiction or the legality of its acts in the respect under consideration. * * *

Upon the question of the constitutionality of the statute the Court says:

In *McAunich v. M. & M. R. R. Co.*, 20 Iowa 343, the rule was announced as follows: These laws are general and uniform, not because they operate upon every person in the state, for they do not, but because every person who is brought within the relation and circumstances provided for, is affected by the law.

They are general and uniform in their operation upon all persons in like situation, and the fact of their being general and uniform is not affected by the number of persons within the scope of their operation. * * *

The statute under consideration is clearly within this rule "because every person who is brought within the relations and circumstances provided for, is affected by the law." It is uniform in its operation, "upon all persons in the like situation," and grants no privileges nor immunities that do not belong equally to all citizens.

Article 8 of the Constitution, it will be observed, relates to the creation of corporations, and does not apply to the defendant board; it is not a corporate body, but a branch of the government. The authority to refuse certificates to graduates of medical schools not in good standing does not extend special privileges or immunities to other schools that are determined to be in good standing.

It is argued on behalf of plaintiff that with the authority claimed by the defendant board it may determine "absolutely and unconditionally, without limitation, or restraint, and without appeal, what rights the graduates of the different colleges of the state shall enjoy."

It is said, "the power to determine what colleges are in good standing, and what are not, is simply an arbitrary power that may be exercised at the will of the board without restraint, and without remedy by appeal." It is true, no appeal is provided for, but the students of a school that has not been deter-

mined to be in good standing, in common with all other persons, have the right to go before the defendant board and be examined, without regard to diplomas, and if found to have the requisite qualifications, to receive a certificate.

It is not correct to say that the defendant board may determine whether a medical school is in good standing arbitrarily and without restraint. We have seen that the law does not authorize such action, and it is illegal. The defendant board acts under the restraints of law that require proper inquiry into the matter to be determined, and we may not presume that the defendant board will act arbitrarily, and without investigation, and upon that presumption hold the statute that confers the power to be unconstitutional. * * *

We are of the opinion that the action of the defendant board, November 21, 1890, [in refusing to issue certificates upon the diplomas of the Iowa Eclectic Medical College] was within its jurisdiction and legal.

As the purpose of the petition is to test the legality of this last action the judgment of the district court in dismissing the petition was correct, and is, therefore, affirmed.

STATE v. BURK.—(Supreme Court of Iowa. October 3, 1893.)

This is an appeal from district court, Davis county: J. C. Mitchell, Judge.

The defendant was charged by indictment as follows: The said Joshua Burk, on the 7th day of September, A. D. 1891, in the county and State aforesaid, did then and there sell and vend linaments, nostrums, ointments, and other drugs to one Asa Hale, the said Joshua Burk then and there being an itinerant vendor of said drugs and nostrums, and did then and there publicly profess to said Asa Hale, to whom he then and there sold said drugs and nostrums, that the said drugs and nostrums then and there sold would cure diseases, injuries, and deformities, the said Joshua Burk then and there not being licensed as an itinerant vendor of drugs, nostrums, and ointments, as required by statute." Defendant having pleaded not guilty, the case was tried to a jury, and a verdict of guilty returned. Defendant's motion for a new trial being overruled, judgment was entered on the verdict, from which defendant appeals.

Opinion 1. This prosecution is under section 10, c. 75, Acts 18th Gen. Assem., as amended in section 2, c. 137, Acts 19th Gen. Assem., and section 3, c. 83, Acts 21st Gen. Assem. The section, as amended, provides as follows: "Any itinerant vendor of any drug, nostrum, ointment or appliance of any kind, intended for the treatment of diseases or injury, who shall by writing or printing, or any other method, publicly profess to cure or treat diseases or injury, or deformity, by any drug, nostrum, manipulation or other expedient, shall pay a license of one hundred dollars per annum, to be paid to the treasurer of the commission of pharmacy, whereupon the secretary of said commission shall issue such a license for one year. Any person violating this section shall be deemed guilty of a misdemeanor and shall upon conviction, pay a fine of not less than one hundred nor more than two hundred dollars." McClain's Code, § 2532. It appeared without question on the trial that, at and for several years prior to the time charged, the defendant was in the employ of S. F. Baker & Co., manufacturers of proprietary medicines at Keokuk, Iowa; that he traveled with a team and wagon, carrying the medicines manufactured by said company, and selling the same from house to house to whomsoever would purchase. The defendant did not hold himself out as a physician, nor assume to determine what the ailments of people were, but he did distribute printed circulars, issued by Baker & Co., representing their medicines to be cures for certain diseases named in the circulars, and the defendant represented that the medicines were as recommended. Section 12 of said Acts of the Eighteenth General Assembly provided that that act should not apply to the sale of proprietary medicines. Said section was amended by section 4 of said Acts of the Nineteenth General Assembly by

adding the following words: "Manufactured in the state when same are sold and distributed by agents from an established place of business." Said section 12, as amended, was repealed by section 4 of said Acts of the Twenty-first General Assembly, and the following enacted in lieu thereof: "Sec. 12. Physicians dispensing their own prescriptions only, are not required to be registered pharmacists, provided that nothing in this act shall prevent any person not a registered pharmacist or not holding a permit from keeping or selling proprietary medicines, and such other domestic remedies as do not include any intoxicating liquors or poisons." Appellant contends that said section 12, as originally enacted, is not repealed, but only the amendment thereto made by the acts of the Nineteenth General Assembly, and therefore the act does not apply to the sale of proprietary medicines. The repeal is not of the amendment alone, but expressly of said section 12, "as amended." It is entirely clear, under this view of the law and the undisputed facts, that the defendant was amenable to pay the license provided, and, if he did not do so, was guilty of the misdemeanor charged.

2. Appellant offered to prove by E. S. Baker that, at his request, a provision exempting manufacturers of proprietary medicines from the provisions of the act was agreed to by the pharmacy commission, and incorporated in the original bill; also to prove certain statements of the committeemen at the time the law was passed as to its effect. Appellant complains of the refusal to admit this evidence, but fails to point out any reason for the complaint. Surely, in such a case as this, the statute is not to be restricted or expanded in its operation by agreements with the pharmacy commission, or construed according to the statement of legislators, except as they have expressed their intention in the law itself. There was no error in excluding this evidence.

3. After the arguments were closed, the court suggested to the county attorney that he had failed to prove that the defendant had no license. The county attorney claimed that it was for the defendant to show that he had a license. He also claimed that he had proven by the witness Mitchel that defendant admitted to him that he had no license. The court caused the reporter to read the testimony of Mitchel in hearing of the jury, and it appearing that Mitchel had not so testified, and the county attorney stating that he had omitted by oversight to question Mr. Mitchel on that subject, he was permitted to recall Mr. Mitchel, and prove by him that defendant said he had no license. It was within the discretion of the court to allow the witness to be recalled, and there was no abuse in that direction. The court had a right to inform itself as to what had been proven by causing the evidence to be read, and it was not prejudicial to appellant that it was read in the hearing of the jury, as it was already before the jury.

The state was permitted, over appellant's objection, to examine in chief three witnesses who were not before the grand jury, and none of whose names were upon the indictment. Appellant's objections were that no proper notice had been served, and for the reason that the indictment charges selling to Asa Hale alone testimony of sales to any other person would not be competent. Notices that these witnesses would be examined were served upon the defendant in person October 11th, and upon October 12th the trial was commenced without any motion by the state for leave to introduce this evidence, and without any demand on the part of the defendant for a continuance. As to the last one of the three examined, there was no other notice, but, as to the other two, notices in due form were served more than four days before the commencement of the trial, by reading the same to the defendant's wife, and leaving copies thereof with her at defendant's house. The first of these witnesses examined testified that defendant was selling medicines, and that he purchased from him condition powders which defendant recommended as good for cattle and horses. The second witness testified that the defendant was traveling, selling Dr. Baker's make of medicines; that she bought some of the medicines; that defendant gave her a circular like the one in evidence, and said the medicines would do what the circular and directions said. The third witness stated that, on the preliminary trial, defendant testified that he was selling Dr. Baker's medicines from house to house on the recommendation of the circular in evidence, which he distributed, and that the

medicines were good for what they were recommended in the circulars. The defendant, in his testimony, states that he was selling Dr. Baker's medicines from house to house to all who were willing to buy; that he distributed circulars such as that in evidence; that he never inquired after their diseases; that he sometimes told them what kind of medicines he had, and what they were recommended for; and that his recommendations were simply that the medicines were good for the diseases named in the circular. The court instructed the jury not to consider the evidence in relation to the sale of preparations for stock. It will be observed that, while the defendant was not examined as to the transaction and declarations related by these three witnesses, he does not deny them, and admits every material fact testified to by them. While it may be true, as stated in the objections, that proper notice had not been served, and that it was error to permit these witnesses to be examined, that it was error without prejudice to the defendant, as their statements of material facts were not only uncontroverted, but were in effect admitted, by the defendant. Evidence of sales and professions made to other persons at or before the time charged was competent to show that defendant was an itinerant vendor, and that his professions were public. The court properly instructed that, under this indictment, the jury must find that the defendant did make a sale to Asa Hale. Our conclusion is that there was no error prejudicial to the defendant, and that the judgment of the district court should be affirmed.

KENTUCKY.

*OSTEOPATHY—JUDGE THOMPSON'S DECISION.

WHAT PRACTICING MEDICINE IS.

In the case of Dr. Byron C. Axtell, of this city, an osteopath, charged with practicing medicine without license, he was today fined \$50 in the city court by Judge Thompson.

Osteopathy originated in Missouri a few years ago. The treatment became somewhat popular in Kentucky, owing to the "cure" of ex-Congressman Goodnight, of Franklin.

The following opinion of Judge Thompson handed down in the case is worth producing in full:

"The defendant is charged with 'practicing medicine' in this city without the authority required by the statute. It is urged by the defendant's counsel that 'under the statutes of Kentucky the acts mentioned and complained of in the evidence do not constitute an offense.' That no witness has 'sworn that Axtell ever practiced medicine, ever gave a prescription or administered a drug, and it appears that he never performed any surgical operation, never used an instrument, never set a fracture, or did anything except to manipulate the limbs and muscles with the hands.' The Legislature of Kentucky, in Chapter 85, 'intended merely to make a law which would prevent persons from administering drugs or giving prescriptions who did not know anything about them.'

"The language of the statute is: 'It shall be unlawful for any person to practice medicine in any of its branches within the limits of the state who has not exhibited and registered in the county clerk's office in the county in which he resides his authority for so practicing medicine, as herein prescribed, etc.

"It is not pretended that defendant has the authority to practice medicine which is prescribed by the statute. The only question, therefore, in the case is, do the acts and doings of this defendant constitute the offense of 'practicing medicine' as denounced by the statute?

*From Report Kentucky State Board of Health, 1896-97.

"This depends on what the Legislature intended by the words 'practice medicine.' If these words are to be construed as meaning only the administration of drugs, the giving of prescriptions, and the performance of surgical operations, then this defendant is entitled to his acquittal. I think it is a just and certainly a safe rule to construe the language of a criminal statute in the sense in which it is commonly used and understood among intelligent people, and I do not think any person of ordinary intelligence ever uses these terms in the restricted sense here contended. The word 'practice' is defined by Webster to mean 'the exercise of an art, or the application of a science to the wants of men': and the word 'medicine,' 'a remedial agent, a remedy, physic,' and in its secondary sense, 'that branch of science which relates to the prevention, cure or alleviation of diseases of the human body;' as the 'study of medicine' is always used among intelligent people, meaning 'the application of that branch of science which relates to the prevention, cure or alleviation of diseases to the wants of man.'

"The defendant claims that he applies to the prevention and cure of disease the science of osteopathy, which his advertisement defines to be 'the science of curing diseases without the knife or medicine.'

"The defendant puts in evidence the Journal of Osteopathy for May, 1897, in which Dr. William Smith, who seems to be an authority on the subject of osteopathy, writes of the 'three essentials.' He says: 'Were I asked to name these to the practitioner, no matter of what school, I would unhesitatingly state anatomy, physiology, and symptomatology'. Further on he says in italics: 'If you permit ignorant men to go forth and treat the sick and suffering, it is you who are responsible for their errors.' I find also in this Journal, which seems to speak with authority, that osteopathy is a science; that it is based upon exact, definite and veritable knowledge of the anatomy and physiology of the human mechanism, including chemistry, histology, morphology of its known elements, as make discoverable the great laws of the human system, by which nature, apart from artificial and medical stimulation, may recover from displacements, disorganization and consequent diseases, and regain strength and health.'

"From this evidence it is manifest that the practice of osteopathy is the practice of medicine within the meaning of the statute: it is further evident that no one is qualified to practice this branch of the science of medicine without a thorough knowledge of anatomy, physiology and the cognate branches which go to make up the science of medicine; and, upon the evidence, the court finds as a fact that the defendant has shown himself absolutely ignorant of the most rudimental learning in any of them. That in his ignorance of the fundamental principles of his profession, he subjected the child of Mrs. Detroy, which was laboring under a tubercular disease of the hip, to cruel and unnecessary torture, affecting its health and necessitating the employment of a physician to treat it for fever resulting from his inaptitude.

"The court is of opinion that any person who, for compensation, professes to apply any science which relates to the prevention, cure or alleviation of the diseases of the human body, is practicing medicine within the meaning of the statute: and, as a matter of fact on the evidence, that defendant is guilty as charged, and the fine of fifty dollars is assessed against him."

MINNESOTA.

DECISION OF THE SUPREME COURT OF MINNESOTA, JULY, 1884,
TERM. *State ex rel. Powell v. State Medical Examining Board.*

The case made by the pleadings is stated in the opinion:

DICKINSON, J.—The relator seeks by mandamus to compel the State Medical Examining Board to issue to him the certificate required by chapter 125 of the

laws of 1883, to authorize him to practice the profession of a physician in this state. He has appealed from an order of the district court quashing an alternative writ. The act referred to creates a board of medical examiners, consisting of the faculty of the Medical Department of the University of Minnesota. It requires all persons, except such as have been practicing medicine five years within the state, as a condition of the right to practice, to procure from this board its certificate or diploma. "Graduates in medicine" are to receive a certificate upon their diplomas being presented to the board and found to be genuine. Other applicants for certificates are required to pass a satisfactory examination before this board. Section 9 of this act contains the provision: "The Board of Examiners may refuse certificates to individuals guilty of unprofessional or dishonorable conduct, and they may revoke certificates for like causes."

It appears that the relator applied for a certificate from the board, presenting a diploma, which was found to be genuine, showing that he was a graduate of the Louisville (Kentucky) Medical College, in which institution he had passed the required course of study. His application was refused only upon the ground that, as the board considered and determined, the relator was guilty of unprofessional and dishonorable conduct, and was, at that time, conducting himself in an unprofessional and dishonorable manner in advertising himself through the newspapers and by circulars to be a medicine man of the Winnebago tribe of Indians, adopted by that tribe, and assuming the name of "White Beaver," and claiming in such publications the proprietorship of certain specific remedies, one of which he claimed would cure cholera morbus when taken internally, and rheumatism when applied externally, which claims are alleged by the respondents to be untrue and impossible. * * *

Held:

1. The applicant has a right to be heard upon the investigation as to his conduct.
2. The word "unprofessional" in section 9 is used convertibly with "dishonorable," having a like meaning.
3. The act is not unconstitutional.

Our conclusions being that the law under which the board acted was constitutional, it is apparent that the relator can not, by mandamus, compel the issuing of a certificate to him. The action of the board is not merely ministerial, but partakes of a judicial character. It is to inquire concerning, and to determine as to the existence of, certain facts, and whether it should grant a certificate of qualification to an applicant must depend upon that determination. The board has not refused or neglected to act upon the matter submitted to it. It has decided upon the application, and the correctness of that decision, involving the exercise of the judgment of the members of the board, can not be brought into review by this proceeding, and is not properly before us.

The order of the lower court, quashing an alternative writ of mandamus, is affirmed.

MISSOURI.

DECISION OF THE SUPREME COURT OF MISSOURI UPON THE CONSTRUCTION OF SECTIONS 1-2 OF THE MEDICAL PRACTICE ACT.— *The State ex rel. E. G. Granville v. The State Board of Health.*

The decision of the court is upon a petition for a peremptory writ commanding the State Board of Health to issue and deliver to the relator, E. G. Granville, a graduate of the Kansas City Hospital College of Medicine, a certificate authorizing him to practice medicine in the State of Missouri.

After citing the act to regulate the practice of medicine in that state—and which is above given—the court say:

To this end also—that is, "to provide for the sanitary welfare of the people of this state, and to rid this commonwealth of that class of medical pretenders,

known by the various designations of empirics, mountebanks, charlatans and quacks,"—it was enacted that when anyone desired to practice the medical profession in this state, he should do one of two things; either present himself before the State Board of Health, and "submit to such examination as the said board shall require," or, if a graduate of medicine, present his diploma to the State Board of Health "for verification as to its genuineness," and "if the diploma is found to be genuine and the person named therein to be the person claiming and presenting the same, the State Board shall issue its certificate to that effect," etc. Sec. 1.

An ingenious argument has been made in behalf of relator endeavoring to show that his right to a certificate is exclusively bottomed on section one, just quoted; that this right became consummate when the diploma was verified as to its genuineness, and the person named in it found to be the person claiming and presenting the same, and that this court in ascertaining whether relator is entitled to the exercise of our mandatory authority in his behalf, must center and confine our attention to that section alone.

Should we do this, our action would certainly be at variance with that very familiar rule of ascertaining the legislative intent, which requires that, save in exceptional instances, instances where the legislative object is accomplished, embraced and ended in and by a single section, that the whole statute, and sometimes others *in pari materia* must be looked to in the effort to discover the entire legislative meaning. This case is not an exceptional one; the legislative thought and purpose are not fully expressed, nor the legislative methods whereby that purpose is to be executed, fully described in section 1. This will become apparent as we proceed further in this discussion. Thus, while section 1 provides for the issuance of certificates to graduates and examinees, it remains for section 2 to declare that the Board shall "prepare two forms of certificates, one for persons in possession of diplomas, the other for candidates examined by the Board." As the Legislature has only made provision in that section for but *two* forms of certificates, neither of which embrace the case of a graduate who has been so unfortunate as to *lose* his diploma, it must needs follow that the Legislature has made no provision for a case of that character. This being true, it will also follow that those words in that section requiring the Board "to issue certificates to all who shall furnish satisfactory proof of having received diplomas from legally chartered medical institutions in good standing," are to be applied and can only be applied to that class of persons for whom the Board is to prepare one of those forms of certificates, and none other, *i. e.*, to that class of "persons in possession of diplomas."

As a necessary sequence of the foregoing it must devolve on him who is possessed of a diploma to furnish to the Board "satisfactory proof of having received" such diploma "from a legally chartered medical institution in *good standing*, and this, too, in addition to the requisites as to verification, particularly specified in section 3. And, if leaving the plain language and letter in section 2, we should look to the reasons which gave to the statutory provisions their birth and their being; look to the mischief they were designed to extirpate and the remedy and protection they were designed to furnish, it would seem passing strange that any other conclusion than that announced should be reached. For why should the Legislature create a Board of Health with such comprehensive powers, and in one case where profert is simply made of the diploma and the affidavit, require that the Board should look no further, but straightway go through the perfunctory performance of issuing a certificate to the applicant, and yet when the diploma is merely lost, proof satisfactory must be made that the absent diploma is issued by "a legally chartered medical institution in good standing?" Is it not obvious, under the claim made by the relator, that the possessor of the diploma *ipso facto* to become the possessor of a certificate? If so, wherein consists the protection which the Board of Health affords in that class of cases? Does not such a construction for the most part nullify the statute and abolish the Board of Health? If satisfactory proof that a diploma has emanated from a medical institution "in good standing," is requisite in the one case, why not in the

other? Surely no satisfactory answer based upon the reason and spirit of the law can be returned to the questions, save one which coincides with the views already announced. * * *

The petition is held to be fatally defective and is refused; but relator is given leave to plead further if he so desires.

STATE EX REL. JOHNSON V. LUTZ ET AL.—(*Supreme Court of Missouri, Dec. 23, 1896.*)

PHYSICIAN—APPLICATION FOR CERTIFICATE TO PRACTICE—STATE BOARD OF HEALTH—RESOLUTION UNAUTHORIZED—INSTITUTION IN GOOD STANDING—MANDAMUS.

The State Board of Health can not refuse a certificate authorizing an applicant to practice medicine in Missouri, on the ground that the medical college from which he was graduated had not complied with a resolution of the board requiring every college, by a certain date, to furnish the board with a list of its matriculates, and the basis of their matriculation, where it appears that the applicant was graduated before the college received notice of the resolution.

2. The applicant was not obliged to submit to an examination by the board, as provided for by Rev. St. 1889, § 6874, with respect to applicants who are not graduates.

3. Though mandamus will not lie to compel the State Board of Health to issue a certificate to practice medicine, where they have determined that the applicant is not a graduate from a college in "good standing," as required by Rev. St. 1889, § 6872, yet the question of good standing can not be made to depend merely on whether the college has complied with a resolution of the board requiring every medical college, by a certain date, to furnish the board with a list of its matriculates and the basis of their matriculation.

In bane. Application for a peremptory writ of mandamus, on the relation of Charles E. Johnson, to compel F. J. Lutz and others composing the State Board of Health of Missouri, to issue a certificate authorizing the relator to practice medicine. Granted.

Opinion of Mr. Justice Burgess: This is a proceeding by mandamus to compel the respondents, as the State Board of Health, to issue to the relator a certificate authorizing and permitting him to practice medicine and surgery in this state. On the 18th day of March, 1896, relator was graduated at the Physio-Medical College of Indiana, located at Indianapolis, in that state, and on the same day received therefrom a diploma, regular in form, and signed by the professors in said college. In the month of July next thereafter he appeared before said board of health, presented his diploma, tendered the fee of one dollar allowed by statute in such cases, and made application for a certificate authorizing him to practice medicine and surgery in this state. The certificate was refused on the ground, as alleged in the return to the writ, that the college issuing the diploma was not, in the judgment of the board, a "medical institution in good standing," within the meaning of the statute; the grounds of this conclusion being that the board had, prior to the presentation of the diploma by relator, passed a resolution, and mailed a copy of same to each medical college in the United States, requiring them to furnish the board, on or before January 1, 1896, a list of their respective matriculates and the basis of their matriculation, and that the said Physio-Medical College had not complied with this order; and also upon the further ground, that, upon announcing its refusal to grant the certificate, the board stated to relator that it would permit him to be examined, and if found qualified, grant him a certificate. Relator declined to be examined, and instituted this proceeding against the board. On April 19, 1894, the board of health adopted a rule prescribing certain conditions upon which medical students might be admitted to the lecture course, and requiring the secretary of the board to notify all medical colleges that said rule would go into effect February 1, 1895; and on the 25th day of October, 1895, said board passed another resolu-

tion, requiring all medical colleges in the State of Missouri to report to the board by January 1, 1896, a list of all their freshmen class, sessions of 1895 and 1896, with the qualifications on which they were admitted to the school. In order to make all the resolutions adopted by the board apply alike to all medical colleges in the United States, said board, on said 28th day of October, 1895, further resolved that, "as a further condition of the recognition of any medical college as being in good standing, the college shall furnish the secretary of the State Board of Health on or before January 1st every year, a complete list of all of its matriculates, together with the basis upon which such applicant matriculated, giving the name of the institution from which a degree or certificate of graduation was obtained, or the name of the state official conducting the examination, or the college previously attended, together with the date when the degree or certificate was issued; this last to be sworn to by the executive officer of the college, and attested by the secretary under the seal of the college." On the 6th day of January, 1896, the board of health passed another resolution, instructing its secretary to refuse registration of the diplomas of any medical college which had not complied with the conditions imposed upon colleges by the resolution, above quoted, of October 28, 1895, and published in the Missouri Sanitarian of the month of November next following. At the same time it was further ordered that copies of the Sanitarian, in which all the proceedings of the board were from time to time published, be sent to all the medical colleges in the United States. It was shown by the secretary of the board that he sent copies of the Missouri Sanitarian, containing all of said resolutions, to all of the medical colleges in the United States, including that of which relator was a graduate; but he did not state when or how they were sent, whether by mail or otherwise. Dr. Lutz, a resident of the city of St. Louis, Mo., and president of the board, testified that in the latter part of October, 1895, so far as he could recollect, he sent a printed notice of the requirements of the board, in a properly sealed envelope, to every medical college in the United States, setting forth the requirements of the board, and calling their attention to them, but that the Physio-Medical College of Indiana had not complied with the requirements of the board, and had not sent them a list of its matriculates, nor informed them in any way that it would comply with the requirements of the board concerning the qualifications of students, or of those who are about to begin the study of medicine. On the other hand, Dr. Bedford testified that he had been secretary of the faculty of the Physio-Medical College for a number of years, perhaps as many as 10 or 12, and, as such, receiver of all such communications addressed to the college, and that at no time prior to 1896 was there received by the college, or by him as secretary of its faculty, any communication from the State Board of Health of Missouri, pertaining to the methods of work or requirements of said college. That on the 24th day of June, 1896, he received through the mail, enclosed in an envelope, addressed to the Physio-Medical College of Indiana, C. T. Bedford, M. D., Secretary, a slip of printed matter, purporting to be the minimum requirements of the State Board of Health of Missouri. The envelope and the printed minimum requirements contained therein were introduced in evidence. The envelope is stamped "St. Louis, June 23," and addressed to Physio-Medical College, Indiana, Indianapolis, Indiana, C. L. Bedford, M. D., Secy." It also has printed on the address side the words "State Board of Health of Missouri, Willis P. King, M. D., Secretary, Kansas City, Mo." On the reverse side it bears the stamp of the post office at Indianapolis, Ind., which shows that it reached there at 4 a. m., June 24, 1896. It will thus be seen that while the evidence on the part of the respondents tended to show that the notice was sent by the secretary and the president of the State Board of Health to the Physio-Medical College, at Indianapolis, Ind., in 1895, the witnesses testified from memory only, and were indefinite as to the exact time, though Dr. Lutz stated that he thought it was in the latter part of October of that year. On the part of the relator we have the positive statements of the secretary of the faculty of the medical college that no such notice was received by that institution, or by himself as secretary, until the 24th day of June, 1896. In corroboration of his statements there were produced in court, and introduced in evidence, the identical notice and envelope in which it was inclosed, the envelope bearing the marks and letters before indicated.

Under these circumstances we think the decided weight of the evidence was in favor of the relator; and the notice was not sent to said college until June 23, 1896, and relator, having therefore graduated, was in no way affected by the failure of the college to comply with said rules. While the return to the alternative writ alleged that the medical board refused to grant relator the certificate applied for, on the grounds that the medical college was not of good standing, and because he declined to submit to an examination by the board as provided for by section 6874, Rev. St. 1889, with respect to applicants for certificates to practice medicine by persons who are not graduates, all material facts stated in the return were traversed by relator, and as no reply was filed thereto or issue taken thereon by respondents, by demurrer or otherwise, as required by statute (section 6813, Rev. St. 1889), the allegations in the plea by relator to the return, in which it was alleged that the certificate was refused because of a non-compliance by the medical college with the rules of the state board, must be taken as confessed. Moreover, the evidence plainly showed that the certificate was refused upon that ground, and the refusal of the relator to submit to an examination by the board, touching his qualifications. The president of the State Board of Health, Dr. Lutz, testified that he found the name of the Physio-Medical College of record in the list of colleges furnished by the Illinois State Board of Health, and that said list is considered standard in the United States. This would seem to settle the question as to the good standing of the college, but there was abundant evidence aside from that of Dr. Lutz to the same effect. Good standing, as used in the statute, simply means good reputation, and must be proven in the same way. But the board undertook to establish a rule of its own, by which such good standing shall be shown; that is, by requiring all medical colleges to furnish to it a list of their respective matriculates and the basis of their matriculation, and in this went beyond the power conferred upon it by statute, from which it derives its origin, and by which its duties and authority are defined. It may be conceded that, if the certificate had been refused upon the ground that the Physio-Medical College was not of good standing, as required by section 6872, Rev. St. 1889, *mandamus would not lie to compel the board to issue, because that question is, under the statute, within the judgment and discretion of the board to determine.* State v. Gregory, 83 Mo. 123; State v. State Medical Examining Board, 32 Minn. 324, 20 N. W. 238; People v. Illinois State Board of Dental Examiners, 110 Ill. 180. And in such circumstances mandamus is not the proper remedy; but, as has been said, the certificate was refused upon entirely different grounds, which did not involve matters of discretion or of judgment. While the members of the medical board are to be commended for their endeavors to elevate the standard of practitioners of medicine and surgery, in passing as a board upon the applications of such persons for certificates to practice their professions, and in prescribing rules and regulations to that end, they must keep within the limits of the statute creating it, and this they did not do.

As relator had a diploma from a medical college in good standing, he was under no obligations to submit to an examination by the board, nor had it any authority to require him to do so, as a prerequisite to granting him a certificate to practice medicine in this state.

We, therefore, shall award a peremptory writ. All concur, except Barelay, J., who concurs specially as stated by him.

Mr. Justice Barelay, (concurring). It appears from the pleadings and evidence that the refusal of a certificate to relator was based on supposed non-compliance by the Indiana college with a rule of the Missouri state board, and not upon any judgment of the board that said college was not of good standing, generally. My concurrence is given to the finding in the foregoing learned opinion touching the issue of notice to the college of that rule of the board, and to the granting of a peremptory mandamus based on that finding. But the validity of the rule of the board has not been called in question by the relator, and it seems to me preferable not to express an opinion upon it. The board is vested with authority to determine what medical colleges are of "good standing," within the meaning of the law. It is evident that there was no intention on the part of the board to apply the rule to persons graduated by this college until the latter had notice of the rule. The relator received

his diploma before the rule became operative as to that institution, and hence (according to the concession of the board) the rule can not properly be held to interfere with the granting of his certificate to practice in this state. Further than that the present case does not require us to go.

NEBRASKA.

DECISION OF THE SUPREME COURT OF NEBRASKA IN THE CASE OF THE STATE OF NEBRASKA v. S. C. EZRA M. BUSWELL, CHRISTIAN SCIENTIST.

1. **PHYSICIANS AND SURGEONS:** Practice in Violation of Statute: Christian Science. The act to establish a State Board of Health, to regulate the practice of medicine in Nebraska, etc., is as much directed against any unauthorized person who shall operate on, profess to heal, or prescribe for or otherwise treat any physical or mental ailment of another, as against one who practices "medicine, surgery and obstetrics," as those terms are usually and generally understood.

2. The object of the statute establishing a State Board of Health, etc., is to prevent imposition upon the afflicted by ignorant and unqualified pretenders to healing power; and any person not within the exceptions prescribed in said act, and not having complied with its requirements as to a certificate, who shall under any pretense operate on, profess to heal, or prescribe for or otherwise treat any physical or mental ailment of another, thereby renders himself liable to its penalties.

Exceptions by the county attorney to the decision of the district court for Gage county, Bush, J., presiding. Filed under the provisions of section 515 of the criminal code. Exceptions sustained.

Opinion of Hon. Justice Ryan: "The material parts of the indictment upon which the defendant was tried were in the following language:

"That Ezra M. Buswell, late of the county aforesaid, on the first day of September, in the year of our Lord one thousand eight hundred and ninety-one, in the county of Gage, and State of Nebraska aforesaid, then and there an illiterate man and unskilled in the art and faculty of medicine and surgery, and devising and intending by divers unlawful means falsely, unlawfully, craftily, and wickedly to deceive and defraud the people and citizens of said county of their goods, chattels, and money, to maintain his dishonest course of living, on the first day of September, in the year of our Lord one thousand eight hundred and ninety-one, and thence continually until the finding of this indictment, to-wit, for the space of eighteen months, at divers places in said county, falsely and unlawfully did assume upon himself to execute, exercise, and occupy the art, faculty, and science of a physician and surgeon, and did then and there profess to heal and otherwise treat sick persons of their physical and mental ailments, and did then and there falsely and fraudulently as a physician and pretended healer of sick persons attend on sick persons and persons with various infirmities, diseases and wounds, and treat them and profess to heal them in the city of Beatrice and divers other places in said county, the said Ezra M. Buswell never having been a graduate from any medical college; nor had he a diploma from any medical college, as required by law, to practice medicine in said state, nor had he a certificate from the State Board of Health of said state entitling him to practice medicine or surgery or otherwise treat or profess to heal physical or mental ailments, nor had he complied with the law in any respect so as to entitle him to practice medicine or surgery or treat in any manner physical or mental ailments, nor had he confined himself to administering gratuitous services in case of emergency or to the administering of ordinary household remedies."

The defendant was acquitted and the case is brought to this court under the provisions of sections 483, 515, 516, 517 of the criminal code. To a compliance

on our part with the provisions of the sections just referred to it is necessary only to consider the sixth instruction given at the request of the defendant. This instruction was in the following language:

"6. The jury are instructed, as a matter of law, that it is manifest from the law under which defendant is indicted that the object of the Legislature in the enactment thereof was only to provide for the regulation of the practice of 'medicine, surgery, and obstetrics,' as these terms are generally understood; and unless you believe from the evidence, and beyond a reasonable doubt, that the defendant within the time mentioned in the indictment practiced 'medicine, surgery, and obstetrics,' as these terms are usually and generally understood, then you will find the defendant not guilty."

The law to which reference was made in the instruction is found in chapter 35 of the Laws of 1891. The act constituting chapter 35 aforesaid was entitled "An act to establish a State Board of Health to regulate the practice of medicine in the State of Nebraska," etc. Section 17 thereof was as follows:

"Sec. 17. Any person shall be regarded as practicing medicine within the meaning of this act who shall operate on, profess to heal, or prescribe for or otherwise treat any physical or mental ailment of another; but nothing in this act shall be construed to prohibit gratuitous services in case of emergency, and this act shall not apply to commissioned surgeons in the United States army and navy, nor to nurses in their legitimate occupations, nor to the administration of ordinary household remedies."

The other provisions of the act are, for our purpose, sufficiently indicated in the language already quoted from the indictment. The instruction complained of required, as an indispensable prerequisite to a conviction, that the jury should find that the defendant within the time mentioned in the indictment had practiced "medicine, surgery, or obstetrics," as those terms are usually and generally understood. Governed by this instruction, the jury could not do otherwise than acquit, for there was no proof to meet its requirement. Whether or not the instruction was proper in view of the evidence adduced, is the sole question presented for our determination.

It is conceded that the perfect toleration of religious sentiment and the enjoyment of liberty in all religious matters is of paramount importance, and lest the contention of the defendant may be misunderstood or imperfectly stated in our own language, that contained in the brief filed on behalf of the defendant will be freely used. Such evidence as was in that brief deemed sufficient to illustrate the argument for defendant, was as follows:

Richard Walthers testified that his brother's boy came home from Florida in September, 1892; that there were running sores on his legs caused by rheumatism, and that he could not walk except by the aid of crutches; that after the defendant had seen him, about two weeks after the boy came back, he laid aside his crutches and walked by the aid of a cane, and after using that for awhile, threw it away and walked as other boys do.

James Ellerbeck testified to having been bitten by a rattlesnake, and that he at once sought the defendant and asked him for help. After talking with the defendant at the church rooms, they went to Rev. Buswell's house, and what took place there is best told in the language of the witness himself:

Q.—What did you do then?

A.—The pain ceased after his treatment, and after driving to his house it seemed to get worse until about 8 o'clock. He talked to me on the bible and different subjects in the bible, and about 8 o'clock he said he would treat me again. I laid down on a lounge and he sat down and put his hands over his face and was in that position maybe ten or fifteen minutes; and all at once I felt it come right through me and it raised me up, and I sat on the lounge and I told him I had wakened up; and from that time on I had no more pain, only there was one or two minutes when I first got up and put my feet on the floor that the stiffness seemed to be hard for a few minutes. Now, during all this time I never lost a meal nor an hour's sleep after that one treatment.

L. Bushnell testified that he was afflicted with a disease that baffled the skill of the physicians, who advised him if he could obtain assistance from

scientists that he should try; that he then sought aid from them and a very short time afterwards was able to go about as usual and sawed wood for the people of the village in order to earn his livelihood; that about three years prior to the time of giving his testimony he had fallen down a flight of stairs and had received serious injuries; that the defendant was sent for and visited him, and that he recovered without any other aid than that of the prayers of the defendant.

The witness Burgess testified of his serious illness from pneumonia, and that the defendant called on him and explained the scripture to him and prayed for him, and that in a short time he recovered.

Mrs. Gibbs testified that in the previous January her little boy, four years of age, had an attack of scarlet fever; that the physicians pronounced his case hopeless; that the child was treated by the scientists and fully recovered.

The defendant Buswell, having been sworn, testified that he was a Christian Scientist so far as he understood, and that he lived up to the teachings of Jesus Christ; that he first studied the Christian Science in his home in Beatrice, and was cured of physical ills through that study; after that he studied with Mary B. G. Eddy in her Metaphysical college in Boston, of which college he was afterwards a graduate. The term "Christian" as he understood it, means "Christ-like;" the teachings of Jesus understood and followed; science, truth understood. He further testified that the scripture teaches us that God is truth. "Truth," the witness said, "is that which is always the same; can never change; the one Supreme Being; the all powerful; that which created all things that are; He who made all that was made, and made it good, as is said in His word. The scripture tells us to know the truth and it will make us free. We understand 'to be free' means to be free in the full sense, free from sickness as well as from sin; that if God can heal the sinner He can heal the sick, or else the sick are more hopelessly lost than the sinner." "The Christian Science church," said the witness, "has a recognized code and text-books of theology; these text-books are the bible, science and health. Reverend Mary B. G. Eddy, of Boston, is the author of the book called 'Science and Health.' It and the bible are the recognized standard among Christian Scientists and adherents of that faith." The accused further testified that he had not practiced surgery or medicine or any of the branches thereof within the State of Nebraska within the eighteen months preceding the trial; that in a medical sense he had not within eighteen months treated any physical or mental ailment within that time, "for," said he, "I understand, with God's laws and not mortal man's. We can experience this only as we learn of the nothingness of mortal man and of the omnipotence of God. When persons request aid and come to us for advice and assistance we treat them as a mother treats her child that is frightened at some object it fears by showing them that God is love; and understanding the all-presence of love, there is no room for fear. We treat it as a question of fear; that is, we seek to dispel the fear by showing them the presence of love. The scripture tells us that perfect love casts out fear. If we can convince ourselves, and those that are suffering, that God is all-powerful and that God is supreme; if we can show them through the bible that God is the power that reigns entirely, just so far as they understand that, so far will they experience love and harmony and respond, as we speak of it. So far as I understand them, I have taught and teach the doctrines of Christian Science. Prayer enters into our work. We are taught by the scripture to pray always. We understand prayer to mean the earnest sincere desire of the heart, and that desire is that we may know the omnipotence of God and the nothingness of ourselves. Our authority for this treatment is the scripture, Jesus' teachings. Jesus taught His disciples to go out in the world and heal the sick and cast out devils and raise the dead, and He further said (His last words before His ascension), 'Teach all nations, baptizing them in the name of the Father, Son, and Holy Ghost. Teach them, if you are my disciples, to observe all things whatsoever I have commanded you; and lo, I am with you always, even unto the end of the world.' We believe and understand (so far as we obey Him) that the same power is for us today as well as eighteen hundred years ago." Continuing his evidence, this witness said: "I have been engaged in this work since I first began to read Science and Health in connection with the bible, which was eight

years ago. I was healed from physical ills, through the Science and Health and the scripture. I was not treated by Christian Scientists." In the course of his testimony this question was asked the witness, and the following answer was elicited:

Q.—What is your custom in allowing people and parents to call physicians, the custom of yourself and church?

A.—We believe that every one has a right to express their wish, and it is always understood that if they prefer some other treatment, or some other mode, or some one else to aid them, it is their privilege. We always do that. It is taught in our text-books. We never give any medicine; that is entirely contrary to the teachings of Christian Science. I treated Mr. Burgess about three years ago. I found him suffering a great deal. If I remember he was not able to sit up; was bolstered up in bed, I think. I treated him solemnly and talked with him of the teaching of the scripture and read to him from them, and also from Science and Health, and sought to show him that there was a greater power than man, and that that power ruled in love, and in proportion as that power was understood we should realize (demonstrate) the presence of love. At the end of a week he was able to go to his stock yards. I have no way of knowing the number of persons I have treated within eighteen months by means of Christian Science. I may have treated a hundred or more. Of these only two died.

Commenting on the facts counsel for defendant make use of the language following: "To place upon this section (17, supra) the construction contended for by the state, and to hold that the practices of the defendant are a violation of the law, would be to abrogate section 4, article 1, of the constitution of this state, which provides that all persons have the natural and indefeasible right to worship Almighty God according to the dictates of their own conscience, and also the second provision of section 4 of the enabling act, which provides that perfect toleration of religious sentiment shall be secured, and no inhabitant of said state shall ever be molested in person or property on account of his or her mode of religious worship. The defendant, and those of the same faith with him, believe as a matter of conscience that the giving of medicine is a sin; that it is placing faith in the power of material things, which belongs alone to omnipotence. To the Christian Scientist it is as much a violation of the law of God to take drugs for the alleviation of suffering or the cure of disease, as for a Methodist clergyman to take the name of his God in vain to relieve his overwrought feelings. It is as much the duty of the defendant, as his conscience and understanding teach him his duty, to visit the sick and afflicted and relieve their distress of mind, as it is for the Presbyterian minister to go into his pulpit on Sabbath morning and preach the word of God according to the understanding of that denomination, or visit the bedside of one of his sick parishioners and administer that religious consolation which is so dear to the heart of the christian and which is apparently so necessary to their spiritual welfare. The act of the latter the eyes of all christendom look upon in admiration as the performance of a christian duty. Upon the former the able counsel for the state would have the world look as upon the act of a criminal." The defendant relied upon the teachings of the bible as his authority as a Christian Scientist. It will not, therefore, be amiss to refer to it for instances applicable to his case. In the eighth chapter of the Acts of the Apostle we find an account of Simon, a sorcerer, who had used sorcery and bewitched the people of Samaria, giving out that himself was some great one. This Simon was thought to be the possessor of great power. Under the ministrations of Philip he believed and was baptised. Thereafter, sufficiently for our purpose, there follows a statement of the conduct of this convert, beginning with the eighteenth, and ending with the twenty-third verse of the chapter just cited. These verses are as follows:

* * * * *

In the light of these instances, cited from defendant's own authority, it is confidently believed that the exercise of the art of healing for compensation, whether exacted as a fee or expected as a gratuity, can not be classed as an act of worship. Neither is it the performance of a religious duty, as was claimed in the district court. There is no claim in this case that compen-

sation in one or the other of these methods was not accepted when tendered. The evidence affirmatively shows the contrary. Not only is this true, but we find a very considerable part of defendant's brief devoted to an argument as to the inefficiency of the established and recognized modes of treatment in the cure of diseases as compared with defendant's method, as tested by the results obtained. The evidence upon which the case was tried convinces us that the defendant was engaged in treating physical ailments of others for compensation. He was within none of the exceptions provided by statute. The instructions which required that, to a conviction, he should be found guilty of practicing medicine, surgery or obstetrics, as generally or usually understood, was erroneous. The object of the statute is to protect the afflicted from the pretensions of the ignorant and avaricious, and its provisions are not limited to those who attempt to follow beaten paths and establish usages. The conservatism resulting from the study of standard authors might be somewhat depended on to minimize the evils attendant upon unlicensed practitioners' attempts to follow regular and approved methods, although as against even these the law should be enforced. Still more stringently should its provisions be rendered effective against pretensions based upon ignorance on the one hand and credulity on the other. The statute does not merely give a new definition to language having already a given and fixed meaning. It rather creates a new class of offenses in clear and unambiguous language, which should be interpreted and enforced according to its terms.

Under the indictment, the sole question presented upon the evidence was whether or not the defendant within the time charged had operated on, or professed to heal, or prescribed for or otherwise treat any physical or mental ailment of another. There was involved no question of sentiment nor of religious practice or duty. If the defendant was guilty as charged, neither pretense of worship nor of the performance of any other duty should have exonerated him from the punishment which an infraction of the statute involved. In cases presented as in this case, no judgment can be rendered in this court, and, therefore, none will be attempted. The exceptions of the county attorney are sustained."

OHIO.

DECISION RENDERED BY THE SUPREME COURT OF OHIO OCTOBER, 1897. FRANCE V. STATE.—(*Supreme Court of Ohio. Oct. 26, 1897.*)

REGULATION OF PRACTICE OF MEDICINE—CONSTITUTIONAL LAW.

In this case the plaintiff in error, Edson France, was indicted by the grand jury of Sandusky county for the offense of practicing medicine in that county without having obtained from the board of medical registration and examination the certificate required to entitle a person to practice medicine in this state. He was tried and convicted at the April term, 1897, of the court of common pleas, and sentenced to pay a fine and costs, to reverse which judgment he has, on leave granted him, filed his petition in error in this court. A statement of the questions raised, and of the facts necessary to their understanding, appears in the opinion. Affirmed.

Judge Williams delivered the following opinion: The prosecution is based upon the act "to regulate the practice of medicine in the state of Ohio," passed February 27, 1896, (92 Ohio Laws, 44-49). If the statute is constitutional, it is not claimed there is any error in the record for which the judgment below should be reversed. The contention is that the act, in some of its provisions, is repugnant to the constitution of this state, and in others to the constitution of the United States; and that the remaining provisions of the statute are so dependent, in their practical operation, upon those which are subject to these constitutional infirmities, that the whole act becomes invalid. The statute provides that "any person practicing medicine or surgery as defined in section 4403f in this state, without having first complied with the pro-

visions of section 4403e and 4403d, except as herein provided, shall be deemed guilty of a misdemeanor, and shall be fined not less than twenty dollars nor more than five hundred dollars, or be imprisoned in the county jail not less than thirty days nor more than one year, or both." Section 4403g. Section 4403f is as follows: "Any person shall be regarded as practicing medicine or surgery within the meaning of this act who shall append the letters M. D. or M. B. to his name, or for a fee prescribe, direct or recommend for the use of any person, any drug or medicine or any other agency for the treatment, cure or relief of any wound, fracture or bodily injury, infirmity or disease: *Provided, however,* that nothing in this act shall be construed to prohibit service in case of emergency, or the domestic administration of family remedies; and this act shall not apply to any commissioned medical officer of the United States army, navy or marine hospital service in the discharge of his professional duties, nor to any legally qualified dentist when engaged exclusively in the practice of dentistry, nor to any physician or surgeon from another state or territory who is a legal practitioner of medicine or surgery in the state or territory in which he resides, when in actual consultation with a legal practitioner of this state, nor to any physician or surgeon residing on the border of a neighboring state, and duly authorized under the laws thereof to practice medicine or surgery therein, whose practice extends into the limits of this state; providing that such practitioner shall not open an office or appoint a place to meet patients or receive calls within the limits of this state." Section 4403e provides that "no person shall practice medicine, surgery or midwifery, in any of its branches, in this state without first complying with the requirements of this act. If a graduate in medicine or surgery he shall, either personally or by letter or proxy, present his diploma to the State Board of Medical Registration and Examination for verification. Accompanying such diploma the applicant shall file his affidavit, duly attested, stating that the applicant is the person named in the diploma and is the lawful possessor of the same, and giving his age and the time spent in the study of medicine. If the board shall find the diploma to be genuine, and from a legally chartered medical institution in good standing, as determined by the board, and the person named therein be the person holding and presenting the same, the board shall issue its certificate to that effect, signed by its president and secretary, which, when left with the probate judge for record as hereinafter required, shall be conclusive evidence that its owner is entitled to practice medicine or surgery in this state. If a legal practitioner under the laws of Ohio in force at the time of the passage of this act, but not a graduate of medicine or surgery, as above defined, he shall, either personally or by letter or proxy, furnish the board an affidavit, duly attested, stating the period during which and the places at which he has been engaged in the practice of medicine or surgery. If the board is satisfied from the affidavit and other information received that the applicant was a legal practitioner of medicine in Ohio at the time of the passage of this act, it shall issue its certificate to that effect, which, when left with the probate judge for record, shall be conclusive evidence that its owner is entitled to practice medicine or surgery in this state. If engaged in the practice of medicine in this state at the time of the passage of this act, but not a legal practitioner under the laws in force at such time, nor a graduate in medicine or surgery as above defined, he shall present himself before the board and submit to such examination as to his qualification for the practice of medicine or surgery as the board may require. If such applicant passes an examination satisfactory to the board, the board shall issue its certificate to that effect, which, when left with the probate judge for record, shall entitle the owner to practice medicine or surgery in Ohio for a period of one year next ensuing from the date thereof. The board may refuse to grant a certificate to any person guilty of felony or gross immorality, or addicted to the liquor or drug habit to such a degree as to render him unfit to practice medicine or surgery; and may, after notice and hearing, revoke a certificate for like cause. An appeal may be taken from the action of the board refusing to grant or revoking a certificate for such cause, to the governor and attorney general, and the decision of which officers, either affirming or overruling the action of the state board, shall be final." And section 4403d contains the following provision: "The person receiving a certificate to practice medicine or surgery under section 4403e shall, before entering upon the practice, leave his certifi-

cate with the probate judge of the county in which he resides, for record. The probate judge shall record the same in a book to be kept for that purpose, and endorse on the margin of the record and on the certificate the time he received the same for record, and make a proper index to all certificates by him recorded. The probate judge shall note in the margin of the record the revocation of a certificate, or any change in the location or death of the owner of a certificate. Upon application the probate judge shall make out a certified copy of any such certificate and the endorsements thereon, and such certified copy shall be *prima facie* evidence of all matters and facts therein contained. Between the first and thirty-first days of December in each year the probate judge shall furnish the secretary of the state board a list of all certificates recorded and in force, and also a list of all certificates which have been revoked or the owners of which have removed from the county or died during the preceding year. In case of a change of residence, the owner of a certificate shall have the same recorded anew by the probate judge of the county into which he removes." The other provisions of the statute are not important in the disposition of the questions in the case.

1. One objection made to the statute is that by those provisions of section 4403c which authorize the medical board, for the causes therein mentioned, to refuse or revoke certificates of qualification required of physicians before they are entitled to practice in this state, and provide for an appeal to the governor and attorney general, it assumes to confer judicial power, which, under section 1 of article 4 of the constitution of the state, belongs exclusively to the courts. Undoubtedly, the authority conferred by the provisions referred to includes the power to examine into and decide questions requiring the exercise of judgment, such as might not inappropriately be conferred on a court; yet, as said by White, J., in *State v. Harmon*, 31 Ohio St. 250, 259, "it does not follow that the exercise of such authority is necessarily the exercise of judicial power. The authority to ascertain facts, and apply the law to the facts when ascertained, appertains as well to the other departments of the government as to the judiciary. Judgment and discretion are required by all departments." It would be difficult to draw the precise line between those functions that may be constitutionally devolved upon the other departments and those which pertain strictly to the judiciary; and, so far as we are aware, the attempt has not been made. But in numerous instances, from an early period in the history of the state, the Legislature has invested various boards, bodies, and officers with the power, and charged them with the duty, of ascertaining facts, and hearing and deciding questions, when deemed necessary or expedient in order to carry into execution laws enacted to accomplish some public need or purpose, or deemed for the public good. Of this nature are those powers conferred on boards of county commissioners and township trustees to determine upon the necessity and propriety of establishing, improving, altering, and vacating public roads and ditches, and to ascertain and decide whether the necessary steps required by the law have been taken in the proceedings; also, those with which other boards and officers have been clothed to determine which of several bidders for public works or contracts is the lowest responsible one, those which authorize county auditors to make additions to tax duplicates, and many others of a kindred nature which might be mentioned,—all requiring, in some manner and degree, and for some purpose, the exercise of the power to hear and determine important questions, sometimes involving large interests. And the validity of this class of legislation has in the main never been challenged; but, when called in question, it has been uniformly sustained by the courts. The case of *State v. Guilbert*, 56 Ohio St. 576, 47 N. E. 551, forms no exception, for the powers of the recorder under the statute there in question were essentially those which properly belong to a court. Those conferred on the medical board by the statute here under consideration are plainly not of that character; nor are they made so by the circumstance that an appeal is allowed from its decisions to the governor of the state and the attorney general. These executive officers do not, under the act, any more than does the board, perform the functions of a court. The powers of the board bear a close analogy to those of boards of school examiners, who are authorized to grant certificates to teach in the public schools to applicants who are found, on examination, to possess the necessary qualifications and furnish satisfactory evidence of good moral character, and to re-

voke any certificate granted, for intemperance, immoral conduct, or other good cause. These boards, in the discharge of their duties, do not exercise the judicial power which the constitution has reserved to the courts, but are public agencies designated by the state to aid in making its common school system effective; and the medical board is but an agency of a like character, clothed with similar powers, to insure the effective execution of a law designed for the promotion of the public health and welfare. The purpose of the statute undoubtedly is, by enforcing the requirements it has prescribed for the admission of persons to the practice of medicine in the state, to prevent those from engaging in the practice of that profession who, from lack of proper knowledge or want of moral rectitude, are unfit to be intrusted with its important and responsible duties. The power to pass upon the qualifications required must necessarily be committed to some board or body other than the Legislature, and may be, not inaptly, characterized as administrative, rather than judicial, within the meaning of the constitution.

2. These provisions of the statute, it is further contended, are in conflict with section 10 of article 1 of the federal constitution, which prohibits the passage by any state of *ex post facto* laws and bills of attainder. But we are of opinion they are not. The certificates which the board is authorized to refuse or revoke are those provided for by the act. When a person makes his application for a certificate, he invokes such action of the board as it is authorized to take under the act, which is, either to grant or refuse the certificate, as the facts brought before it may appear to warrant. The refusal to grant it, when that is done in accordance with the act, leaves the applicant in no different situation from that which he occupied before his application was made. And, when he accepts a certificate granted by the board, he holds it subject to the provisions of the statute at the time it was issued. The power of revocation then residing in the board, for any of the causes mentioned in the statute, attaches to the certificate as one of the terms and conditions upon which it was granted and accepted, and becomes a part of it, as much so as if expressed in it. So that neither the refusal to grant nor the revocation of the certificate has any retroactive operation, nor imposes any new or additional punishment or disability for a past act. The statute, in all its provisions, has prospective operation only, and does not purport to have a retroactive effect.

3. Another contention of the counsel for the plaintiff in error is that the statute discriminates against physicians and surgeons who reside out of the state, solely on account of their residence, and not for the lack of the necessary qualifications. This result is claimed to follow from those provisions of section 4403g which make it necessary for the person obtaining a certificate from the medical board to leave it with the probate judge of the county in which he resides, to entitle him to practice,—a requirement with which it is impossible for a non-resident to comply; and those of section 4403f by which physicians residing in other states and territories are prohibited from opening an office, or appointing a place to meet patients or receive calls within this state, and which restrict their right to practice here to cases in which they may be called in consultation with a legal practitioner of this state, or where, residing on the border of a neighboring state, their practice extends into this state. These provisions, it is contended, operate as a restraint upon the full enjoyment and pursuit of their lawful calling by physicians who are citizens of other states, and are therefore in conflict with section 2 of article 4 of the federal constitution, which guarantees to the citizens of each state the privileges and immunities of citizens in the several states, and also with the fourteenth article of amendment of that constitution, which forbids any state to make or enforce any law abridging the privileges or immunities of the citizens of the United States. And it is furthermore contended that, the statute being invalid in the particulars referred to, the whole act must fall, because, otherwise, resident physicians would be amenable to the law, while those who reside out of the state are exempt from its operation, the result of which would be that the state would thus impose greater burdens on its own citizens than are imposed on non-residents engaged in the same occupation and enjoying the same privileges.

Unless the last of these contentions can be sustained, the first one, though held to be entirely sound, can not be made available by the plaintiff in error:

for the courts will not enter upon an inquiry into the validity of a law which invades no right of person or property of the party who invites the inquiry. When the alleged offense is charged to have been committed by the plaintiff in error, he was a resident of the state, and it is not competent for him to assert the rights of non-residents; nor can he interpose objections to the law which alone concern their rights, as a means of defeating the operation of those provisions which are applicable to him, unless the validity of the latter are also involved. Besides, as said by Mr. Justice Miller, in *Bradwell v. State*, 16 Wall. 130, 138, "it has been repeatedly held that the second section of the fourth article of the constitution has no application to a citizen of the state whose laws are complained of." And it is held in that case that the section of the constitution referred to "only guarantees privileges and immunities to the citizens of other states in that state."

If, as is urged by counsel, the requirement of the statute concerning the registry of the certificates which physicians must obtain to entitle them to practice in this state is void as against non-residents, either because of the impossibility of their compliance therewith, or because the statute is thus made to deprive them of a right they otherwise would have, the only result would be that, without the necessity of such compliance, non-resident physicians would be entitled to practice their profession here. In effect, they would be excepted from the operation of the statute; and it is because they would thus be relieved of a burden which is imposed upon physicians residing in the state, and the latter thus discriminated against, that the entire act is claimed to be invalidated. It is not necessary to adopt this circuitry to establish the exemption of non-resident physicians from the necessity of compliance with the act. The statute, by express provision, excepts from the requirements of obtaining and registering certificates all physicians and surgeons of other states called in consultation with a physician of this state, and all those residing on the border of a neighboring state whose practice extends into this state. The number thus excepted, or the extent of their practice, can make no difference, in principle, in the solution of the question here presented. The exception of some, and to a limited extent only, constitutes a discrimination which can not be any the less subject to the constitutional objection made than the exception of all of the same class. So that the question may be resolved into this: Does the exception contained in the statute, in favor of non-resident physicians, render the act obnoxious to the federal constitution, as claimed? We think it does not. Under a statute of West Virginia much like ours, and containing a similar exception, a resident physician of that state was prosecuted for practicing medicine without the certificate required by the act. And, upon very full consideration, the act was held constitutional, in the case of *Dent v. West Virginia*, 129 U. S. 124, 9 Sup. Ct. 231. And, while it does not appear that the question in the form here urged was pressed upon the court in that case, that feature of the statute excepting non-resident physicians from its provisions was not overlooked, but is pointed out in the opinion, where it is said that the statute "applies to all physicians except those who may be called for special cases from another state." Mr. Justice Field clearly distinguishes that case from those of *Cummings v. Missouri*, 4 Wall. 277, and *Ex parte Garland*, Id. 333, and fully sustains the power of the states, under the national constitution, to make and enforce, for the protection of their people, all reasonable regulations and conditions calculated to insure proper qualifications of those who would engage in the practice of medicine, or pursue other professional callings requiring learning and moral integrity for the proper discharge of their duties; and he observes that, "as one means to this end, it has been the practice of different states from time immemorial to exact in many pursuits a certain degree of skill and learning upon which the community may confidently rely, their possession being generally ascertained upon an examination of parties by competent persons or inferred from a certificate of them in the form of a diploma or license from an institution established for instruction on the subjects, scientific and otherwise, with which such pursuits have to deal. The nature and extent of the qualifications required must depend primarily upon the judgment of the State as to their necessity. If they are appropriate to the calling or profession, and attainable by reasonable study or application, no objection to their validity can be raised because of

their stringency or difficulty,"—and, further, that "the same reasons which control in imposing conditions upon compliance with which the physician is allowed to practice in the first instance may call for further conditions as new modes of treating disease are discovered, or a more thorough acquaintance is obtained of the remedial properties of vegetable and mineral substances, or a more accurate knowledge is acquired of the human system, as to the agencies by which it is affected. It would not be deemed a matter for serious discussion that a knowledge of the new acquisitions of the profession, as it from time to time advances in its attainments for the relief of the sick and suffering, should be required for continuance in its practice, but for the earnestness with which the plaintiff in error insists that by being compelled to obtain the certificate required, and prevented from continuing in his practice without due process of law." And in *Bradwell v. State*, supra, it is held that "the right to control and regulate the granting of licenses to practice law in the courts of a state is one of those powers which are not transferred for protection to the federal government, and its exercise is in no manner governed or controlled by citizenship of the United States in the party seeking such license;" and that the right to engage in such practice is not "a privilege or immunity of a citizen of the United States, within the meaning of the first section of the fourteenth article of amendment of the constitution of the United States." There is no apparent ground of distinction in this respect between the right to engage in the practice of medicine and that of engaging in the practice of law.

We discover nothing unreasonable in the regulations adopted by the statute in question for the admission of persons to the practice of medicine, nor any valid objection to the provision excepting therefrom physicians residing in other states. Physicians called in consultation are usually the most eminent and skillful that can be procured; and those residing on the border of an adjoining state, with a practice extending into this State, can include only those who have a legal standing and established practice in their own state, which the law regards as sufficient evidence of their capacity and character to admit them to continue their practice here. In neither case are the citizens likely to suffer harm. It was apparently contemplated by the Legislature that these two classes embraced in the exception would include such non-resident physicians as would be likely to engage, in any way, in the practice in this State; or, if not, any others would be so exceptional as to call for no further provision. When a physician of another state establishes himself in the practice in this state, by opening an office within it, or regularly engages in the practice here, though it be from place to place, it may be that he should be treated as a resident, within the meaning of the statute. Evidently, to constitute such residence, it is not necessary that he should be an elector. A temporary residence may be of such character and duration as to bring him within the statute. But in what cases that may be so we need not now attempt to point out. The occasion for so doing may arise when a physician coming from another state to engage in such practice shall make complaint that he has been refused a certificate or its registration. We are satisfied that, in its application to persons in the situation of the plaintiff in error, the statute is not open to the objections he here urges against it, but is constitutional and valid. Judgment affirmed.

OREGON.

DECISION OF THE SUPREME COURT OF THE STATE OF OREGON, NOVEMBER, 1891, TERM, SUSTAINING THE RIGHT OF A STATE BOARD OF MEDICAL EXAMINERS TO DETERMINE AS A QUESTION OF FACT WHETHER OR NOT A MEDICAL INSTITUTION ISSUING A DIPLOMA IS AN INSTITUTION IN "GOOD STANDING."—*William Barmore v. The State Board of Medical Examiners.*

This is a proceeding by writ of mandamus against the defendants, who constitute the Board of Medical Examiners for the State of Oregon, to compel them to issue to the plaintiff the proper certificate authorizing him to practice as a physician in this state, or show cause for such refusal.

The material allegations in the writ are that the petitioner is a graduate of medicine and is the holder and in lawful possession of a diploma issued by the Medical Department of the University of Cincinnati, a legally chartered institution in the state of Ohio, in good standing. That said petitioner did, on the 2d day of May, 1891, present his said diploma to said board, duly verified by oath, and in all respects performed the acts on his part by statute required, and thereupon applied for a certificate from said board to the effect that said diploma was found to be genuine, and that the person presenting the same was the person named therein, and that it therefore became and was the duty of said board to issue to the petitioner such certificate entitling him to practice his profession in this state, and that they refused and still refuse, contrary to the duty imposed upon them by law: and that the plaintiff has no plain, speedy, or adequate remedy in the ordinary course of law.

The board answered said writ, and thereafter, by leave of court, filed an amended answer. It is admitted that the plaintiff received a diploma from the Medical Department of the University of Cincinnati, in the state of Ohio, but denies that said Medical Department of the University of Cincinnati was, at the date of said diploma, or is now, a medical institution in good standing in the state of Ohio or elsewhere.

Admitted that said board of medical examiners neither made nor found any objection to the genuineness of said diploma, or to the identity of the petitioner; but denies that they refused on those or any grounds, except as hereinafter alleged, to issue him a license to practice medicine in this state, and denies that said board in so refusing to issue said, or any, certificate or license to the petitioner, acted contrary to its alleged duty under the provisions of said acts, or that it still refuses to do so, except as hereinafter alleged. There are other denials not necessary to be noticed. And for a further and separate defense:

That, pursuant to the power and authority vested in said board by the act of the legislative assembly of the state of Oregon, approved February 28, 1891, entitled "An act to regulate the practice of medicine and surgery in the State of Oregon," and the act amendatory thereof, approved February 2, 1891, creating said board, they did, as such board, at a meeting thereof, held in the city of Portland, Oregon, on the 27th day of April, 1891, amongst other things, duly adopt a standing resolution for the guidance of said board and as a criterion to aid them in determining as to whether the diplomas presented for their examination by those wishing to avail themselves of the provisions of said act were from legally chartered medical institutions in good standing, which resolution, among other things, provided:

"*Resolved*, That the words medical institution in good standing, in section 11 of an act to amend an act entitled an act to regulate the practice of medicine and surgery in the state of Oregon, is hereby defined to include only those institutions which require at least three regular courses or sessions of six months each, extending over a period of three years for graduation," for the sole and only purpose of aiding said board in determining the character of the schools from which diplomas issued.

That said rule was in force and effect on the 2d day of May, 1891, and that on said date the petitioner presented the diploma mentioned in the petition to the said board of medical examiners for their examination, and applied for a certificate or license to practice medicine in the state of Oregon; and thereafter, to-wit, on the 4th day of May, 1891, the said board, after due deliberation, rendered its decision on said application of petitioner for a license to practice medicine in this state, and refused the said license on the ground that said diploma was issued to the applicant from a medical university requiring only a two-term course of less than six months each; and adjudged and determined that the said university issuing said diploma was not at said time and is not now a medical institution in good standing within the meaning of said acts and the resolutions of said board.

For a further defense it is alleged that the plaintiff submitted himself for examination by said board and he was fully examined as to his qualification to practice medicine and surgery in this state, and that upon such examination his average was only fifteen per cent, and that he was not licensed be-

cause he lacked the necessary qualifications and learning. That by a rule of the board every person examined must show an attainment of seventy-five per cent in the branches of study over which the examination extends and is usually pursued in the attainment of medical knowledge.

The reply denied most of the new matter in the answer.

Geo. Chamberlain, Attorney General, for appellant. W. W. Thayer, C. B. Bellinger and L. A. McNary for respondent.

Strahan, C. J.—This litigation grows out of the act of 1889 to regulate the practice of medicine and surgery in this state, and the act of 1891, amendatory thereof.

The first section of the act of 1889 (Session Acts, p. 145), among other things, provides: "Every person practicing medicine or surgery in any of their departments shall possess the qualification required by this act. If a graduate of medicine, he shall present his diploma to the board of examiners hereafter provided for, for verification as to its genuineness. If the diploma is found to be genuine and if the person named therein be the person claiming and presenting the same, the board of examiners shall issue its certificate to that effect, signed by at least two of the members thereof, and such diploma and certificate shall be deemed conclusive as to the right of the holder of the same to practice medicine in this state." If the appellant be not a graduate, the section then provides for his examination, and if such examination be satisfactory to the examiners, a certificate shall issue, which confers like privileges as in the case of graduates.

The second section of the act provides for the board of examiners, defines their qualifications and the method of their appointment.

Section 3 of the act requires the board of examiners to issue certificates to all who shall furnish satisfactory proof of having received diplomas or licenses from legally chartered medical institutions in good standing of whatever school or system of medicine; and they shall prepare two forms of certificates, one for persons in possession of diplomas or licenses, the other for candidates examined by the board; they shall furnish to the county clerks of each county a list of all persons receiving certificates, etc.

Section 13 of the act exempts those then practicing medicine in Oregon, provided they register their names with the county clerk within sixty days after the passage of the act.

By the amendatory act (Session Acts, 1891, pp. 153-4) section three of the original act is amended. As amended it is made the duty of the State Board of Medical Examiners to issue certificates to all who shall furnish satisfactory proof of having received diplomas or licenses from legally chartered medical institutions in good standing of whatever school or system of medicine. They shall prepare three forms of certificates, one for persons in possession of diplomas or licenses, one for candidates examined by the board, and one for those who are practicing medicine or surgery in the State of Oregon and have registered their names and places of residence with the county clerk of the county in which they reside, in conformity with section thirteen of the aforesaid act, etc.

These provisions of statutory law appear to have been copied substantially either from the laws of Illinois or Missouri; nor is it material, for in each of those states the statute had been construed by the courts before its enactment in this state. By adopting the statute in such case we adopted with it the construction it had received by the courts of the state from whence it was taken, and the decisions of the courts of such states are authority here.

The construction of the Illinois statute came before the Supreme Court of that state in *People ex rel. v. State Board of Medical Examiners*, 110 Ill. 180. In the Illinois act* the word "reputable" was used instead of the words "good standing" as in our and the Missouri acts, and in reaching the conclusion as to the powers of the board to determine what college was "reputable" within the meaning of the act the court said:

* A curious confounding by the court of the Illinois Medical Practice Act with the Act to Create a State Board of Dental Examiners in the State of Illinois, passed May 30, 1881.

"As a part of the current history of the times, and as an aid in arriving at the legislative intention, we know there were colleges of different kinds authorized by the laws of states in which they were located in which there were pretended annually to be delivered full courses of lectures and instructions upon arts and sciences professed to be taught, that were not 'reputable' because they graduated for money frequently without regard for scholarship. A diploma from such an institution afforded no evidence of scholarship or attainments to its holder. It was a fraud and deserved no respect from anybody, and it was against such diploma the law was intended to protect the public, and therefore required the college to be 'reputable.' Whether a college be reputable or not is not a legal question but a question of fact. So also are the requirements in regard to the annual delivery of full courses of lectures and instructions. These questions of fact are by the act submitted to the decision of the board, not in so many words, but by the plainest and most necessary implication. Their action is to be predicated upon the existence of the requisite facts, and no other tribunal is authorized to investigate them, and if necessary therefore they must do so. The act of ascertaining and determining what are the facts is in its nature judicial."

It involves investigation, judgment and discretion. The same question was again before the Supreme Court in Board of Dental Examiners v. People ex rel. Cooper, 123 Ill. 227. In that case the board adopted a rule for its guidance in such cases identical in principle with the one adopted by the appellant board. The resolution adopted by the board of Illinois is as follows:

"*Resolved*, That after June, 1885, the Illinois State Board of Dental Examiners will recognize as reputable only such dental colleges as require, as a requisite for graduation, attendance upon two full regular courses of lectures and practical instruction, which courses shall each be of not less than five months' duration, and shall be held in separate years, with practical instruction intervening between the courses. Such colleges must also require a preliminary examination before admitting students to matriculation: *Provided*, that no certificate from a high or normal school or other literary institution is presented by the candidate."

In this case The People ex rel. Sheppard v. State Board of Dental Examiners, *supra*, was approved, but it was held under the peculiar facts developed by the pleadings that the board had abused the discretion which the statute had vested in it, and for that reason the alternative writ was made peremptory. The opinion of the appellate court is found in this case in 20 Ill. App. 457.

So in The State ex rel. Granville v. Gregory et al., constituting the State Board of Health of Missouri, 83 Mo. 123, the same construction was given a very similar statute in the state of Missouri. In that case it was held that the granting of certificates to holders of diplomas involved matters of judgment and discretion on the part of the State Board of Health, and would not be enforced by mandamus.

A similar question came before the Supreme Court of Minnesota in State ex rel. Powell v. State Medical Examining Board, 32 Minn. 324, with the like result. In that case the board was authorized to refuse the certificate to any one guilty of "unprofessional or dishonorable conduct," and it was held that the relator was not entitled to a remedy by a mandamus to secure a review of the correctness, or the reversal, of the determination of the board.

This class of legislation has its origin in the police power of the state. Its object is to protect the inhabitants of the state from imposition by presumptuous pretenders, and it has been upheld and sustained in Massachusetts, Maine, New York, Ohio, Illinois, Alabama, Georgia, Missouri and Texas.

To render such a law effective the power to grant certificates must be lodged in some recognized body of men learned in the science of medicine, with a supervisory power vested in the courts to review their acts if the discretion which the law gives them shall be abused. But before the courts will interfere, it must be made to appear that there has been an abuse of discretion. It is not enough that there may be found men in the same profession who would have decided the other way.

We are the better satisfied with the result in this case for the reason that the return of the certificate was refused on the ground that the college issuing the diploma was not one in good standing. The appellant submitted himself to an examination by the board and fell below the general average, and for that reason, also, a certificate was refused.

There was no abuse of discretion on the part of the board alleged or shown, and feeling ourselves bound by the authorities cited we have only to reverse the judgment and dismiss the writ, and it is so ordered.

PENNSYLVANIA.

DECISION OF THE SUPREME COURT OF PENNSYLVANIA AGAINST THE INCORPORATION OF A MEDICAL COLLEGE INTENDED TO CONFER DEGREES IN MEDICINE UPON STUDENTS AND OTHERS.

—*Case of the Medical College of Philadelphia, v. Wharton.*

The preamble of the act of 1791 declares, that a great portion of the time of the Legislature has heretofore been employed in enacting laws to incorporate private associations, etc., and it provided a method of relieving the Legislature from the burden, [by empowering the Supreme Court to issue certificates to associations of private individuals for literary, charitable or religious purposes, and thus, in effect, to incorporate such associations.] Since the passing of the act nearly one hundred colleges have been incorporated by the Legislature. This is a strong argument against the application. 1st—The preamble speaks of private associations. Is this, therefore, such a private association? Can a medical college, invested with a large jurisdiction and powers to be exercised upon a subject of great public importance and with power to grant honors and privileges to persons not members be properly called a private society? In all countries, the profession of medicine has been considered in the light of a public trust; and in many states no one can practice without a license granted by the public authority. Whatever may have been the original meaning of the word college it has now come to signify an institution for the higher branches of education established or incorporated by the state. (2 Kent's Com. 270.) 2nd—To authorize the Court to grant a certificate the association must be either for a literary, charitable or religious purpose. The Court will not go beyond its authority. In the case of St. Mary's church, 6 Serg. & Rawle, 505, C. J. Tilghman said: "In this business of charters the Court acts under the grant of an extraordinary power of a special nature and is confined to the cases described in the acts of the assembly." This can hardly be called a literary institution. This word seems to be applicable in this connection to libraries and other associations connected with literature. Medicine is a science. The constitution of this commonwealth (Art VII, Sec. 11,) declares that "The arts and sciences shall be promoted in one or more seminaries of learning," that is, as would seem, promoted by the direct action of the Legislature. Here a distinction seems to be taken between the sciences and other knowledge, which has been followed since.

* * *

Huston, J., delivered the opinion of the Court.

On the 16th of April, 1791, was passed an act of assembly entitled "an act to confer on certain associations of the citizens of this commonwealth the powers and immunities of corporations or bodies politic in law," and is in part as follows: "Whereas, a great portion of the time of the Legislature has heretofore been employed in enacting laws to incorporate private associations; and it would not only be more advantageous to the public, but also convenient to individuals who are desirous of being so incorporated, that the same might lawfully be effected without an immediate application in all cases to the General Assembly of this commonwealth; therefore be it enacted that," etc.

* * *

Wherever we have power to certify, we are bound to certify; if we have authority to certify, and thus in effect incorporate this college with these powers, we must, if applied to, grant a similar charter, with similar powers, to

the physicians of every county and town in the state. We have no more right to decide on the degree of medical science in the applicants than on the piety of a congregation of any religious sect which applies to us to certify to a proposed charter of incorporation; and this might place the degree of Doctor of Medicine in a situation somewhat similar to what was threatened by a celebrated minister of France, who said that he would create so many dukes that it would be a shame not to be a duke and no honor to be a duke.

The degrees conferred in colleges are not offices or appointments, but they confer honor, influence and respectability to a certain extent. The power of conferring such degrees was never meant to be put in such a situation that the attorney general and the Court were bound to concur in granting it to any association which wished to be incorporated for literary or scientific purposes, and this without the power of inquiring as to the qualifications of the applicants, to exercise such power with advantage to the community, or the advancement of medical science.

UTAH.

DECISION CONCERNING OSTEOPATHY.

The following is a decision concerning osteopathy, by District Judge H. H. Rolapp, of Utah.

State vs. William Hartford: The defendant is charged by an information with practicing medicine without a license from the State Board of Medical Examiners.

Section 1736 of the Revised Statutes provides that "Any person practicing medicine * * * within this state without holding * * * a license shall * * * be deemed guilty of a misdemeanor."

Section 1737 provides that "Any person shall be regarded as practicing medicine within the meaning of this title who shall treat, operate upon, or prescribe for any physical ailment of another for a fee."

The defendant admits having manipulated with his hands upon persons for physical ailments, for a fee, and without a license; but insists that inasmuch as he uses no medicine or surgical instruments, or any other agencies except his naked hands, that he does not come within the prohibited class named in the statute. He does not hold himself out as a doctor, physician or surgeon, but denominates himself a diplomat of osteopathy. He further insists that his science does not belong to any recognized school of medicine; or, if it does, that the present State Board of Medical Examiners is not legally constituted, it being admitted that no osteopathist is a member of said board—while Section 1728 of the Revised Statutes provides that said board "shall consist of seven members, who shall be representatives of the various recognized schools of medicine."

The latter point, I apprehend can not be determined in this case. The whole inquiry, then, recurs to whether the defendant is practicing medicine within the meaning of the act.

Counsel for defendant invites attention to the case of *Smith vs. Lane* (24 Hun., 632) which seems to be in point, if the statutes upon which that decision was founded were as broad as ours. But in the New York statute it is simply provided, in specific terms, that the practice of medicine or surgery should be a misdemeanor, unless authorized by a certificate setting forth such person's qualifications to practice all of the branches of the medical arts. Under that provision it was undoubtedly the duty of the Court to interpret the words "practice of medicine and surgery" in the common acceptance of those words; and they therefore said "the practice of medicine is a pursuit very generally known and understood, and so also is that of surgery. The former includes the application and use of medicine and drugs for the purpose of curing, mitigating or alleviating bodily diseases; while the functions of the latter are limited to manual operations usually performed by surgical instruments or appliances."

That is undoubtedly a good definition of the words in the statute then before the Court. But our statute goes further and says that, "any person shall be regarded as practicing medicine * * * who shall treat, operate upon, or prescribe for any physical ailment of another for a fee." The word "treat" as defined by Webster, in this connection, is synonymous with "manipulation," "handling," "mode or manner of checking and destroying disease." That is exactly what the testimony in this case shows the defendant did; and the Legislature must have intended that the words thus used by them should have some significance, and be used in connection with "ailments." There is no suggestion in the section that the word "treat" referred to treating with medicine, or with any other specific agencies of a similar kind. If such treatment was done by the naked hands and for the purpose of curing ailments of another, and was done for a fee, it seems to come logically within the intention of the statute, which defines such treatment, handling or manipulation as practicing medicine. That the section is sweeping, I admit; but the power of the Legislature to thus enact is undoubtedly possessed.

My attention was also called to the case of State against Eastman, decided in Indiana. While I can not fully concur with the learned judge in the interpretation placed upon the statute then under consideration by him, yet all he suggested was the words "other agencies," named in that statute, referred to drugs and medicines, and as osteopathy does not include the use of such agencies the practitioners of that science did not come within the prohibition of that statute. Granting the premises in regard to the interpretation of the statute, of course the conclusion was right; but in addition to that the Indiana statute only prohibited the direction or recommending for use by another of drugs, medicines or other agencies, but said absolutely nothing about the personal treatment by a person upon another for the curing of ailments. Such treatment is directly covered by our statute.

I think the decision in Illinois, in the case of Eastman against The People is the most valuable, because it concerns itself with a statute identical with ours. Says the court in that case: "It appears that the appellant was engaged in the practice of 'the profession of osteopathy' as it is termed in the briefs; that he had an office where he received patients, and that he visited patients at their homes; that he advertised his system and his skill therein, and that he professed ability to understand and treat human ailments intelligently and successfully. So far as shown his treatment consisted wholly of rubbing and manipulating the affected parts with his hands and fingers and by flexing and moving the limbs of the patient in various ways. It is insisted on his behalf that because he used no medicine or instruments he is not amenable to the statute, which reads: 'Any person shall be regarded as practicing medicine within the meaning of this Act who shall treat, operate on or prescribe for any physical ailment of another.' It is urged on behalf of the appellant that this provision must receive a reasonable interpretation and to 'treat' implies the use of medicine or drugs of some sort. This is not so necessary. Many of the minor operations are effected without the use of instruments by mere pressure, extension and flexing. This of course implies some knowledge of anatomy and some skill. It is said by counsel that if the statute reaches this case, it must include treatment by Turkish baths, massage and the like. We think not. The evidence shows that the appellant claimed to be competent to treat and cure numerous diseases. He represented himself as a graduate of the new school of osteopathy and qualified to examine and treat all who might seek his aid. Herein he differs from those who give Turkish baths, massage and the like. He professes to be able to diagnose and advise in respect to a long list of diseases, and to furnish discriminating and efficient treatment to those who may come to him, and while he may rely wholly upon manipulation, etc., yet he professes to have skill and judgment in these methods so as properly to adapt the treatment to each case, giving it what is appropriate in amount, and with repetition at such times and to such extent as may be dictated by his knowledge and experience. By his skill in the use of his peculiar remedy or methods he claims to be competent to relieve and cure various ailments, and therefore he invites patronage.

"Medicine is the art of understanding diseases and curing or relieving them when possible. It is that branch of physics which relates to the healing of diseases. This art is not restricted to any particular methods or remedies. These are innumerable, considering what are used and have been discarded. We are of opinion the proofs bring appellant within the Act and that he is liable to the penalty imposed for practicing medicine without a license."

I think the same reasoning applies in the case at bar.

A number of other questions were raised at the trial, but I consider it wholly immaterial whether the Legislature of Missouri has declared osteopathy not to be the practice of medicine, because that does not bind our Legislature. Nor can I consider here the benefit the defendant may have been to the citizens of this community (which fact I do not doubt), or that the medical fraternity are the instigator of this prosecution.

The Legislature is the proper tribunal that should be applied to in permitting the engaging in any science or art that will be of benefit to humanity; but until they do, or while they have specifically enacted laws to the contrary, I am simply called upon to interpret the law as I find it; and I can come to no other conclusion than that the treatment or manipulation engaged in by the defendant requires him to take out a license. Having failed to do so he has violated the statute. I must therefore find the defendant guilty as charged.—*From Journal of the American Medical Association, April 16, 1898.*

WEST VIRGINIA.

DECISION OF THE UNITED STATES SUPREME COURT AFFIRMING THE VALIDITY OF THE WEST VIRGINIA MEDICAL PRACTICE ACT AND THE RIGHT OF THE BOARD TO DETERMINE THE "REPUTABILITY" OF A MEDICAL COLLEGE.—*Dent v. West Virginia, 129 U. S.*

The Court stated the case as follows:

This case comes from the Supreme Court of Appeals of West Virginia. It involves the validity of the statute of that state which requires every practitioner of medicine in it to obtain a certificate from the State Board of Health that he is a graduate of a reputable medical college in the school of medicine to which he belongs, etc.

Under this statute the plaintiff in error was indicted in the State Circuit Court of Preston county, West Virginia, for unlawfully engaging in the practice of medicine in that state in June, 1882, without a diploma, certificate or license therefor as required, not being a physician or surgeon called from another state to treat a particular case or to perform a particular surgical operation. To this indictment the defendant pleaded not guilty, and a jury having been called, the state, by its prosecuting attorney, and the defendant, by his attorney, agreed upon the following statement of facts, namely: "That the defendant was engaged in the practice of medicine in the town of Newburg, Preston county, West Virginia, at the time charged in the indictment, and had been so engaged since the year 1876 continuously until the present time, and has during all said time enjoyed a lucrative practice, publicly professing to be a physician, prescribing for the sick, and appending to his name the letters M. D.; that he was not then and there a physician and surgeon called from another state to treat a particular case or to perform a particular surgical operation, nor was he then and there a commissioned officer of the United States army and navy or hospital service; that he has no certificate, as required by section 9, chapter 93, acts of the Legislature of West Virginia, passed March 15, 1882, but has a diploma from the American Medical Electric College, of Cincinnati, Ohio; that he presented said diploma to the members of the board of health who reside in his congressional district, and asked for the certificate as required by law, but they, after retaining said diploma for some time, returned it to defendant with their refusal to grant him the certificate asked, because, as they claim, said college did not come under the word 'reputable' as defined by said board of health; that if the defendant had been or should be prevented from practicing medicine it

would be a great injury to him, as it would deprive him of his only means of supporting himself and family; that at the time of the passage of the act of 1882 he had not been practicing medicine ten years, but had only been practicing six, as aforesaid, from the year 1876."

These were all the facts in the case. Upon them the jury found the defendant guilty and thereupon he moved an arrest of judgment on the ground that the act of the Legislature was unconstitutional and void so far as it interfered with his vested right in relation to the practice of medicine, which motion was overruled, and to the ruling an exception was taken. The Court thereupon sentenced the defendant to pay a fine of fifty dollars and the costs of the proceedings. The case being taken on writ of error to the Supreme Court of Appeals of the state the judgment was affirmed, and to review this judgment the case is brought here.

Mr. Justice Field, after stating the case, delivered the opinion of the Court, as follows:

Few professions require more careful preparation by one who seeks to enter it than that of medicine. It has to deal with all those subtle and mysterious influences upon which life depends, and requires not only a knowledge of the property of vegetable and mineral substances, but of the human body in all its complicated parts, and their relation to each other, as well as their influence upon the mind. The physician must be able to detect readily the presence of the disease, and prescribe appropriate remedies for its removal. Every one may have occasion to consult him, but comparatively few can judge of the qualifications of learning and skill which he possesses. Reliance must be placed upon the assurance given by his license, issued by an authority competent to judge in that respect, that he possesses the requisite qualifications. Due consideration, therefore, for the protection of society may well induce the state to exclude from practicing those who have not such a license, or who are found upon examination not to be fully qualified. The same reason which control in imposing conditions, upon compliance with which the physician is allowed to practice in the first instance, may call for further conditions as new modes of treating diseases are discovered, or a more thorough acquaintance is obtained of the remedial properties of vegetable and mineral substances, or a more accurate knowledge is acquired of the human system and of the agencies by which it is affected. It would not be deemed a matter for a serious discussion that a knowledge of the new acquisitions of the profession, as it from time to time advances in its attainments for the relief of the sick and suffering, should be required for its continuance in its practice, but for the earnestness with which the plaintiff in error insists that by being compelled to obtain the certificate required, and prevented from continuing in his practice without it, he is deprived of his right and estate in his profession without due process of law. We perceive nothing in the statute which indicates an intention of the Legislature to deprive one of any of his rights. No one has a right to practice medicine without having the necessary qualifications of learning and skill; and the statute only requires that whoever assumes, by offering to the community his services as a physician, that he possesses such learning and skill, shall present evidence of it by a certificate or license from a body designated by the state as competent to judge of his qualifications.

There is nothing of an arbitrary character in the provisions of the statute in question; it applies to all physicians except those who may be called for a special case from another state, it imposes no conditions which can not be readily met, and it is made enforceable in the mode usual in kindred matters, that is by regular proceedings adapted to the case. It authorizes an examination of the applicant by the board of health as to his qualifications when he has no evidence of them in the diploma of a reputable medical college in the school of medicine to which he belongs, or has not practiced in the state a designated period before March 1881. If, in the proceedings under the statute, there should be any unfair or unjust action on the part of the board in refusing him a certificate, we doubt not that a remedy would be found in the Courts of the state. But no such imputation can be made, for the plaintiff in error did not submit himself to the examination of the Board after it had decided that the diploma he presented was insufficient.

DECISION OF THE SUPREME COURT OF THE UNITED STATES IN
THE CASE OF DENT, PLAINTIFF IN ERROR, V. THE STATE OF
WEST VIRGINIA.

1. A statute of a state which requires every practitioner of medicine in it to obtain a certificate from the State Board of Health that he is a graduate of a reputable medical college and which makes the practice of medicine by such person without a certificate a misdemeanor, punishable by fine or imprisonment is not unconstitutional and void under the Fourteenth Amendment, which declares that no state shall deprive any person of his life, liberty or property without due process of law.

2. Legislation is not open to the charge of depriving one of his rights without due process of law if it be general in its operation upon the subjects to which it relates, and is enforceable by usual modes adapted to the nature of the case.

Submitted Dec. 11, 1888.

Decided Jan. 14, 1889.

Mr. Justice Field delivered the opinion of the court:

Whether the indictment in which the plaintiff in error was tried and found guilty, is open to objection for want of sufficient certainty in its averments, is a question which does not appear to have been raised either on the trial or before the Supreme Court of the state. The presiding justice of the latter court in its opinion states that the counsel for the defendant expressly waived all objections to defects in form or substance of the indictment, and based his claim for a review of the judgment on the ground that the statute of W. Virginia is unconstitutional and void. The unconstitutionality asserted consists in its alleged conflict with the clause of the Fourteenth Amendment, which declares that no state shall deprive any one of life, liberty or property without due process of law—the denial to the defendant of the right to practice his profession without the certificate required constituting the deprivation of his vested right and estate in his profession which he had previously acquired.

It is undoubtedly the right of every citizen of the United States to follow any lawful calling, business or profession he may choose, subject only to such restrictions as are imposed upon all persons of like age, sex and condition. This right may in many respects be considered as a distinguishing feature of our republican institutions. Here all vocations are open to every one on like conditions. All may be pursued as sources of livelihood, some requiring years of study and great learning for their successful prosecution. The interest, or as it is sometimes termed, the estate acquired in them, that is, the right to continue their prosecution, is often of great value to the possessors, and can not be arbitrarily taken from them, any more than their real or personal property can be thus taken. But there is no arbitrary deprivation of such right where its exercise is not permitted because of a failure to comply with conditions imposed by the state for the protection of society. The power of the state to provide for the general welfare of its people authorizes it to prescribe all such regulations as in its judgment will secure or tend to secure them against the consequences of ignorance or incapacity as well as of deception and fraud. As one means to this end it has been the practice of different states, from time immemorial, to exact in many pursuits a certain degree of skill and learning upon which the community may confidently rely, their possession being generally ascertained upon an examination of parties by competent persons, or inferred from a certificate to them in the form of a diploma or license from an institution established for instruction on the subjects, scientific and otherwise, with which such pursuits have to deal. The nature and extent of the qualifications required must depend primarily upon the judgment of the state as to their necessity. If they are appropriate to the calling or profession, and attainable by reasonable study or application, no objection to their validity can be raised because of their stringency or difficulty. It is only when they have no relation to such calling or profession, or are unattainable by such reasonable study and application, that they can operate to deprive one of his right to pursue a lawful vocation.

Few professions require more careful preparation by one who seeks to enter it than that of medicine. It has to deal with all those subtle and mysterious

influences upon which health and life depend, and requires not only a knowledge of the vegetable and mineral substances, but of the human body in all its complicated parts, and their relation to each other as well as their influence upon the mind. The physician must be able to detect readily the presence of disease, and prescribe appropriate remedies for its removal. Every one may have occasion to consult him, but comparatively few can judge of the qualifications of the learning and skill which he possesses. Reliance must be placed upon the assurance given by his license, issued by an authority competent to judge in that respect that he possesses the requisite qualifications. One consideration, therefore, for the protection of society may well induce the state to exclude from practice those who have not such a license, or who are found upon examination not to be fully qualified. The same reasons which control in imposing conditions, upon compliance with which the physician is allowed to practice in the first instance, may call for further conditions as new modes of treating disease are discovered, or a more thorough acquaintance is obtained of the remedial properties of vegetable and mineral substances, or a more accurate knowledge is acquired of the human system and of the agencies by which it is affected. It would not be deemed a matter for serious discussion that a knowledge of the new acquisitions of the profession, as it from time to time advances in its attainments for the relief of the sick and suffering, should be required for continuance in its practice, but for the earnestness with which the plaintiff in error insists that by being compelled to obtain the certificate required, and prevented from continuing in his practice without it, he is deprived of his right and estate in his profession without due process of law. We perceive nothing in the statute which indicates an intention of the Legislature to deprive one of any of his rights. No one has a right to practice medicine without the necessary qualifications of learning and skill; and the statute only requires that whoever assumes, by offering to the community his services as a physician, that he possesses such learning and skill, shall present evidence of it by a certificate or license from a body designated by the state, as competent to judge of his qualifications.

As we have said on more than one occasion, it may be difficult, if not impossible, to give to the terms "due process of law" a definition which will embrace every permissible exertion of power affecting private rights and exclude such as are forbidden. They come to us from the law of England, from which country our jurisprudence is to a great extent derived, and their requirement was there designed to secure the subject against the arbitrary action of the Crown and place him under the protection of the law. They were deemed to be equivalent to "the law of the land." In this country, the requirement is intended to have a similar effect against legislative power, that is, to secure the citizen against any arbitrary deprivation of his rights, whether relating to his life, his liberty or his property. Legislation must necessarily vary with the different objects upon which it is designed to operate. It is sufficient for the purposes of this case, to say that legislation is not open to the charge of depriving one of his rights without due process of law, if it be general in its operation upon the subjects to which it relates, and is enforceable in the usual modes established in the administration of government with respect to kindred matters, that is, by process or proceedings adapted to the nature of the case. The great purpose of the requirement is to exclude every thing that is arbitrary and capricious in legislation affecting the right of the citizen. As said in this court in *Yick Wo v. Hopkins*, speaking by Mr. Justice Mathews: "When we consider the nature and theory of our government, the principles upon which they are supposed to rest, and review the history of their development, we are constrained to conclude that they do not mean to leave room for the play and action of purely personal and arbitrary power." 118 U. S. 356, 369 (30: 220, 226). See also *Pennoy v. Neff*, 95 U. S. 714, 733, (24: 565, 572); *Davidson v. N. O.*, 96 U. S. 97, 104, 107, (24: 616, 619, 620); *Hurtado v. Cal.*, 110 U. S. 516 (28: 232); *Mo. Pac. R. Co. v. Humes*, 115 U. S. 512, 519 (29: 463, 465).

There is nothing of an arbitrary nature in the provisions of the statute in question: it applies to all physicians, except those who may be called for a special case from another state; it imposes no conditions which can not be readily met; and it is made enforceable in the mode usual in kindred matters, that is, by regular proceedings adapted to the case. It authorizes the exami-

nation of the applicant by the board of health as to his qualifications when he has no evidence of them in the diploma of a reputable medical college in the school of medicine to which he belongs, or has not practiced in the state a designated period before March, 1881. If, in the proceedings under the statute, there should be any unfair or unjust action on the part of the board in refusing him a certificate, we doubt not that a remedy would be found in the courts of the state. But no such imputation can be made, for the plaintiff in error did not submit himself to the examination of the board after it had decided that the diploma he presented was insufficient.

The cases of *Cummings v. Mo.*, 71 U. S. 4 Wall. 277, and of *Ex parte Garland*, 71 U. S. 4 Wall. 333, upon which much reliance is placed, do not, in our judgment, support the contention of the plaintiff in error. In the first of these cases it appeared that the Constitution of Missouri, adopted in 1865, prescribed an oath to be taken by certain persons holding certain offices and trusts and following certain pursuits within its limits. They were required to deny that they had done certain things, or had manifested by act or word certain sympathies or desires. The oath which they were to take embraced thirty distinct affirmations respecting their past conduct, extending even to their words, desires and sympathies. Every person unable to take this oath was declared incapable of holding in the state "any office of honor, trust or profit under its authority, or of being an officer, councilman, director, trustee or other manager of any corporation public or private," then existing or thereafter established under its authority; or "of acting as a professor or teacher in any educational institution, or in any common or other school, or of holding any real estate or other property in trust for the use of any church, religious society or congregation." And every person holding, at the time the Constitution took effect, any of the offices, trusts or positions mentioned was required, within sixty days thereafter, to take the oath, and if he failed to comply with this requirement it was declared that his office, trust or position should, ipso facto, become vacant.

No person after the expiration of the sixty days was allowed, without taking the oath, "to practice as an attorney or counsellor at law," nor after that period could "any person be competent as a bishop, priest, deacon, minister, elder or other clergyman of any religious persuasion, sect or denomination to teach or preach, or solemnize marriages." Fine and imprisonment were prescribed as a punishment for holding or exercising any of the "offices, positions, trusts, professions, or functions" specified without taking the oath, and false swearing and affirmation in taking it was declared to be perjury punishable by imprisonment in the penitentiary.

A priest of the Roman Catholic church was indicted in a circuit court of Missouri, and convicted of the crime of teaching and preaching as a priest and minister of that religious denomination, without having first taken the oath, and was sentenced to pay a fine of \$500, and to be committed to jail until the same was paid. On appeal to the Supreme Court of the state the judgment was affirmed, and the case was brought on error to this court.

As many of the acts from which the parties were obliged to purge themselves by, the oath had no relation to their fitness for the pursuits and professions designated, the court held that the oath was not required as a means of ascertaining whether the parties were qualified for those pursuits and professions, but was exacted because it was thought that the acts deserved punishment, and that for many of them there was no way of inflicting punishment except by depriving the parties of their offices and trusts. A large portion of the people of Missouri were unable to take the oath, and as to them the court held that the requirement of its constitution amounted to a legislative deprivation of their rights. Many of the acts which parties were bound to deny that they had ever done were innocent at the time they were committed, and the deprivation of a right to continue in their office if the oath were not taken was held to be a penalty for a past act, which was violative of the constitution. The doctrine of this case was affirmed in *Pierce v. Carskadon*, 83 U. S., 16 Wall. 234.

In the second case mentioned, that of *Ex parte Garland*, it appeared that on the second of July, 1862, Congress had passed an act prescribing an oath to be taken by every person elected or appointed to any office of honor or

profit under the United States, either in the civil, military or naval departments of the government, except the president, before entering upon the duties of his office, or before being entitled to his salary or other emoluments. On the 24th of January, 1865, Congress, by a supplemental act, extended its provisions so as to embrace attorneys and counsellors of the courts of the United States. This latter act, among other things, provided that after its passage no person should be admitted as an attorney and counsellor to the bar of the Supreme Court, after the 4th of March, 1865, to the bar of any circuit or district court of the United States, or of the court of claims, or be allowed to appear and be heard by virtue of any previous admission, until he had taken and subscribed the oath prescribed by the act of July 2, 1862. The oath related to past acts, and its object was to exclude from practice in the courts parties who were unable to affirm that they had not done the acts specified: and, as it could not be taken by a large class of persons, it was held to operate against them as a legislative decree of perpetual exclusion.

Mr. Garland had been admitted to the bar of the Supreme Court of the United States previous to the passage of the act. He was a citizen of Arkansas, and when that state passed an ordinance of secession which purported to withdraw her from the Union, and by another ordinance attached herself to the so-called Confederate States, he followed the state and was one of her representatives first in the lower House and afterwards in the Senate of the Congress of the Confederacy, and was a member of that Senate at the time of the surrender of the Confederate forces to the armies of the United States. Subsequently, in 1865, he received from the president of the United States a full pardon for all offenses committed by his participation, direct or implied, in the rebellion. He produced this pardon and asked permission to continue as an attorney and counsellor of this court without taking the oath required by the act of January 24, 1865, and the rule of the court which had adopted the clause requiring its administration in conformity with the act of Congress. The court held that the law in exacting the oath as to his past conduct as a condition of his continuing in the practice of his profession, imposed a penalty for a past act, and in that respect was subject to the same objection as that made to the clauses of the Constitution of Missouri, and was therefore invalid.

There is nothing in these decisions which supports the positions for which the plaintiff in error contends. They only determine that one who is in the enjoyment of a right to preach and teach the Christian religion as a priest of a regular church, and one who has been admitted to the practice of the profession of the law, can not be deprived of the right to continue in the exercise of their respective profession by the exaction from them of an oath as to their past conduct, respecting matters which have no connection with such professions. Between this doctrine and that for which the plaintiff in error contends, there is no analogy or resemblance. The Constitution of Missouri and the act of Congress in question in those cases were designed to deprive parties of their right to continue in their profession for past acts or past expressions of desires and sympathies, many of which had no bearing upon their fitness to continue in their professions. The law of West Virginia was intended to secure such skill and learning in the profession of medicine that the community might trust with confidence those receiving a license under authority of the state.

Judgment affirmed.

Sewanee Medical College, Sewanee.....	118	June 16 to Jan. 19, '99
Medical Department University of Vermont.....	233	Jan. 6 to June 30

In accordance with the figures given in the above tables, which, in every instance, were furnished by the colleges interested, there were in attendance during the session of 1897-98 at the 139 colleges enumerated, 22,886 medical students. After adding to these figures 500 as an estimate of the number taking instruction in the non-recognized institutions shown on page cxlvii of this report, it can be stated, in round numbers, that there were 23,400 students in ~~143~~¹⁴⁵ regularly established medical colleges in the United States during the session of 1897-98.

In the fifteenth Annual Report of the Illinois State Board of Health, it is shown that during the session of 1883-84, 12,204 matriculants were reported in the existing medical schools. This number was decreased to 10,891 in the session of 1884-85, but in 1892-93 the entire number of students was 18,910, a gain in eight years in the total attendance of 73.6 per cent. The number of existing medical colleges conferring degrees, as listed in this Report, was 143. Of these 135 were recognized either conditionally or in full, by the Board.

* Freshman course from Sept. 15 to June 29.

Action was deferred in the case of 2 and recognition temporarily refused 2 more. These 4 institutions were afterwards accorded full recognition. The status of 1 institution had not been determined. To 3 colleges, 2 of which still grant diplomas, 1 being mentioned in the list of non-recognized medical colleges in this Report, and the other being considered a "diploma mill", is not referred to by name, recognition was absolutely refused.

It being impossible, at this time, to determine whether the 18,910 students in the session of 1892-93 represented the total number in the 135 recognized colleges, or in the 143 recognized and non-recognized institutions—or whether possibly the figures cover the entire number of matriculants in the 148 teaching institutions listed in the Report, 5 of which did not confer degrees, it is difficult to show the percentage of increase of students during the past five years, in proportion to the gain in the number of colleges. In all probability, however, it will be sufficient to say that with 18,910 students in 1893 and 23,400 in 1898, the increase in five years is 23.7 per cent. As noted above the increase in eight years from 1885 to 1893 amounted to 73.6 per cent.

LIST OF MEDICAL COLLEGES IN THE UNITED STATES WHICH IN THE CATALOGUES OF THE SESSION OF 1897-98 ANNOUNCE THE ADOPTION OF A COURSE EXTENDING OVER FOUR YEARS.

Arkansas Industrial University—A.
California Medical College.
College of Medicine University of Southern California.
Cocper Medical College—B.
Hahnemann Hospital College, San Francisco—D.
College of Physicians and Surgeons, San Francisco—B. E.
Medical Department University of California—C.
Denver Homeopathic Medical College—E.
Gross Medical College—A. H.
Medical Department University of Colorado—A. R.
Medical Department University of Denver—A.
Yale University Department of Medicine.
Georgetown University School of Medicine—A.
Medical Department Howard University—C.
Medical Department Columbian University, Washington.
Medical Department National University, Washington.
Bennett College of Eclectic Medicine and Surgery.
Chicago Homeopathic Medical College.
Chicago Physio-Medical College.
College of Physicians and Surgeons, Chicago.
Dunham Medical College.

-
- A—Announces observances of rules of Association of American Medical Colleges.
B—Advanced standing of one year granted to students who have taken private studies or studied with a preceptor.
C—Grants two years advanced standing to graduates of recognized dental Colleges.
D—Credit given to students who have pursued studies under reputable physicians.
E—Grants two years advanced standing to graduates and students of pharmaceutical, veterinary or dental Colleges.
H—Grants advanced standing (years not stated) to graduates of pharmacy, of dentistry and of veterinary medicine.
R—Advanced standing granted to graduates and students of colleges of dentistry, pharmacy and veterinary medicine.

Hahnemann Medical College and Hospital, Chicago.
 Harvey Medical College, Chicago.
 Hering Medical College and Hospital.
 Illinois Medical College.
 Jenner Medical College.
 National Medical College, Chicago.
 Northwestern University Medical School (Chicago Medical College).

 Marion-Sims College of Medicine.
 Missouri Medical College—H. M.
 St. Louis Medical College.
 Creighton Medical College—N.
 Lincoln Medical College.
 Omaha Medical College.
 Albany Medical College.

A—Announces observance of rules of Association of American Medical Colleges.

G—Requires after July 1, 1895 an attendance on four courses of lectures. Grants one year's advanced standing on a course extending over three years, to graduates in pharmacy, dentistry and veterinary medicine.

H—Grants advanced standing (years not stated) to graduates of pharmacy, of dentistry and of veterinary medicine.

I—Grants advanced standing (years not stated) to students who have studied medicine one year or more.

K—Requirements for graduation very indefinite.

L—Announces that students who matriculated prior to the session 1895-6 may graduate in three years.

M—Announces that students who matriculated prior to session of 1897-8 may graduate in three years.

N—Advanced standing to the second or third year, granted to those who pass examinations on all subjects in which said classes shall have been examined.

R—Advanced standing granted to graduates and students of colleges of dentistry, pharmacy and veterinary medicine.

Bellevue Hospital Medical College.
 College of Physicians and Surgeons, New York.
 Eclectic Medical College of the City of New York.
 Long Island College Hospital.
 Medical Department Niagara University.
 New York Medical College and Hospital for Women.
 New York Homeopathic Medical College and Hospital.
 New York University Medical College.
 Syracuse University College of Medicine.
 Medical Department University of Buffalo.
 Women's Medical College of the New York Infirmary.
 Cincinnati College of Medicine and Surgery—A. R.
 Cleveland College of Physicians and Surgeons—A. R.
 Cleveland Homeopathic Medical College—O.
 Medical College of Ohio.
 Eclectic Medical Institute.
 Medical College Western Reserve University.
 Miami Medical College—P.
 Ohio Medical University—A.
 Pulte Medical College.
 Starling Medical College—A.
 Toledo Medical College—A. R.
 Medical Department Willamette University—A.
 Medical Department University of Oregon—B. F.
 Hahnemann Medical College and Hospital, Philadelphia.
 Jefferson Medical College.
 Medico-Chirurgical College.
 University of Pennsylvania Department of Medicine.
 Western Pennsylvania Medical College—A. R.
 Woman's Medical College of Pennsylvania.
 Meharry Medical College—C.
 Department of Medicine University of Texas.
 Medical Department University of Vermont.
 Wisconsin College of Physicians and Surgeons—H.

In the majority of the above institutions students were graduated in the session of 1897-98 after an attendance on three courses of lectures. This was found to be the case in several colleges, in the announcements of which a course extending over four years seemed obligatory. In all probability the same rule will be observed in the greater number of the colleges during the session of 1898-99, but it is believed that after January 1, 1900, each college named above will require an attendance on four full courses of lectures in four separate years, in accordance with the rules of the Illinois State Board of Health.

-
- A—Announces observance of rules of Association of American Medical Colleges.
 B—Advanced standing of one year granted to students who have taken private studies or studied with a preceptor.
 C—Grants two years advanced standing to graduates of recognized dental Colleges.
 F—Grants two years advanced standing to graduates of accredited dental and pharmaceutical Schools.
 H—Grants advanced standing (years not stated) to graduates of pharmacy, of dentistry and of veterinary medicine.
 O—Certificates of work done by non-graduates in accredited institutions of learning accepted with or without examination.
 P—One year's service as interne in a hospital acceptable to the faculty will be accepted in lieu of the fourth year of the regular course.
 R—Advanced standing granted to graduates and students of colleges of dentistry, pharmacy and veterinary medicine.

LIST OF MEDICAL COLLEGES IN THE UNITED STATES
WHICH, IN THE CATALOGUES OF THE SESSION
OF 1897-98, FAIL TO ANNOUNCE THE
ADOPTION OF A COURSE EXTEND-
ING OVER FOUR YEARS.

Medical College of Alabama—C.
Atlanta Medical College—A.
Georgia College of Eclectic Medicine and Surgery—A.
Medical College of Georgia—B.
Southern Medical College, Atlanta—C.
College of Physicians and Surgeons, Kansas City, Kansas—C.
Kansas Medical College—A.
Medical Department Tulane University—C.
Medical School of Maine.
Boston University School of Medicine.
Beaumont Hospital Medical College.
Central Medical College.
Ensworth Medical College and Hospital.
Homeopathic Medical College of Missouri—C. D.
Kansas City Homeopathic Medical College.
Kansas City Medical College.
*St. Louis College of Physicians and Surgeons—A.
University Medical College, Kansas City, Mo—A.
Women's Medical College, Kansas City, Mo.
Dartmouth Medical College.
Leonard School of Medicine.
Laura Memorial Woman's Medical College—A.
Medical College of the State of South Carolina.
Chattanooga Medical College.
Sewanee Medical College—C.
Medical Department University of Tennessee—C.
Memphis Hospital Medical College—C.
Tennessee Medical College—A.
Medical Department University of Nashville—A.
Medical Department Vanderbilt University—C.
Medical College of Virginia.
Medical Department University of Virginia.
University College of Medicine, Richmond—A. E.
Milwaukee Medical College—A.

Of the above colleges the requirements are not changed in the college announcements for the session of 1898-99, in the case of the following:

Medical College of Alabama.
†Atlanta College of Physicians and Surgeons.
Georgia College of Eclectic Medicine and Surgery.
College of Physicians and Surgeons, Kansas City, Kas.
Medical Department Tulane University.
Kansas City Medical College, Kansas City Mo.

* "Students matriculating this year for the first time will be required to attend four full terms before applying for graduation."—Letter from Dean College of Physicians and Surgeons, St. Louis, December 9, 1897.

A—Grants one year advanced standing to graduates of pharmaceutical, dental and veterinary colleges.

B—Still graduates some students on two courses of lectures.

C—Grants advanced standing (years not stated) to graduates of colleges of dentistry, pharmacy and veterinary medicine.

D—Students who are found qualified in the studies of the first year, are permitted to enter the second year.

E—Students of dentistry, in this institution, desiring to take the medical course after graduating in dentistry, can do so in one additional year by matriculating also in medicine at the beginning of their second course in dentistry.

† Consolidation of Atlanta Medical College and Southern Medical College.

Medical College of the State of South Carolina.
 Memphis Hospital Medical College.
 Medical College of Virginia.
 Medical Department University of Virginia.

In the case of the subjoined colleges changes have been announced as noted.

Kansas Medical College:

All graduates after January 1, 1900, must attend four full courses of lectures.

Medical School of Maine:

All graduates after January 1, 1900, must attend four full courses of lectures.

Boston University School of Medicine:

Candidates for the degree of Doctor of Medicine, must have studied medicine during four years.

Ensworth Medical College:

All graduates must have attended four courses of lectures.

Homeopathic Medical College of Missouri:

All graduates must attend four full courses of lectures. Advanced standing, years not stated, granted to graduates in pharmacy and dentistry.

University Medical College Kansas City, Mo.:

All students after 1899 will be required to attend a four year's course of instruction.

Dartmouth Medical College:

Adopts a course extending over four years, except for those students who matriculated before January 1, 1898.

Medical Department University of Nashville:

All graduates, after 1899 must have taken four courses of lectures.

Milwaukee Medical College:

All students are required to attend four full courses of lectures in four separate years.

From the remaining institutions which in the college catalogues of the session of 1897-98, announce the continuance of a course extending over three years, no later catalogues have been received up to the present date September 15, 1898.

THE DIPLOMAS OF 1892-95.

On July 8, 1887, the following resolution was adopted by the Illinois State Board of Health.

Resolved, That the phrase "medical colleges in good standing," in the first section of the Act to Regulate the Practice of Medicine, approved June 16, 1887, is hereby defined to include only those colleges which shall, after the session of 1890-91, require four years of professional study, including any time spent with a preceptor, and three regular courses of lectures, as conditions of graduation, and shall otherwise conform to the Schedule of Minimum Requirements heretofore adopted by the BOARD.

In accordance with this resolution, all colleges in good standing with the Board were required to exact an attendance on three courses of lectures in separate years, of all graduates after the session of 1890-91. This requirement was not observed by the following named colleges now in existence, in all of which students were graduated on two courses of lectures, up to and including the year specified in their respective captions.

1892.

Medical Department Arkansas Industrial University.
 Medical College of Indiana.
 Keokuk Medical College.
 College of Physicians and Surgeons, Keokuk.
 Medical School of Maine.
 Baltimore University School of Medicine.
 St. Louis College of Physicians and Surgeons.
 Toledo Medical College.

1893.

University of Maryland School of Medicine.
 †Barnes Medical College.
 Beaumont Hospital Medical College.
 Ensworth Medical College.
 Marion-Sims College of Medicine.
 Bellevue Hospital Medical College.
 *Eclectic Medical Institute.

1894.

Medical College of Alabama.
 College of Physicians and Surgeons, Baltimore.
 Tennessee Medical College.

1895.

Atlanta Medical College.
 Georgia College of Eclectic Medicine and Surgery.
 Southern Medical College.
 Medical Department University of Louisville.
 Louisville Medical College.
 Kentucky School of Medicine.
 Medical Department Tulane University.
 Baltimore Medical College.
 ‡Medical Department University of Oregon.
 Chattanooga Medical College.
 Medical Department University of Tennessee.
 Memphis Hospital Medical College.
 Medical Department University of Nashville.
 Medical College of Virginia.
 §University College of Medicine, Richmond.

1896.

Medical Department University of Vermont.
 Medical Department University of Virginia.

1898.

Medical College of Georgia.

While no mention of the fact is made in the college announcements, there is very little doubt that in several institutions not named above, students were graduated from 1892 to 1895 on two courses of lectures. The Association of American Medical Colleges did not require of all students an attendance on three courses of lectures until 1895.

†Admitted graduates in dental surgery to the third year.

*Graduated on three courses, two of which were consecutive. Graduated until 1895 on four consecutive courses of twenty weeks each.

‡Graduated until 1895 students of dental and pharmaceutical colleges on one full course of lectures and on an incomplete course.

§Formerly College of Physicians and Surgeons, Richmond.

¶Students of dentistry in this Institution, desiring to take the medical course after graduating in dentistry, can do so in one additional year by matriculating also in medicine at the beginning of their second year course in dentistry. (College Announcement session 1897-98.)

FRAUDULENT INSTITUTIONS.

In the 15th Annual Report of the Board, the Secretary took occasion to note with chagrin that the Board "had been more successful in breaking up and suppressing fraudulent institutions already established and in preventing the formation of new ones in other states than it had in Illinois." At the present date, it must be stated with still greater chagrin, that the conditions existing in 1893 have in no manner been improved. While in the Report referred to, but eight active "diploma mills" in Illinois could be named, it would be an easy task in the present issue to demonstrate the active and pernicious existence of at least six more, and to prove to the satisfaction of the most skeptical, that the promoters of these infamous concerns (which, to use the words of a former Attorney General of the State, do no good to any class of people upon earth, excepting grave diggers and undertakers) have in their possession legally issued charters to the number of a dozen or more, which can at any time be made available.

This, however, can be done only by mentioning each and every institution concerned by name, a dignity which will not be conferred upon "diploma mills" in the Reports of the Illinois State Board of Health, while the present Board holds office.

It can be said in short, and with little doubt of the absolute truth of the assertion, that every institution in Illinois conferring the degree of Doctor of Medicine, which is not named on pages cxliii-iv and cxlvii of this Report, is fraudulent.

While the "diploma mill" industry is confined principally to Chicago, there are still in Ohio, Massachusetts, New York and Washington a few so called colleges which confer the degree of Doctor of Medicine on applicants who "have taken home study" or "who can show evidence of successful practice." Wisconsin is at last freed from the disgrace, the "Wisconsin Eclectic Medical College" being now extinct. This is due to the efforts of the energetic health commissioner of Milwaukee, who, with the assistance of the postal authorities, persuaded promoter Rutland to seek a more congenial climate.

Against the leading institution of this character in Chicago, the successor of the notorious Illinois Health University, proceedings have been instituted by the Attorney General of the State at the instigation of this Board, and it is very probable that in a few months the "college" will cease to exist—under its present name. The Illinois State Board of Health is in possession of ample proof that the "faculty" of this institution has, individually and collectively, for many months, conferred the degree of Doctor of Medicine on applicants from all parts of the Union, the majority of whom are ignorant charlatans, and that the only qualifications demanded were the payment of the necessary fees and a statement of the amount of medical (?) knowledge possessed. Diplomas were also, in some instances, conferred upon persons in payment for labor performed in and around the "college."

The traffic abroad in these legally-chartered-medical-college-diplomas, has diminished little if any during the past five years. This business, however, is principally in the hands of one Harkins, on whose card appear the titles A. B., A. M., M. D., D. C. L., LL. D. and Ph. D., (degrees all conferred by himself) the name of his alma mater being legion. He issues "degrees" it is stated, in accordance with the tastes of his customers who select the college, the name of which most tickles their fancy. The "Professor," no doubt, also has a few charters up his sleeve for emergencies.

As under the laws of Illinois, any three or more persons may, for a nominal fee, obtain a charter from the State for the organization of any institution for a charitable, educational or other purpose, little relief from this state of affairs can be looked for until legislation is obtained, placing the issuing of charters of educational institutions with some organized body in the State, which will have the power also to revoke those already issued.

Full details of the efforts of this Board in this connection will be found in the Third, Fifteenth and Sixteenth Annual Reports. There is every reason to believe that, with the assistance of the Governor of the State, who is heartily in sympathy with the efforts to break up this disgraceful traffic, the necessary legislation will be secured early in the coming year.

THE ASSOCIATION OF AMERICAN MEDICAL COLLEGES.

OFFICERS.

President—Prof. Henry O. Walker, Detroit.
 First Vice-President—Prof. H. Bert Ellis, Los Angeles.
 Second Vice-President—Prof. Samuel C. Woody, Louisville.
 Secretary-Treasurer—Prof. Bayard Holmes, 104 East Fortieth St., Chicago.

JUDICIAL COUNCIL.

Prof. Dudley S. Reynolds, Louisville, Chairman.
 Prof. Victor C. Vaughan, Ann Arbor.
 Prof. John B. Roberts, Philadelphia.
 Prof. Albert R. Baker, Cleveland.
 Prof. Randolph Winslow, Baltimore.
 Prof. Starling Loving, Columbus.
 Prof. J. H. Etheridge, Chicago.

COMMITTEE ON CONDITION OF MEDICAL COLLEGES IN MEMBERSHIP.

Prof. E. Fletcher Ingals, Chicago, Chairman.
 Prof. John C. Oliver, Cincinnati.
 Prof. Thomas H. Hawkins, Denver.

Next meeting at Columbus, Ohio, June 5, 1899.

CONSTITUTION OF THE ASSOCIATION OF AMERICAN MEDICAL COLLEGES.

ARTICLE I.

This organization shall be known as the Association of American Medical Colleges.

ARTICLE II.

Sec. 1. Any medical college conforming to the requirements of the association, as expressed in this constitution and in the by-laws of the association, is eligible to membership.

Sec. 2. Any medical college desiring membership in this association shall make application to the secretary and pay the annual dues of five dollars. This application shall be accompanied by evidence that the college applying is conforming to the requirements of this association. The application and all evidence and information in relation to the college applying shall then be put in the hands of the Judicial Council, to be reported to the association favorably or unfavorably, at the annual meeting, at which time the college shall be elected to membership if it receives the favorable recommendation of the Judicial Council and the favorable ballot of a majority of the colleges represented in the meeting. The neglect of the Judicial Council to report on the application of a college shall not be a bar to election.

Sec. 3. Each college is entitled to one representative at all meetings of the association, and to one vote on all questions. The dean of the college will be its accredited representative in the absence of any other delegate.

Sec. 4. The dues are five dollars a year, payable in advance.

ARTICLE III.

Sec. 1. Each college holding membership in this association shall require of each student, before admission to its course of study, an examination, the minimum of which shall be as follows:

1. In English, a composition on some subject of general interest. This composition must be written by the student at the time of the examination, and should contain at least 200 words. It should be criticised in relation to thought, construction, punctuation, spelling, and handwriting.

2. In Arithmetic, such questions as will show a thorough knowledge of common and decimal fractions, compound numbers, and ratio and proportion.

3. In Algebra, such questions as will bring out the student's knowledge of the fundamental operations, factoring, and simple quadratic equations.

4. In Physics, such questions as will discover the student's understanding of the elements of mechanics, hydrostatics, hydraulics, optics, and acoustics.

5. In Latin, an examination upon such elementary work as the student may offer showing a familiarity usually attained by one year of study; for example, the reading of the first 15 chapters of Caesar's Commentaries, and the translation into Latin of easy English sentences involving the same vocabulary.

Sec. 2. In place of this examination, or any part of it, colleges, members of this association, are at liberty to recognize the official certificates of reputable literary and scientific colleges, academies, high schools and normal schools, and also the medical student's certificate issued by any state examining board covering the work of the foregoing entrance examination.

Sec. 3. Colleges, members of this association, may allow students who fail in one or more branches in this entrance examination the privilege of entering the first-year course, but such students shall not be allowed to begin the second course until the entrance requirements are satisfied.

Sec. 4. Colleges, members of this association, are free to honor official credentials issued by medical colleges of equal requirements, except in the branches of study embraced in the last year of their own curriculum.

Sec. 5. Candidates for the degree of Doctor of Medicine in the year 1899 and thereafter shall have attended at least four courses of medical instruction, each course of at least six months' duration, no two courses of which shall have been in the same calendar year.

Sec. 6. Colleges, members of this association, are free to give to students who have met the entrance requirements of the association additional credit for time on the four years' course as follows: (a) To students having the A. B., B. S., or equivalent degree from reputable literary colleges, one year of time. (b) To graduates and students of colleges of homeopathic or eclectic medicine, as many years as they attended those colleges, provided they have met the previous requirements of the association and that they pass an examination in materia medica and therapeutics. (c) To graduates of reputable colleges of dentistry, pharmacy and veterinary medicine, one year of time.

Sec. 7. A college not giving the whole four courses of the medical curriculum, and not graduating students, but otherwise eligible, may be admitted to membership.

ARTICLE IV.

Sec. 1. In addition to the representatives of colleges in attendance at regular meetings, who are termed active members, there shall also be associate members and honorary members. Associate members shall consist of former representatives and representatives of post-graduate medical schools and members of state boards of medical examiners. Distinguished teachers in medicine and surgery may be elected to honorary membership.

Sec. 2. Only duly delegated and accredited active members in actual attendance whose annual dues are paid shall have voting power, but associate and honorary members may participate in all other proceedings and duties and may be elected to any office.

ARTICLE V.

Sec. 1. The officers of this association shall be a president, senior and junior vice-presidents, secretary and treasurer, and a judicial council of seven members, all of whom shall be elected annually by ballot and serve until the election of their successor.

Sec. 2. The president, or one of the vice-presidents in the absence of the president, shall preside at all the meetings, and perform such duties as parliamentary usage in deliberative assemblies and the by-laws of this association may require. The seven members constituting the judicial council shall serve three years each. Vacancies by expiration of term shall be filled at the annual election of officers. Vacancies by death or resignation shall be temporarily filled by the surviving members of the judicial council.

Sec. 3. The secretary and treasurer shall record the proceedings of the meetings, conduct the correspondence, receive dues and assessments from members, disburse the funds of the association as provided by resolution, issue certificates of membership and perform such other duties as the by-laws may require.

Sec. 4. The judicial council shall investigate and determine all questions of violation of the rules and regulations of this association, and all matters of dispute between the members of this association. All charges or complaints shall be preferred formally in writing, and referred to the council. The council shall make written report at the next ensuing session of the association upon all matters received for adjudication.

ARTICLE VI.

Sec. 1. The stated meetings of this association shall occur annually on the Monday preceding the Tuesday on which the American Medical Association convenes.

Sec. 2. A majority of the active members whose dues are paid shall constitute a quorum.

ARTICLE VII.

This constitution shall not be altered or amended, except by written notice to all members at least 30 days previous to a stated meeting, and by a vote of two-thirds of all the active members present at such meeting.

BY-LAWS.

Section 1. The presiding officer shall, on calling meetings to order, call for the reading of the minutes of the previous session, which, when approved, shall be recorded in a book kept for that purpose, signed officially by the secretary and approved by the president.

Sec. 2. After approval of the minutes, the secretary shall announce the colleges represented at the meeting, and an adjournment of ten minutes shall then follow to allow other representatives present to register and pay their dues.

Sec. 3. Order of business:

1. The reading of the minutes of the previous meeting.
2. Roll-call of membership.
3. Reports of committees.
4. Secretary and treasurer's report.
5. Report of judicial council.
6. Papers and essays.
7. New business.
8. Adjournment.

Sec. 4. These by-laws may be altered or amended at any time by unanimous consent of the members present, or by written proposition, to so alter or amend, being read in open session and receiving the approval of a three-

fourths' vote of all the members present at an adjourned session of any stated meeting: *Provided, however*, not more than twenty-four hours shall have elapsed between the time of the proposition to amend and the final vote thereon.

EXTRACTS FROM THE MINUTES OF THE 1898 MEETING.

The association was called to order at 10 o'clock a. m., at the Albany hotel, Denver, Col., June 6, 1898, by Prof. James W. Holland, of Philadelphia, president. The secretary announced the following members present by delegates:

Arkansas Industrial University.
 College of Medicine of the University of Southern California.
 Medical Department of the University of California.
 Gross Medical College.
 University of Denver, Department of Medicine.
 University of Colorado. (Colorado School of Medicine.)
 Georgetown University School of Medicine.
 Medical Department Columbian University.
 College of Physicians and Surgeons, Chicago.
 Illinois Medical College.
 Northwestern University Woman's Medical School.
 Rush Medical College.
 Fort Wayne College of Medicine.
 Medical College of Indiana, University of Indianapolis.
 Keokuk Medical College.
 University of Iowa, Medical Department.
 Kansas Medical College.
 Hospital College of Medicine.
 Kentucky School of Medicine.
 Medical Department University of Louisville.
 Baltimore Medical College.
 College of Physicians and Surgeons, Baltimore.
 Woman's Medical College, Baltimore.
 College of Physicians and Surgeons, Boston.
 Detroit College of Medicine.
 Medical Department University of Minnesota.
 Barnes Medical College.
 College of Physicians and Surgeons, St. Louis.
 Creighton Medical College.
 Syracuse University, College of Medicine.
 Cincinnati College of Medicine and Surgery.
 Miami Medical College.
 Medical College of the Western Reserve University.
 Omaha Medical College.
 Medical Department Willamette University.
 Jefferson Medical College.
 Medico-Chirurgical College.
 Woman's Medical College of Pennsylvania.
 Milwaukee Medical College.
 Wisconsin College of Physicians and Surgeons.

On motion, the president appointed the following committee to consider and report on the proposed amendments to the constitution: J. M. Bodine, of Louisville; T. H. Hawkins, of Denver, and H. O. Walker, of Detroit.

Prof. Montgomery A. Crockett, of Buffalo, N. Y., read an essay on "The Developing Method in the Teaching of Medicine." The subject was approvingly discussed by the following gentlemen, all of whom had slight modifications to suggest: Prof. Chas. G. Stockton, of Buffalo; Prof. John Minzey, of Topeka; Prof. Dudley S. Reynolds, of Louisville; Prof. A. Stewart Lobinger, of the University of Colorado; Prof. Bayard Holmes, of Chicago; Prof. John V. Shoemaker, of Philadelphia; Prof. Ernest Laplace, of Philadelphia, and Prof. H. J. Herriek, of Cleveland. Prof. Crockett was called on to conclude the discussion, after which the association adjourned until 2 o'clock p. m..

SECOND SESSION.

2:15 p. m. The association was called to order by the president, Prof. James W. Holland. The secretary read the minutes of the last annual meeting, held at Philadelphia May 31 and June 1, 1897, which were approved. By request the secretary called the roll: 27 colleges answered present, by delegates.

The president called Past President Prof. James M. Bodine to the chair, and proceeded to read his address. The address was well received, and, on motion, the secretary was ordered to publish it, and furnish each member of the association a copy.

Prof. James M. Bodine, chairman of the committee on constitutional amendments, reported as follows: "The amendment proposed for Art. III. Sec. 5, extending the required hours for a year's work to 800, is not a desirable change, and your committee respectfully reports against its adoption. The proposed amendment to Art. III. Sec. 7, by the addition of the following, 'A college not giving the whole four courses of the medical curriculum and not graduating students, but otherwise eligible, may be admitted to membership,' is respectfully approved by your committee." On motion, the report of the committee was unanimously adopted and the amendment made part of the constitution.

* * * * *

American Institute of Homeopathy.

*President, Benj. F. Bailey, M. D., Lincoln, Neb.

Secretary, Eugene H. Porter, M. D., 181 W. 83d St., New York.

Next meeting, Atlantic City, N. J., June 17, 1899.

List of colleges recognized same as last year.

For laws and regulations see Transactions 1897.

National Confederation of Eclectic Medical Colleges.

MEMBERS.

The Eclectic Medical Institute, 1009 Plum St., Cincinnati, O.—John K. Scudder, M. D., W. E. Bloyer, M. D., Delegates.

The Bennett College of Eclectic Medicine and Surgery, Cor. Ada and Fulton Sts., Chicago, Ill.—A. L. Clark, M. D., N. A. Graves, M. D., Delegates.

The Eclectic Medical College of the City of New York, 239 East 14th St., New York, N. Y.—Geo. W. Boskowitz, M. D., J. H. Bell, M. D., Delegates.

The American Medical College, 407 S. Jefferson St., St. Louis, Mo.—Edwin Younkin, M. D., E. L. Standlee, M. D., Delegates.

The California Medical College, 1422 Folsom St., San Francisco, Cal.—D. Maclean, M. D., J. W. Hamilton, M. D., Delegates.

The Lincoln Medical College, Lincoln, Neb.—W. S. Latta, M. D., W. K. Loughbridge, M. D., Delegates.

OFFICERS OF THE CONFEDERATION—1898-99.

President—E. Younkin, M. D., 3035 Lucas Ave., St. Louis, Mo.

Vice-President—W. S. Latta, M. D., Lincoln, Neb.

Secretary and Treasurer—John K. Scudder, M. D., 1009 Plum St., Cincinnati, O.

Next meeting at Detroit June 20, 1899.

* This information was furnished by the secretary in response to a request made for a copy of the rules and regulations, list of colleges, names of officers, etc., for publication in the Report of the Illinois State Board of Health. No reply was received to subsequent letter asking for a copy of the Transactions.

PREAMBLE.

At the annual meeting of the National Eclectic Medical Association, held at Niagara Falls, N. Y., June 19, 20 and 21, 1894, the following resolution, recommended by the committee on medical colleges, was adopted unanimously:

"*Resolved*, That the committee on medical colleges recommend the organization of an Eclectic Medical College Association, composed of two delegates from each college recognized by the National Association; and that the committee on medical colleges be given power to sanction any action taken by said organization."

H. WOLGEMUTH, M. D., *Chairman.*,
J. K. SCUDDER, M. D.,
E. YOUNKIN, M. D.,
V. A. BAKER, M. D.,
H. H. GREEN, M. D.,

Committee.

Following the adoption of the above the "National Confederation of Eclectic Medical Colleges" was organized, and a constitution adopted, of which Article II is herewith appended.

"The objects of this Confederation shall be to maintain organized coöperation between the Eclectic Medical Colleges recognized by the National Eclectic Medical Association; for the purpose of promoting the mutual interests of said colleges, establishing uniform minimum requirements and curriculum, and furthering the cause of higher medical education."

The officers enumerated above were duly elected.

MINIMUM REQUIREMENTS.

The following minimum requirements, as revised, have been adopted to take effect with the session of 1898-9:

I. Preliminary requirements shall be: 1. Credible certificate of good moral standing. 2. A good English education to be attested by: (a) first grade teacher's certificate, or (b) a diploma from a graded high school, or literary or scientific college or university, or (c) evidence of having passed the matriculation examination to a recognized literary or scientific college, or (d) N. Y. regent's medical student's certificate. 3. Also, an elementary knowledge of natural history or physics, and Latin.

II. That the branches taught shall include in the course of instruction: (a) anatomy; (b) physiology; (c) chemistry and pharmacy; (d) materia medica and therapeutics; (e) principles and practice of medicine; (f) pathology; (g) surgery; (h) obstetrics and gynaecology; (i) hygiene; (j) medical jurisprudence; (k) electro-therapeutics; (l) microscopy; (m) ophthalmology and otology.

III. That the length of the course of instruction after July 1, 1897. (affecting graduates in 1901) shall not be less than four years' reading, including four annual sessions of not less than six months each, in four different calendar years.

IV. *Attendance and Examination or Quizzes*—1. Regular attendance during the entire lecture course should be required, allowance to be made only for necessary absences, such absences not to exceed more than 20 per centum of the course. 2. Regular examination or quizzes to be made by each professor or lecturer at least twice a week. 3. Final examination in all branches to be conducted by competent examiners.

V. *Dissections, Clinics and Hospital Attendance*—1. Each student shall have dissected not less than a lateral half of a cadaver. 2. Attendance during at least two terms of clinical and hospital instruction shall be required.

VI. *Advance Standing*—(a) Graduates of reputable and regularly established colleges of dentistry, colleges of pharmacy and colleges of veterinary medicine, which require, as a condition of graduation, attendance on a course extending through three or more full years, may be allowed one year's standing on a four year medical course only on condition that they comply with the

entrance requirements of the medical college, and pass all the examinations and perform all the laboratory work embraced in the course of the Freshman year.

(b) Graduates of colleges of arts and sciences which require a regular attendance of three or more years as an essential to graduation, may be admitted to the second year of the medical course without examination.

VII. And every medical college must show to this Confederation that it has a sufficient and competent corps of instructors, and the necessary facilities for teaching, dissections and clinics.

NOTE—The foregoing are the minimum requirements for colleges belonging to this Confederation; most of the colleges require more than the foregoing.

The Action of the American Medical Association

At the June, 1898, meeting of the American Medical Association, a resolution was adopted which is best explained in detail in the following communication:

AMERICAN MEDICAL ASSOCIATION.

WILLIAM B. ATKINSON, M.D.

Permanent Secretary, 1400 Pine St., Southwest Cor. Broad.

PHILADELPHIA, June 30, 1898.

DEAR SIR: At the recent meeting of this Association the following was unanimously adopted:

WHEREAS, The American Medical Association did, at Detroit in 1892, unanimously resolve to demand of all the medical colleges of the United States the adoption and observance of a standard of requirements of all candidates for the degree of Doctor of Medicine which should in no manner fall below the minimum standard of the Association of American Medical Colleges; and

WHEREAS, This demand was sent officially by the permanent secretary to the deans of every medical college in the United States and to every medical journal in the United States, now, therefore, the American Medical Association gives notice that hereafter no professor or other teacher in, nor any graduate of, any medical college in the United States, which shall after January 1, 1899, confer the degree of Doctor of Medicine or receive such degree on any conditions below the published standard of the Association of American Medical Colleges, be allowed to register as either delegate or permanent member of this association.

Resolved, That the permanent secretary shall within 30 days after this meeting send a certified copy of these resolutions to the dean of each medical college in the United States, and to each medical journal in the United States.

Respectfully yours,

WM. B. ATKINSON, *Permanent Secretary*.

As the Illinois State Board of Health does not require an attendance upon four courses of lectures until after the conclusion of the college session of 1898-99, this loosely worded, ambiguous resolution, will, if permitted to stand, affect all the colleges which graduate students in 1899 in accordance with the rules of this Board. No graduate of, or any professor or teacher in such institutions can, hereafter, register as either a delegate or permanent member of the American Medical Association.

In the opinion of many conservative members of the American Medical Association, the resolution, which is certainly an attempt to

amend the constitution of the Association, was illegally adopted, hence is inoperative. In either case, it is probable that the peculiar phraseology of the resolution will tend to nullify it.

It may be interesting to note, at this juncture, that in 1892 when the American Medical Association resolved to demand certain qualifications of all medical colleges in the United States, the Illinois State Board of Health demanded and *enforced* a standard of requirements, which was equaled by no association of medical colleges and by few State Boards of Health or of Medical Examiners. The Board furthermore, has since 1892, required a standard with which over one-third of the colleges now composing the active membership of the Association of American Medical Colleges, have failed to comply

REQUIREMENTS FOR PRACTICE IN FOREIGN COUNTRIES.

MEDICAL EDUCATION AND REQUIREMENTS FOR PRACTICE IN CANADA, CUBA, MEXICO, THE COUNTRIES OF EUROPE AND JAPAN.

DOMINION OF CANADA.

The British dominions north of the United States consist of the Dominion of Canada and the Island of Newfoundland. The Dominion of Canada is made up of the following provinces: Nova Scotia and Cape Breton, Prince Edward Island, New Brunswick, Province of Quebec, Province of Ontario, Province of Manitoba, Province of the Northwest Territories, which includes the Klondyke district, and the Province of British Columbia, which includes the island of Vancouver.

Each of these several provinces enacts its own medical laws, which can not be interfered with by any federal legislation. At present there is no general reciprocity existing among the several provinces; any reciprocity which does exist—*i. e.*, accepting the license of one province as good for another—will be mentioned in the description of the requirements for practice in each particular province.

NEWFOUNDLAND.

This province is controlled by a board called the Newfoundland Medical Board, Henry Shea, M. R. C. P., L. R. C. S., St. Johns, being president, and J. Sinclair Tait, M. D., L. R. C. P., St. Johns, registrar. In accordance with the Newfoundland Medical Act no person can begin the study of medicine without passing matriculation examination, which is equivalent to the examination required by the General Council of Medical Enregistration and Education of Great Britain. The whole examination must be passed at one time. Graduates in arts are exempted from examination. Licentiates in the various provinces of Canada and licentiates of Great Britain are allowed to practice without further examination. Candidates for licenses from the United States are required to produce evidence of having passed the matriculation examination equivalent to the one mentioned, and to have studied four years before obtaining their diplomas.

NOVA SCOTIA.

Nova Scotia has a separate Provincial Medical Board, of which Dr. E. W. H. Lindsay, of Halifax, is registrar. In order to obtain license to practice in this province it is necessary for British subjects to pass an examination consisting of English, arithmetic, algebra, geometry,

Latin, mechanics of solids and fluids and an optional study, such as French, German or Greek. Details of this examination may be obtained from the registrar. Candidates require to take at least 50 per cent of each subject and 60 per cent on the total. Examinations are held twice a year, the first Thursday in May and last in September. The student so enregistered, after completing four years of study in a recognized university in Canada, may obtain on application his license to practice without further examination. Graduates in medicine from the United States wishing to practice in this province are usually submitted to examination unless they have been enregistered for a number of years.

PROVINCE OF NEW BRUNSWICK.

Province of New Brunswick has its medical education controlled by the College of Physicians and Surgeons of New Brunswick, of which G. E. Coulthard, M. D., Fredericton, is president, and G. H. Coburn, M. D., of Fredericton, is registrar. This province also requires a matriculation examination for British subjects very similar to that required by Nova Scotia, which examination or its equivalent will in all cases be required to be enregistered with the council prior to the beginning of medical study. The matriculation examinations are held in St. John twice each year, on the first Wednesday in July and the second Wednesday in September. In order to obtain a license to practice according to the amendmeuts of the Medical Act passed in March, 1895, the candidate must satisfy the council that he has passed the preliminary examination and has put in four years of study consisting of four graded collegiate courses of not less than six months each at some recognized college or university. In the absence of having such a diploma from a recognized college, the candidate for license is submitted to the professional examination, which professional examination is held once a year in St. John, commencing third Wednesday in June.

PRINCE EDWARD ISLAND.

Prince Edward Island has also a medical board. At present it has an examining board for professional examinations, but admits to practice on the island those who are qualified to practice in New Brunswick or Nova Scotia on payment of a required fee. Registered practitioners of Great Britain are entitled to practice upon payment of a fee. Graduates in medicine from any university in Canada or from certain United States medical schools specified in the separate schedule to the Act, who obtained their diploma prior to 1880 are entitled to enregister upon payment of \$20.00. Other than those above mentioned must present proof of having undergone the requisite amount of study in a recognized university, and must pass an examination before the medical council.

These three provinces, namely, Nova Scotia, New Brunswick and Prince Edward Island, are now uniting their medical councils and

will probably within a year or two be governed by one medical board and no one will be admitted to practice unless he has conformed to regulations which will be similar to those in Ontario and Quebec, *i. e.*, all will be submitted to an examination in professional subjects.

PROVINCE OF QUEBEC.

The medical education in the Province of Quebec is under the control of the College of Physicians and Surgeons of the Province of Quebec, of which Dr. David Marcil, Sr., of St. Eustache, Que., is president, and Dr. A. T. Brosseau, 138 St. Denis street, Montreal, is registrar, to whom all applications should be made for entrance upon practice. There is in this province a matriculation examination, which must be passed by all candidates desiring to obtain license except B. A.'s of Canadian universities, which B. A. degree must be enregistered at the time of beginning the study of medicine. The time of the beginning of the study of medicine in this as well as several of the other provinces of Canada dates from the time of matriculation. The matriculation examination is an exceptionally difficult one, being the most advanced of any other province in the dominion. Details can be obtained on application. For all students after matriculating four years of nine months each are required to obtain a license. The studies may be pursued in any of the three universities of the Province of Quebec, namely, McGill, Laval or Bishop's College. On obtaining a degree in medicine from one of these medical schools it is only necessary to register the same to obtain a license to practice. No examination is held by the council, but they exercise a supervision by means of assessors over the examinations in the three universities mentioned above. This is practically the only course that can be pursued by anyone desiring to obtain a license to practice in this province. Graduates and licentiates of the United States, unless they have passed the primary examination and studied for four years are not admitted to practice. Neither are licentiates of Great Britain except under special circumstances. The board, however, may appoint examiners and submit to an examination in professional subjects practitioners from United States who wish to practice in this province. The examinations for matriculation are held twice a year, in June in Montreal, and in September in Quebec, and in the same month the governors of the council meet to enregister practitioners.

PROVINCE OF ONTARIO.

The Province of Ontario is presided over by a medical council, of which Dr. R. A. Pyne, corner Bay and Richmond streets, Ontario, is the registrar, and Dr. J. Henry, of Orangeville, Ont., is president. Practitioners are incorporated under the title of the College of Physicians and Surgeons of Ontario. It consists of ten members chosen from the various universities in the province and seventeen others elected from the different elective divisions by the practitioners. These seventeen territorial representatives are elected every four years.

The council fixes the requirements for the preliminary examination, which is the same as the arts matriculation examination of Toronto university with chemistry and botany in addition. Those holding a B. A. degree or who have passed the prescribed examination for entrance upon the sophomore year of a Canadian or British university are admitted to the study of medicine without further examination. The time of beginning the study of medicine dates from the enregistration of this preliminary examination, and a course of five years' study is necessary to qualify for a license. Students must pass three examinations, namely, an examination on the primary branches, consisting of anatomy, physiology, chemistry and materia medica not earlier than the second year; an intermediate examination on the professional branches, such as medicine, surgery, etc., not earlier than the fourth year, and a final examination at the end of the fifth year, which is clinical and includes a paper on the history of medicine. Four years of the course of study must be passed at a recognized Canadian university, the fifth year must be spent in hospital work or in a physiological or pathological laboratory, six months of the fifth year may, however, be spent with a general practitioner. Graduates of American universities are practically excluded from this province. The council may admit at its discretion any duly enregistered practitioner of Great Britain upon such terms as may seem expedient.

PROVINCE OF MANITOBA.

Medical education is controlled in this province by the College of Physicians and Surgeons of Manitoba, Dr. J. S. Grey, of Winnipeg, being registrar. The council of this college consists of certain representatives from the medical schools and others elected by the practitioners in the different districts. Homeopaths are also represented in the proportion of 1 to 15 enregistered homeopaths. The University of Manitoba is the sole examining body in medicine in this province, and it is extremely difficult for anyone to obtain a license to practice in Manitoba who has not conformed with the regulations governing matriculation and study at the University of Manitoba. The most recent amendment to the act reads as follows: "The license to practice is granted only upon the certificate of the Manitoba University when the holder is a graduate of said university by examination, or that the party applying is a licentiate of the College of Physicians and Surgeons or of other incorporated body of medical men exercising similar powers in the provinces of the dominion where reciprocal rights are granted to the graduates of Manitoba University by examination and licentiates of the College of Physicians and Surgeons of Manitoba."

PROVINCE OF THE NORTHWEST TERRITORIES.

The Province of the Northwest Territories has a College of Physicians and Surgeons in accordance with an ordinance of the Legislative Assembly passed in 1888. Of this body Dr. R. G. Brett is president and Dr. Hugh U. Bain, of Prince Albert, is registrar. No

special standard of matriculation is required for entrance upon the study of medicine in this province as there is no medical school within its jurisdiction. The council admits upon its register any persons who produce from any recognized school of medicine certificates of four years' study and a diploma of qualification from such school, and who shall pass a satisfactory examination touching his fitness to practice as a physician and surgeon, and on payment of a registration fee of \$50.00. The council, however, does not exact an examination from an applicant who is a registered practitioner in any other province in Canada. Those who are not so enregistered, as well as applicants from the United States, are required to pass this examination. The examinations are held three times a year: the second Wednesday in January, May and September. The last examination was held May 11 at Indian Head and Calgary.

EXTRACT FROM LETTER FROM SECRETARY.

"The examination covers the following subjects (all written): anatomy, chemistry, materia medica and therapeutics, physiology, pathology and histology, surgery, medicine, medical jurisprudence and toxicology, obstetrics, and diseases of women and children. The fee for examination is \$50.00, and for registration \$50.00. We admit to registration without examination all graduates of Great Britain and Ireland, licensed practitioners of Ontario, Quebec and Manitoba in the Dominion of Canada."

PROVINCE OF BRITISH COLUMBIA.

The Province of British Columbia is controlled by the British Columbia Medical Council, of which Dr. R. E. McEachnie of Nanaimo is president and Dr. C. J. Fagan of Westminster is registrar. This province, like the province of the Northwest Territories, has no special standard matriculation examination, but examines all candidates for license whether they are graduates of Canadian, English or American universities. It does not accept the license of any other province of the Dominion. All persons who produce a diploma from any college or school of medicine requiring four years' study are eligible for examination. The examinations are held three times annually, on the first Tuesday in May and September, and the second Tuesday of January, in Victoria. The examination is both oral and written, on not only the professional subjects but also the primary subjects of anatomy, chemistry, physiology, pathology, etc. Every candidate requires to take 50 per cent of these primary branches and 75 per cent of the final branches to pass. The fee for license is \$100.00.

NOTE ON RECIPROCITY.

From time to time reciprocity has existed between certain provinces of the Dominion. At present the Province of Manitoba is in reciprocal relations with the maritime provinces (New Brunswick, Nova Scotia and Prince Edward Island), but not with Quebec, Ontario or British Columbia. Licentiates in one maritime province may practice in any other by enregistering.

The Province of Quebec will allow enregistered practitioners of New Brunswick to practice in the counties adjoining that province, the same privilege being accorded to practitioners of the Province of Quebec.

Inasmuch as negotiations are now pending for fuller reciprocal relations between the different provinces of the Dominion, and as the Medical Acts of the Maritime Provinces, the Province of Quebec and those of Western Canada are undergoing revision, it would be well for any practitioner desiring to enregister in Canada to communicate with the registrar of the particular province in which he proposes to enregister.

The Medical Schools of Canada are as follows:

Halifax Medical College, Halifax. N. S.

Medical Faculty of Laval University, Quebec. (French.)

Medical Faculty of Laval University, Montreal. (French.)

Medical Faculty of McGill University, Montreal.

Medical Faculty of Bishop's College, Montreal.

Faculty of Medicine Toronto University, Toronto, Ont.

Faculty of Medicine Trinity University, Toronto, Ont.

The Ontario Medical College for Women, Toronto, Ont.

Faculty of Medicine Queens University, Kingston, Ont.

Faculty of Medicine Western University, London, Ont.

Faculty of Medicine Manitoba University, Winnipeg, Man.

The term "Royal" College of Physicians and Surgeons is a title which is applied only to the Faculty of Medicine of Queens University of Kingston.

The Colleges of Physicians and Surgeons of Ontario, Quebec and Manitoba are the controlling bodies of the medical profession and are licensing bodies entirely.

CANADIAN MEDICAL ASSOCIATION.

President, Dr. Irving H. Cameron, Toronto; vice presidents, Prince Edward Island, Dr. J. McLeod, Charlottetown; Nova Scotia, Dr. Kirkpatrick, Halifax; New Brunswick, Dr. L. N. Bourque, Moncton; Quebec, Dr. Jas. Bell, Montreal; Ontario, Dr. J. A. Williams, Ingersoll; Manitoba, Dr. R. S. Thompson, Deloraine; Northwest Territories, Dr. Lindsay, Calgary; British Columbia, Dr. P. J. Tunstall, Vancouver; general secretary, Dr. F. N. G. Starr, Toronto; treasurer, Dr. H. B. Small, Ottawa; publishing committee, Drs. A. D. Blackader, J. L. Dawson, W. W. Young and the general secretary and treasurer; by-laws, E. C. Parne, Wyatt Johnston, Jas. Bell, E. R. Dickson, G. S. Ryan, W. W. Dickson, M. Beausoleil and the president and secretary.

CUBA.

In this island there is one medical college, the Real Universidad de la Habana. Persons graduating therefrom were authorized to practice in the Spanish colonies. Foreigners desiring to practice in Cuba were obliged to be incorporated with this University. As a rule, licentiates who had passed the government examination in Spain were allowed to practice in her colonies.

At present, an inter regnum existing, it is difficult to say what qualifications will be demanded. No restrictions, apparently, are now placed on the practice of American surgeons.

MEXICO.

There are in this republic four schools especially for the study of medicine, and four in which the study of medicine is carried on, though being colleges established for other professions.

The schools are located as follows: One in the City of Mexico, sustained by the general government, and the other three in the cities of Guadalajara, Jalisco, Monterey, State of Nueva Leon, and in Merida, State of Yucatan, respectively, and are sustained by the government of those states. The other four, annexes to the colleges, are located in Campeache, Oaxaca, Puebla and San Luis Potosi, capitals of the states of the same names, and are sustained by the state governments.

Physicians, graduates of the state schools, may legally practice their profession in such states and not in the capitol, but these physicians and those graduates of medical schools in Europe, the United States or any other country are not prohibited from practicing the profession in this country, but if they desire to do so legally they must pass the examination of the School of Medicine in this capitol, which examination is conducted in Spanish, and a thesis on some medical subject must also be presented written in Spanish. At the present time there is being an effort made to modify the law in respect to these examinations, so that the persons interested if they present diplomas from reputable medical schools may have the examinations less severe and much reduced.

The course of study at the medical school in the capitol is fixed at six years; those of the states generally they are five or six years.

MEDICAL EDUCATION IN MEXICO.—In 1578 a chair of medicine was initiated in the University of Mexico—that institution being then twenty-five years old—and was the first of the kind to be established in the New World. It was called the *prima* or morning class, and the professor was expected to cover the whole field of the science, as it then was taught; and it was said that he managed to do so in the course of four years. The student, as the custom then was, was required to serve a pupilage under some practitioner for a longer or shorter period. Candidates had previously to study Latin and to go through the course of arts and astrology or mathematics, and to obtain the degree of Bachelor of Arts. In 1599 a second chair of medicine was founded, which was called *vesperas*, or evening class. In 1661 chairs of *methodus medendi* and of anatomy and surgery were established; and later a class of dissection and operative surgery was added. At the end of the curriculum the student obtained the degree of Bachelor of Medicine; subsequently, after a fresh examination, that of licentiate; and finally, after an interval, that of doctor. In 1768 a Royal College of Surgeons was established on the model of similar colleges then existing in Cadiz and Barcelona. In this college practitioners of a lower grade were trained; they were called "Romancist surgeons," to distinguish them from the "Latin surgeons" who studied in the University. At

this college, also, phlebotomists, dentists, bonesetters, midwives, etc., picked up such scraps of knowledge as were required for the exercise of their several functions. After a time an ordinance was made that no one should be allowed to matriculate in this school who did not know Latin. In 1830 a further step was taken for the improvement of the professional education of the surgeons in the shape of an enactment that no one should be admitted to the school of surgery who had not previously obtained the degree of Bachelor of Philosophy. In 1831 the two branches of the profession were finally amalgamated; all candidates were required to submit to examination in medicine and surgery, and the faculty conferred a diploma in both, instead of the various diplomas of physician, "Latin surgeon" and "Romanceist surgeon," which had previously been given. The numerous political changes which swept over Mexico in the years following 1833 affected the medical school, which was several times closed and more than once in danger of destruction. Largely owing to the public spirit of its professors, however, it managed to survive, and under the enlightened administration of General Diaz, it has now developed into a highly efficient teaching institution. Before 1833 it had 11 professorships; from that date to 1877 only 5 were added. From 1877 to the present date 10 new chairs have been established, without counting a large class of clinical teachers, assistants and prosectors.—*Journal of the American Medical Association*.

GREAT BRITAIN AND IRELAND.

Medical education and enregistration in Great Britain is under the control of the General Council of Medical Education and Enregistration of the United Kingdom. This general council is made up of representatives, one from each of the following universities: London, Oxford, Cambridge, Durham, Victoria, and one from Glasgow and Aberdeen collectively. The Royal College of Physicians and Royal College of Surgeons of England, Apothecaries' Hall of London, College of Physicians and College of Surgeons of Edinburgh, Faculty of Physicians and Surgeons of Glasgow, one person from the University of Edinburgh and the University of Aberdeen collectively, one from the Universities of Glasgow and St. Andrews collectively, and one from each of the following bodies in Ireland: Kings and Queens College of Physicians in Ireland, Royal College of Surgeons in Ireland, Apothecaries' Hall of Ireland, University of Dublin and Queens University of Ireland. Six persons nominated by Her Majesty, four from England, one from Scotland and one from Ireland.

It will be seen that every University in the Kingdom having power to confer degrees in medicine has its representative upon the general council. These universities are: London, Oxford, Cambridge, Durham, Victoria, Edinburgh, Glasgow, Aberdeen, St. Andrews, University of Dublin and Queens University.

These universities are the only ones that have the right to confer the degrees of M. D., and graduates from these Universities are at once enregistered and obtain their license to practice without further examination.

WHO ARE ENTITLED TO BE REGISTERED.

On and after June the 30th, 1887, every person desiring to be registered under the medical acts must pass a qualifying examination in

medicine, surgery and midwifery, held for the purpose of granting a registrable diploma by any university or corporation in the United Kingdom legally qualified to grant such diploma, or by a combination of two or more medical corporations in the same part of the Kingdom, one at least being qualified to grant a diploma in surgery, and one at least to grant a diploma in medicine; or by a combination of such university with any such university or universities, or of any such university or universities with any such corporation or corporations, all being in the same part of the Kingdom; or by any such medical corporation, with assistant examiners appointed by the general council.

Every person who has passed such examination and possesses one or more of the following qualifications, is entitled, on payment of a fee of £2 in respect of qualifications obtained before January 1, 1859, and of £5 in respect of qualifications obtained since that date, to be registered on producing to the registrar of the Branch Council for England, Scotland or Ireland, the document conferring or evidencing the qualification, or each of the qualifications, in respect whereof he seeks to be registered; or upon transmitting by post to such registrar information of his name and address and evidence of the qualification or qualifications in respect whereof he seeks to be registered, and of the time or times at which the same was or were respectively obtained.

a. Fellow, Member, Licentiate, or Extra-Licentiate of the Royal College of Physicians of London.

b. Fellow, Member or Licentiate of the Royal College of Physicians of Edinburgh.

c. Fellow or Licentiate of the Royal College of Physicians of Ireland.

d. Fellow, or Member, or Licentiate in Midwifery of the Royal College of Surgeons of England.

e. Fellow or Licentiate of the Royal College of Surgeons of Edinburgh.

f. Fellow or Licentiate of the Faculty of Physicians and Surgeons of Glasgow.

g. Fellow or Licentiate of the Royal College of Surgeons in Ireland.

h. Licentiate of the Society of Apothecaries of London.

i. Licentiate of the Apothecaries' Hall of Dublin.

j. Doctor, or Bachelor, or Licentiate of Medicine, of any university of the United Kingdom.

k. Licentiate in Surgery of any university in Ireland legally authorized to grant a license in surgery.

l. Doctor of Medicine, by doctorate granted prior to the 2d of August, 1858, by the Archbishop of Canterbury.

m. Doctor of Medicine of any foreign or colonial university or college practising as a physician in the United Kingdom before October the 1st, 1858, who produced certificates to the satisfaction of the council of his having taken such degree after regular examination or who satisfies the council that there is sufficient reason for admitting him to be registered.

n. Bachelor in Surgery of any university in the United Kingdom legally authorized to confer such degree.

o. Member of the Royal College of Physicians in Ireland.

p. Master in Obstetrics in any university in the United Kingdom.

The above list contains the names and addresses of all the licensing bodies in the United Kingdom.

The requirements for practice in England, Scotland, Ireland and Wales are the same, namely:

That the candidate must be a graduate of some English university with powers to confer the degree of M. D., or has passed one or more of the licensing bodies mentioned above.

COLONIAL AND FOREIGN PRACTITIONERS.

The medical register of Great Britain now contains separate lists of colonial and foreign practitioners. Her Majesty in Council will from time to time define the colonies and foreign countries to which the law is to apply, but no order in respect thereto may be at any time revoked or renewed until such colonies and foreign countries will be included as affording to registered practitioners such privileges of practicing as may seem just.

A person who desires to be enregistered as a colonial practitioner must prove to the registrar of the medical council that he holds a recognized colonial diploma granted in such a British possession. India, Australia and Cape Colony are the only ones recognized at present.

A person who desires to be enregistered as a foreign practitioner must prove to the registrar that he holds a *recognized* foreign medical diploma granted in such a foreign country; also that he is not a British subject, or that the diploma was not granted while he was domiciled in the United Kingdom. At the present time there is no list of authorized foreign diplomas.

A recognized foreign or colonial diploma is one which is recognized for the time being by the medical council as furnishing sufficient guarantee of the possession of the requisite knowledge and skill for official practice. It is necessary for all foreigners and colonial practitioners who are not graduates of certain recognized universities or medical organizations to pass one or more of the examinations of the above licensing bodies. It is important to remember that since 1887 *all candidates for licenses must be qualified in all three branches, namely, medicine, surgery and obstetrics*, in order to obtain such right to practice.

The following are the General Medical Council's regulations in reference to students' registration in medicine:

No medical student shall be registered until he has passed a preliminary examination required by the General Medical Council and has produced evidence that he has commenced medical study. The preliminary examinations in general education required to be passed previous to enregistration as a medical student especially as follows:

1. English language, including grammar and composition.
2. Latin, including grammar, translation from specified authors, and translation of easy passages not taken from such authors.
3. Mathematics, comprising: (a) arithmetic; (b) algebra, as far as simple equation, inclusive; (c) geometry, the subject matter of Euclid, Books I, II and III, with easy deductions.
4. One of the following optional subjects: (a) Greek; (b) French; (c) German; (d) Italian; (e) any other modern language; (f) logic.

The council will not in future accept any certificates of pass in preliminary examination in general education unless the whole of the subjects included in the preliminary examination required by the council for the registration of students of medicine have been *passed at the same time*.

The examinations in general education recognized by the General Medical Council as qualifying for enregistration include the matriculation examination of the English, Scotch and Irish universities mentioned above, together with the University of Wales, and the highest certificate of the Oxford and Cambridge examining board; the preliminary examination of the Royal College of Physicians in Ireland; the College of Preceptors' examination for a first-class certificate and preliminary examination for medical students; the Intermediate Education Board of Ireland, junior, middle and senior grade examination; Educational Institute of Scotland, preliminary medical examination. The certificates from all Canadian, certain Indian, colonial and foreign universities and colleges are accepted, but must contain evidence that the examination has been conducted by or under the authority of the body granting it, and includes all the subjects required by the General Medical Council, and states that all the subjects of examination have been passed at one time, and copies of the form of the required certificate will be supplied by the registrar of the council for the purpose.

PROFESSIONAL EDUCATION.

For those who commence study after January 1, 1892, the course of professional study after registration shall occupy *at least five years*. The final examination in medicine, surgery and midwifery must not be passed before the close of the fifth academic year of medical study.

H. E. Allen, LL. B., is registrar of the general council and of the branch council for England at 299 Oxford street, London, W.

James Robertson is registrar of the branch council for Scotland, 48 George Square, Edinburgh.

S. W. Wilson, registrar of the branch council for Ireland, 35 Dawson street, Dublin.

THE DIMINISHED RUSH INTO THE MEDICAL PROFESSION.—Is it safe to assume that at length the somewhat wild rush by young men into the medical profession is to be moderated? We ourselves do not mean to be rash in making this assumption. Meantime we take the facts for what they are worth, as recorded in the Medical Students' Register just issued. In the year 1897 the medical students registered were in England 828, in Scotland 504, and in Ireland 210. There was a decrease as compared with 1896 of 199. The numbers in 1896 again were less than those of 1895 by 97. We must go back 21 years, to 1876, for so low a registration number as that recorded last year—namely, 1479. The numbers have been several times over 2,000, as in 1879, 1880, 1881, 1889, and in 1891, when they reached the appalling number of 2,405. Since 1865, the commencement of students' registration, 50.15 per cent of the total number of registrations have been in England, 30.5 in Scotland, and 19.5 in Ireland. The diminution last year was proportionately greater in Ireland than in Scotland or in England. We

can not affect to regret the signs of arrest in this rush into the profession. Medicine is not improved by crowds competing for a livelihood.—*The London Lancet*.

THE PROSECUTION OF JOHN HAMILTON, M. D., NEW YORK.—John Hamilton of Bedford avenue, Tottenham-court-road, appeared on June 17th before Mr. Lushington in answer to two summons charging him with falsely pretending to and using the title of Doctor of Medicine, he being an unregistered practitioner. Mr. Muir Mackenzie prosecuted on behalf of the General Medical Council. Mr. Morton Smith defended. A medical student gave evidence that he visited the defendant at the above address and paid him two guineas for medicine. There was a brass plate on the door with the words, "John Hamilton, M. D., New York." Mr. Mackenzie argued on decided cases that the fact that the defendant held a diploma granted in another country did not entitle him to practice as an M. D. in England, but Mr. Smith said the defendant had never described himself as other than he was and pointed out that two previous prosecutions against him had failed. Mr. Lushington dismissed the summons, saying there was no evidence to show that the defendant had used this title with intent to deceive and allowing the defence £3 3s. costs. We have quoted the *Times*' report of the case almost verbally, which doubtless represents accurately its essential points. The General Medical Council will not be encouraged by such a result to continue the prosecution of such gentlemen as "John Hamilton, M. D., New York." It does not follow, however, that the Council is not right in having instituted such a prosecution. For one thing, it will satisfy those members of the Council who are anxious that the Council should wage war against all questionable uses of medical titles which are not registrable. Then, it is further very important that the present meaning of the law should be ascertained by actual prosecutions even if they are occasionally unsuccessful. How else is the Council to found a claim which must some day be made to have the law amended and fortified for the protection of the public? Certainly it does not seem to have been proved in this case that the title M. D. was ever used without the source of it being indicated. This is a weak spot in the prosecution and one which differentiates it from other cases in which the prosecution succeeded.—*Ibid*.

GERMANY.

In this Empire there are twenty medical faculties in the following universities: 1. Friedrich-Wilhelms University in Berlin. 2. Rheinische Friedrich-Wilhelms University at Bonn. 3. University of Breslau. 4. Friedrich-Alexanders University in Erlangen. 5. Albert Ludwig's University at Freiburg. 6. Ludwig's University at Gießen. 7. Georg-Augusts University at Göttingen. 8. University of Greifswald. 9. Vereinigte Friedrichs University Halle-Wittenberg (University of Halle). 10. Ruprecht-Karls University at Heidelberg. 11. University of Jena. 12. Christian-Albrechts University at Kiel. 13. Albertus University at Königsberg. 14. University of Leipzig. 15. University of Marburg. 16. Ludwig-Maximilians University in Munich. 17. University of Rostock. 18. Kaiser-Wilhelms University in Strassburg. 19. Eberhard-Karls University at Tübingen. 20. Julius-Maximilians University at Würzburg.

There are two medical diplomas given in Germany, one by the state and the other by the university, and each has its separate examinations and requirements, the former being the more difficult of the two. The state recognizes only those doctors who have passed

its examination. They alone have a license to practice, and they alone can receive appointments to any medical office. Those doctors who have only passed the university examination can hold no appointment, and can not insist on the payment of their fees from their patients. Any person who chooses, with or without a degree, can practice medicine in Germany, but he does so at his peril, and if he makes any mistakes, he is punished both by fine and imprisonment.

After October 1, 1898, no university can grant the degree of doctor of medicine to any one who has not passed the Staats-Examen, which alone can give the right to practice. Hence all graduates after the date mentioned can lawfully practice.

MEDICAL QUALIFICATIONS AND TITLES IN GERMANY.

(From the Berlin Correspondent London Lancet, May 28, 1898.)

In The Lancet of April 16th, p. 1069, there was an annotation to the effect that after the commencement of next winter session the German universities would only confer the degree of M. D. on candidates who had already passed the state examination and thereby become legally qualified to practice medicine. As the laws on medical qualification and examination in Germany are quite different from those in England a few particulars on the subject may be of interest to the readers of The Lancet. In 1867 the various laws and regulations concerning the practice of medicine which were in force in the different states of the then North German Confederation (Prussia, Saxony, &c.) were replaced by a uniform system applicable to the whole confederation, the provisions of which were included in the *Generbe-Ordnung* (trade-law). In 1871, when the German Empire was founded, this law was extended also to the southern states (Bavaria, &c.) and is now an Imperial law for the whole of Germany. Since this time unqualified practice has not been illegal, anybody being at liberty to give medical advice; but in order that the public might be able to distinguish between practitioners who had received a medical education and those who had not the state instituted a system of examinations of its own, the successful candidates at which receive certificates of "approbation," as they are termed, and thereby become legally qualified medical practitioners. Candidates for this certificate must for their ordinary school education spend nine years in a German *Gymnasium* and must pass the *Abiturienten-examen* in general science, after which they study medicine for four and a half years at a university. After the end of the curriculum, in the course of which there is a preliminary examination in anatomy, physiology, botany, &c.—the so-called *tentamen physicum*—the candidate may apply for "approbation," and is thereupon examined by the commissioners appointed by the government. These commissioners, although they hold examinations in university towns, are not necessarily university professors, but may be any other medical men, such as hospital physicians and surgeons, government medical officers, &c., whom the government sees fit to appoint for the purpose. They are, in fact, government officials, and in their capacity of examiners they are quite independent of the universities. After the candidate has passed the state examination, a description of which would make the present article unduly long, he receives the certificate of "approbation" from that state of the empire to which the university belongs. This certificate is valid throughout the whole empire and confers on its owner the title of *praktischer Arzt*, which he makes use of for his visiting-cards, for his door-plate, and when he signs a medical certificate. This title enables him to hold appointments, to enter the services, and to practice wherever he likes. A certificate of "approbation" may be revoked if it has been obtained by fraudulent means, but this is the only ground for withdrawing it, and a medical man retains it during his whole life even though he may be convicted of a crime and punished. There is no statutory limit of age for medical practice in Germany, there is no annual sum to be paid as a license or tax, and the only formality which a man beginning practice has to attend to is that he must personally

call on the medical officer of the district, show him his "approbation," and write his signature, which is then communicated to all the licensed chemists and to the police officials of the district. It is a penal offense for any unauthorized person to use the title of *praktischer Arzt* or any other title or description by which the public may be induced to believe that he is a duly qualified medical man. The courts of law have to decide in each individual case whether a description used by an unqualified person is one by which the public may be deceived, and the police are authorized to remove door-plates which are held to be infringements of the statute. It is, of course, very easy to secure the conviction of unqualified practitioners in cases of gross imposture, but many of these individuals are very ingenious in evading the law. It results thus from the above that unqualified practice is not in itself an offence, but only unqualified practice under an assumed title. This is a matter of special interest for foreign medical men who would like to practice under their foreign qualification. If they do so they must understand that they are regarded as unqualified and that when their foreign title is similar to a German one they are liable to be punished. Foreigners desiring to become duly qualified in Germany have to pass all the examinations even if they have already studied medicine and taken diplomas at home. This subject was dealt with in *The Lancet* of Sept. 5th, 1896, p. 666 (Students' Number). Exemption from the examination is only allowed by law in cases when the government desires to appoint foreign medical men of scientific renown as university professors, hospital physicians, &c.; but this provision has come into force only in a few cases of professors of foreign nationality—Austrians, Swiss, Dutch, &c.—who obtained their qualifications by a special order of the federal council.

Altogether apart from and independent of the state examination the universities have preserved their old-time established right of conferring on medical men the degree of M. D. (Doctor of Medicine), but this is a mere academic title and not a legal qualification to practice medicine. The examination for M. D. differs greatly in the various universities according to their respective statutes and by-laws. As a rule a four years' course of study, an oral examination and a written thesis are required; at some universities a certain number of printed copies of the thesis must be provided at the expense of the candidate. After the examination has been passed a formal, old-fashioned "disputation" is held between the candidate and the "opponents," whom he may choose among his friends, and after the disputation the dean, in full academical costume, hands the diploma to the candidate. This examination is in several universities made so easy that it is little more than a formality. It is a common joke of German students to say that at some universities the degree may be taken while the train is waiting at the railway station. Graduation expenses also vary very much and the poorer students naturally prefer to take their degrees where there is least to pay, for there is no objection to studying at one university and graduating at another. Although the title of M. D. is not necessary for practice the great majority of medical men nevertheless take it, and it is indispensable for those who desire to become *privat docenten* at a university. The degree, being quite independent of the state examination, could hitherto be taken either before or after the "approbation," but as was explained in *The Lancet* of April 16th this state of things will now come to an end, for the degree will only be given to those who have previously passed the state examination. This reform originated in the fact that in a few instances candidates who had passed the university examination were rejected at the state examination, and when they engaged in practice it was very difficult to make out a case for prosecution because they had legally taken their degree and avoided calling themselves *praktischer Arzt*. The public call every medical man a "doctor," even if he has only passed the state examination.

Although it is almost impossible for foreigners to pass the state examination every facility is afforded them for taking the degree of M. D. They are put at an advantage in comparison with Germans, as they may begin to study at a university without the certificate of a German *gymnasium*. They are only bound to prove that they are qualified for medical study according to the laws of their respective countries. They can present themselves for the M. D. examination after a much shorter time of study than is required of

Germans who intend to pass the state examination, and the time spent at foreign universities is counted in a liberal manner. A great number of foreign medical men, especially Americans, take the German M. D. under this condition, a system which is not without drawbacks. For instance, Germans of deficient general education have gone to America and after becoming American citizens have returned to Germany for the purpose of taking the M. D. degree as foreigners and have then entered on practice in America as German medical men. As the public abroad know little about German qualifications, this fact has undoubtedly lowered the credit of the German medical profession. The above described reform, however, will not refer to foreigners, as they will in future be entitled to take the degree without having previously passed the state examination. The whole question of practice and of qualification is a rather complicated one. It would certainly be the best plan to confer the title of Doctor *eo ipso* on every duly qualified man, as in Austria, but this reform is not yet in sight, as it would interfere with the ancient privileges of the universities.

RATIO OF PHYSICIANS TO POPULATION.—The statistical data bearing upon the ratio between physicians and the general population of Germany, as given out in the new edition of the "Deutsche Medicinal-Kalender," are interesting. We learn (Med. Rec.) that there were 24,873 physicians in the empire during the year 1897: a ratio of 4.5 physicians to 10,000 inhabitants. In 1883 the ratio was 3.33 to 10,000; in 1890 it was 4 to 10,000 inhabitants. Thus 1897 shows a decided increase. Berlin, with its 1,750,000 inhabitants, has 2,196 physicians, or 1 to 800. Ten years ago there was but one physician to 1,218 inhabitants. This is an increase of almost eighty per cent. In the meantime the population increased but nine per cent. Throughout the entire empire there exists a similar disproportion. When we furthermore learn that during the first years of the last decade there was a slight falling off in the number of medical students, which, however, has since been surely and steadily increasing, we can not but conclude that there is a most unwholesome over-production of physicians. France has from 26,000 to 27,000 physicians; Paris, with its 2,500,000 inhabitants, 2,500, or one physician to 1,000. England, on the other hand, has but 20,000.—*The Medical Standard, Chicago*

QUACKERY IN GERMANY AND AMERICA.—We may be consoled with the thought that the United States is not alone in its affliction with quackery. The empire of Germany is described by a German medical journal as an Eldorado of quacks. In 1896 the Saxon national medical college stated that in the year named 745 quacks, naked and not ashamed, flourished in Saxony. This is an increase of 42 over the preceding year. The proportion of quacks to legally authorized practitioners was as one to two. In certain districts the quacks outnumbered the doctors in good standing. The following special lines of quackery were represented: "Nature healers," of whom there were 220; "sympathy," with 106 exponents; homeopathy, with 97; massage, with 72; "magnetism," with 46, and tape-worm curing with 19. It would be interesting and possibly disheartening to enquire where we stand in relation to the quackery of America.—*Ibid.*

A CHECK TO THE HIGHER EDUCATION OF WOMEN.—The movement in favor of the higher education of women in Germany has just received a severe check. At the conference at Wiesbaden of the German Medical Association, numbering over 15,000 members, a motion was unanimously adopted against the admission of women to the study of medicine.—*Echange.*

FRANCE.

In this republic there are six diploma-granting faculties, at Paris, Montpellier, Nancy, Lille, Lyons and Bordeaux. There are in France twenty-one other schools which can not grant degrees, viz.: Two complete schools at Nantes and Marseilles, fifteen preparatory schools at Alger, Amiens, Angers, Besancon, Caen, Clermont-Ferrand, Dijon, Grenoble, Limoges, Poitiers, Rheims, Rennes, Rouen, Toulouse and Tours, three naval medical schools at Brest, Rochefort and Toulon, and the Military Medical School of Val-de-Grâce in Paris. None of these twenty-one schools can grant degrees: their pupils are examined by one of the six faculties. Graduates of foreign schools must pass an examination before one of the six faculties.

RULES FOR FOREIGN STUDENTS FOR ADMISSION TO THE UNIVERSITY OF
PARIS.

General Rules.

The rules for matriculation in the Faculty of Medicine of the University of Paris are the same for foreign students as for French students. They embody an obligatory matriculation, giving the date and place of birth of the student, his residence, and a statement of his previous studies, with a mention of any degree or examination taken by him: This examination, which must be made in person and not by proxy, is good for one year only, and must be renewed annually; this is done by the giving up of the original card received at the time of the first matriculation, which will be exchanged without cost.

Foreign students can be registered in the faculty upon production of a medical diploma obtained by them in foreign countries. They are not permitted to register for any of the degrees instituted by the state, except on producing diplomas or certificates covering studies similar to those exacted from French students; or, on a special dispensation from the government according them, either an equivalent to the title or diploma of a French certificate; or, a total dispensation of all diplomas and certificates.

Foreign students, graduates of foreign universities, who have complied with the above regulations, may secure a dispensation from examination for bachelorship in medicine; but no dispensation is ever granted for the degree of licentiate or doctor, the examinations for which must be taken strictly according to the rules laid down for French students.

No foreign doctor, no matter what his nationality, can practice his profession in France except upon having received a regular diploma from the French government as a doctor of medicine.

Foreign students who enter the university with the intention of finishing their medical studies and to establish themselves in France to practice medicine, can only receive a diploma from the government, if their foreign diploma covers studies equivalent to the regu-

lations governing the degree of bachelorship, and on taking all the regular examinations afterwards. But such foreign students, who, after having finished their studies, intend to return to their homes, may be accorded a dispensation from the examination for the bachelorship in medicine, if they can present a duly authenticated translation of a foreign diploma of a corresponding degree. The diplomas granted to such students will not entitle them to practice medicine in France.

Scientists, professors and foreign doctors, admitted by the dean or a director, upon the proposition of a professor, are not excluded from matriculation for attendance on the lectures or at the laboratories of the university.

Every student for one of the degrees instituted by the government is obliged to attend the full quarterly terms of studies laid down in the special regulations for each grade.

Foreign students are subject to all the rules and regulations pertaining to discipline governing the French students.

Special Rules.

In order to obtain the degree of Doctor of Medicine it is necessary for the student to attend the full courses of studies for four years, during which time sixteen different registrations take place, one after the other during the first fortnight of every quarter, the dates for which are always announced at the university as well as in the medical journals and in the principal newspapers in Paris.

The first registration should take place at the end of October or beginning of November. The second in January, the third in April, the fourth in July, the fifth at the end of October or beginning of November, and then continuing as above. These registrations are not recognized until after a certain amount of practical work, as well as attendance at hospitals and medical, chirurgicai or special clinics. This practical work is obligatory.

Students wishing to obtain the title of Doctor of Medicine must submit to five examinations and defend one thesis. The five examinations are divided as follows:

First examination: Anatomy, less topographic anatomy, practical demonstrations of dissection. *Second examination:* Histology, physiology, including biological chemistry and physics. *Third examination:* Part first—Operative medicine and topographical anatomy, external pathology and obstetrics. Second part—General pathology, animal and vegetable parasites, microbes, internal pathology, practical demonstrations in pathological anatomy. *Fourth examination:* Therapeutic hygiene, medical jurisprudence, materia medica, pharmacology and application of the physical and natural sciences. *Fifth examination:* First part—External clinic, obstetrical clinic. Second part—Internal clinic. *Thesis* upon a subject chosen by the candidate.

The first examination is taken between the sixth and eighth registration, the second between the fourteenth and sixteenth; the fourth and fifth examinations and the thesis must be taken before the same faculty.

The yearly course of studies is divided in two terms, during which they are divided as follows:

First year—First term: Anatomy, histology, physiology, general elementary pathology, biology, chemistry, obligatory practical demonstration, biological chemistry. Second term: Histology, physiology, biological physiology, propedeutic, obligatory practical demonstrations in physic, histology and physiology.

Second year—First term: Anatomy, histology, external pathology, medical and chirurgical clinics, obligatory practical service as interne in hospital, physics, biology, chemistry, histology and physiology.

Third year—First term: Internal pathology, external pathology, operative medicine, obstetrics, pathological anatomy, parasitology, medical natural history, medical chirurgical clinics, obligatory practical demonstrations, services in hospital, pathological anatomy and parasitology, including animal and vegetable parasites. Second term: Operative medicine, internal pathology, external pathology, general biology, obstetrics, pathological anatomy, medical and chirurgical clinics, obligatory practical demonstrations, hospital services, operative medicine, pathological anatomy.

Fourth year—First term: Therapeutics, hygiene, medical jurisprudence, pharmacology, botanical materia medica, medical and chirurgical clinics, chemistry, physics applied to hygiene and therapeutics, history of medicine and chirurgy, obligatory practical demonstrations, practical work, special hospital work; obstetrical work, clinics, chemistry, practical work before the faculty, including botanical materia medica, chemical materia medica and pharmaceutical materia medica, bacteriology, etc. Second term: Therapeutic hygiene, medical jurisprudence, pharmacology, botanical materia medica, medical chirurgy, special and obstetrical clinics, chemistry applied to hygiene and therapeutics, history of medicine and chirurgy, obligatory practical work, special hospital work, obstetrical demonstrations, clinical chemistry, obligatory work before the faculty, botanical, chemical and pharmacological materia medica, bacteriology, etc.

Fifth year—First term: Practical work before the faculty, botanical, chemical and pharmaceutical materia medica, bacteriology. Second term: Practical work before the faculty, botanical, chemical and pharmacological chemistry, bacteriology, etc.

NOTE.—“The students of the University of Paris are not likely to suffer from intellectual overpressure, if one may judge from the number of holidays which they enjoy. One of the students has used some of the abundant spare time which the bounty of his alma mater in the matter of “free days” leaves him to compile the following list of holidays: The great summer vacation, 64 days; All Saints’ holidays, 3; Christmas and New Year, 10; St. Charlemagne, 2; free days in Lent, 2; the Easter vacation, 15; Whitsuntide, 3; the National Festival, 3; Sundays, 52; Thursdays, 52; memorial days of great men, 10; total, 216 days. Thus it is seen that the future doctors of France devote only 149 days out of the 365 to the business of their education.”—*British Medical Journal*.

AUSTRIA.

Has the following medical schools: 1. Karl-Franzens University at Graz. 2. Leopold-Franzens University at Innsbruck. 3. Deutsche-Karl-Ferdinands University in Prague. 4. University of Vienna. 5. University of Buda-Pesthe.* 6. Klausenburg.* 7. University of Cracow.*

Those desiring to practice or to hold medical appointments must have a certificate issued by the university and endorsed by the proper government official called the "*Regierungs Kommissaer*."

In Austria the "leaving" or *maturitäts* examination is regularly the condition exacted for the students desirous to be inscribed at the university, which comprehends four faculties (branches), viz.: 1. Theology. 2. Law. 3. Medicine. 4. Philosophy. Each of these faculties is empowered to give to the student, after he has passed the necessary examinations ("*Staatsprüfungen*" and "*Rigarsen*") the title of a Doctor. The regular course at the gymnasium requires 8 years, no person being admitted before fully 10 years of age.

Exceptionally a person can study in private (as a Privatist) and pass the examinations, also the *Maturitäts-prüfung*, at a gymnasium, to whose director he has applied for such purpose.

The subjects taught in the gymnasium are the following:

1. Latin, up to fluently reading and explaining a classic author, such as Virgilius and Tacitus. A translation from Latin and into Latin, both in writing, are prescribed for the scholars at the *Maturitäts-prüfung*.
2. Greek, up to reading and explaining Homer and a prose author.
3. Ancient and Modern History.
4. Natural science, viz.: elementary mechanics, chemistry, physics, chemistry.
5. Natural History (botany, zoölogy and mineralogy).
6. Mathematical science, up to the binomial theorem, and trigonometry.
7. Philosophical "*Propaedeutik*."

Besides religion, German and other languages, drawing, singing, athletics (not obligatory).

Citizens of foreign states have till now had the possibility of being "inscribed" at an Austrian university if they possess, according to the judgment of the dean of the respective faculty, in general the grade of instruction exacted from Austrian scholars coming from gymnasium to university. If a foreign citizen comes to an Austrian university from a foreign university he has to show sufficient testimonials to be inscribed.

Lately there have been effected some alterations with regard to the courses in the gymnasium and to the reception of foreign students at the universities of Austria and Hungary, the details of which are not at hand.

* Austria-Hungary.

RUSSIA.

Has nine medical schools, in the Medical Military Academy at St. Petersburg and the Universities of Moscow, Kasan, Charkov, Kieff, Watsaw, Dorpat, Tomsk and Helsingfors. The medical course last eight years. Only those holding diplomas equivalent to that of Bachelor of Arts, granted after eight years of successful study in a middle school (gymnasium), are admitted to Russian universities.

But one medical examination is required and but one diploma is issued after a course of five years in one of the universities. A foreigner must pass a state examination in order to obtain a license to practice, unless he holds a diploma from a regular medical college and enjoys an established reputation in his profession, and furnishes evidence of his ability that shall be satisfactory to the Minister of Public Instruction. Only licensed physicians are permitted to charge for prescriptions, or are eligible to receive appointments requiring medical knowledge.

FELDCHERS.—To some military hospitals there is conferred the right of issue of diplomas or better certificates of a feldcher, which might be best translated as assistant surgeon. Such feldchers are trained for nursery and to help physicians. They have no right to practice medicine, but can, in cases of emergency, assist a patient, reporting the case to the attending physician.

ITALY

Has twenty-one medical faculties and schools. Royal Medical Faculties at Bologna, Cagliari, Catania, Messina, Modena, Naples, Padua, Palermo, Parma, Pisa, Rome, Sassari, Siena and Turin; free universities at Camerino, Ferrara, Perugia and Urbino and the Instituto di Studi Superiori Pratici e di Perfezionamento in Florence. All of these grant the degree. The medical course last six years, with an examination at the end of each year and a final examination at the close of the course. In Rome qualified foreign men who confine their practice to their own countrymen are not interfered with, though in order to practice generally, the M. D. of an Italian university must be obtained.

BELGIUM.

Three years' study in one of the four universities—Ghent, Liege, Brussels and Louvain. Examinations for the degree of M. D. are divided into three sections, as follows: 1. General pathology, pathological anatomy, special pathology and therapeutics, general therapeutics. 2. Surgical pathology (including ophthalmology), theoretical midwifery, hygiene, medical jurisprudence. 3. Medical,

ophthalmological and surgical clinic, practical midwifery, surgical operations. All the examinations under three are practical. According to the new law the government is authorized, on the advice of a jury, which has the power of granting the diplomas of doctor of pharmacist, to give permission to applicants who have obtained a diploma abroad entitling them to practice in their own country, but no permission can be given to practice medicine unless the original diploma is, however, authorized to grant to persons, even though they may have no diploma, on the advice of the medical commission of the province in which they reside, special permission to practice "certain acts of the art of healing."

DENMARK.

Has one medical school in the University of Copenhagen. Professor Carl I. Salomonsen is chief of the same. The students study at the hospitals and also at the university. Those who pass the examination have the right to practice as doctors throughout the kingdom, Danish possessions and colonies. The examinations are: 1 Oral examination in anatomy, physiology and pharmacology. Practical examination in dissections. 2 Written examination in medical jurisprudence, surgery and therapeutics. Oral examination in general pathology and pathological anatomy, special pathology and therapy, surgical pathology and midwifery. Practical examination in clinical medicine, and clinical and operative surgery.

Foreigners wishing "jus practicandi" in Denmark must pass the examination in the Danish language at the university.

There is also a medical school at Reykjavik, Iceland, but those who pass the examination there are only allowed "jus practicandi" in Iceland.

GREECE.

Has one university medical school, at Athens. Four courses of study required, at the end of which the theoretical examination is held and one year after this the candidate is examined practically. The practical examination corresponds to the German State Examination, and is necessary for the license to practice. Graduates of foreign medical schools must pass the practical examination only in order to secure a license to practice.

NORWAY.

Norway has only one principal medical college, namely, the Frederick's University of Christiania founded in 1811.

The successful passing of final examinations gives the title "Doctor in Medicine" with license to practice. In order to obtain the doctor grade the candidate must defend an original dissertation before faculty.

Foreign medical men must pass a severe state examination before they are permitted to practice.

PORTUGAL.

Has three medical schools in the universities of Coimbra, Lisbon and Oporto. The medical course is five years, at the end of which the candidate can get a license to practice by passing the examinations and presenting a suitable thesis in the Portuguese language. The degree M. D. is granted by the University of Coimbra only. The other schools confer the title surgeon. Foreign medical men who wish to practice in Portuguese territory must pass a state examination (held in the Portuguese language) at one of the medical schools.

SPAIN.

Has nine medical faculties in the universities of Barcelona, Granada, Madrid, Seville, Salamanca, Santiago, Valencia, Valladolid, and Sargossa. The course (obligatory) lasts four years. All graduates must pass a states examination before being permitted to practice. Once licensed they can practice anywhere on Spanish territory. Foreign physicians must, as a rule, pass a state examination, exceptions, however, have been made in the case of some British, French, German and American diplomas. It is believed that hereafter graduates of all medical colleges in the United States will be required to pass an examination.

SWEDEN.

Has three medical faculties, in the Universities of Upsala and Lund, and the Kongl Karolinska Mediko-Kirurgiska Institute at Stockholm. The student must complete his general chemistry and physics education before beginning the study of medicine. After passing the examinations in anatomy, physiology, physiological chemistry, pharmacology, general pathology and history of medicine, the candidate must have six months' service in the academy hospital, eight months' service in the Seraphim Hospital at Stockholm, two or three months in the Hospital for Venereal Diseases, four months in the Lying-in Charity, the clinic for women and the Childrens' Hospital, and two months in the Hospital for the Insane. In from three to five years after passing the examinations mentioned above he can come up for the licentiate examination, the passing of which gives the right to practice. For the M. D. degree the licentiate must defend a dissertation publicly. Foreign medical men must pass a severe state examination in order to practice.

SWITZERLAND.

Has four medical faculties, in the Universities of Basle, Berne, Geneva and Zurich. There is a federal examination board and each canton has a separate examining board. The only physicians who can practice throughout the entire republic or on the staff of the army are those who have passed the examination of the federal board. Persons who have passed a canton board can practice in that canton only. Many cantons accept the university diploma without further examination. It is believed that the canton board will shortly be abolished leaving all practitioners to pass a federal or national examination only.

TURKEY.

Has two medical schools, the military and the civil, at Constantinople. The course is six years, two of which are spent in clinical work. Foreign medical men must pass an examination. The fee is 7 Turkish pounds, being 5 for the permit and 2 for the medical jury.

JAPAN.

There are two universities in this empire, one located at Tokio, called the Tokio Imperial University, and the other the Kioto Imperial University (Kioto), in the former of which a medical college has already been established, the course therein being four years, while in the latter, I understand, a similar course will be instituted in the near future. The alumni of these colleges, as well as those of the medical department of the 1st, 2d, 3d, 4th and 5th High schools, located respectively at Chibo, Sendai, Okayama, Kanazawa and Nagasaki, and of the medical schools of Osaka, Kioto and Aichi, are entitled to practice without passing any examination, whilst any other person who desires to practice must pass an examination before a committee annually appointed by the Minister of State for Home Affairs.

So far as the present treaty between the United States and Japan is in force, an American citizen who is qualified to practice at home can practice in open ports without any special requirements, but outside of such ports he is debarred by said treaty.

Medical Societies in Illinois.

MEDICAL SOCIETIES IN ILLINOIS.

ILLINOIS STATE MEDICAL SOCIETY.

Organized in 1850.

T. J. Pitner, M. D., President Jacksonville.
 Harold N. Moyer, M. D., First Vice-President Chicago.
 J. T. McAnally, M. D., Second Vice-President Carbondale.
 Edmund W. Weis, M. D., Permanent Secretary Ottawa.
 W. F. Grinstead, M. D., Assistant Secretary Cairo.
 George N. Kreider, M. D., Treasurer Springfield.

Censors: J. L. White, M. D., Bloomington; E. P. Cook, M. D., Mendota; D. W. Graham, M. D., Chicago; C. C. Hunt, M. D., Dixon; Hugh T. Patrick, M. D., Chicago; C. DuHadway, M. D., Jerseyville; J. F. Percy, M. D., Galesburg; James L. Reat, M. D., Tuscola; C. E. Black, M. D., Jacksonville.

Membership, 800. Meetings—Next annual meeting, Cairo, May 16, 17 and 18, 1899.

ILLINOIS HOMEOPATHIC MEDICAL SOCIETY.

Organized 1855.

A. C. Cowperthwaite, M. D., President 717 Marshall Field bldg., Chicago.
 P. H. Wessel, M. D., Vice-President Moline.
 F. E. Downey, M. D., Treasurer Clinton.
 W. W. Stafford, M. D., Secretary 100 State, Chicago.

Censors: C. E. Colwell, M. D., Aurora; C. B. Kinyon, M. D., Rock Island; T. C. Duncan, M. D., Chicago.

Membership, 400. Meetings annually.

ILLINOIS STATE ECLECTIC MEDICAL SOCIETY.

Organized 1869.

Anson L. Clark, M. D., President Elgin.
 Florence S. Manion, M. D., First Vice-President Mt. Vernon.
 John D. Robertson, M. D., Second Vice-President Chicago.
 W. E. Kinnett, M. D., Recording Secretary Yorkville.
 Susan K. Whitford, M. D., Treasurer Elgin.
 W. R. Schussler, M. D., Corresponding Secretary Orland.

Next meeting, Springfield, May 17-18, 1899.

ILLINOIS STATE ASSOCIATION OF PHYSIO-MEDICAL PHYSICIANS AND SURGEONS.

Organized 1878.

B. H. McKinney, M. D., President New Douglas.
 A. P. Johnston, M. D., Vice-President 1029 Kimball ave., Chicago.
 H. A. Hadley, M. D., Secretary 301 S. Francisco ave., Chicago.
 J. C. McCandless, M. D., Treasurer 6536 Ingleside ave., Chicago.

Censors: R. C. Knox, M. D., Rogers Park, Chicago; H. J. Treat, M. D., 70 Dearborn st., Chicago; H. P. Nelson, M. D., 605 W. VanBuren st., Chicago.

Membership, 40. Meetings annually in September.

ILLINOIS ARMY AND NAVY MEDICAL SOCIETY.

Organized 1890.

A. C. Corr, M. D., President Carlinville.
 E. P. Bartlett, M. D., Secretary and Treasurer, Springfield.

ÆSCULAPIAN SOCIETY OF THE WABASH VALLEY.

Organized in 1846.

W. H. Tenbrock, M. D., President Paris.
 J. D. Mandeville, M. D., Vice-President Philo.
 Z. T. Baum, M. D., Secretary and Treasurer Paris.
 Censors: Charles B. Fry, M. D., Mattoon; W. A. Buchanan, M. D., Paris; John Weir,
 M. D., West Union; Walter Schell, M. D., Terre Haute, Ind.; J. A. Baughman, M. D., Neoga.
 Membership, 145. Meetings, Neoga, Ill., May and October.

CENTRAL ILLINOIS DISTRICT MEDICAL SOCIETY.

Organized 1874.

J. J. Connor, M. D., President Pana.
 J. N. Nehms, M. D., Secretary Taylorville.
 J. M. Miller, M. D., Treasurer Pana.
 Censors: J. Huber, M. D., Pana; T. J. Whitten, M. D., Nokomis; W. J. Eddy, M. D.,
 Shelbyville; E. A. Burwell, M. D., Nokomis; E. M. Alverson, M. D., Stonington.
 Membership, 150. Meetings last Tuesday in April and October.

FOX RIVER VALLEY MEDICAL ASSOCIATION.

Organized 1860.

Monroe M. Robbins, M. D., President Aurora.
 James E. Bumstead, M. D., Secretary and Treasurer Dundee.
 Censors: Howard L. Pratt, M. D., Elgin; Monroe M. Robbins, M. D., Aurora; William
 A. Nason, M. D., Algonquin.
 Membership, 75. Semi-annual meetings.

GALVA DISTRICT MEDICAL SOCIETY.

Organized 1866.

W. H. Cole, M. D., President Kewanee.
 C. W. Hall, M. D., Secretary and Treasurer Kewanee.
 Censors: S. Thompson, M. D., Galva; M. T. Ward, M. D., Toulon; F. A. Guthrie, M. D.,
 Aledo.
 Membership, 30. Meetings first Thursday in May.

MEDICAL AND SURGICAL SOCIETY OF WESTERN ILLINOIS.

Organized 1882.

F. H. Russell, M. D., President Bluffdale.
 H. R. Gledhill, M. D., Secretary and Treasurer Jerseyville.
 Censors: Carl Black, M. D., Jacksonville; E. G. Proctor, M. D., Kane; Caleb DuHad-
 way, Jerseyville.
 Membership, 100. Meetings quarterly.

MILITARY TRACT MEDICAL ASSOCIATION.

Organized, 1866.

E. L. Mitchell, M. D., President Roseville.
 O. B. Will, M. D., Secretary and Treasurer Peoria.
 Censors: J. A. Kirkland, M. D., Cambridge; G. E. Luster, M. D., Galesburg; I. F.
 Harter, M. D., Stronghurst.
 Membership, 175. Meetings annually in October.

NORTH CENTRAL ILLINOIS MEDICAL ASSOCIATION.

Organized 1874.

E. P. Cook, M. D., President.....Mendota.
 William O. Ensign, M. D., Secretary and Treasurer.....Rutland.
 Censors: J. A. Marshall, M. D., Pontiac; A. S. Bickel, M. D., Florid; A. E. McBride, M.
 D., Coleta; J. A. Freeman, M. D., Millington; C. D. Chalfant, M. D., Streator; S. C. White,
 M. D., Sandwich.

Membership, 125. Meetings annually on first Tuesday in December.

ROCK RIVER INSTITUTE OF HOMEOPATHY.

Organized 1879.

O. B. Blackman, M. D., President.....Dixon.
 A. W. Blunt, M. D., Secretary.....Clinton, Iowa.

Membership, 18. Meetings quarterly.

ROCK RIVER VALLEY MEDICAL ASSOCIATION.

Organized April 19, 1894.

J. B. Crandall, M. D., President.....Sterling.
 Francis Morrill, M. D., Secretary and Treasurer.....Sterling.

Censors: Frank Anthony, M. D., Sterling; F. M. Banker, M. D., Franklin Grove; George
 Ryon, M. D., Amboy; F. B. Owens, M. D., Dixon; T. J. Taylor, M. D., Ashton.

Membership, 71. Semi-annual meetings.

SOUTHEASTERN ILLINOIS MEDICAL SOCIETY.

Organized in 1876.

Chas. W. Sibley, M. D., President.....Fairfield.
 Theodore A. Johnson, M. D., Secretary and Treasurer.....Xenia.

Censors: James W. Boyles, M. D., Clay City; N. S. Marshall, M. D., Olney; Louis J.
 Shifferstein, M. D., Effingham.

Membership, 85. Meetings semi-annually.

SOUTHERN ILLINOIS MEDICAL ASSOCIATION.

Organized 1874.

J. O. DeCourcey, M. D., President.....St. Libony.
 C. G. Rayhill, M. D., Secretary.....Belleville.
 J. I. Hale, M. D., Assistant Secretary.....Alto Pass.
 H. L. Gault, M. D., Treasurer.....Sparta.

Membership, 250. Meetings semi-annually.

ADAMS COUNTY MEDICAL SOCIETY.

Organized March 28, 1850.

J. Fletcher, M. D., President.....Mendon.
 Frank E. Tull, M. D., Secretary.....Quincy.
 L. H. A. Nickerson, M. D., Treasurer.....Quincy.

Censors: Joseph Robbins, M. D., Quincy, and W. E. Gilliland, M. D., Coatsburg.

Membership, 40. Meetings second Monday of each month.

BOND COUNTY MEDICAL SOCIETY.

Organized November 13, 1886.

J. A. Warren, M. D., Presidednt.....Beaver Creek.
 W. T. Easley, M. D., Secretary.....Greenville.
 J. S. Pondexter, M. D., Treasurer.....Mulberry Grove.

Censors: J. H. Gordon, M. D., Pocahontas; B. F. Coop, M. D., Greenville.

Membership, 26. Semi-annual meetings.

BRAINARD DISTRICT MEDICAL SOCIETY.

Organized 1877.

S. T. Hurst, M. D., President.....Greenview.
 Katharine Miller, M. D., Secretary.....Lincoln.
 Chas. C. Reed, M. D., Treasurer.....Lincoln.
 Censors: J. C. Fisher, M. D., Petersburg; N. Holmes, M. D., Delavan; W. P. Walker,
 M. D., Mason City.
 Membership, 63. Quarterly meetings.

BUREAU COUNTY MEDICAL SOCIETY.

Organized 1893.

T. Sprague, M. D., President.....Sheffield.
 Robert M. Pollock, M. D., Secretary and Treasurer.....Princeton.
 Membership, 35. Semi-annual meetings in May and November.

CHAMPAIGN COUNTY MEDICAL SOCIETY.

William F. Gray, M. D., President.....Champaign.
 John Laughlin, M. D., Secretary and Treasurer.....Rantoul.
 Censors: James E. White, M. D., Urbana; J. C. Harmon, M. D., Rantoul; John Martin,
 M. D., Tolono.

Membership, 44. Quarterly meetings occurring on Wednesday nearest the middle of
 March, June, September and December. Annual meeting in December.

CLINTON COUNTY MEDICAL SOCIETY.

Organized in 1876.

W. P. Gordon, M. D., President.....Carlisle.
 Max Broening, M. D., Secretary.....Carlisle.
 G. B. Perkins, M. D., Treasurer.....Jamestown.
 Board of Examiners: F. X. Fisher, M. D.; T. Gaffner, M. D.; S. H. Wilcox, M. D.; N. P.
 Thompson, M. D.; W. G. Bechtold, M. D.

Membership, 14. Meetings quarterly on first Tuesday in February, May, August and
 November.

COOK COUNTY ECLECTIC PATHOLOGICAL SOCIETY.

Organized September 21, 1885.

Eli Wright, M. D., President.....853 Warren av.
 Eli Wright, M. D., Treasurer.....853 Warren av.
 Arthur Weir Smith, M. D., Secretary.....1326 W. Polk st.
 Directors: Eli Wright, J. B. McPatrick and A. W. Smith.
 Membership, 8.

COOK COUNTY HOMEOPATHIC MEDICAL SOCIETY.

Organized October, 1891.

Wilson A. Smith, M. D., President.....Morgan Park.
 L. M. Ousley, M. D., Treasurer.....33 Center av., Chicago.
 J. N. Ranger, M. D., Secretary.....Champaign.
 Censors: Thos. C. Duncan, 100 State st.; E. R. McIntyer, M. D., 349 N. Clark st.
 Membership, 62. Meetings first and second Tuesday of each month.

COOK COUNTY HOSPITAL CLINICAL SOCIETY.

Organized January 4, 1890.

Peter Bassoe, M. D., President.....Cook County Hospital.
 H. J. Brugge, M. D., Secretary.....Cook County Hospital.
 Peter Bassoe, M. D., Treasurer.....Cook County Hospital.
 Membership, 18. Meetings first and third Fridays of each month.

CRAWFORD COUNTY MEDICAL SOCIETY.

Organized in 1879.

F. J. C. Griffith, M. D., President.....Annapolis.
 John Weir, M. D., Secretary.....West Union.
 C. Barlow, M. D., Treasurer.....Robinson.
 Censors: W. H. Hayhurst, M. D., West York; L. J. Weir, M. D., West York; T. N. Rafferty, M. D., Robinson.

Membership, 22. Meetings second Thursday in alternate months.

DE WITT COUNTY MEDICAL SOCIETY.

Organized March 8, 1856.

D. W. Edmiston, M. D., President.....Clinton.
 John A. Tyler, M. D., Secretary.....Clinton.
 Censors: J. M. Wilcox, M. D., Clinton; A. L. Morris, M. D., Farmer City; A. E. Campbell, M. D., Clinton.

Membership, 25. Quarterly meetings second Tuesday in January, April, July, October.

FULTON COUNTY MEDICAL SOCIETY.

J. E. Sutton, M. D., President.....Canton.
 E. H. Heise, M. D., Secretary.....Canton.
 J. A. Logan, M. D., Treasurer.....Canton.

Censors: J. K. Welch, M. D., Cuba; P. F. Stoops, M. D., Ipava; B. C. Toler, M. D., Astoria; W. E. Shallenberger, M. D., Canton; W. S. Strobe, M. D., Lewistown.

Meetings first Thursday in February, April, October and December.

HANCOCK COUNTY MEDICAL SOCIETY.

Organized in 1875.

William Boaz, M. D., President.....Carthage.
 James H. Callahan, M. D., Treasurer.....Carthage.
 R. L. Cashburn, M. D., Secretary.....Carthage.

Censors: James W. Carlton, M. D., Carthage; C. S. Forney, M. D., Adrain.

Membership, 25. Meetings first Monday in May and December; generally, also, first Mondays in March and September.

JERSEY COUNTY MEDICAL SOCIETY.

(No answer received to repeated enquiries.)

KANKAKEE COUNTY MEDICAL SOCIETY.

Organized December 17, 1891.

B. F. Uran, M. D., President.....Kankakee.
 F. S. Tinslar, D. D. S., Secretary and Treasurer.....Kankakee.

Executive Committee: Isabella M. Davenport, A. M. Hudson and Charles Line.

Membership, 39. Meetings first Thursday in February, April, June, August, October and December.

LASALLE COUNTY MEDICAL SOCIETY.

Organized July 29, 1853.

K. W. Leland, M. D., President.....Utica.
 E. W. Weiss, M. D., Secretary and Treasurer.....Ottawa.

Censors: Geo. A. Diens, M. D., Streator; R. W. Bower, M. D., Sheridan; E. P. Hatheway, M. D., Ottawa.

Meetings annually. Membership, 35.

LAKE COUNTY MEDICAL SOCIETY.

(No answer received to repeated enquiries.)

MACOUPIN COUNTY MEDICAL SOCIETY.

Organized in 1873.

Geo. R. Cowan, M. D., President Girard.
 A. C. Corr, M. D., Secretary and Treasurer.....Carlinville.
 Censors: J. E. Pence, M. D., Carlinville; Elias Davis, M. D., Nilwood; G. R. Cowan,
 M. D., Girard.

Membership, 40. Semi-annual meetings in April and October.

MADISON COUNTY MEDICAL SOCIETY.

Organized January 8, 1873.

Stephen F. Robinson, M. D., President.....Edwardsville.
 Frederick G. Zenk, M. D., Secretary and Treasurer.....Troy.

MASSAC COUNTY MEDICAL SOCIETY.

Organized January 2, 1894.

J. A. Orr, M. D., PresidentMetropolis.
 A. C. Ragsdale, M. D., Secretary.....Metropolis.
 J. E. Gowan, M. D., Treasurer.....Metropolis.
 Censors: J. E. Bronson, M. D., Metropolis; J. A. Helm, M. D., Metropolis; J. E. Gowan,
 M. D., Metropolis.

Membership, 17. Meetings second Thursday in each month.

McCLEAN COUNTY MEDICAL SOCIETY.

Organized 1854.

C. M. Noble, M. D., PresidentMcLean.
 T. W. Bath, M. D., Secretary.....Normal.
 I. Little, M. D., Treasurer.....Bloomington.
 Censors: A. L. Fox, M. D., Bloomington; Lee Smith, M. D., Bloomington; J. B. Taylor,
 M. D., Bloomington.

Membership 60. Meetings first Thursday of every month.

MONROE COUNTY MEDICAL SOCIETY.

Organized June 23, 1883.

H. Ganter, M. D., PresidentFloraville.
 L. Adelsberger, M. D., Secretary.....Waterloo.
 W. A. James, M. D., Treasurer.....Chester.
 Censors: A. Wetmore, M. D., Waterloo; H. Heidelberg, M. D., Hecker; M. G. Nixon,
 M. D., Columbia.

Membership 19. Meetings first Monday in June and fourth Monday in September.

MORGAN COUNTY MEDICAL SOCIETY.

Organized 1866.

A. L. Adams, M. D., PresidentJacksonville.
 C. E. Black, M. D., Secretary.....Jacksonville.
 E. F. Baker, M. D., Treasurer.....Jacksonville.
 Censors: H. W. Smith, M. D., Roodhouse; L. J. Harvey, M. D., Griggsville; C. M. Ver-
 trees, M. D., Murrayville.

Membership 57. Meetings second Thursday in each month.

OGLE COUNTY MEDICAL SOCIETY.

Organized in 1876.

George Mix McKenney, M. D., PresidentOregon.
 Henry A. Mix, M. D., Secretary.....Oregon.
 Frank G. Crowell, M. D., Treasurer.....Rochelle.

Censors: William W. Burns, M. D., Polo; James Pankhurst, M. D., Grand Detour; Well-
 ington Carleton, M. D., Rochelle; A. L. Mendenhall, M. D., King's.

Membership 22. Annual meetings, Oregon, Ill.

PERRY COUNTY MEDICAL SOCIETY.

Organized 1890.

H. P. Huntsinger, M. D., President.....	Pinckneyville.
J. I. Higgs, M. D., Treasurer.....	Conclerville.
J. R. Sims, M. D., Secretary.....	DuQuoin.

Membership 16. Meeting third Friday of each month.

ST. CLAIR COUNTY MEDICAL SOCIETY.

Organized 1866.

Adolph Schlernitzauer, M. D., President.....	Millstadt.
Julius Rohl, M. D., Permanent Recording Secretary.....	Belleville.
B. H. Portuando, M. D., Corresponding Secretary.....	Belleville.
D. C. Heely, M. D., Permanent Treasurer.....	Belleville.

Censors: Adolph Berger, M. D., Lebanon; James O. De Courey, M. D., St. Libony;
Adolph Schlernitzauer, M. D., Millstadt.

Membership, 38. Quarterly meetings first Thursday, March, June, September and December.

SALINE COUNTY MEDICAL SOCIETY.

Organized 1895.

J. W. Ballance, M. D., President.....	Harrisburg.
J. R. Baker, M. D., Secretary and Treasurer.....	Harrisburg.

Membership, 34. Meets the first Friday in each month.

SHELBY COUNTY MEDICAL SOCIETY.

Organization: Reorganized in 1864 or 1865, but records lost previous to December 5, 1876.

Wm. J. Eddy, M. D., President.....	Shelbyville.
Wm. G. Wilson, M. D., ex-officio Treasurer.....	Shelbyville.
Wm. G. Wilson, M. D., Secretary.....	Shelbyville.

Membership, 8. Meetings, first Tuesday in each month.

STEPHENSON COUNTY SOCIETY OF PHYSICIANS AND SURGEONS.

Organized 1878.

J. W. Saucerman, M. D., President.....	Winslow.
C. R. Sheetz, M. D., Secretary and Treasurer.....	Freeport.

Censors: D. C. L. Mease, M. D., Freeport; M. Saucerman, M. D., Rock Grove; J. A. Poling, M. D., Freeport.

Membership, 23. Semi-annual meetings second Tuesday in January and July.

WABASH COUNTY MEDICAL SOCIETY.

Organized July 26, 1880.

George C. Kingsbury, M. D., President.....	Mt. Carmel.
Louis C. Lukemeyer, M. D., Secretary.....	Mt. Carmel.
J. C. McClurkin, M. D., Treasurer.....	Mt. Carmel.

Membership, 23. Quarterly meetings in January, April, July and October.

WARREN COUNTY MEDICAL SOCIETY.

Organized 1898.

C. Sharrick, M. D., President.....	Monmouth.
Franklin E. Wallace, M. D., Secretary.....	Monmouth.
Cynthia Skinner, M. D., Treasurer.....	Monmouth.

Membership, 16. Meetings monthly.

WILL COUNTY MEDICAL SOCIETY.

Organized 1875.

J. A. Clyne, M. D., President.....Joliet.
 Louis J. Frederick, M. D., Secretary and Treasurer.....Joliet.
 Censors: George C. Raynor, M. D., Joliet; P. G. Rulien, J. R. Casey.
 Membership, 38. Meetings second and fourth Tuesday of each month.

WILLIAMSON COUNTY MEDICAL ASSOCIATION.

Organized October 14, 1878.

H. V. Ferrell, M. D., President.....Cartersville.
 George W. Evans, M. D., Secretary.....Marion.
 W. H. Bentley, M. D., Treasurer.....Marion.
 Censors: A. P. Baker, M. D., Cottage Home; John W. Vick, M. D., Cartersville; W. J. Burgess, M. D., Lake Creek.
 Membership, 32. Meetings bi-monthly.

WINNEBAGO COUNTY MEDICAL SOCIETY.

Organized October, 1881.

Geo. L. Winn, M. D., President.....Rockford.
 John E. Allaben, M. D., Secretary and Treasurer.....Rockford.
 Membership, 29. Quarterly meetings, second Tuesday in January, April, August and December.

WOODFORD COUNTY MEDICAL ASSOCIATION.

Organized July 5, 1870.

A. L. Mendenhall, M. D., President.....Kings.
 Frank Stubblefield, M. D., Secretary and Treasurer.....El Paso.
 Meetings first Monday in May.

AURORA MEDICAL SOCIETY.

R. A. Windett, M. D., President.....Aurora.
 O. S. Parker, M. D., Secretary and Treasurer.....Aurora.
 Membership, 35. Meetings monthly.

BELLEVILLE MEDICAL SOCIETY.

Organized in 1889.

Adolphus M. Scheel, M. D., President.....Belleville.
 Ernst P. Raab, M. D., Secretary.....Belleville.
 Membership, 11. Meetings second Wednesday in each month.

CAIRO MEDICAL SOCIETY.

Organized October, 1892.

J. C. Sullivan, M. D., President.....Cairo.
 Joseph J. Gordon, M. D., Treasurer and Secretary.....Cairo.
 Censors: William W. Stevenson, M. D.; William H. Fields, M. D.; John J. Rendleman, M. D.; George H. McNemer, M. D.; N. R. Casey, M. D.; J. H. Bryant, M. D.; Lucius J. Holly, M. D.; Wm. F. Grinstead, M. D.; Alpheus A. Bondurant, M. D.; Samuel B. Carey, M. D.; William C. Clarke, M. D.
 Membership, 14. Meetings first and third Wednesdays each month.

CHICAGO MEDICAL SOCIETY.

Organized April 5, 1852.

Arthur D. Bevan, M. D., President.....	100 State St.
S. C. Plummer, M. D., Treasurer.....	4304 Lake ave.
J. H. Stowell, M. D., Chairman Membership Committee.....	2633 Indiana ave.
Arthur R. Edwards, M. D., Secretary.....	103 State st.

Membership, 902. Meetings every Wednesday.

PHYSICIANS' CLUB OF CHICAGO.

Organized 1895.

Geo. W. Webster, M. D., Chairman.....	70 State st.
Wm. H. Wilder, M. D., Secretary.....	103 State st.
John Ridlon, M. D., Treasurer.....	103 State st.

 J. H. Finch, M. D., Secretary-Treasurer..... Champaign.

Censors: H. E. Cushing, M. D.; W. L. Gray, M. D., and C. N. White, M. D.

Membership, 12. Meetings, second and fourth Wednesday in each month.

ARMY MEDICAL EXAMINING BOARDS OF ILLINOIS.

1861-65 and 1898.

ILLINOIS ARMY BOARD OF MEDICAL EXAMINERS.

THE WAR OF THE REBELLION.

[Reprint from the 10th Annual Report, Illinois State Board of Health.]

As a contribution to the history of the regulation of the practice of medicine by the State of Illinois, I submit the results of the work of the Illinois Army Board of Medical Examiners during the War of the Rebellion, gathered from the records of the Adjutant General's office, from reports and papers of Dr. H. A. Johnson, of Chicago, and from my own personal experience and observation.

Although, as shown in our reports on Medical Education, efforts had been made from time to time for more than forty years* to establish some test of fitness of those engaged or offering to engage in the practice of medicine, the creation of this Army Board and the work which it accomplished were the first practical results in this direction. From the hundreds of medical men who tendered their services with patriotic zeal—often with an excess of patriotism which obscured their recognition of the demands of military service—there were selected a corps of 660 surgeons and assistant surgeons, whose record as faithful, competent, and, in many cases, brilliant officers was not surpassed by any similar body engaged in the defense of the Union. It is not too much to say that the reputation for endurance, pluck and effectiveness which Illinois troops early won and sustained throughout the war was due in no small measure to the skill, forethought and devotion of the Illinois medical staff. This has been fully testified to by the highest military authorities.

These gentlemen, impartially and conscientiously selected solely on the basis of personal worth and professional fitness, went into the service and the field more thoroughly equipped and better qualified for the discharge of their duties than did any other class of volunteer officers, either of the line or the staff. I very distinctly re-

* "While still a territory and sparsely settled only along the river fronts and water courses of Southern Illinois, efforts were already being made by the pioneer practitioners to regulate the practice of medicine and to foster the cause of medical education. In 1817 an act of the territorial Legislature—with a preamble reciting that 'well regulated medical societies have been found to contribute to the diffusion of true science, and particularly to the knowledge of the healing art'—divided the territory into two medical districts: all that portion of the territory lying east of the meridian line running due north from the mouth of the Ohio formed the Eastern Medical District, and that west of said line formed the Western Medical District."—For historical summary of these efforts see *Medical Education and the Regulation of the Practice of Medicine in the United States and Canada*: FIFTH ANNUAL REPORT OF THE STATE BOARD OF HEALTH OF ILLINOIS—p. 52 et seq.

member the impression created on my own mind when, after having served for some time in departments where Illinois regiments were scarce, a corps, composed almost entirely of our own State troops, was added to the command in which I was serving as a Medical Director. The hospital staff and appointments were in excellent and effective order; the medical and surgical records were complete and intelligently kept; the sanitary discipline and police regulations of the camps were admirable; and, as a result, the proportion of "effectives for duty" was maintained much above the average—in striking contrast to regiments from other states in the same command.

This is said without invidiousness, and only as bearing upon the work of the Army Medical Examining Board—the first practical step in Illinois towards regulating the practice of medicine, under the authority of the State. It may also and properly be said, that the survivors of those who were thus selected returned to the State at the close of the war to speedily occupy the foremost places of professional and social influence in their respective communities. About 170 of these are still living in this State but their ranks are rapidly thinning out, and it has occurred to me, while there is yet time, to put on record some account of the manner in which the medical staff of the Illinois contingent was provided, and a complete roster of the names of its members. This seems proper as a matter of justice and in the interest of history.

In the organization of the first brigade of Illinois troops the State Legislature, in April, 1861, constituted a Medical Board to carry out the intent of a general order of the War Department, implied in the phrase which authorized the appointment of regimental medical officers "after having passed an examination by a competent Medical Board, appointed by the Governor of the State." This order was not mandatory, but permissive only, and it was left to the Governors of the several States to determine whether or not it should be carried into effect. In fact, it was not, in many of the States made operative, and medical officers were appointed in some by a State officer known as the Surgeon General, and in other States by the Governors, on recommendation of regimental officers, civilians or politicians. In the former case, where the selections were made by the Surgeon General of the State, the appointments were for the most part wise, but not uniformly so; and, on the other hand, where there was no medical authority to discriminate between applicants, the two extremes of qualifications were found—a few well qualified, and a large number of incompetents.

Gov. Yates, however, who early won the appellation of the "Soldier's Friend," by his devotion to those who went forth to battle, seized this opportunity for securing competent medical officers for the 200,000 men which Illinois sent into the field during the war. In one of his papers on this subject Dr. Johnson tells the following incident, which well illustrates the attitude of our great "War Governor" toward the Army Medical Board:

[Extract from "Medical War Memories," by H. A. Johnson, M. D., Chicago, read before the Loyal Legion, Chicago, February 9, 1888.—Page 8.]

"During the first week of our work a physician, an intimate friend of Governor Yates, came before the Board and was found so deficient that we could not recommend him even for assistant surgeon. We had already rejected several candidates of much pretension, and, as they were still in Springfield, and had to some extent the confidence of the colonels who had nominated them, a united effort was made to over-ride the action of the Board. We were represented as either ignorant or prejudiced, our examinations were characterized as technical, and our decisions influenced by personal friendship or by other unnamed motives.

"On the evening of the day when the Governor's friend was sent back, the Governor came to my room and asked why Dr. ———— had not been recommended. I told him that the Board gave the doctor a patient hearing, and that the answers to practical questions, as well as his written dissertation, made it impossible for us to ask for his appointment. That as we were made the judges of qualification, we must do our duty in that station in which it had pleased the Governor of Illinois to place us. He replied, 'I am extremely sorry that Dr. ———— has failed to pass, but I am not surprised.' Then turning to me he added, 'For our boys who go from home and its comforts to the battle-field and its dangers I want to do the very best I can, and I pledge you that I will commission no one as surgeon or assistant surgeon, whom you can not recommend.' This promise he kept very faithfully, and, although for a few days there was a great clamor for the scalps of the Medical Board, there came from the executive chamber no further questioning as to the reasons for our actions."

As first constituted, the Illinois Army Board of Medical Examiners consisted of Drs. N. S. Davis, of Cook county; Charles Ryan, of Sangamon county; Geo. W. Stipp, of McLean county; William M. Chambers, of Coles county, and Dr. Carpenter, of St. Clair county. Candidates were required to pass an examination before this Board and obtain its recommendation as a condition of appointment and commission. As time developed the need for further troops, and new calls were made, the Medical Board was recognized June 14, 1861, under General Order No. 25 of the War Department. This new Board consisted of Drs. Hosmer A. Johnson, of Chicago; Henry Wing, of Collinsville; Henry W. Davis, of Paris; O. M. Bryan, of Sycamore, and Robert Roskotten, of Peoria. Dr. Davis was subsequently appointed surgeon of the 18th Illinois Infantry, and Dr. D. K. Green, of Salem, was appointed to fill the vacancy. Drs. Bryan, Stipp and Roskotten were promoted to the positions of brigade surgeon in the fall of 1861, and during the greater part of 1862 the Board consisted of Drs. Johnson, Wing and Green. In the fall of 1862, Dr. A. L. McArthur, of Joliet, and Dr. Daniel Brainard, of Chicago, were appointed to fill the vacancies created by the promotion of Drs. Bryan and Roskotten. Dr. Johnson, as president of the Board, continued to devote himself to this work, and to frequent inspections of the sanitary and medical condition of Illinois troops, as well as to active service in the field on occasion, until February, 1865, and the experience thus gained has since been continuously employed most usefully for the public and the profession in the broad field of preventive medicine and in the various health services of the city of his residence, of the State and the Nation. At the date mentioned, February, 1865, Drs. Johnson and Wing resigned. Dr. Rufus S. Lord, of Springfield, was appointed a member,

and the Board was thenceforth, until the close of the war—two months later—composed of Drs. Brainard, Green and Lord.

Drs. Wing, Brainard, Green and Lord are long since dead, and Dr. McArthur recently; Drs. H. A. Johnson, N. S. Davis, W. M. Chambers, O. M. Bryan and Robert Roskotten still survive.

The first session of the permanent Board—appointed June 14, 1861—was held in the city of Springfield on the 18th day of June, 1861, when an organization was effected by the election of H. A. Johnson, president, and O. M. Bryan, secretary. Subsequently, upon the resignation of Dr. Bryan, Dr. Wing was elected secretary.

Soon after its organization the Board received a letter from the Secretary of War, instructing it to be governed by the “army regulations; to investigate carefully the physical ability, moral character and professional attainments of each candidate, and to report favorably for appointment or promotion, in no case admitting of a reasonable doubt.” In order to accommodate the candidates, as far as possible, sessions of the Board were held at Springfield, Chicago, Cairo, Alton, and in the field. I quote the following verbatim from the report of the Board, made December 13, 1862, to Adjutant General Fuller, showing the work accomplished during the first nineteen months.

“The whole number of candidates whose names have been registered on our books is 793. The whole number examined, as reported in the list which accompanies this, is 495. Of these 159 have been recommended for the office of surgeon; 266 have been recommended for the office of assistant surgeon; and 70 have been rejected. In addition to these cases reported, a very considerable number of candidates, after a partial examination, have become conscious of their deficiencies, and have requested permission to withdraw their applications. This request has, we believe, in every case, been granted, with the understanding that it was not to be made a matter of record, and that they were in all respects to be considered as unexamined.

“There is still another class of cases in which the examinations are not yet completed. Men of good moral character and with the ability to be useful, but who are deficient in some one department of medicine or surgery, have, in several instances, been advised to withdraw for a time, and to devote themselves to study with reference to a further examination. These cases are still unrecorded. For convenience we may divide the candidates into three classes:

“1st. Those whose study and practice have made them familiar with the whole field of medicine and surgery. This class is necessarily very small, but the Board is happy to know that there are such men in the service.

“2d. Those who, assuming the title of doctor, have never received the first rudiments of a medical or surgical education. As a general rule, we have found their ignorance only equaled by their impudence. It is unfortunate that these men have often gained the confidence of regiments and the nomination of colonels to the exclusion of better but more modest applicants.

“3d. By far the larger proportion of those who have presented themselves have been men of moderate attainments, capable of much usefulness in private practice, but unaccustomed to study, and able only with difficulty to express their ideas or demonstrate their knowledge.

“In the examination of the first and second classes, but little time has been consumed, but in order to judge correctly of the third class, much patience has been necessary. The habits of mind, methods of reasoning, and probable action in any given case, have been subjects of study, and the Board

has often been compelled to form a judgment not so much upon the actual knowledge developed in the examination as upon the evidence of good sense, sound judgment and adaptation to the service.

“ The examinations have consisted in an investigation :

“ 1st. Of the moral character of the candidate.

“ 2d. Of his professional character.

“ 3d. His experience and adaptation to the work.

“ 4th. His knowledge of his profession.”

During the war a total of 1,250 applicants were examined by this Board in the manner already described, and 664 were recommended for appointment and commission—188 as surgeons and 476 as assistant surgeons. Of these latter 118 were subsequently re-examined and promoted to the rank of surgeon.

The professional and personal character of the men thus selected was so high that—although many of them had not graduated in medicine, and consequently were without the diploma specified in the Medical Practice Act as entitling its possessor to the certificate of the State Board,—the credentials of this Army Medical Examining Board were accepted as proof of the qualifications required by the act, and the survivors in 1877 were registered as certified physicians by the formal action of the State Board.

Of those who were commissioned and whose names are found in the following roster, there were 184 surgeons, 278 first assistant surgeons and 180 second assistant surgeons. Of this number, 89 were promoted after examination from first assistant surgeons to surgeons, and 32 from second assistant surgeons to first assistant surgeons, and 29 from second assistant surgeons to surgeons, making a total of 150 promoted. Eleven were promoted to the rank of brigade surgeons and assistant surgeons of volunteers.

There were six who were killed in action and while on duty; 21 died and 19 were discharged on account of physical disability, the result of disease contracted in the service; 71 surgeons, 104 assistant surgeons, and 28 second assistant surgeons resigned; 8 were dismissed from the service*, one first assistant surgeon and seven second assistant surgeons.

Many of the assistant surgeons had charge of regiments, as it frequently occurred that the surgeons were on detached duty, or incapacitated on account of sickness. Sixteen of the second assistant surgeons were mustered out as hospital stewards and three as privates, because of the lack of opportunity to be mustered in as assistant surgeons. This occurred near the close of the war, and their muster out, as such, did not do the parties justice.

An nearly as I can ascertain, of the total number who passed this Examining Board, there are only 240 now living. They will be found, as a rule, to be among the most reputable and prominent practitioners in the communities in which they reside. A roster of all who passed this examination is herewith submitted:

* Names omitted in the roster.

ROSTER OF SURGEONS CONNECTED WITH ILLINOIS REGIMENTS DURING THE REBELLION—INFANTRY.

REGIMENT.	NAME.	RESIDENCE.	DATE OF APPOINTMENT.	MILITARY HISTORY.
*7-3 months.	Metcalf, Richard L.	Springfield.	Apr. 25, 1861	M. O. July 24, 1861. Aptd. Surg. 7th Inf't. (3 years) July 24, 1861. M. O. Sept. 13, 1863.
8-	Trowbridge, Silas T.	Decatur.	Apr. 25, 1861	Mustered out July 25, '61. Appointed Surg. 8th Inf't. (3 y's). Mustered out Oct. 11, '64.
9-	Bell, Sanford	Springfield.	Apr. 26, 1861	Mustered out July 26, 1861.
10-	Everett, Samuel W.	Caro	Apr. 24, 1861	Mustered out July 29, 1861.
11-	Heise, Adolph W.	Joliet.	Apr. 25, 1861	Mustered out July 30, 1861. Declined to be Surgeon 11th Infantry (3 years). Appointed Surgeon 100th Inf. Aug. 30, 1862. Resigned April 21, 1864.
12-	Wardner, Horace	Anna.	May 2, 1861	Mustered out Aug. 1, 1861. Appointed Surgeon 12th Infantry July 16, 1861. Appointed Brigade Surgeon April 4, 1862. Mustered out Oct. 7, 1865.
7-3 years.	Leonard, William L.		Nov. 3, 1863	Mustered out July 9, 1865.
8-	Dennison, Charles N.	Decatur.	July 27, 1864	Promoted from 2d Assistant Surgeon. Mustered out May 4, 1866.
9-	Hamilton, Samuel M.	Monmouth	July 26, 1861	Promoted Surgeon U. S. Volunteers April 4, 1862. Resigned Sept. 9, 1863.
9-	Gulich, Emil	Alton	Apr. 28, 1862	Mustered out Aug. 20, 1864.
9-Consol	Bigger, David P.	Henderson	Apr. 24, 1865	Appointed 1st Assistant 13th Infantry June 21, 1864. Mustered out Oct. 21, 1864. Promoted from 1st Assistant 102d Infantry. Mustered out July 9, 1865.

ASSISTANT SURGEON OF VOLUNTEERS.

Frezell, John H.	Jan. 9, 1865	Mustered out Aug. 5, 1865
-----------------------	--------------	---------------------------------

* This class of Surgeons was appointed by the President, after examination and recommendation by the Board of Examiners, and were assigned to duty at Brigade, Division and Corps Headquarters, and also to the charge of general hospitals, as the necessities of the service required, and were under the immediate control of the Surgeon General of the Army. In 1862 the title was changed to Surgeon of Volunteers: after this date, candidates, upon successful examination, were commissioned as Assistant Surgeons of Volunteers. Another examination was necessary for promotion to the rank of Surgeon. There were thirty-seven of this class of medical officers from Illinois, four of whom had been connected with the Illinois Army Medical Examining Board, and twenty with Illinois regiments.

*ILLINOIS ARMY BOARD OF MEDICAL EXAMINERS,
CAMP TANNER, 1898.

The first call for troops by the War Department for the American-Spanish War, was received by Governor Tanner on April 26, 1898. In less than two days seven regiments of infantry and one of cavalry and one light battery of artillery of the National Guard of Illinois had reported at the Camp ready for duty, and within four weeks the regiments comprising nearly 8,400 officers and men were mustered into the service of the United States.

Brigadier-General J. H. Barkley was placed in command of the post, Col. J. Mack Tanner, A. A. G., was appointed Post Adjutant, and Lieut. Col. G. N. Kreider, Assistant Surgeon General, Post Surgeon; Surgeon General N. Senn reported on September 28, and remained on duty until ordered to Chickamauga.

The regiments were all well equipped with a medical staff and supplies, and in the majority of instances the medical officers had experiences gained in the annual encampments, or had seen actual service in the riots of recent years.

An examining board consisting of one U. S. Army surgeon and two surgeons from the National Guard was ordered formed. The detail was as follows: Surgeon General N. Senn, Brigadier Surgeon C. C. Carter, Illinois National Guard, and Captain H. P. Birmingham, Assistant Surgeon United States Army. The duties of the board were to examine all applicants for commissions in the medical department of the United States Volunteers, both as to their physical condition and professional standing and requirements. The examination was exceedingly rigid, but to the credit of the candidates, three only were rejected.

The following are some of the questions asked:

ANATOMY AND SURGERY.

1. Give the origin and distribution of the pneumogastric nerve.
2. Mention the bones of the carpus, and give their relative locations by illustration.
3. Describe the innominate artery and give its relations to surrounding structures.

* For much of the information contained herein, the writer is indebted to Lieut. Col. G. N. Kreider, Assistant Surgeon General, Illinois National Guard.

4. Enumerate the different hemostatic measures and describe their technique and indications.
5. Detail the treatment of recent compound fracture of the leg.
6. Describe the different amputations through and below the ankle joint and mention the names of the surgeons who devised them.

MILITARY SURGERY.

1. Give method of treating (temporary) gunshot fracture of the thigh, on the field, and when and how would you remove the patient.
2. What is the effect produced by modern, small, jacketed bullet compared with the old large calibre missile?
3. Give method of procedure in rendering first aid to, and removal of, wounded from fighting line to field hospital.

HYGIENE.

1. Give your ideas on the selection and sanitation of camps.
2. The prophylaxis and treatment of sunstroke.
3. How would you determine, in the field, in a general way, the salubrity of the water supply, and what measures would you take for preventing its pollution?

PRACTICE OF MEDICINE.

1. Describe pneumonia: Definition, etiology, morbid anatomy, symptoms, complications, prognosis, termination, diagnosis, treatment.
2. Describe cerebro-spinal meningitis: Cause, pathology, symptoms, diagnosis, prognosis, treatment.
3. Describe diseases most liable to occur in tropical countries, with short description of causes, symptoms, pathology, prophylaxis, diagnosis, and treatment.

The minimum percentage was placed at 70.

As the result of this examination, the following surgeons were accepted and later mustered into the service of the United States:

First Infantry. Surgeon, W. G. Willard; Assistant Surgeon, T. E. Roberts and C. B. Walls.

Second Infantry. Surgeon, G. F. Lydston; Assistant Surgeons, J. G. Byrne and G. P. Marquis.

Third Infantry. Surgeon, J. B. Shaw; Assistant Surgeons, A. F. Lemke and C. E. Starrett.

Fourth Infantry. Surgeon, T. C. McCord; Assistant Surgeons, C. M. Galbraith and G. E. Hilgard.

Fifth Infantry. Surgeon, M. R. Keeley; Assistant Surgeons, E. W. Ames and J. L. Bevans.

Sixth Infantry. Surgeon, F. Anthony; Assistant Surgeons, C. A. Robbins and L. S. Cole.

Seventh Infantry. Surgeon, T. J. Sullivan; Assistant Surgeons, G. W. Mahoney and F. P. St. Clair.

First Cavalry. Surgeon, W. Cuthbertson; Assistant Surgeons, T. J. Robeson and J. Rowe.

Surgeons Lydston and Cuthbertson resigned their commissions about a month later. Assistant Surgeon Cole died late in May, 1898, as the result of injuries received while on duty. Assistant Surgeon Robeson was appointed Surgeon vice Cuthbertson, and Hospital Steward Albert Mowry was appointed Assistant Surgeon to succeed Robeson.

The First Infantry received its baptism of fire and of fever at Santiago de Cuba. The Third and Sixth Regiments and Battery "A" also faced the foe in Porto Rico. It was the fortune of war that no other regiments of the Illinois National Guard were permitted to participate in the engagements, and, during the conflict, in the occupation of Spanish territory.

The second call for troops was issued on June 28th. A day later the Eighth and Ninth Regiments reported at Camp Tanner. A board to examine applicants for positions on the medical staff of these regiments was shortly afterwards appointed. The detail was as follows:

Lieutenant Colonel C. C. Carter, I. N. G.
 Lieutenant Colonel G. N. Kreider, I. N. G.
 Dr. Daniel H. Williams, Chicago.

The successful candidates in this examination were:

Drs. A. A. Wesley, E. S. Miller and J. W. Curtis, all of Chicago, assigned to the Eighth regiment.

Drs. Andy Hall, of Mt. Vernon; W. R. Washburn, of Union, and W. G. Gregory, of Cave-in-Rock, assigned to the Ninth regiment.

Drs. R. S. Porter, of Chicago; C. F. Shoutz, of Chicago; W. L. Smith, of Streator, and C. E. Whiteside, of Moline, unattached.

Dr. Whiteside was later assigned to the Sixth Regiment, vice Cole, deceased.

The Eighth Regiment, which is composed entirely—officers, non-commissioned officers and privates—of colored men, has taken the place of the gallant First in Cuba. This change was made on the recommendation of Governor Tanner, who realizing the fever was depleting the ranks of the First, asked that the regiment be ordered home and that the Eighth be sent to take its place. It is unnecessary to say that the latter regiment to a man volunteered for this service.

The Eighth Illinois Infantry is the first colored regiment commanded by officers of the same race, which has been offered to the government by any state. Governor Tanner wisely decided that if the colored soldier could fight, he could also command. Heretofore the success obtained by colored regiments has been largely attributed to their officers; now, whatever laurels are won by this regiment, the negro race can justly claim as their own.

OFFICIAL REGISTER

PHYSICIANS.

JUNE 30, 1898.

NOTE.

The majority of the addresses in the Official Register are taken from the records of the State Board of Health. They, necessarily, must be incorrect in cases where physicians have changed locations, unless the fact of the removal was furnished by the physicians interested, or the members of the county or city societies, to whom the lists have been sent for revision, or was observed in the lay or medical press.

Practitioners who are known to have moved from the addresses originally given, and of whose present whereabouts the Board has no knowledge, are reported under the head of Miscellaneous. These names are not included in the index.

As deaths of physicians are seldom reported to the Board, many whose names appear within are, doubtless, not living.

MEDICAL INSTITUTIONS, BOARDS OF MEDICAL EXAMINATION, MEDICAL SOCIETIES AND LICENSING BODIES, DESIGNATED BY NUMBER IN THE OFFICIAL REGISTER OF PHYSICIANS, IN COLUMN "BASIS OF ISSUE."

1. Academy of Medicine, Paris, France.
2. Albany Medical College, Albany, N. Y.
3. American Medical College, Cincinnati, O.
4. American Medical College, St. Louis, Mo.—(a)
5. Baltimore Medical College, Baltimore, Md.—(b)
6. Beaumont Hospital Medical College, St. Louis, Mo.—(c)
7. Bellevue Hospital Medical College, New York City, N. Y.
8. Bennett College of Eclectic Medicine and Surgery, Chicago, Ill.
9. Berkshire Medical College, Pittsfield, Mass.
10. Boston University School of Medicine, Boston, Mass.
11. Botanico-Medical College of Ohio, Cincinnati, O.
12. Carolinen Medico-Chirurgical Institute, Stockholm, Sweden.—(d)
13. Castleton Medical College, Castleton, Vt.
14. Central Medical College, Indianapolis, Ind.
15. Central Medical College, Syracuse, N. Y.
16. Certificate of Examination of Medical Authorities, Lomsha, Russia.
